Undergraduate Education

To enter the University of California as an undergraduate, you must complete requirements that demonstrate, as accurately as possible, whether you have sufficient intellectual knowledge, skills, and interests to pursue a University degree.

You should begin fulfilling University admission requirements by the ninth grade and may need to continue working on them through the first two years of college. Admission requirements include completion of specific courses with specified minimum grades and achievement of specific scores on nationally administered examinations. While these requirements are somewhat rigorous, consideration is given to special circumstances.

Applying for Admission

The University’s application processing system allows you to apply to as many as eight campuses of the University on one application and select a different major or program for each one. (San Francisco, as the only health sciences campus of the University, is not included in this process.)

A basic application fee of $35 entitles you to be considered at one campus. There is a fee of $20 for each additional campus selected. These fees are subject to change and are not refundable.

You may obtain a University of California Undergraduate Application Packet containing the necessary forms and instructions from California high school or community college counselors or from the Office of Admissions and Records, 120 Sproul Hall, University of California, Berkeley; Berkeley, CA 94720.

Priority Application Filing Periods, Berkeley

Fall semester 1988: File November 1-30, 1987

Note: Dependent upon institutional enrollment needs, some colleges, schools, majors, or class levels may be closed. Generally, the Berkeley campus is not open to lower division transfer applications in either fall or spring. You should inquire just before the beginning of the filing period to determine if your area of interest is open. After the filing period, applications are accepted only until application targets are met.

Competitive Admission at Berkeley

Berkeley is not able to admit all qualified undergraduate applicants. Many undergraduate programs of study attract more qualified applicants than the campus can accommodate each year. Engineering at all levels (including chemical engineering in the College of Chemistry), all majors in the College of Letters and Science and the College of Environmental Design at the freshman level, and business administration at the junior level are current examples of oversubscribed programs. While all applicants who apply to open programs during the priority filing period will be considered, it is inevitable that some will be denied admission to Berkeley. The Berkeley campus’s selection of applications to consider for admission is based primarily upon applicants’ demonstrated high scholarship in preparatory work, which often goes well beyond the minimum eligibility requirements.

Admission as a Freshman

If you have not registered in regular session in any college-level institution since you graduated from high school, you will be applying for admission as a freshman. Minimum subject, scholarship, and examination requirements follow. If you do not meet these requirements or cannot qualify by examination alone (see below), you can only be admitted in advanced standing.

Subject Requirement

At the heart of the admission process is a set of high school courses called the “a to f” requirements. These consist of 15 year-long courses, each of which must be completed with at least a C grade. At least 7 of the 15 units must be earned in courses taken during your last two years of high school. Your grades in the “a to f” required courses are the only grades used in calculating your grade-point average for determining admission. Courses that fulfill the “a to f” requirements must appear on a list that your high school principal has certified meets University requirements. This list is called “Courses to Meet Requirements for Admission to the University of California” and can be obtained from your school counselor. The list may vary slightly in some colleges and schools; see the section “Colleges and Schools,” beginning on page 60.

The “a to f” requirement courses are:

a. History

One year of United States history or one-half year of United States history and one-half year of civics or American government.

b. English

Four years of university preparatory English composition and/or literature; not more than one year will be accepted from the 9th grade.

c. Mathematics

Three years of subjects such as algebra, geometry, trigonometry, calculus, elementary functions, and mathematical analysis. Nonacademic courses such as arithmetic and business mathematics may not be used.

</tbody>
</table>

*Act is scored in intervals of 1 point from a minimum of 1 to 35 maximum.
**SAT is scored in intervals of 10 points from a minimum of 400 to 1600 maximum.
d. Laboratory Science
A year course in one laboratory science, taken in the 10th, 11th, or 12th grade.

e. Foreign Language
Two years of one foreign language with a written literature are acceptable.

f. College Preparatory Electives
Four units in addition to those required in a. through e. to be chosen from at least two of the following subject areas: history, English, advanced mathematics, laboratory science, foreign language, social science, and fine arts. In general, elective courses should involve considerable reading and should aim to develop your analytical and reasoning ability and skill with written and oral exposition.

Scholarship Requirement
If you achieve a grade point of 3.3 in courses listed in "a to f" taken after the ninth grade, you will be eligible to enter the University regardless of your scores on standardized tests. If your grade-point average is below 3.3 but greater than 2.77, you will be eligible for admission to the University if you achieve specified scores on the standardized tests. (See the University of California Freshman Eligibility Index above.) Note, however, that eligibility alone does not guarantee admission; there are more students eligible for admission than there are spaces available.

Grades you received in courses taken in the 9th grade or earlier are not used in determining your scholarship average, although subject requirements (except laboratory science) may be satisfied with grades of C or better in these courses. If you successfully complete more than the minimum units within each required subject, only the best grades are used in calculating your grade-point average. The grades earned in the required third year of mathematics (intermediate algebra) will be used only if they improve your grade-point average. Two of the 4 units in elective courses used to satisfy the "f" requirement must be completed with a grade of C or better, and all 4 units must be accepted by the high school for graduation. The best grades earned in any two of these units taken in grades 10 through 12 will be used in computing your grade-point average for admission. Grades are counted on a semester basis unless a school gives only year grades.

You may repeat courses in which the original grade was D or F. The better grade will be used in determining your scholarship averages. Although there is no limit to the number of repeats that may be used in fulfilling "a to f" requirements, you may repeat a course only once.

If the courses you repeat were originally taken before the ninth grade, they will be treated as if you were taking them for the first time.

The grades earned in up to 4 units (8 semesters) in courses that are (1) certified by your high school as offered at the honors level, and (2) taken in the last two years of high school will be given extra weight in computing your grade-point average for admission. Grades earned in honors courses are counted as follows: A = 5 points, B = 4, and C = 3. To be counted, these grades must have been earned in honors courses in history, English, advanced mathematics, laboratory science, and foreign language. Courses in these subjects that prepare you for the Advanced Placement examinations of the College Board are examples of honors courses.

Examination Requirement
All freshman applicants must submit test scores as described below. If you are applying for admission to the fall term, you should take the tests by November of your senior year. The following tests are required:

1. One aptitude test—either: (a) the Scholastic Aptitude Test—SAT—(the verbal and mathematics scores you submit from this test must be from the same sitting); or (b) the American College Test—ACT—composite score.

2. Three College Entrance Examination Board achievement tests, which must include (a) English Composition, (b) mathematics (level 1 or 2), and (c) any third achievement test (not English composition or mathematics).

High School Proficiency Examination
The University of California will accept the Certificate of Proficiency, awarded by the State Department of Education upon successful completion of the California High School Proficiency Examination, in lieu of the regular high school diploma. However, all other University entrance requirements (subject pattern, grades, tests) must be met. The date of graduation on University records will be the date of the certificate.

Entrance by standardized test scores will remain an option if you are ineligible on the basis of your high school record.

Admission by Examination Alone
If you do not meet the scholarship and subject requirements for admission and have completed fewer than 12 transferable college units since graduation, you can qualify for admission as a freshman by examination alone. (Note: If you have completed transferable college courses, College Entrance Examination Board tests cannot be taken in academic subjects covered in those courses.) To qualify for admission by this method, you must score at least 1100 on the Scholastic Aptitude Test or 26 on the American College Test. Further, your total score on the three achievement tests must be 1650 or higher, with no score less than 500 on an individual achievement test. High school graduation or a certificate of proficiency is required for students who qualify for admission by examination.

Admission of Nonresident Applicants
The admission requirements for nonresidents are stiffer than those for residents; nonresident freshman applicants are required to have a grade-point average in "a to f" subjects of 3.4 instead of 3.3.

Admissions procedures and examination requirements for nonresidents, however, are the same as those for California residents, except that to be admitted by examination alone, nonresident applicants must have the same total score on the Scholastic Aptitude Test of 1100 but a higher total score on the three achievement tests: 1730 or higher, with no score less than 500 on an individual achievement test.

For detailed information on these requirements and on admission by examination alone, consult the publications Information for Prospective Students or the Undergraduate Application Packet, obtainable from California high school or community college counselors or from the Office of Admissions and Records, 120 Sproul Hall.
Admission as a Transfer Student

The requirements for admission in advanced standing vary according to your high school record. The transcript you submit from the last college you attended must show that at minimum you were in good standing and you earned a grade-point average of 2.0 or better. If your grade-point average was below 2.0 at any college you attended, you may have to meet additional requirements to qualify for admission.

Requirements for Residents

If you completed all the “a to f” subjects and met the Eligibility Index, you may be eligible for admission any time after you have established an overall college grade-point average of 2.0 or better.

If you have completed fewer than 12 quarter or semester units of transferable college credit since high school graduation, you must also satisfy the examination requirement for freshmen.

If you meet the Eligibility Index but you have not studied one or more of the “a to f” courses in high school, you may be admitted after you have: (a) established an overall grade-point average of 2.0 or better in another college or university; and (b) completed, with a grade of C or better, appropriate college courses in the high school subjects that you lacked; and (c) either completed 12 or more quarter or semester units of transferable work or met the examination requirement.

If you did not meet the Eligibility Index or did not meet the Eligibility Index and lacked required subjects, you may be admitted after you have: (a) established an overall grade-point average of 2.0 or better in another college or university; and (b) completed 56 semester (84 quarter) units of college credit in courses accepted by the University for transfer credit.

If you are a nonresident applicant who graduated from high school with less than a 3.4 grade-point average in the “a to f” subjects required for freshman admission, you must have completed at least 56 semester (84 quarter) units of transferable work with a grade-point average of 2.8 or better. In addition, if you lacked any of the required subjects in high school, you must complete appropriate college courses as outlined under “Requirements for Residents” above.

Intercampus Transfers

If you are registered on any campus of the University or were previously registered in a regular session of the University, you may apply for transfer to another campus of the University by filing the undergraduate application. Filing dates and application fees are the same as those listed for new applicants.

Additional Requirements

For additional requirements for admission in advanced standing, see the announcement of the individual college or school to which you seek admission.

Admission of International Applicants

If you are applying from another country, you should request further information about admission to the University, visas, special examinations, fees and expenses, housing, and travel. Direct your inquiries to the Office of Admissions and Records, 120 Sproul Hall, or call 642-0734.

Readmission

If you formally withdraw from Berkeley, were absent for one or more semesters, or are returning to Berkeley in the Limited Status or Second Bachelor’s programs, you must file an Undergraduate Application for Readmission. Application deadlines are April 15 for full admission and August 15 for spring admission. Applications must be accompanied by a $35 readmission fee. If you attended other colleges or universities while you were away from Berkeley, you must send an official transcript to Berkeley immediately. Address correspondence to the Office of Admissions and Records, 120 Sproul Hall, or call 642-0734.

Special Admission Circumstances

Admission by Exception

A limited number of students who have not met the regular requirements for admission but can offer evidence of their potential to succeed at the University may be considered for admission by exception. Further information may be obtained from the Office of Admissions and Records.

Educational Opportunity Program (EOP)

Students from minority and low-income backgrounds who may not meet the regular admission requirements are given a chance to apply to the University through the Educational Opportunity Program (EOP). Prospective EOP students must show a potential to benefit from higher education. Financial aid counseling, tutoring, and housing aid are available under the program.

To be considered for the EOP, you must fill out the section of the undergraduate application that is designated for those interested in the EOP.

Limited Status

If you already have a bachelor’s degree or have completed a substantial amount of college work with a superior scholastic average, you may take certain courses toward a definite and limited objective. You will be considered only if you are an applicant of unusual merit. You must normally have a personal interview with an admissions officer who will determine from your record your needs, plans, and conditions of admission, subject to approval from the dean of your college or school.
Registration and Enrollment in Classes

The Advance Class Enrollment System

Berkeley's computerized Advance Class Enrollment (ACE) system enables you to request classes and receive a class schedule well before each semester begins. The system is designed to increase the probability that spaces will be available for all students wishing to take a particular course. For courses that are limited in enrollment, ACE will ensure that students who meet the specific priority requirements are scheduled first.

To register and enroll, follow these steps:

1. **Obtain Your Registration Packet**
   - **New students (including transfer students):** You will be mailed your registration packet after you return your Statement of Intention to Register, Statement of Legal Residence, and the $50 deposit.*
   - **Readmitted students:** You will be mailed your registration packet after receiving approval of your readmission.*
   - **Continuing students:** You must obtain your registration packet in person at locations indicated on campus bulletin board placards during the Advance Enrollment period (see the Academic Calendar at the front of this catalog).

2. **Select Classes and Submit Your Schedule Request Form**
   - With the Schedule of Classes and the General Catalog, you can determine a class schedule. You are encouraged to contact a college, school, or major adviser to help you choose classes and formulate a schedule tailored to your particular academic interests. Once you have selected your classes, you must complete and submit your Schedule Request Form by the appropriate ACE deadline.

3. **Pay Registration Fees**
   - You must pay the fees indicated on your billing statement by the ACE fee payment deadline. You may pay your fees in full or in three installments on the Deferred Payment Plan. You will not be scheduled in classes if you do not pay fees by the deadline.

4. **Receive Your Confirmed Class Schedule**
   - If you submitted your Schedule Request Form and paid your registration fees by the ACE deadline, a Confirmed Class Schedule will be produced for you shortly before the beginning of the semester. You may have your schedule mailed to your local or permanent address or have it held for pickup at the Office of Admissions and Records.

*Note: Packets are mailed only to addresses within the United States and Canada. If you live outside these areas, you must enroll and register during In-Person Registration at the beginning of the semester.

You are responsible for all classes into which you have been scheduled. To make any changes, you must file a Petition to Add/Drop Courses and/or a Petition to Change Grading Option on or after the first day of instruction.

In-Person Registration

If you fail to submit your Schedule Request Form and/or pay your registration fees by the ACE deadlines, you will have another opportunity to do so at In-Person Registration at the beginning of the semester. However, you will be limited to requesting classes that are still open after the scheduling of students who enrolled through ACE. Continuing students will be liable for a $50 late registration fee and/or a $50 late enrollment fee. Confirmed Class Schedules will be available on the first day of instruction.

Undergraduate Majors and Degrees

How to Choose a Major

The decision on the choice of a major is a very important one and should be made on the basis of your interests and abilities as well as your career goals. You should look carefully into the programs available by using this catalog and by visiting departments in which you are interested. Your adviser can help you explore the possibilities of interdisciplinary majors, which you take by declaring a group major or field major.

If the major you are interested in is offered in more than one college or division, your adviser can help you choose the one that best suits your academic goals.

You are strongly urged to declare your major as soon as possible and should begin thinking about possible majors in your first year at Berkeley. Some majors require a full four years to complete; most majors require that some or all the lower division major requirements be completed before you may be accepted into the major. Since you are expected to be accepted into a major by the time you have completed 60 units, these lower division major requirements should be planned into your program for the first two...
Myths and Facts About Majors and Careers

Myths about the relationship between your major and career goals abound. When you choose a major, you should have no misconceptions about the undergraduate preparation you will need to pursue your goals. Several popular myths about majors and careers are debunked below.

**Myth:** When you choose a college major you are choosing a career.

**Fact:** A study conducted by the College Placement Council found that the majority of college graduates are successfully employed in fields not directly related to their academic majors. A few majors such as engineering, computer science, and accounting prepare students for fairly specific career fields, but most majors, especially in the liberal arts, give graduates a wide range of career options.

**Myth:** You should choose a career that is in high demand.

**Fact:** The job market moves in cycles. The career that is in high demand now may be glutted by the time you finish college—either because so many people have already entered that field or because economic patterns have changed. New fields are also constantly opening up. So it is better to choose a major and career that genuinely interest you.

**Myth:** Liberal arts majors are not employable.

**Fact:** Liberal arts majors develop skills that are highly valued by employers and that are applicable to a wide variety of professional jobs. If these graduates sometimes take longer to find a niche in the working world, it is because they have not defined their goals or are unaware of their options.

**Myth:** You must pursue certain specific undergraduate majors to gain admission to postgraduate professional schools in fields such as business, law, or medicine.

**Fact:** While some postgraduate professional schools require or recommend certain academic prerequisites, in most cases they do not require a specific major. In other instances they may be looking for the development of certain broad skills, such as the ability to read and write critically. In short, you may major in a wide variety of academic fields; there is no “pre-med,” “pre-law,” or “pre-business” major that will help you get into graduate school.

**Myth:** You cannot do much beyond working hard at classes in your major to improve your chances of career success.

**Fact:** Courses outside your major and independent study projects are important, too. You will gain valuable experience by participating in extracurricular activities such as student organizations, sports, social groups, and student government. In addition, internships, summer jobs, and volunteer activities will help you define your interests, develop skills, strengthen your resume, and establish professional contacts in the working world.

**Myth:** Your first job will determine your career. Therefore you ought to be completely sure of your choice when you make an academic or career decision.

**Fact:** You cannot be entirely sure of any decision. Each career has its advantages and disadvantages; any choice involves some risk. Do not think that you cannot change your mind. According to the Bureau of Labor Statistics, the average person changes careers three times in a lifetime—and even within a specific field, you are usually free to explore new directions.

Declaration and Change of Major

Regulations and procedures for declaring the major vary for each college. You may, at any time up to the last semester of residence, file a petition for a change of major. You must secure approval for this action from the dean or other authorized person in the college or department to which you are transferring.

Preparation for Graduate Study

If you are preparing for study toward a higher degree, you should learn, as early as possible, the entrance and degree requirements of your graduate field, in order to include all prerequisite steps in your undergraduate program.

Undergraduate Degrees

- Afro-American Studies, A.B.
- Ancient Near Eastern History and Archaeology, A.B.
- Anthropology, A.B.
- Architecture, A.B.
- Art (History of), A.B.
- Art (Practice of), A.B.
- Asian Studies, A.B.
- Asian-American Studies, A.B.
- Astronomy, A.B.
- Biochemistry, A.B.
- Bioengineering, B.S.
- Biological Sciences, A.B.
- Biophysics, A.B.
- Biophysics: Medical Physics Option, A.B.
- Bioresource Sciences, B.S.
- Botany, A.B.
- Business Administration, B.S.
- Chemical Engineering, B.S.
- Chemistry, A.B. or B.S.
- Chicano Studies, A.B.
- Civil Engineering, B.S.
- Classical Civilization, A.B.
- Classical Languages, A.B.

- Computer Science, A.B. or B.S.
- Conservation and Resource Studies, B.S.
- Development Studies, A.B.
- Dramatic Art, A.B.
- Dramatic Art—Dance, A.B.
- Dutch Studies, A.B.
- Earth Science, A.B.
- Economics, A.B.
- Electrical Engineering and Computer Sciences, B.S.
- Engineering, Seven Double Major Programs, B.S.
- Engineering Geoscience, B.S.
Minors

Minors are offered at Berkeley in many departments and groups in the College of Letters and Science (Afro-American Studies, Art, Asian Studies, English, Ethnic Studies, Geography, Music, Near Eastern Studies, Slavic Languages and Literatures, South and Southeast Asian Studies, Women's Studies, and many foreign language departments) and in the College of Environmental Design. For more detailed information and lists of the minors available, see the section “Colleges and Schools,” beginning on page 60.

Undergraduate Degree Requirements

As soon as you have been accepted for admission to Berkeley, you should learn the requirements you will have to fulfill to earn your bachelor's degree. These requirements are prescribed by three sources: the University, your college or school, and your department. All are summarized below. For more information, please visit the Office of Admissions and Records, Student Service Area, 128 Sproul Hall.

University Requirements

The University sets two general requirements for the baccalaureate degree: Subject A and American History and Institutions.

Subject A Requirement

All University departments assume that you are proficient in reading and writing English and understand how to compose an essay on an academic topic. If you have not demonstrated proficiency upon entrance to the University, you must enroll in Subject A1, “Introduction to Language,” or in a related course (see “Courses for Non-native Speakers” below) during your first semester of residence.

If you have not fulfilled the requirement after two semesters, you may not be eligible to enroll in the University for a third semester.

The Office of Admissions and Records accepts the following in fulfillment of the Subject A requirement (the examinations cited in 1-4 below must be taken before you enter the University):

1. A score of 600 or above on the English Composition Test of the College Entrance Examination Board (CEEB).

Minors

Minors are offered at Berkeley in many departments and groups in the College of Letters and Science (Afro-American Studies, Art, Asian Studies, English, Ethnic Studies, Geography, Music, Near Eastern Studies, Slavic Languages and Literatures, South and Southeast Asian Studies, Women's Studies, and many foreign language departments) and in the College of Environmental Design. For more detailed information and lists of the minors available, see the section “Colleges and Schools,” beginning on page 60.

Undergraduate Degree Requirements

As soon as you have been accepted for admission to Berkeley, you should learn the requirements you will have to fulfill to earn your bachelor's degree. These requirements are prescribed by three sources: the University, your college or school, and your department. All are summarized below. For more information, please visit the Office of Admissions and Records, Student Service Area, 128 Sproul Hall.

University Requirements

The University sets two general requirements for the baccalaureate degree: Subject A and American History and Institutions.

1. A score of 600 or above on the English Composition Test of the College Entrance Examination Board (CEEB).
Planning Your Program/College of Letters and Science

You will note in the selection of sample programs below that there are several ways to fulfill college requirements such as the reading and composition requirement. If you plan to take a mathematics course, please read with great care Choosing Your First Math Course at UCB, available in the college advising office. As you look through the courses in this catalog, you will learn that some courses must be taken in a specific sequence while many others may be taken in random order. The courses taken in your first year should be selected for a variety of reasons, including the following:

1. General interest
2. Fulfillment of degree requirements listed in the Announcement of the College of Letters and Science
3. Prerequisites (or lower division) requirements for the major or majors you wish to consider. Most major departments will not accept you into the major until the lower division requirements for that major are completed. These prerequisites are listed in the “Courses and Curricula” section of this catalog for all majors in the College of Letters and Science.

Sample Programs for First-Year Students

Both the American History and the American Institutions requirements may be satisfied in the following ways:

1. By fulfilling the "a" subject requirement for admission (one year of U.S. history or one-half year of U.S. history and one-half year of U.S. government in high school with a grade of C or better).

2. By taking one quarter or semester of basic U.S. history or U.S. government at a college or university before entering Berkeley. Inquiries about specific courses should be directed to the Office of Admissions and Records, 120 Sproul Hall.

3. By passing the high school Advanced Placement American History exam with a score of 3 or better.

4. By passing the College Board Achievement Test in U.S. history with a score of 500 or better.

5. For students transferring from another UC campus: by taking any course or courses that satisfy the AH&I requirements of that campus.

Students who have not satisfied the AH&I requirements before entering Berkeley may satisfy them in the following ways:

1. By taking the American History and/or American Institutions exams (see Section II, 4 below).

2. By petitioning the AH&I Office (in 29 Sproul Hall, before the semester in which you will graduate). Foreign students intending to remain in the U.S. must fulfill the AH&I requirements.

Attention foreign students: The AH&I requirements will be waived if you have at least 901/2 semester units (senior status), hold a current, nonimmigrant visa (F is the most common), and an I-94 departure record. You should present your visa and I-94 record to the Office of Records, 128 Sproul Hall, before the semester in which you will graduate. Foreign students intending to remain in the U.S. must fulfill the AH&I requirements.
well-rounded curriculum; (4) the credit requirement, which is the total number of units to be completed, with specifications of how these credits are to be distributed; and (5) a minimum scholarship requirement. For detailed information you should obtain a copy of the announcement of your college or school.

Reading and Composition Requirement
The Berkeley campus is strongly committed to developing high levels of ability in critical thinking and communication among its undergraduates. Hundreds of courses require long papers and nearly 50 courses provide training in writing or speaking. In addition to the Universitywide Subject A requirement, the College of Letters and Science and most other colleges and schools require two semesters of lower division work in composition. Ten departments and programs regularly offer courses that satisfy the reading and composition requirement: Afro-American Studies, Asian American Studies, Chicano Studies, Comparative Literature, Division of Special Programs, Dramatic Art, English, Native American Studies, Rhetoric, and South and Southeast Asian Studies. Since each course has a slightly different focus, you should contact the individual departments for details and consult your college or school for the particular courses that satisfy its requirements.

Minimum Scholarship Requirement
If you fail to maintain the minimum grade-point average prescribed by your college or school, you will normally be dismissed or put on probation. Since scholarship rules are applied only at the close of regular sessions, grade points that you earn in a University of California summer session or by removing an Incomplete grade are not taken into consideration until the close of your next semester of attendance.

Residence Requirement
After you have completed 90 units toward the bachelor's degree, you must complete at least 24 of the remaining units in residence in no fewer than two semesters in the college or school of the University in which you will take your degree. You must begin these final 24 units in the semester in which you exceed 90 units. You should consult the announcement of your college or school for details concerning the senior residence requirement as it pertains to the summer session.

Departmental Requirements
Every student must select a field of concentration and pursue a major or curriculum, normally by taking a minimum number of units in one department or school. Occasionally—as with business administration, optometry, and others—the school and the department are synonymous. In some cases a major may embrace more than one department, as with the humanities field major in the College of Letters and Science.

Major Requirements
Major requirements that must be fulfilled before you may receive a baccalaureate degree are outlined in each department in the "Courses and Curricula" section of this catalog. See also your department adviser.

Declaration of Candidacy
If you know at the beginning of a semester that you will have fulfilled graduation requirements by the end of the semester, you must fill in the appropriate bubble on the back of your Schedule Request Form at the beginning of the semester. The period for declaring candidacy ends with the third week of classes. However, declarations filed during the third week are subject to a $3 late fee. If for any reason you do not meet the requirements for graduation after declaring your candidacy, you must file a new declaration in the filing period for the subsequent semester in which the degree will be awarded.

If you are a nonregistered student at the time you are ready to declare your candidacy, you must go in person to 128 Sproul Hall to fill out the form "Candidate for Bachelor's Degree for a Nonregistered Student." The filing deadline is the end of the third week of classes.

General Rules and Academic Policies
See also the section "Academic Policies," beginning on page 53.

Academic Probation
Regulations and procedures governing academic probation vary with each college and school. For specific details, consult your college or school announcement. Students on probation are not entitled to take courses with a passed/not passed option.

Academic Dismissal
Regulations and procedures governing academic dismissal vary with each college and school. For specific details, consult your college or school announcement.

If you are dismissed, you may appeal for a hearing by formal petition to the dean of your college or school, but the action of dismissal is normally considered final. If you are dismissed and want to transfer to another college or school at Berkeley, you may petition the dean of that college or school.

Minimum Progress
For undergraduates, normal progress toward a degree requires 30 units of successfully completed course work each year. If you fail to achieve minimum academic progress, you may continue to be enrolled only with the approval of the dean of your college or school. To achieve minimum academic progress, you must have successfully completed a number of units no fewer than 15 times the number of semesters, less one, in which you have been enrolled on the Berkeley campus. Summer Session is not counted as a semester. A 15-unit study list is considered a normal course load; a study list of fewer than 13 units must be authorized by the dean of your college or school.

Progress Toward a Degree
At the close of each semester, the courses, units, grades, and grade points earned are added onto your cumulative University record. From this record, you may determine your progress toward a degree.

In working for a degree, you should keep in mind the various levels on which you must satisfy requirements—University, college, school, and department—as well as the kinds of requirements you must fulfill:
course, unit, grade point, and amount of upper division work. You may receive additional counsel in these matters from your adviser.

Academic Opportunities

Exchange Program with Hayward, Mills, and Sonoma

Berkeley has an exchange program with California State University, Hayward; Mills College, Oakland; and California State University, Sonoma. With the approval of your adviser and the dean of your school or college, you may register and pay applicable fees at Berkeley and be exempt from tuition and fees at the host campus. You may enroll for only one course per semester at the host campus.

Studying Abroad

While progressing toward your bachelor's degree, you have a number of opportunities to earn University of California credit while studying abroad. The Universitywide Education Abroad Program has study centers at the following universities:

Africa
- Fourn Bay College, Freetown, Sierra Leone University College, Nairobi, Kenya University of Benin, Lome, Togo (summer program)

Asia
- Beijing University, People's Republic of China Chinese University of Hong Kong International Christian University and Sophia University, Tokyo, Japan Nanjing University, People's Republic of China National Chengchi University, Taipei, Taiwan University of Delhi, India Yonsei University, Seoul, Korea

Australia
- Australian National University, Canberra La Trobe University, Melbourne Macquarie University, near Sydney

Europe
- University of Vienna, Austria Universities in France: Bordeaux, Grenoble, Lyon, Marseilles, Montpellier, Paris (Film, Literature), Pau-Paris, Poitiers
- Georg-August University, Goettingen, Germany
- Karl Marx University, Budapest, Hungary University of Dublin, Trinity College, Ireland (a part of the United Kingdom and Ireland program)

Middle East
- Universities in Israel: Haifa, Jerusalem (Hebrew University) American University of Cairo, Egypt

South America
- University of Sao Paulo, Brazil Pontifical Catholic University of Peru, Lima, Peru

Requirements for participation are a grade-point average of 3.0, upper division standing, and sufficient language preparation. University scholarships, loans, and grants may be used to finance the year abroad.

Berkeley also participates in several inter-collegiate consortia for advanced language studies: Rome Classics Program (requiring Latin fluency), Japanese language study in Tokyo, Mandarin Chinese study in Taipei, and Arabic study in Cairo.

Teaching, Research, and Internships

Berkeley offers many opportunities for you to gain practical teaching experience, conduct research projects, and engage in internships either as volunteers or paid employees.

Teaching

Over 2000 students participate every year in more than 100 programs that provide you with the opportunity to develop and refine teaching or tutoring skills. You may work with local schools, help other undergraduates through various departmental tutoring programs, or guide visitors around the campus, and receive academic credit or financial compensation for your work. A listing entitled "Opportunities for Undergraduates to Teach," available at Moffitt Undergraduate Library, describes these programs and how you might participate.

Research

In classes in a wide range of disciplines, students work independently or as part of a team on projects ranging from writing preliminary research designs to carrying out sophisticated research projects. Past projects have included working on archaeological digs, collecting and recording family folklore, cataloging museum collections, determining the mechanism for habitat selection of garden snails, assessing the effect of media coverage of the Viet Nam war on public sentiment, and collecting information from scholars, managers, and workers in Yugoslavia on management in Yugoslavian firms. For more information consult your adviser.

Internships

A wide variety of internships—loosely defined as structured field experience—is available to you on and off campus. The positions may be paid or unpaid, may or may not carry academic credit, and may have either educational or career value. Courses with field components occur principally in the 197, 198, and 199 series. Check the course listings in the catalog for specific information. The following offices have listings of numerous internships, both on and off campus: SCOPE Cooperative Education Internship Program, College of Engineering Cooperative Education Program, Career...
Planning and Placement Center in 111 Wheeler Hall, Work Study Program, and Community Projects Office. Many individual internship programs in education, counseling, government, news media, museums, and other private and public organizations are available through campus-based offices. For detailed information about these programs, consult *The Internship Directory* at the Career Planning and Placement Center, Building T-6, or call 642-1716 (deaf and hearing-impaired (TDD), 642-5373).

Cooperative Education Program

The Cooperative Education Program is an opportunity for undergraduate and graduate students to integrate classroom study with supervised practical and professional experience in the field. You may work with government, industry, business, or nonprofit organizations in positions related to your academic and/or career objectives before graduation. These positions may be paid or non-paid, full- or part-time, and may last for one semester or as long as two years, depending upon the type of experience you want.

Two offices constitute the campus-wide cooperative education program: SCOPE (Survey of Career Options and Professions Through Exploration) and the Engineering Cooperative Education Program. Each program office has separate application procedures and requirements. If interested, you should contact the appropriate program for specific information.

SCOPE Cooperative Education Program

Liberal arts, sciences, natural resources, environmental design, and business administration majors may apply through this office. Positions are varied in nature: paid or non-paid, full- or part-time, lasting for one semester or as long as two years. For general requirements, contact the SCOPE Office, Career Planning and Placement Center, upper level, Building T-6, 642-1532.

Engineering Cooperative Education Program

All engineering, computer science, and chemical engineering majors may apply through this office. Positions offered are full-time, paid, for a minimum of one semester. For general requirements, contact the Engineering Co-op Office, 209 McLaughlin Hall, 642-6385.

Division of Freshman and Sophomore Studies

Berkeley offers a wide variety of courses especially designed for lower division students. These courses are usually seminars that are limited in size to 20 students. Most are discussion and writing seminars, and all provide opportunities for individual expression and intellectual exploration. Course descriptions are posted at the Division of Freshman and Sophomore Studies, 237 Campbell Hall, 642-8363.

Honors Courses

Berkeley offers some honors courses for highly qualified students, usually in their senior year. A very small number of these courses is available to lower division students. See your major adviser for information.

Individual Majors

If you have interests that fall outside traditional disciplines, you may design your own major to satisfy your individual academic goals. See an adviser for assistance and more information.

Advising and Academic Assistance

College and Department Advisers

The College of Letters and Science has a staff of professional advisers who will help you plan your course of study, fulfill requirements, and eventually choose a major. After you have chosen a major, you will be assigned to an adviser who is a faculty member in your major department. Outside the College of Letters and Science, your adviser will most likely be a faculty member.

Student Learning Center

The Student Learning Center, located in Building T-8, 642-7332, offers assistance and noncredit courses in reading, writing, and study skills and preparation for examinations. Priority is given to Affirmative Action and Educational Opportunity Program students, but everyone is welcome.

Academic Excellence

Semester Honors

To be eligible for semester honors, you must have completed a minimum of 12 units undertaken for letter grades at Berkeley and have the minimum grade-point average required by your school or college. Schools and colleges may establish additional criteria that you must also meet.

Honors at Graduation

To be eligible for honors in general scholarship at graduation, you must have completed a minimum of 50 semester units at the University of California, of which a minimum of 43 units must be undertaken for a letter grade; completed a minimum of 30 units at Berkeley; and achieved a grade-point average that ranks you in your school or college in the top 3 percent for highest honors, the next 7 percent for high honors, and the next 10 percent for honors. These criteria are minimal; consult your college or school office.

Honor Societies

Berkeley has a number of honors societies that elect students in recognition of academic excellence. Among these are Phi Beta Kappa, a national honor society; the Pytanean Society, founded in 1900 to honor upper division and graduate women for academic accomplishment and service to the University; the Honors Students Society; Tau Beta Pi, the national honor society for engineering disciplines and various other engineering honors societies (see the *Student Guide to Engineering Societies*, available at the Engineers Joint Council office); Alpha Mu Gamma, a national society for students with demonstrated excellence in languages; and individual societies in most language departments. See your adviser for more information.

Prizes

Awards for outstanding ability in some area of creative, scholarly, or athletic achievement are available at Berkeley in two general categories: competitive prizes for creative effort or departmental awards for outstanding scholastic achievement. Consult the Committee on Prizes, 642-3498, for more information.
Graduate Education

The main purpose of graduate study is to inspire independence and originality of thought in the pursuit of knowledge. As a graduate student you are expected to achieve mastery of your chosen field through advanced course work, independent study, and research.

Graduate education embraces study for all degrees and certificates beyond the bachelor’s degree—principally the master's and doctoral degrees. Graduate degrees fall into two broad categories: (1) Professional—degrees awarded by each professional college and school in recognition of a student’s command of a comprehensive body of professional knowledge and the ability to organize and carry out investigation of significant problems in the field. (2) Academic—degrees awarded by the academic departments and some professional schools in recognition of a student’s command of a wide range of related subjects within an academic field, preparation in one or more foreign languages, and ability to pursue original research leading to a significant contribution to a field of study.

These graduate degree programs have been approved by the Graduate Council and the Coordinating Committee on Graduate Affairs, which must approve any new programs. A list of graduate degrees appears later in this section. For complete information on regulations and procedures for graduate students, see the section “Academic Policies,” beginning on page 53.

The Nature of Graduate Education

Graduate study is the pursuit of knowledge through advanced course work and research. Graduate courses demand a capacity for critical analysis and a specialization of research interests not normally appropriate for an undergraduate major. These courses may be conducted in a number of ways: (1) as advanced lecture courses; (2) as seminars in which faculty and students present critical studies of selected problems within the subject field; (3) as independent study or reading courses; or (4) as research projects conducted under faculty supervision.

You are accorded considerable liberty in your choice of courses, at the discretion of your graduate adviser, as long as you meet the minimum requirements for academic residence.

Possession of a bachelor’s degree does not in itself entitle you to enroll in a graduate course. These courses assume adequate preparation at the upper division level in the subject field (a minimum of 12 units of upper division work basic to the subject matter of the graduate course; this basic work may be pursued in more than one department). You are therefore encouraged to take upper division courses that will give you the background you need for advanced work; you are not confined to graduate courses.

Graduate courses completed before you attain your bachelor’s degree are not acceptable for unit credit toward an advanced degree. Courses in the 300 and 400 series, which are professional in nature, are not acceptable for unit credit as part of the program for an academic degree. These courses may, however, satisfy certain requirements, such as teaching, research, or technical work, in particular academic programs.

You will also have an individual or major adviser, usually assigned after you advance to candidacy for the doctorate, but frequently appointed in the earlier stages of your training. The individual or major advisers may or may not be the same as the official graduate advisers. You should keep in close touch with your individual adviser and should confer with your official graduate adviser at the beginning of each semester to obtain approval of your program of study (by signature on the Schedule Request Form).

Graduate Admissions

Applying for Admission

You must file a completed application for admission, as well as all additional documents specified on the application form (including transcripts from each college-level institution you previously attended) and an application fee of $35, with the Graduate Admissions/Fellowship Office or the department to which you are applying by the established deadlines. Follow the instructions in the application packet, which you should request from the department of your choice.

Many departments have earlier final application dates than the Graduate Division, both for admission and financial assistance, and many departments also admit students only for the fall semester. Information on special departmental deadlines and requirements is contained in the application packet.

The final dates of the Graduate Division for acceptance of applications for admission for the 1987-88 academic year are: fall semester, February 10; and spring semester, September 1. The School of Law admits only for the fall semester; the deadline is February 1.

Limited Enrollment

Each graduate program at Berkeley has a maximum enrollment, which limits the number of applicants who may be accepted. Almost invariably, this maximum is smaller than the number of applicants who meet the minimum qualifications for admission. Selection procedures are designed to admit applicants in accordance with their relative merit and promise among those at least minimally qualified. It is to your advantage to inquire early about the possibility of study at Berkeley.
Admissions Requirements

The University requires the following academic qualifications: (1) a degree from an accredited institution, comparable to the bachelor's degree offered at Berkeley; (2) sufficient undergraduate training to undertake graduate study in the chosen field; and (3) a satisfactory scholastic average.

In addition to the general University requirements, certain schools or departments may require additional records, such as separate applications, reading lists, examples of original work, or the results of qualifying examinations. Information on undergraduate requirements for a major field and on graduate programs and requirements is available in the school or departmental announcements and bulletins and in the "Courses and Curricula" section of this catalog.

Graduate Record Examination

Applicants for graduate admission (with certain exceptions listed below) are required to take the general test of the Graduate Record Examination and to have their scores on this examination reported by the Educational Testing Service. Although current test scores are preferred, reports up to five years old—but not older—will be accepted.

If you are applying to the UCB-UCSF Joint Medical Program, you must take the MCAT (Medical College Admission Test).

If you are applying to the School of Business Administration, you must take the Graduate Management Admission Test (GMAT) in place of the Graduate Record Examination.

If you are applying to the School of Law for the J.D. degree, you must take the Law School Admission Test (LSAT) rather than the GRE.

Teaching Credential applicants (Multiple and Single Subject only) are not required to take the GRE. However, applicants for the M.A.T. degree must fulfill the GRE requirement.

You should make arrangements directly with Educational Testing Service to take the GRE at least three weeks before the desired test date (six weeks, if registering to take the examination outside the United States).

You may obtain applications for the GRE examination and GMAT examination from the Educational Testing Service, Box 955, Princeton, NJ 08540, or from its western office at 1947 Center Street, Berkeley, CA 94707 (after June 1987, P.O. Box 23470, Oakland, CA 94623-0470).

If you are a domestic candidate from a family with an extremely low income, you may qualify for a waiver of GRE test fees. Consult your undergraduate financial aid office to determine whether your institution participates in the GRE Fee Waiver Program and whether you qualify. Fee waivers are not available directly from the Educational Testing Service.

International Applicants

Applicants who come from a country in which the official language is English or who have studied for one year or more in schools or universities in which English is the language of instruction must take the general test of the Graduate Record Examination. In general, others applying from countries outside the United States need not submit GRE scores unless their major departments so require. A list of departments or groups that require the GRE of all their applicants is included in the application packet.

International applicants must fulfill all previously stated admissions requirements and have an excellent command of English before beginning graduate study at Berkeley. Since no one can be admitted to graduate standing to learn English, if you are applying from a country in which English is not the official language you must take the Test of English as a Foreign Language (TOEFL) and have the results sent directly to the Graduate Admissions/Fellowship Office. The test is administered six times a year, and you should register as soon as possible by writing either the TOEFL agent in your home country or TOEFL, CN 6155, Princeton, NJ 08541-6155. The results of institutional administrations of the TOEFL are not acceptable in lieu of the international or special center administrations. If you took the test more than two years ago, you must take it again.

Special Circumstances

Readmission

If you have withdrawn and want to re-enroll, you must file an Application for Readmission, obtainable from the Petitions Desk, Graduate Division, 1 California Hall, and pay a nontransferable, nonrefundable readmission fee of $35. This fee must accompany the Application for Readmission when first submitted or the application will not be reviewed. Approval of readmission is not automatic. The Graduate Division and your school, group, or department will review your petition and academic record and notify you of their decision.

Duplication of Higher Degrees

Normally, duplication of degrees is not permitted. You may petition the dean of the Graduate Division for an exception to this policy if the degree you want is in a field of study distinctly different from the field in which you attained your original degree. A professional degree is not regarded as duplication of an academic degree.

On the recommendation of the graduate adviser and with the approval of the dean of the Graduate Division, you may, however, be permitted to earn a second master's degree in the same subject as that of the first master's (or in a closely allied subject), if you are enrolled in a doctoral program at Berkeley in that subject (or allied subject), and if that particular doctoral program requires a master's degree from Berkeley.

Reactivation of Application

The Graduate Division keeps application materials on file for two years. If you filed an application within the past two years but did not complete the application process, were denied admission, or were admitted but did not register, you may reactivate your previous file by submitting a new application form by the established deadline for the semester in question.

The first reactivation is free. Thereafter, a $35 fee is required. A request for reconsideration in another major field for the same semester does not constitute a reactivation of application.

Notification of Action on Admission

A written notice from the dean of the Graduate Division is valid proof of admission. Admission to graduate study is limited by the number of places available in the various colleges, schools, and departments of Berkeley. If you have applied for admission
and fellowship consideration, you will be notified on or about March 1 of the action on your applications. If you have applied for admission only, you will be advised as soon as possible after a decision has been reached. Normally, however, acceptance letters for admission only will not be issued until after March for the fall semester.

Registration and Enrollment in Classes

Advance Class Enrollment

Berkeley's computerized Advance Class Enrollment (ACE) system enables you to request classes and receive a class schedule well before each semester begins. The system is designed to increase the probability that spaces will be available for all students wishing to take a particular course. For courses with limited enrollment, ACE will ensure that students who meet the courses’ specific priorities are scheduled first.

To register and enroll, follow these steps:

Obtain Your Registration Packet

New students: See “Special Information for New Graduate Students” below.

Readmitted students: You will be mailed your registration packet after receiving approval of your readmission.*

Continuing students: You must obtain your registration packet in person at locations indicated on campus bulletin board placards during the Advance Enrollment period (see the Academic Calendar at the front of this catalog).

Your registration packet will contain a Schedule Request Form for requesting classes and a billing statement for paying your registration fees. If you will be a readmitted student, you will also receive a Schedule of Classes that lists the meeting times and locations of all courses to be given at Berkeley for the term. New and continuing students must purchase one from the ASUC Bookstore or from other local bookstores.

Select Classes and Submit Your Schedule Request Form

With the Schedule of Classes and the General Catalog, you can determine a class schedule. Once you have selected your classes, you must complete and submit your Schedule Request Form, with the approval of your major adviser, by the appropriate ACE deadline.

Pay Registration Fees

You must pay the fees indicated on your billing statement by the ACE fee payment deadline. You must pay your fees in full or in three installments on the Deferred Payment Plan. You will not be scheduled in classes if you do not pay fees by the deadline.

Obtain Your Confirmed Class Schedule

If you submitted your Schedule Request Form and paid your registration fees by the ACE deadlines, a Confirmed Class Schedule will be produced for you shortly before the beginning of the semester. You must obtain your schedule in person from your major department office.

You are responsible for all classes into which you have been scheduled. To make any changes, you must file a Petition to Add/ Drop Courses and/or a Petition to Change Grading Option on or after the first day of instruction.

In-Person Registration

If you fail to submit your Schedule Request Form and/or pay your registration fees by the ACE deadlines, you will have another opportunity to do so at In-Person Registration at the beginning of the semester. However, you will be limited to requesting classes that are still open after the scheduling of students who enrolled through ACE.

Continuing students will be liable for a $50 late registration fee and/or a $50 late enrollment fee. Your Confirmed Class Schedule will be available at your major department office on the first day of instruction.

*Note: Packets are mailed only to addresses within the United States and Canada. If you live outside these areas, you must enroll and register during In-Person Registration at the beginning of the semester.

Statement of Firm Intent to Register

The admission notice to new (including reactivating) graduate students contains a Statement of Firm Intent to Register that must be filled out and returned to the Graduate Admissions/Fellowship Office by the date indicated in the notice. Only the return of the form to the Graduate Admissions/Fellowship Office indicating a firm intent to register will reserve the registration slot allocated to you. If you want to retain a record of the return of your Statement of Firm Intent to Register, you should send it by certified or registered mail. If you do not want to accept the offer of admission, you should return the Notification of Declination of Admission so that your place can be allocated to another applicant.

Failure to Register

If you do not return the Statement of Firm Intent to Register or return it but do not register for the semester in which you were admitted, you must request reactivation of your application if you want to attend any subsequent semester. You have no priority over other applicants for any subsequent semester by virtue of your previous admission.

Registration

To maintain good standing as a graduate student, you must register with the Office of Admissions and Records each semester until you complete all requirements for the degree, unless you have permission from the dean of the Graduate Division to withdraw. Failure to register or to obtain formal permission to leave the University will constitute withdrawal from the Graduate Division, and you will be denied readmission. You may satisfy the requirement for full-time continuous registration by attending both semesters of an academic year. You must be registered or pay the filing fee, whichever is applicable, for the semester in which your degree is conferred. If you hold a nonimmigrant visa, you must be registered for both semesters of each academic year unless you have special permission from the Immigration Service to do otherwise. Consult the Foreign Student Adviser for further information.
In summary, you must register in any semester in which you are enrolled in formal courses of instruction or are making any use of University facilities, including access to the faculty, except for uses accorded the general public.

If your studies or research requires absence from California for the semester, you must file a petition requesting absence and a reduction of the University registration fee with the Graduate Division, 1 California Hall.

Special Information for New Graduate Students

If you will be a new graduate student, you must enroll and register during the In-Person Registration period at the beginning of the semester. However, you will be mailed a billing statement shortly before the ACE fee payment deadline. The statement will indicate the registration fees due and the amount of financial aid, if any, applied against your fees. You may make a payment at that time or by the In-Person Registration deadline. You must obtain your registration packet, which will include your Schedule Request Form, in person from your major department office (available approximately two weeks before the beginning of instruction). After meeting with your major adviser, you must submit your Schedule Request Form and pay your registration fees (if you did not do so previously) by the In-Person Registration deadline. Your Confirmed Class Schedule will be available in your major department office on the first day of instruction.

Cancellation of Registration by Mail

Students who have registered and decide before classes begin not to attend Berkeley may cancel by mail by filing the appropriate form. For further information see the section “Academic Policies,” beginning on page 53.

The Study List and Unit Load

Under Advance Class Enrollment, all students fill out a Schedule Request Form, entering on it all course requests, including thesis and/or research approved by the graduate adviser, for the semester. Courses are classified as lower division (numbered 1 through 99); upper division (100-199); and graduate (200-299). Lower division courses are not counted as part of a full program of study leading to a higher degree. You must be enrolled in 12 units in 200 series (or above) to be considered a full-time student. (For information on courses in the 600 series, see page 54.)

Graduate student instructors and research assistants must normally carry a minimum of 6 units of upper division or graduate work (courses in the 100 or 200 series). Fellowship holders and foreign students on nonimmigrant visas must carry a full program of study; the minimum program is 12 units in upper division and/or graduate courses, although individual study in the form of language preparation, comprehensive and qualifying examination preparation, etc., for the Ph.D. degree is taken into account. In these cases reduced unit loads are accepted as full programs with the consent of the graduate adviser and dean of the Graduate Division.

Changes in the Confirmed Schedule

Graduate students may file petitions to add or drop courses listed on their confirmed class schedules at any time through the fifth week of instruction with the signed approval of the course instructor and graduate adviser. If you discontinue a course after this time, you will normally receive a grade of F unless you submit a letter of explanation from your graduate adviser along with your petition for special approval to the dean of the Graduate Division. A $5 fee will be assessed for petitions submitted after the third week of instruction.

Withdrawal

If you want to withdraw from Berkeley at the end of a semester or while the semester is in progress, you must file a formal withdrawal. For further information, see the section “Academic Policies,” beginning on page 53.

Graduate Degrees and Certificates

Academic degrees are the M.A., M.S., M.F.A., and Ph.D. All other degrees and certificates are professional. The J.D. in Law is the basic law degree. It is a graduate degree, and if interested you should apply directly to the School of Law.

Certificate in Russian and East European Studies

The Certificate in Russian and East European Studies has been developed to serve graduate students in the humanities and social sciences who wish to broaden their knowledge of the Russian and East European area. To be eligible you must be in good standing and currently enrolled in a graduate program at Berkeley in a field related to the Russian/East European area. The program is to include at least 18 semester units in three or more disciplines, not including that in which you have received or are planning to receive your master's or doctoral degree. Advanced language courses in grammar, composition, or conversation may not be used to fulfill this requirement. Of the 18 required units, at least 6 must be at the 200 level; the remaining units may be at the 100 or 200 level. Applications and further information about the certificate program are available at the Center for Slavic and East European Studies, 361 Stephens Hall.

Certificate of Completion of Graduate Curricula in Library and Information Studies

A certificate program has been established which is designed to meet the need for advanced studies beyond the first professional degree (M.L.I.S.) and short of the doctoral degrees (Ph.D., D.L.I.S.). You should direct inquiries to the School of Library and Information Studies.

*Students are not admitted to work for the M.A. degree, although it may be awarded to students pursuing work toward the Ph.D. degree after fulfillment of the appropriate M.A. requirements.
†Indicates established interdisciplinary group or field.

Certificate of Completion of Graduate Curriculum in Optometry

In this program you will spend 9 to 18 months in graduate professional training and must have previously earned the Doctor of Optometry degree. For information contact the Director of Clinics, School of Optometry, 250 Minor Hall, 642-0945.

Master of Arts in Teaching

The degree of Master of Arts in Teaching is offered by the School of Education jointly with the Department of English. If you are a candidate you must satisfy all requirements for certification to teach in California, in addition to completing academic training in one of the subject fields, you should direct inquiries to the appropriate academic department and to the School of Education.

Joint Doctoral Programs

There are two intercampus joint degree programs between Berkeley and the University of California, San Francisco: Bioengineering and Medical Anthropology. If interested, you should apply to the campus most appropriate to your research interests, but you will have access to facilities and faculty on both campuses through intercampus exchange registration. For information, write to the Department of Anthropology or the Group in Bioengineering.

Near Eastern Religions

A program leading to the Ph.D. degree is conducted jointly by the Berkeley campus and the Graduate Theological Union. For more information, see the discussion below under "Academic Opportunities."

Special Education

A joint doctoral program in special education leading to either the Ph.D. degree or the Ed.D. degree is offered by the Berkeley campus and San Francisco State University. The program is interdisciplinary, including clinical experience as well as in-depth preparation in the behavioral sciences and in statistics and research methods. For application material and additional information, write to: Special Education Group, c/o
School of Education, UC Berkeley, or Department of Education, San Francisco State University, 1600 Holloway Avenue, San Francisco, CA 94132.

Concurrent Degree Programs

Concurrent degree programs provide a broad integrated curriculum between two disciplines. You should direct inquiries to the departments or schools involved.

Teaching Credentials

Courses leading to the multiple subject or single subject teaching credentials are offered on the Berkeley campus. For details, please consult the Announcement of the School of Education.

Requirements for Graduate Degrees

The Master’s Degree

Berkeley offers instruction leading to both academic and professional degrees.

For specific regulations governing the professional master's degrees, see the individual announcements of the colleges and schools. This section will deal primarily with the academic master's degree.

Residence Requirement

A minimum of two semesters of academic residence is required for the master's degree. Academic residence is defined as enrollment in at least 4 units in 100-200 series courses. Specific subject requirements and performance levels are set by the schools, departments, and groups.

Transfer of Credit from Other Institutions

You should first request a transfer of units at the end of your first semester of attendance. Your graduate adviser should make a formal request to the dean of the Graduate Division specifying the units and courses involved. Your credits may be transferable if (1) the units involved are equivalent to work normally offered within your current program of study, (2) the grade recorded was at least a B, and (3) you have a superior scholastic record (at least a 3.5) at both your original institution and at Berkeley. Final action will be taken when you have completed half the program and are applying for advancement to candidacy. No more than 4 semester or 6 quarter units are transferable, and the work must have been completed previously in graduate status at an institution of high standing. The units transferred cannot be used to reduce the minimum required in the 200 series courses or the minimum residence requirement.

Work that formed part of the program for a master's degree previously conferred (either at the University of California or elsewhere) may not be applied toward a current degree program.

Credit for graduate work that you completed on other campuses of the University of California may be granted in excess of 6 units, if (1) the units involved are equivalent to work normally offered within your current program of study, and (2) the grade recorded was at least a B, and (3) you have a superior scholastic record (at least a 3.5) at both your original institution and at Berkeley. Final action will be taken when you have completed half the program and are applying for advancement to candidacy. No more than 4 semester or 6 quarter units are transferable, and the work must have been completed previously in graduate status at an institution of high standing. The units transferred cannot be used to reduce the minimum required in the 200 series courses or the minimum residence requirement.

Work that formed part of the program for a master's degree previously conferred may not be applied toward a current degree program.

Credit for graduate work that you completed on other campuses of the University of California may be granted in excess of 6 quarter units or 4 semester units. Requests are handled on an individual basis.

Concurrent Enrollment—University Extension

Courses taken concurrently through University Extension but held on the Berkeley campus under the instruction of a regular member of the Berkeley faculty are generally not applicable toward a Berkeley master's degree. These courses are intended to provide

Extension students with an opportunity to take courses that would not ordinarily be available to them. Concurrent enrollment cannot replace normal registration by Berkeley graduate students, nor may it be used to accumulate credit toward a Berkeley degree by an individual not formally admitted to graduate standing at Berkeley. An exception may be made for you only if there is clear evidence that you were concurrently enrolled through Extension while in graduate standing at another institution and with the intent of applying the units earned toward a graduate degree at that institution. Exceptions must be fully justified by the graduate adviser and will require special approval by the dean of the Graduate Division.

Amount and Distribution of Work

If you work toward an academic master's degree on the Berkeley campus, you will pursue one of two plans, as determined by your school, department, or group. (Units may adopt either or both plans and will, in the latter case, designate which plan you are to follow.)

Plan I requires at least 20 semester units of upper division and graduate courses and a thesis. At least 8 of these units must be in graduate courses (200 series) in your major subject. Course units are not granted for the thesis.

Plan II requires at least 24 semester units of upper division and graduate courses, followed by a comprehensive final examination administered by your school, department, or group. At least 12 of the units must be in graduate courses in your major subject.

If you are following both plans, your graduate adviser will guide you regarding distribution of course work among departments. Please note that departments, schools, and groups may have performance standards that are higher than the minimum B average required by the Graduate Division. Further requirements are specified by the major department.

Advancement to Candidacy

When you complete the requirements for your degree, you will not automatically be admitted to candidacy for the master's degree; you must make a formal application to the dean of the Graduate Division when you have completed approximately half the master's program. The application must be approved by the chair of graduate advisers in your major school, department, or group
and must include a precise statement of the studies on which the application is based. You must apply no later than the end of the third week of instruction of the semester in which the degree is to be awarded. If you are to submit a thesis, however, you should consult your adviser as early as possible about advancement to candidacy so that the appropriate committee can be formed.

The Master's Thesis
If you are following Plan I, described above, you must submit a typewritten thesis, double-spaced on medium-weight, 8 1/2 x 11-inch approved paper, with a minimum left-hand margin of 1 1/2 inches. Consult the Degrees Staff in the Graduate Division for required brands of paper.

The thesis must be unbound and without perforations. The type must be adequate for photographic reproduction. Following approval by your thesis committee, two copies are filed with the Graduate Division. Further information regarding the organization and format of the thesis is available from the Degrees Staff in the Graduate Division.

The thesis constitutes a report, in as brief a form as possible, of results obtained in an original investigation of a problem. The problem in question need only be of limited scope; however, the thesis should be comparable in style, organization, and depth of understanding to investigations of greater scope, such as the dissertations of doctoral candidates.

You must submit your thesis to a committee of three members of the faculty appointed by the dean of the Graduate Division. One member of the committee must be chosen from a department other than that of your major subject. You are required to confer with all members of your committee before beginning your thesis; since the committee is not appointed until you are advanced to candidacy, you should not begin thesis work before advancement in order to avoid extensive revisions. You are responsible for placing the completed thesis in the hands of your committee members.

Three years is the normal time period allowed for completion of the thesis. Candidacy for the master's degree will lapse automatically at the end of that time. You can be reinstated, however, upon the recommendation of the graduate adviser to the dean at the time your thesis committee members have approved a final draft of your thesis.

If all three members of your committee approve the thesis, they sign the official title page prepared by the Graduate Division. You then file two copies of the thesis with the Graduate Division for later deposit in the University library. If any member of your committee doubts the acceptability of the thesis, the committee chair convenes the committee to discuss it. If the committee reaches agreement on its acceptability, the thesis is signed and filed as described above. If the committee continues to disagree, the thesis is sent to the dean of the Graduate Division together with a brief statement of each committee member's opinion. If all members of the committee reject the thesis, it is sent to the dean with a statement to that effect by the committee chair. In all cases of rejection or split vote, the Administrative Committee of the Graduate Council makes the final decision.

The Doctoral Degree
Berkeley offers both academic and professional degrees. Professional degree programs are outlined in the individual announcements of the colleges and schools offering them. The general procedures given in this section apply primarily to the academic doctoral degree.

The Doctor of Philosophy degree is not granted solely for fulfilling technical requirements such as residence and completion of specified courses; it is awarded in recognition of a student's knowledge of a broad field of learning and for distinguished accomplishment in that field through an original contribution of significant knowledge and ideas. The student's research must reveal high critical ability and powers of imagination and synthesis.

Programs of Study
Programs of study for doctoral degrees are more individualized than those for master's degrees, permitting more specialization within a field or the establishment of connections among fields. Nevertheless, if you are seeking a doctoral degree, you must have your program of study approved by the graduate adviser of the department or group to which you are admitted or later transferred. University policy requires continuous registration from entrance until receipt of the degree, unless a formal withdrawal is granted by the dean of the Graduate Division.

Your field of study may be in a single department, except for essential related courses in other departments; in several departments; or in an interdisciplinary group. Once you have chosen a field of study, you should confer with your graduate adviser to select the sequence of courses that will best prepare you for qualifying examinations and research work.

Residence Requirement
A minimum of two years or four semesters of academic residence is required for the Ph.D. degree. Academic residence is defined as enrollment in at least 4 units in 100-200 courses. The period during which you are allowed to be in candidacy is limited; after its expiration your candidacy for the degree is likely to lapse. You should consult your department or the Graduate Division for the time permitted in candidacy.

Foreign Language Requirement
The foreign language requirement ensures that you have the ability to acquire wide knowledge in your field of study and to keep up with foreign developments in your field. You are urged to complete the foreign language requirement early in your graduate career. You must fulfill the foreign language requirement for the Ph.D. before advancement to candidacy and preferably before admission to the qualifying examinations according to the policies current in your department or group. Each graduate program may have somewhat different foreign language requirements. If you are a prospective student, you are urged to inquire about the foreign language requirement as soon as possible and, if you can, to fulfill it while still an undergraduate. In some graduate programs, applicants for admission must have satisfied the foreign language requirement before applying.
The following rankings of selected graduate departments at U.S. universities are drawn from the most recent assessment of the country’s top research institutions.

In the 1982 study sponsored by four national academic organizations, Berkeley emerged as the strongest graduate institution across the board on a “reputational” scale in which faculty members rated the academic quality of their peers across the country.

The study, which consisted of polling 5,000 faculty members at 228 colleges and universities, was sponsored by the Conference Board of Associated Research Councils, an ad hoc group consisting of the American Council on Education, American Council of Learned Societies, National Research Council, and Social Sciences Research Council.

The study surveyed 32 fields, and the reputations of Berkeley’s departments were listed among the top 10 in 30 of them. Stanford was in the top 10 in 24 fields, and Harvard in 22. To the left are the 16 fields in which Berkeley’s departments were rated among the top three.

</table>
Qualifying Examinations
Before you are admitted to candidacy, you must pass a series of qualifying examinations administered by a four- or five-member committee approved by the Graduate Council. An oral component is required. You must be registered in the semester in which you take the examinations, and you must have removed any previous deficiencies in training, including incomplete grades in courses that your graduate adviser required for your program. You must have maintained at least a B average in all course work that you undertook in graduate status, and you should have fulfilled the language requirement(s).

Please note: Departments, schools, and groups may have performance standards that are higher than the minimum B average required by the Graduate Division.

Advancement to Candidacy
You must apply for advancement to candidacy, on a form furnished by the Graduate Division, no later than the semester following the one in which you passed your qualifying examinations. The completed form, bearing the endorsement of your department, is filed with the Graduate Division, which determines whether you have met all formal requirements. You must pay a fee of $25 when you file the application, and you must have completed all requirements for the doctoral degree except the dissertation before you may be advanced to candidacy.

The Candidate's Degree
The degree “Candidate in Philosophy,” which gives formal recognition to a definite state of progress toward the doctorate, may be awarded to you when you are advanced to candidacy.

Please note: Departments, schools, and groups may have performance standards that are higher than the minimum B average required by the Graduate Division.

You are to work under one of two plans, as adopted by the department or group:

Plan A: The Administrative Committee of the Graduate Council appoints a five-member committee which determines whether you have met the requirements for the degree. Three members of the committee, one of whom must be from a department other than that of your major subject, guide you in research and judge the merits of your dissertation. The entire committee conducts a final oral examination dealing with the relationship between your dissertation and the general field of study in which the subject of the dissertation lies. Admission to the final examinations may be restricted to the members of the committee, members of the Academic Senate, and guests of equivalent rank from other institutions.

Plan B: The Administrative Committee of the Graduate Council appoints a committee of three members, one of whom must be from a department other than that of your major subject, to guide you in research and judge the merits of your dissertation. This committee may require any necessary conferences to elucidate the subject treated in the dissertation. After presentation of the dissertation but before final action is taken upon it, the committee may, if necessary, require you to defend the dissertation in a formal oral examination.

After your committee has approved your dissertation, the original must be filed with the Graduate Division by a deadline specified by that office. You must also file an abstract of the dissertation, no longer than 350 words and signed by the committee chair.

Programs using Plan A and Plan B are listed below.

Plan A
Anatomy
Buddhist Studies
Hispanic Languages and Literatures
Logic and the Methodology of Science
Romance Philology

Plan B

Minimum Requirements
All the procedures and regulations described above and in the preceding section on
master's degrees constitute the minimum
requirements for the higher degrees, as
set by the Graduate Division. Each academic
department may adopt additional require-
ments, as approved by the dean of the
Graduate Division and the Graduate Council,
according to the demands of your field of
study.

Interdisciplinary Groups and
Individual Majors
If your interests fall outside departmental
boundaries, Berkeley has a number of
interdisciplinary graduate programs that cut
across departmental lines and are adminis-
tered by faculty from a variety of depart-
ments. You may also design your own major
under “Academic Opportunities” below.

Academic Opportunities

Exchange Programs
Berkeley students participating in any of the
following exchange programs, with the
exception of the Intercampus Exchange
Program, will not automatically receive credit
for taking course work at the host campus.
The courses will be posted in the memoran-
dum column of your transcript. If you want
to transfer units, see page 41, “Transfer
of Credit from Other Institutions.” No more
than 4 semester or 6 quarter units are trans-
ferable toward the master’s degree.

Intercampus Exchange Program
If you are a graduate student registered on
any campus of the University, you may
go to another campus of the University as
an Intercampus Exchange Graduate Student
with the approval of your graduate adviser,
the chair of the department in which you
want to study, the dean of the Graduate Di-
vision on the home campus, and the dean
of the Graduate Division on the host campus.

You may obtain an application form for
the Intercampus Exchange Program for
Graduate Students from the Office of the
dean of the Graduate Division on your home
campus. You should complete and file the
application form at least three weeks before
the opening of the term of enrollment on
the host campus. (Please note that all other
UC campuses are on the quarter system.)

This privilege is available to graduate
students who would like to associate with
scholars or fields of study not available
on the home campus, or who seek the use
of special facilities and collections. Whenever
possible, you should make personal
arrangements with faculty members on both
campuses to ensure that the courses, semi-
nars, or facilities will be available to meet
your needs. This privilege will be granted
whenever there is evidence of serious and high-
quality scholarship.

As an intercampus exchange student, you
register and pay fees on your home campus
but have library, infirmary, and other stu-
dent privileges on your host campus. You
must be approved by the Graduate Division
and your department. Normally, you will not
participate in the Intercampus Exchange Program when it is considered
desirable for you to take a limited number
of courses that are offered at Stanford but
not at Berkeley. Participation in the program
must be approved by the Graduate Division
and your department. Normally, you will not
be allowed to participate in the Exchange
Program until you have completed a year of
graduate study at Berkeley. Participants in
this program register and pay the applicable fees at Berkeley and are exempt from tuition and fees at Stanford. The same privilege is accorded to Stanford students who want to take courses at Berkeley. If you apply for this program, you must enroll in at least one course at Berkeley. You may obtain further information and an application form from the Petitions Desk in the Graduate Division, 1 California Hall.

Exchange Program with Hayward, Mills, and Sonoma
You may also participate in exchange programs with California State University, Hayward; Mills College, Oakland; and California State University, Sonoma. With the approval of the Graduate Division and your department, you may register and pay applicable fees at Berkeley and be exempt from tuition and fees at the host campus. You may enroll for only one course per semester at the host campus.

Graduate Theological Union
There are two kinds of programs that include the facilities of the Graduate Theological Union in Berkeley: the "casual program" and the joint Ph.D. program in Near Eastern Religions. The casual program is open to all students in the GTU community and all graduate students at UC Berkeley. This program allows you to register on one campus and take courses on the other, subject to the appropriate academic approvals. You may obtain applications and deadline dates from the Petitions Desk in the Graduate Division, 1 California Hall.

The Joint Doctoral Program in Near Eastern Religions is open only to students who wish to work toward the Ph.D. degree. To apply, you must first have an M.A. (or its equivalent) in Near Eastern studies or in a related field and must have at least two ancient languages suitable to the proposed program. You must be admitted to both the Graduate Theological Union and the University, because the degree is conferred jointly by both institutions. As a student in the joint doctoral program, you will be under the administrative supervision of the graduate dean at each institution. Both deans must participate in decisions before final action may be taken on a student matter. You must use the extensive library holdings of the Union and supplement your program with selected courses in Palestinian archeology, Biblical studies, Semitic epigraphy, and philology. For information about the program, a catalog, and application forms, write to the Graduate Theological Union, 2465 LeConte Avenue, Berkeley, CA 94709.

The Exchange Scholar Program
The Exchange Scholar Program is an experimental program designed to enable doctoral students with superior academic records to study at one of the participating institutions to take advantage of educational opportunities that are not available at Berkeley. Normally, you are eligible to become an exchange scholar only after you have completed one year in a Berkeley graduate degree program. You may take courses and/or conduct research with particular faculty at the host institution for no more than one year while remaining registered at Berkeley. Participating institutions are UC Berkeley, Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, Stanford University, and Yale University. You may obtain further information and an application from the Petitions Desk in the Graduate Division, 1 California Hall.

Please note: Guidelines for participation in the exchange program with Stanford University are outlined above under the Stanford-California Exchange Program.

Study Abroad
Graduate students who have been admitted to study toward a higher degree may, under certain conditions, be granted permission to study abroad. To apply, you must have completed at least one year in residence before your departure for study abroad, and you must demonstrate language proficiency where required.

As a graduate student, you are eligible to apply to most of the study centers under the Universitywide Education Abroad Program. (For a list of study centers, see "Studying Abroad" on page 34.) You must obtain the approval of both your department and the dean of the Graduate Division.

Internship/Study Opportunities in Professional Studies Program in India
The professional schools in Berkeley conduct a program in New Delhi. Students earn credit for internship work in local government agencies appropriate to their professional interest and enroll in an Indian university. For additional information on all the above programs, write to the Office of International Education, 2538 Channing Way, 104 Building D, University of California, Berkeley; Berkeley, CA 94720.

Tropical Biogeography
If you are a registered graduate student interested in doing field research in the tropics, see Biology 250 for information.

Interdisciplinary Groups
Berkeley has established graduate programs in a number of fields that cut across conventional departmental lines yet comprise distinct cores of knowledge. These programs are administered by groups of faculty from several related departments and, in certain instances, from several campuses. If you are enrolled in these programs you can work with any faculty member in the group without having to pursue the particular discipline of the department with which the faculty member is associated. Moreover, this arrangement gives you access to a range of facilities not ordinarily open to students enrolled in departmental programs. In some cases (e.g., medieval studies), a faculty committee is appointed specifically to advise you and the interested departments on setting up a program that will best meet the departments' and your views of the intellectual quality of the proposed programs. Since groups have no budgets or facilities of their own, however, most applicants, to be accepted by a particular group, must first obtain the sponsorship of one of its faculty members.

Following is a current list of graduate groups on the Berkeley campus:
Group in Agricultural and Environmental Chemistry
Professor Isao Kubo, Chair
c/o Department of Entomological Sciences
201 Wellman Hall

Group in Ancient History and Archaeology
Professor Andrew Stewart, Chair
c/o Department of History of Art
405 Doe Library

Group in Asian Studies
Professor Robert R. Reed, Chair
2223 Fulton
Room 520

Group in Bioengineering
Professor Stanton A. Glantz, Chair
c/o Department of Medicine
UC San Francisco

Group in Biophysics and Medical Physics
Professor Edward L. Alpen, Chair
230 Donner Laboratory

Group in Biostatistics
Professors E. L. Scott and Nicholas Jewell, Co-chairs
c/o School of Public Health
19 Warren Hall

Group in Buddhist Studies
Professor Padmanadh S. Jaini, Chair
c/o Department of South and Southeast Asian Studies
1203 Dwinelle Hall

Group in Comparative Biochemistry
Professor Lester Packer, Chair
c/o Department of Physiology-Anatomy
2549 Life Sciences Building

Group in Demography
Professor Eugene A. Hammel, Chair
c/o Graduate Group in Demography Office
2234 Piedmont Avenue

Group in Developmental Biology
Professor Fred H. Wilt, Chair
c/o Department of Zoology
4079 Life Sciences Building

Group in Endocrinology
Professor Howard A. Bern, Chair
c/o Department of Zoology
4079 Life Sciences Building

Group in Energy and Resources
Professor Robert Sawyer, Chair
c/o Group Office
100 T-4

Group in Environmental Health Sciences
Professor Edward T. Wei, Chair
c/o Public Health, Biomedical and Environmental Health Sciences
316 Warren Hall

Group in Epidemiology
Professor Warren Winkelstein, Chair
c/o School of Public Health
19 Warren Hall

Group in Ethnic Studies
Professor Takaki, Chair
c/o Asian-American Studies
3407 Dwinelle Hall

Group in Folklore
Professor Alan Dundes, Chair
c/o Department of Anthropology
232 Kroeber Hall

Group in Genetics
Professor James Fristrom, Chair
c/o Department of Genetics
345 Mulford Hall

Group in Health and Medical Sciences
Program Office 106 T-7

Group in Immunology
Professor Phyllis B. Blair, Chair
c/o Department of Microbiology and Immunology
3573 Life Sciences Building

Group in Latin American Studies
Professor Alex Saragoza, Chair
Center for Latin American Studies
2334 Bowditch Street

Group in Logic and the Methodology of Science
Professor Jack Silver, Chair
c/o Department of Mathematics
731 Evans Hall

Committee on Medieval Studies
Professor Alan Nelson, Chair
c/o Department of English
322 Wheeler Hall

Group in Microbiology
Professor Dennis Ohman, Chair
c/o Department of Microbiology and Immunology
3573 Life Sciences Building

Group in Molecular and Physiological Plant Biology
Professor Richard Malkin, Chair
c/o Department of Molecular Plant Biology
313 Hilgard Hall

Group in Neurobiology
Professor Frank S. Werblin, Chair
c/o Department of Electrical Engineering and Computer Sciences
231 Cory Hall

Group in Nutrition
Professor Nancy K. Amy, Chair
c/o Department of Nutritional Sciences
119 Morgan Hall

Group in Parasitology
Professor James L. Hardy, Chair
School of Public Health
216 Warren

Group in Physiological Optics
Dean Jay M. Enoch, Chair
School of Optometry
350 Minor Hall

Group in Range Management
Professor James Bartolome, Chair
c/o Department of Forestry and Resource Management
145 Mulford Hall

Group in Romance Languages and Literatures
Professor Jerry R. Craddock, Chair
c/o Department of Spanish and Portuguese
4236 Dwinelle Hall

Group in Romance Philology
Professor Suzanne Fleischman, Chair
c/o Department of French
4125 Dwinelle Hall

Group in Science/Mathematics Education
Professor Alan Schoenfield, Chair
c/o School of Education
1607 Tolman Hall

Group in Soil Science
Professor Mary Firestone, Chair
c/o Department of Plant and Soil Biology
108 Hilgard Hall

Group in Special Education
Professor E. M. Bower, Chair
c/o School of Education
4413 Tolman Hall

Group in Wood Science and Technology
Professor Arno P. Schniewind, Chair
c/o Forest Products Laboratory
478 Richmond Field Station

Advisory Groups
(not degree programs)

Committee on Psychoanalytic Studies of the
Arts and Society
Professors Neil Smelser and Joseph Lipshutz, Co-chairs
c/o Department of Linguistics
2337 Dwinelle Hall

Program in Public and Nonprofit Management
Professor Eugene Bardach, Coordinator
Graduate School of Public Policy
2007 Hearst

Committee for Certificate in Russian and East
European Studies
Professor George W. Breslaver, Chair
Center for Slavic and East European Studies
372 Stephens Hall
Individual Doctoral Programs
To allow you to work in a field that, in its breadth, falls between that of a department and an interdisciplinary group, the Graduate Division has encouraged the informal establishment of ad hoc programs leading to the Ph.D. degree. You will be considered for an interdisciplinary program only if you have completed at least two semesters of graduate study in a doctoral program on this campus and have shown superior academic performance in your graduate studies here. In these programs, you may prepare a proposal for a course of study under the sponsorship of five faculty members. Final approval of every individual graduate program and admission of each student into such a program must be granted by the Graduate Council. You must complete degree requirements in accordance with Plan A of the Graduate Council policies, and the degree is awarded in a field approved for you by the council.

Standards of Scholarship
You must receive a grade of A, B, C (including pluses and minuses), or S in your course work to satisfy degree requirements. You will not receive course credit for courses graded below C-. You must maintain a grade-point average of 3.0 in all upper division and graduate course work taken as a graduate student unless you are in a department, school, or group that has higher standards.

Probation and Dismissal
You are subject to probation and dismissal if your grade-point average falls below that required by your department, school, or group; if you have too many incomplete grades; or if your written work is substandard. You may appeal dismissal for academic reasons to the Graduate Council of the Academic Senate.

Normative Time
Normative time is defined as the elapsed calendar time in years that under normal circumstances would be needed to complete all requirements for the doctoral degree, assuming that a student is engaged in full-time, uninterrupted study and is making desirable progress toward the degree.

The primary goals of the Normative Time Program are to provide incentives to both students and instructional units to reduce the average time taken to complete requirements for the doctoral degree, to facilitate a greater degree of continuity in doctoral studies, and to provide a more equitable assessment of fees for doctoral students advanced to candidacy. After advancement to candidacy, eligible students will receive a special grant to offset the cost of the educational fee.

The program is obligatory for all doctoral students (independent of original degree goal) first enrolled on the Berkeley campus in fall 1978 and thereafter. If you entered earlier you may elect to join the program. The conditions of the program are described in the section “Academic Policies,” beginning on page 53.

Academic Residence
In order to meet the academic residence requirement for higher degrees—not to be confused with state residence, defined in the Appendix—every graduate student must enroll in and complete a minimum of 4 units of upper division and/or graduate courses per required semester of academic residence. Only courses in the 100 or 200 series satisfy this requirement. You should also become familiar with the regulations on academic residence for the individual graduate degrees.

Postdoctoral Fellows and Visiting Scholars
Prospective fellows or scholars should communicate with the chair of the department, school, or research unit in which they are interested to determine whether the facilities they require are available and whether they meet eligibility requirements for an honorary appointment. With rare exceptions, visiting scholars must hold a doctoral degree or its equivalent. Visiting scholars may not be students enrolled or on leave from another institution of higher education, candidates for a graduate degree, or employees of any University of California campus. Foreign fellows or scholars should communicate with the Advisers to Foreign Students and Scholars Office, International House, to determine whether they hold the proper visa to assume an appointment.
Fees and Financial Aid

It is very important that you carefully consider the total financing of your education, from your first term at Berkeley to completing your degree objective. If financial help will be needed beyond funds that you or your family are able to provide, you should make the necessary applications for financial assistance well in advance of enrollment. You should pay particular attention to early deadlines for application for grants, scholarships, work-study, and National Direct Student Loans. While the needs and resources of each student differ, the University can provide a general list of fees and expenses normally encountered. You should note that fees are subject to change without notice.

Part of your fees may be refunded if you cancel your registration before the opening day of the semester or withdraw before the beginning of the sixth week of classes of any semester. (See Index, “Schedule of Refunds.”) A circular on refunds, Student Fees and Deposits, is also available from the Office of Admissions and Records, 120 Sproul Hall.

Total Expenses. The cost of attending the University varies according to individual circumstances. The expenses listed below are approximate costs for the nine-month academic year and should be used only as a guideline.

Required Fees

University Registration Fee—$289 per semester. This fee is paid by all students and covers normal expected usage of facilities such as laboratories and gymnasiums and services such as counseling, placement, and health.

Educational Fee—This fee is paid by all students at $402 per semester. It is used to support a portion of the cost of the educational program. In exceptional circumstances the educational fee may be reduced by one-half for part-time undergraduate students.

Additional Fees and Expenses

Late Fee Payment—$50. Continuing students who pay fees after the ACE fee payment deadline are liable for this fee.

Late Enrollment—$50. Continuing students who submit their Schedule Request Forms after the ACE deadline (see calendar for dates) are liable for this fee.

Reinstatement after having been dropped from University rolls—$10.

Approval of part-time undergraduate study is made only in exceptional cases and is based on considerations of occupation, family responsibility, and health. Applications must be approved by the appropriate dean before the start of each term. A fee reduction will be made only if you enroll in no more than two courses.

Berkeley Campus Fee—This fee is paid by all students in the amount of $47.25 per semester. It provides support for a wide range of activities sponsored by the ASUC, including work with academic and administrative units of the campus. It covers use of the Student Union, helps pay construction costs of the Union building, and assists with the provision of ethnic studies on the Berkeley campus.

Nonresident Tuition—$2,145 per semester. At the time of registration, you are classified as a resident or nonresident for tuition purposes. Only U.S. citizens and holders of immigrant visas can become qualified for resident classification. Under California law you will be classified as a resident for tuition purposes if you have lived in California for more than one year immediately before the day instruction begins at the last of the campuses to open for a semester. Residence is the combination of physical presence within California plus intent to live in California permanently. Nonresidents must pay a nonresident tuition fee each semester. For detailed information regarding the establishment of California residence, see the Appendix or write to the Attorney in Residence Matters, 590 University Hall, University of California, Berkeley; Berkeley, CA 94720.

Athletic Privilege Cards, Men’s Athletic Events—$26, Student Football Season Ticket; $20, Basketball/All Sports Card. Purchase is optional. Privilege cards permit free admission or reduced rates to most University men’s athletic events.

Athletic Privilege Cards, Women’s Athletic Events—$10, Cal Gold Card. Purchase is optional. Privilege card is season pass that permits free admission to all women’s intercollegiate athletic events.

Table of Fees

At the time of registration, by mail or in person, students pay the following fees each semester:

<table>
<thead>
<tr>
<th>Category</th>
<th>Fees per Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resident</td>
<td>$738</td>
</tr>
<tr>
<td>Nonresident</td>
<td>2,883</td>
</tr>
<tr>
<td>Foreign†</td>
<td>2,883</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>School of Law</th>

<tbody>
<tr>
<td>Resident</td>
<td>$753</td>
</tr>
<tr>
<td>Nonresident</td>
<td>2,898</td>
</tr>
<tr>
<td>Foreign†</td>
<td>2,898</td>
</tr>
</tbody>
</table>

†Students on nonimmigrant visas pay an additional health insurance fee of approximately $85.

Financial Aid

The Financial Aid Office is located on the second floor of Sproul Hall. The office is composed of four units, each serving a different part of the academic community. Unit 1 (642-6442) serves undergraduate students in the College of Letters and Science whose last names begin with letters A through K. Unit 2 (642-6492) serves undergraduate students in the College of Letters and Science whose last names begin with letters L through Z. Unit 3 (642-0623) serves undergraduate students in the professional schools. Unit 4 (642-0485) serves graduate...
students and law students. By writing to
or visiting your unit, you may obtain infor-
mation about the various kinds of student
aid offered. Undergraduate students may
apply for undergraduate scholarships (in-clud-
ing Regents' Scholarships), Supplemental
Educational Opportunity Grants (SEOG),
Cal grants, and Fell grants. Both graduate and
undergraduate students may apply for
University Grants-in-Aid, National Direct
Student Loans, University Loans, Guaranteed
Student Loans, Work-Study Program, and
other aid programs.

All financial aid except fellowships, honorary
scholarships, teaching and research appoint-
ments, and prizes is granted on the basis of
financial need. Financial need is the differ-
ence between your parents' expected contri-
bution plus your own resources and the al-
lowable education expenses. Prizes are
awarded on the basis of competition or out-
standing ability in some area of creative or
scholarly achievement. Scholarship awards
are made on the basis of scholarship and
financial need, except Regents' and Alumni
Honorary Scholarships, which are awarded
in recognition of outstanding achievement and
promise. Complete information concerning
these programs except prizes is con-
tained in the Financial Aid Handbook 1987-
88, which you may obtain from the Finan-
cial Aid Office. A separate booklet describ-
ing the various prizes offered is available
from the Committee on Prizes, second floor,
Sproul Hall.

Financial aid application information will
be sent to entering undergraduate students
who indicate interest on their admission
application. The graduate admission appli-
cation includes information on fellowships
and financial aid, and financial aid forms will
be sent to entering graduate students who
indicate interest. Continuing undergraduate
and graduate students can pick up financial
aid information from their unit of the FAO.
The application deadline is usually in early
February.

Information and application materials con-
cerning graduate fellowships and graduate
scholarships may be obtained separately from
the Graduate Division, 1 California Hall.
The application is normally due by January
10.

Reserve Officers Training Corps

The University of California, as a land-
grant institution established by the Morrill
Act of 1862, offers courses and programs in
military training. This training is voluntary
and affords you the opportunity to qualify for

a commission as an officer in the Army,
Marine Corps, Navy, or Air Force while
completing your college education. Reserve
Officer Training Corps (ROTC) courses
are offered by three departments: Aerospace
Studies (Air Force), Military Science
(Army), and Naval Science (Navy and
Marine Corps). The scholarship programs
carry a monthly stipend and pay a flat rate for
books and most fees for qualified students.
Individual programs are described under
Military Officers' Education Program.

Aid to Veterans and Dependents
of Veterans

If you are a veteran or a veteran's dependent,
you may secure forms for aid from Veterans
Services, Office of Admissions and Rec-
ords, 37 Sproul Hall, or from the Veterans
Administration Regional Office, 211 Main
Street, San Francisco, CA 94105. Informa-
tion about application deadlines is
contained in the Veterans Affairs publication
available in 37 Sproul Hall.

Fellowships, Graduate Scholarships, and Academic
Appointments for Graduate Students

Numerous programs—from fellowships,
grants-in-aid, and loans to assistantships,
subsidized housing, and child care
programs—provide ways in which you can
meet your financial needs. Some of the
programs are need-based and are adm-
istered through the Financial Aid Office.
These programs are discussed in preceding
paragraphs. Others are merit-based and are adm-
istered through the Graduate Division
Fellowship Office and the academic depart-
ments. For detailed information about all
the sources available to you, consult the
Graduate Application for Admission, Fel-
lowship, and Financial Aid, available from
the department to which you wish to apply.
The following paragraphs discuss merit-
based fellowships, graduate scholarships, and
teaching and research appointments, the
primary sources of non-loan financial aid for
graduate students.

Fellowships and Graduate
Scholarships

Applications for fellowships and graduate
scholarships are considered only once a
year. Awards are made for the academic year
beginning with the fall semester.

In assigning awards, the Committee on
Fellowships and Graduate Scholarships will
consider the extent and quality of your
previous academic work, evidence of your
ability in research or other creative accom-
plishments, your intellectual capacity, and
promise of productive scholarship.

In addition to Regents Fellowships and
fellowships funded by endowed income, the
following fellowships are awarded in open
competition:

The Berkeley Fellowships for Graduate
Study. Fellowships are awarded to students
of outstanding achievement and high prom-
ise who will begin graduate study toward
the doctoral degree in any field. These are
three-year awards, based on continued
excellence in the fellow's advanced degree
program, with an annual stipend of $8,000
plus tuition and fees.

Foreign Language and Area Studies
Fellowships. The U.S. Department of Edu-
cation allocates fellowship funds to institu-
tions of higher education that offer training in modern foreign languages other
than Western European languages, and in
area and international studies. Area studies
is defined as a program of comprehensive
study of aspects of a society or societies
including geography, history, culture, econ-
omy, politics, international relations, and
languages. To be eligible, you must be a
citizen or permanent resident of the U.S.,
show potential for high academic achieve-
ment, and plan to enroll in a course in the
language of award.

Graduate Opportunity Fellowships. The
purpose of the Graduate Opportunity Fel-
lowship Program is to increase the enrollment
of women and ethnic minorities in depart-
ments in which they have been traditionally
underrepresented. To be eligible for an
award under this program, you must have
demonstrated scholastic achievement and be
Fellowship Application Procedure. If you are applying for admission/fellowship, you must file the combined Application for Admission, Fellowship, and Financial Aid according to instructions included in the application. Important: You are strongly advised to take the October Graduate Record Examination.

If you are applying for admission for the spring semester, you must file a Continuing/Returning Graduate Student Fellowship Application (secured from the Graduate Fellowship Office) for an award to begin the following fall semester.

If you are a continuing or returning graduate student at Berkeley, you may obtain the necessary fellowship application material from the Graduate Fellowship Office. You must file the application and supporting materials with the department or graduate group.

The fellowship application deadline is January 10.

Announcement of Awards. Awards are announced by April 1 and must be accepted or refused, in writing, by April 15. Your acceptance of a fellowship or graduate scholarship carries with it the presumption that you will devote full time to graduate study and research at Berkeley.

Fellowship Supplementation. Fellows may be employed no more than 25 percent time per semester as teaching or research assistants or in similar educationally relevant positions. Any exception to this policy must be approved by the dean of the Graduate Division upon recommendation of the graduate adviser.

Nonresident Tuition Scholarships
If you are a nonresident student with an outstanding academic record, you may be recommended by your department for a nonresident tuition scholarship. Awards may cover a full academic year or partial nonresident tuition only. If you receive one of these scholarships, you must enroll in a full-time program of study and/or research leading to a higher degree.

Applications are available in the Graduate Fellowship Office, 1 California Hall, and in departments. You should submit your completed application to your department by April 15.

Graduate Minority Program
The goal of the Graduate Minority Program is to increase the number of minority students entering and completing higher degrees at the University. The program assists with recruitment activities and provides financial assistance and support services for students from groups that have been traditionally underrepresented in graduate and professional programs in the United States. The University has identified Blacks, Chicanos/Latinos (Hispanics), and American Indian/Alaska Natives as the most severely underrepresented, and it recognizes that Asian Americans are underrepresented in certain fields. U.S. citizenship is required.

Graduate Minority Program awards are based on evaluation of academic promise, financial need, and available program funds. The amount of the awards is based on financial need and provides a stipend up to $5,300 plus payment of fees. Awards are made for one year and are renewable for an additional year if satisfactory academic progress is being made toward completion of the degree. A limited number of awards may be available for students in the final dissertation year.

Application fee waivers are also available for disadvantaged needy students from underrepresented groups. Graduate Minority Program applicants usually qualify for these waivers. The request forms are available at the Graduate Minority Program Office.

Applications for prospective students are included in the Graduate Application for Admission, Fellowships, and Financial Aid. Applicants are also required to complete the Financial Aid Office application with all necessary supporting documents for determination of financial need.

For further information write to the Graduate Minority Program, Graduate Division, 1 California Hall, University of California, Berkeley, CA 94720.

Teaching and Research Positions
Teaching Appointments. Many departments make graduate student instructors available to qualified graduate students, providing them with a stipend of $1,006 to $1,197 per month (based on a half-time appointment). Appointments are half time or less. Graduate student instructors must be registered full-time students. Chosen for scholarly achievement and promise as a teacher, appointees serve the apprenticeship under active supervision of the regular faculty. Advancement to candidacy, teaching experience, and continuous and satisfactory progress toward the degree are rewarded with appointment to the higher steps of graduate student instructor. In some departments, students working for a Ph.D. are required to complete a specified minimum period of teaching as part of their degree program. If interested, you should apply directly to the chair of the department in which you wish to teach.

Research Appointments. If you are a qualified registered full-time graduate student, you may seek a research appointment in the departments, centers, and institutes of the University. The stipend ranges from $867 to $1,140 per month for a half-time appointment. The duration and extent of such an appointment are variable. If interested, you should apply directly to the department, center, or institute in which you wish to work.

Stipend figures for all positions mentioned above are subject to United States income tax deductions. Figures given are gross, not net, and do not reflect deductions. If you are offered an appointment, you should obtain information about payment schedules, since payment for work performed is later than the deadline for payment of registration fees. Appointments are for one or two academic semesters and carry no guarantee of waiver of the nonresident tuition fee or any other fees. Reappointment may be recommended. Summer Session appointments may be additional and, in some cases, full time. For teaching appointments, payment is in 10 equal installments (five installments per semester). In order to ensure proper academic progress, candidates for higher degrees may not be appointed by the University in any capacity at more than half time without the express consent of the dean of the Graduate Division. Graduate students appointed half time by the University to most academic titles must be registered for at least 6 units of upper division and/or graduate work and are considered full-time students. The structure of graduate student teaching and research is currently under review on the Berkeley campus.

*Add $938 extra food allowance for each dependent over 12 years old; add $2,100 for each dependent beyond the first.
*Law students add $175 for additional law books and $30 for additional fees.
If not a California resident, add $4,290 nonresident tuition (estimated).
Academic Policies

The Semester System

Under the semester system on the Berkeley campus, the academic year is divided into two semesters and one summer session. Quarter units, either earned previously at Berkeley or at another institution, are converted to semester units by multiplying by two-thirds; for example, 180 quarter units equal 120 semester units.

Courses and Units

Most University courses are assigned a unit value. One unit represents three hours of work per week by the student, including both class attendance and preparation. Laboratory, discussion, quiz, or review sessions may or may not be given unit value.

Grades

The work of all students on the Berkeley campus is reported in terms of the following grades: A (excellent), B (good), C (fair), D (barely passing), F (failure), P (passed at a minimum level of C), NP (not passed), S (satisfactory), U (unsatisfactory), I (work incomplete due to circumstances beyond the student’s control, but of passing quality), IP (work in progress; final grade to be assigned upon completion of entire course sequence). The grades A, B, C, and D may be modified by plus (+) or minus (—) suffixes. A course in which the grades A, B, C, D or P (undergraduate students only) is received is counted toward degree requirements. A course receiving the grade S (graduate students only) is similarly counted unless otherwise specified in the course description. A course in which the grade F, NP, or U is received is not counted toward degree requirements. A course in which the grade of I or IP is received is not counted toward degree requirements until the I or IP is replaced by grade A, B, C, D, P, or S.

Grade Points

Grade points per unit are assigned as follows: A = 4, B = 3, C = 2, D = 1, and F = none. When attached to the grades A, B, C, or D, plus (+) grades carry three-tenths of a grade point more per unit, and minus (—) grades three-tenths of a grade point less per unit than unsuffixed grades, except for A+, which carries 4.0 grade points per unit as does the A.

Grade-Point Average

Your grade-point average is computed on courses undertaken in the University of California, with the exception of courses undertaken in University Extension. Grades A, B, C, D, and F are used in determining your grade-point average; grades IP, P, S, NP, and U carry no grade points and are excluded from all grade-point computations. Grade I, if assigned prior to fall 1973, is included and is computed as an F; an I grade assigned fall 1973 and later is excluded from computations. For additional information, see “Repetition of Courses” below.

Special Provisions—Graduate Students

Only courses graded A, B, C (with or without plus or minus signs), or S are accepted in satisfaction of degree requirements. Courses graded below C- do not yield unit credit toward a higher degree, regardless of your overall grade-point average. Graduate students must maintain a minimum grade-point average of 3.0 in all upper division and graduate course work undertaken in graduate standing in the University of California or its exchange programs. Please note that departments, schools, and groups may have a higher performance standard than the minimum B average required by the Graduate Division. You must also work full time at your academic or professional program unless a program with fewer units is approved by your graduate adviser, successfully complete all course work required by your department or group program, pass the required examinations and fulfill other requirements specified for the program, and advance to candidacy.

For a course extending over more than one semester in which evaluation of your performance is deferred until the end of the final semester, provisional grades of in progress (IP) may be assigned in the intervening semesters. The provisional grades are replaced by the final grade if you complete the full sequence. If you do not complete the full sequence, the Berkeley Division of the Academic Senate is authorized to regulate the award of credit.

With the consent of the department involved, graduate students may enroll in courses in the 600-series. These courses are evaluated by means of the grades satisfactory and unsatisfactory (S and U). They prepare you for appropriate master’s or doctoral examinations and do not count toward academic residence or the unit requirements for a higher degree. Beginning with fall semester 1985, you may earn 1-8 units of 601 or 602 per semester or 1-4 units per summer session. You may accumulate a maximum of 16 units in 601 and 602, respectively, toward examination preparation. No credit is allowed for work graded unsatisfactory.

Passed/Not Passed and Satisfactory/Unsatisfactory Grades

If you are an undergraduate in good academic standing (2.0 grade-point average or better, or in good academic standing under the academic probation regulations of your college or school), you may elect to take letter-graded courses on a Passed/Not Passed basis, and if you are a graduate student in good academic standing, you may elect

to take letter-graded courses on a Satisfactory/Unsatisfactory basis with the consent of your department or group. Credit for courses taken on these bases is limited to one-third of the total units that you have taken and passed on the Berkeley campus at the time your degree is awarded. Included in this one-third are any units completed in an Education Abroad program, or on another University of California campus in an intercampus visitor or exchange program, or in a joint doctoral program. For graduate degree programs, grades of Satisfactory assigned in courses numbered 299 and in courses of the 300, 400, or 600 series are excluded from this computation. If you enroll in a course offered only on a Passed/Not Passed or Satisfactory/Unsatisfactory basis, you will be graded P/NP if an undergraduate and S/U if a graduate.

A course that is required in or prerequisite to your major may be taken on a P/NP or S/U basis only upon approval of the faculty of your school or college. Courses required in a graduate major are determined by your adviser.

If you are a special or limited-status student, you may take courses on a P/NP basis at the discretion of the dean of your college or school. You may not repeat on a P/NP basis a course that you have previously taken on a letter-graded basis.

The option of being graded P/NP or S/U in a course may be cancelled if you are found to be ineligible for the option. If the course is offered on a P/NP or S/U basis only, it may be deleted from your study list at the option of your dean.

If you want honors at graduation, you should consult your college, school, or division for additional restrictions.

Your level of performance must correspond to a minimum letter grade of C- if you are to receive a passed grade, and to a B- if you are to receive a satisfactory grade.

These rules may be further limited by the faculties of the various schools and colleges and by the Graduate Council.

Grade I (Incomplete)
The grade I may be assigned if your work in a course has been of passing quality but is incomplete for reasons beyond your control. Prior arrangements must be made with the instructor, because in assigning the I grade the instructor is required to specify the reasons to the department chair.

For graduate students, the I grade will remain on record until the required work is completed. Graduate students must finish the course requirements as soon as possible. To remove an I grade from your record, you must file the appropriate petition and fees with the Office of Admissions and Records, Room 128 Sproul Hall.

Although I grades are not counted in computing the grade-point average, it is important to remove them quickly. If you have more than the maximum allowable number of I grades, you will be placed on probation with the consent of the Office of Admissions and Records, Room 128 Sproul Hall.

For undergraduate students, an I grade received in the fall semester must be replaced by the first day of instruction in the following fall semester.

An I grade received in the spring semester or Summer Session must be replaced by the first day of instruction in the following spring semester.

When you complete the required work or deferred examination, grade points will be assigned if you receive a grade of A, B, C, or D. If you repeat the course, grade points will then be assigned to the earned grade if the dean has given prior written approval to repeat it. If you repeat the course without the approval of the dean, the I grade will be converted to an F and the repeated course will be treated the same as any other course in which you receive an F. The dean of your college or school may extend the deadline for undergraduate completion of an I grade. For undergraduates, except as noted below, any I grade which has not been replaced within the above deadlines will, at the end of that time, be converted to grade F (or NP if taken passed/not passed). After that time, but not retroactively, the grade is counted in computing your grade-point average.

Exceptions: Within the above deadlines for completing an I grade, undergraduate students may notify the dean that they have not attempted completion and will not complete the work required for removal of the I grade, and may request that the grade not be replaced by an F (or NP). This procedure is limited to a maximum of two courses. Once the decision has been made, it is irrevocable; the course cannot afterward be completed by any means, including repetition of that course or any equivalent course.

Also, if a degree is conferred before the end of the above deadlines following the assignment of an I grade, the grade will not be converted to an F (or NP). However, you still have the option of removing the I grade within the above deadlines.

If you are an undergraduate student with 12 or more units of I on record, you may not register without the permission of the dean. If you have registered by mail, the registration may be cancelled.

All students who receive an I grade whenever assigned must file a Petition for Grade and Grade Points in Incomplete Course, available at department offices and at the Office of Admissions and Records, Room 128 Sproul Hall. You should file the petition with the department in which you received the I grade as soon as you and the instructor have established the date you completed the course. The filing fee is $5, payable at the Cashier's Office. You must make arrangements to complete the course at least 30 days before the deadline. The final grade cannot be recorded until you have filed the petition with the department.

Note: The I grade is not physically replaced or removed from the academic record. Completion of the work is reflected as a subsequent line entry on the record, and the units and grade points thus earned will be included in the grade-point computations at the close of the next session.

Grade IP (In Progress)
If you take a course extending over more than one term and evaluation of your performance is deferred until the end of the final term, provisional grades of IP (In Progress) are assigned in the intervening term(s). The provisional grades are replaced by one final
grade if you complete the full sequence. The grade IP is not included in the grade-point average. Effective with an IP assigned fall 1973 or later, if the full sequence is not completed as scheduled, the IP will be replaced by grade I when the instructor has no basis for assigning a grade for the term(s) completed. Further changes in your record will be subject to the rules pertaining to I grades (see above).

Changes of Grade
All grades except I and IP (see above) are considered final when assigned by an instructor at the end of a term. An instructor may request a change of grade when a computational or procedural error occurred in the original assignment of a grade, but a grade may not be changed as a result of re-evaluation of your work. No final grade except I may be revised as a result of re-examination or the submission of additional work after the close of the term.

Appeal Process
If you have a grievance about grades, you may appeal. You have grounds for appeal if you feel that considerations of race, politics, religion, sex, or sexual harassment affected your grades, or that your work was evaluated by other criteria that do not directly reflect your performance of the course requirements. The following formal procedure may not be activated unless you, the instructor in charge, an ombuds-person (or any mutually accepted third party), and the department chair have failed to resolve the dispute informally. The procedure, once initiated, is to be completed at the unit level within 20 days and at the Senate level within 40 days if both parties are in residence and the University is in regular session. The formal process must be initiated within two semesters of the alleged offense.

Appeal of Grades in Courses and Examinations
Each department or other instructional unit, or group of units reaching similar disciplines, must establish a standing Grievance Committee chair. For each case this chair will appoint an ad hoc Grievance Committee composed of three faculty members, only two of whom may be from the same unit, and two students in good standing appointed by the student association(s) of the unit(s). If no student association exists, the students are to be appointed by the ASUC or the Graduate Assembly. (The student members must have passed courses or an examination in the unit(s) at least at the level of the disputed course or examination and have been in residence for at least one year.) If you are dissatisfied with the outcome of the informal discussion, you may submit the case in writing to the Grievance Committee, which will obtain a written response from the instructor and will provide all parties the opportunity to present additional information orally or in writing. The Grievance Committee’s recommendation to the Committee on Courses, including minority view, if any, must be given in writing. If the Committee on Courses finds in your favor, it may change a failing grade to a P or S, drop a course retroactively, retain the course but eliminate the grade from the GPA, or adopt the letter grade, if any, that was recommended by four of the five members of the Grievance Committee of the unit(s).

Credit by Examination
Undergraduate Students
You may earn credit by examination in two ways:

1. If you are a new or re-entering undergraduate student, on the recommendation of the Board of Admissions you may be allowed credit by examination for knowledge that you acquired since graduation from high school, either by independent study or at another institution, and for which you have not been allowed advanced standing credit. You should apply to the Office of Admissions and Records for credit.

2. If you are a student in good standing and currently registered in a regular session, you may qualify for course credit by examination. You may apply for credit to the dean of your college or school on the Petition for Credit by Examination, obtainable from the Office of Admissions and Records. You may apply for credit by examination in any course listed in the current General Catalog that pertains to the regular sessions at Berkeley. However, the subject in which you want to be examined should be one in which, in the opinion of the instructor in charge of the department, knowledge can be tested by examination. You must file a separate petition for each course for a fee of $5 per course. In certain laboratory, field, or practice courses, neither a written nor an oral examination may be a satisfactory test. You may not receive credit by examination (1) if the credit would duplicate credit that you presented for admission to the University or (2) in elementary courses in your native language if it is not English. The examination must cover the entire
course and be administered at one sitting of no longer than three hours. It may be the regularly scheduled final examination for the class, provided that the examination meets the foregoing criteria. The result of the examination may be reported to the Office of Admissions and Records only as Passed or Satisfactory, according to the regulations governing the assignment of these grades. Further information concerning credit by examination may be obtained from the Office of Admissions and Records.

Graduate Students

If you are a graduate student in residence, you may petition to receive a limited amount of course credit toward your degree by passing examinations on material covered in certain courses in lieu of taking those courses. Laboratory courses or graduate seminar or research courses are excluded. You must be registered for at least 4 units of upper division and/or graduate course work at the time you take the examination and you must be in good academic standing (3.0 grade-point average or better). The final result of the examination will only be reported as satisfactory or unsatisfactory. You may obtain the petition from the Office of Admissions and Records. Approval to take these examinations must be given by the dean of the Graduate Division and by the course instructor, or, if no instructor is designated, by the department chair.

Midterm and Final Examinations

The number of midterm examinations varies at the discretion of the instructor. Notices will be sent to undergraduate students whose work at mid-term was of D or F quality. Final examinations are required in all undergraduate nonlaboratory courses, with the exception of courses that the Schedule of Classes indicates do not require a final examination. This requirement allows you to demonstrate mastery of course material while providing the instructor with written evidence for evaluation. You may be re-examined only to complete an incomplete grade, not to raise any other grades. The examination may last no longer than three hours and must be administered at the time announced in the Schedule of Classes. Any deviation from this announced time, including take-home examinations, requires approval from the Committee on Courses. This requirement guarantees you ample prior notice of the examination time and eliminates conflict with other examinations. The Committee on Courses considers take-home examinations that extend into final examination week to violate both the letter and spirit of the three-hour limit. Instructors or departments must return your final examinations or copies of them, or retain them for 13 months after the date of the examination. They must give you access to retained examinations under the supervision of the instructor or a designee. The department is responsible for ensuring compliance with this regulation for all faculty, including visiting faculty and faculty on leave.

Other Academic Policies

Grade Reports and Transcripts

After the close of each semester, the Office of Admissions and Records will mail you an unofficial copy of your academic record, which will include courses taken and grades received for the previous semester. For students admitted fall quarter 1975 and later, this copy will reflect all work undertaken on the Berkeley campus. For students admitted prior to fall quarter 1975, the copy may be partial and cover only course work undertaken fall quarter 1976 and later. Official copies of the academic record transcripts are also available from the Office of Admissions and Records, Room 128 Sproul Hall. After the last date for final examinations, transcripts for registered students must be held for inclusion of grades for the semester and, therefore, will not be available for approximately 30 working days. Partial transcripts will not be issued. At times other than the end of the semester, the normal period required for processing and issuing transcripts for both registered and former students is five to seven working days. The charge for each transcript of every undergraduate, graduate, or separate Summer Session record is $3 and $1 for each additional copy of any record requested at the same time. The total amount due must accompany the application. If you urgently need a transcript that would normally take five days to issue, it can be made in 24 hours at a special charge of $8 and $6 for each additional copy.

Registration Cards

Your registration card is your official identification as a student at Berkeley. You should keep it with you at all times. After you have paid all applicable fees and submitted your Schedule Request Form, you will receive a Confirmed Class Schedule which will have your validated registration card attached to it. As a supplement to the registration card you are also expected to have a photo ID card, which will eventually replace the registration card. For more information, go to 120 Sproul Hall.

Change of Name and Address

If you are moving, you should go to 120 Sproul Hall to fill out a change of address form.

Probation and Dismissal—Graduate Students

Graduate students are subject to probation and dismissal for academic deficiencies at the discretion of the dean of the Graduate Division under the policies established by the Graduate Council of the Academic Senate. Probation may be initiated by the dean of the Graduate Division or by recommendation of the chair of graduate advisers in your major department, school, college, or graduate group. The most common causes of probation are a poor GPA, incomplete grades in 100-200 series courses, and written work of substandard quality in courses central to your program of study. Dismissal for academic deficiencies is normally carried out by the dean on the recommendation of the chair of the graduate advisers, but the dean may also initiate dismissal after reviewing your record. You may appeal dismissal for academic reasons to the appropriate committee of the Graduate Council of the Academic Senate.

Normative Time—Doctoral Students

This program is obligatory for all doctoral students who first enrolled on the Berkeley campus in fall 1978 and afterward, regardless of their original degree goal. Students
who entered earlier may elect to join the program. The conditions of the Normative Time Program are as follows:

1. Upon entry to a Berkeley doctoral program, you proceed with course work in the normal fashion until you have completed all requirements for advancement to candidacy. During this period you are registered continuously, except for semesters on approved withdrawn status as appropriate, and are liable for payment of all fees and applicable tuition.

2. Once you have been advanced to candidacy for the doctoral degree, you become eligible in subsequent semesters for a fee-offset grant equal in amount to the educational fee.

3. You are awarded the grant each semester until your accrued time in graduate status exceeds the normative time set for your program of study. Accrued time is the number of semesters since you first registered, less a maximum of two semesters of approved withdrawn status, and any other adjustments that may be approved by the dean of the Graduate Division.

4. During the entire period of study, you must be registered continuously, except when you are on approved withdrawn status, or during the semester when the filing fee is used in lieu of registration.

You will be informed of your eligibility and the number of semesters of fee-offset grant support available to you when you are advanced to candidacy. You must attain formal candidacy for the doctoral degree before the first day of instruction in the semester for which the first grant is awarded. In addition, you are required to apply annually by May 1 for renewal of the grant.

The following normative times in semesters have been established:

- Agricultural and Environmental Chemistry (13)
- Agricultural and Resource Economics (12)
- Anatomy (10)
- Ancient History and Archaeology (14)
- Anthropology (12)
- Applied Mathematics (11)
- Architecture (12)
- Asian Studies (10)
- Astronomy (10)
- Biochemistry (11)
- Bioengineering (10)
- Biophysics (10)
- Biostatistics (10)

- Wood Science and Technology (10)
- Zoology (10)

Access to Records

You are entitled by law and University policy to examine and challenge most of the records that the University maintains on you. These records are confidential and in most circumstances may be released to third parties only with your prior consent. Such matters are detailed in the Berkeley Campus Policy Governing Disclosure of Information from Student Records, available in the Office of the Director of Student Activities and Services, 102 Sproul Hall.

Leaving Berkeley

Cancellation of Registration

Undergraduate Students

If you paid registration fees but are unable to attend classes, you may have your enrollment and registration cancelled by notifying the Office of Admissions and Records in writing before the first day of instruction. Beginning with the first day of instruction, you must request a formal withdrawal from
the University rather than a cancellation (see below). You cannot cancel your registration by nonattendance of classes alone. A refund of all but $10 of the registration fee is made on cancellations except for the $50 deposit paid by new undergraduates.

Graduate Students
If you have paid registration fees and decide before the first day of instruction not to attend (consult the Academic Calendar at the front of this catalog for the appropriate date), you must file the Cancellation of Registration by Mail form. Once the semester has begun, if you must discontinue your studies you must apply for a formal withdrawal as described below. Cancellation of Registration by Mail forms are available from the Petitions Desk, Graduate Division, 1 California Hall. Please note that students who cancel their registration must also apply for a formal withdrawal.

Absences and Withdrawal

Undergraduate Students
You are responsible for short absences during the semester. Scholarship recipients who wish to withdraw officially from the University may be required to refund the scholarship money. If you must discontinue your studies for the remainder of the semester, you should obtain a Notice of Withdrawal form from the Office of Admissions and Records and submit it, together with your registration card, for the first of several required endorsements at the earliest possible date. If the form is submitted before the first day of classes, you will be entitled to the same refund as would be made on cancellation of registration. The refund of fees is prorated thereafter (see Schedule of Refunds). The amount of refund is determined not by the date on which you discontinue your studies, but by the date on which the Notice of Withdrawal is first presented for endorsement. If you are eligible for further registration in the University, you will be entitled to a Statement of Honorable Withdrawal. You must not discontinue the work of a semester without formal notice; doing so may result in the assignment of F grades, academic dismissal, and loss of eligibility for readmission to a future semester.

If you have been dismissed for academic or disciplinary reasons, you are generally not eligible for readmission. If you have cancelled your registration, withdrawn, or been absent for a semester, you will be required to apply for readmission in any future semester you wish to attend. The Application for Readmission available from the Office of Admissions and Records must be accompanied by a nontransferable, nonrefundable readmission fee of $35. The Application for Readmission will not be considered until the fee has been paid. The final filing dates are June 15 for fall semester and October 1 for spring semester.

Graduate Students
If you want to withdraw from the University at the end of a semester or find it necessary to discontinue studies before the end of a semester, you must apply for formal withdrawal. Failure to obtain a formal release indicates that you have voluntarily withdrawn from the graduate program and terminated your intent to proceed to the degree for which you were admitted. Withdrawal petitions are available from the Petitions Desk, Graduate Division, 1 California Hall, and are filed with the same office. During the period of absence, you are exempt from all fees and are expected, in turn, to maintain no connections with the University. You may not use University facilities (except for uses accorded the general public) or place demands on faculty time. Withdrawal requires the endorsement of your department, school, or group and the dean of the Graduate Division.

Refunds
Armed Forces. If you enter the armed forces before the end of the sixth week of the semester, you may receive a full refund of the regular session registration fee if you received no credit for the courses you were taking. No refund will be made after that deadline.

New Undergraduate Students. If you withdraw from the University before the first day of instruction, your registration fees are refunded except for the $50 Statement of Intention to Register fee. From the first day of instruction and afterward, the $50 Statement of Intention to Register fee is withheld from the registration fee, and the schedule of refunds is applied to the balance of fees assessed.

All Continuing and Readmitted Students and New Graduate Students. There is a service charge of $10 for cancellation of registration or withdrawal before the first day of instruction. After the first day of instruction the schedule of refunds is applied to the total fees assessed.

Schedule of Refunds. The schedule of refunds refers to calendar days, beginning with the first day of instruction. Percentages listed (days 1-35) should be applied respectively to each tuition, educational fee, University registration fee, and other student fees. The effective date for determining a refund of fees is the date on which the Notice of Withdrawal is first presented for endorsement. No University services will be provided to you after that date. Students receiving federal financial aid (Pell Grant, SEOG, NDSL, or GSL) should be aware that a percentage of any refund from housing or fees will be used to repay those loans. For students on the Deferred Payment Plan, the amount of refund is based upon total fees assessed (not actually paid) at the time the withdrawal petition is filed; these students may still have a financial obligation to the University upon withdrawal. A written policy about refunds is available from the Financial Aid Office.

Graduation from Berkeley

Undergraduate Students
Declaration of Candidacy. If you expect to complete work for your degree by the end of a semester, you must declare your candidacy at the beginning of the semester by filling in the appropriate bubble on the back of your Schedule Request Form. You
have until the end of the third week of classes in which to declare. Nonregistered students: If you are not registered at the time you want to declare candidacy, you must come in person to 128 Sproul Hall to fill out the form “Candidate for Bachelor’s Degree for a Nonregistered Student” by the end of the third week of classes.

Degree check. The Office of Admissions and Records will check your records to ensure that you have completed the University requirements (American History and Institutions and Subject A) necessary for graduation and your college or school will check for the fulfillment of major, department, and college or school requirements.

Confirmation of Candidacy. Your Confirmed Class Schedule will indicate whether or not you have been advanced to candidacy. If you think there has been an error, go to 128 Sproul Hall.

Graduate Students
Before a graduate degree can be conferred, candidates must have advanced to candidacy and completed the master’s thesis or doctoral dissertation and any required comprehensive or oral examinations. For detailed procedures and requirements, see the section “Graduate Education,” beginning on page 36.

Certificate of Completion
A Certificate of Completion is official proof that you have been granted the degree for which you were working. You may request a certificate from 128 Sproul Hall and it will be sent to you from four to six weeks after the end of the semester.

Commencement
Commencement exercises to honor students who have won baccalaureate and graduate degrees and to give recognition and awards to students who are graduating with distinction are held each year in May. Students who have won their degrees in the previous fall semester or in Summer Session are welcome to participate. The ceremonies are held by individual schools or colleges or, in the College of Letters and Science, by individual department. There are about 60 ceremonies each year. The ceremonies consist of speakers and the presentation of degrees and awards and are followed by a reception, sometimes a dance, and for at least one department a picnic and volleyball game.

Students may rent caps and gowns through the ASUC and may make arrangements for photographs to be taken or video tapes made. See your department office for additional information.

Diplomas
Diplomas are not given out at Commencement but are available some four months afterward. You will be notified by the Office of Admissions and Records that your diploma is ready, and you may pick it up at 128 Sproul Hall or request that it be mailed to you for a $5.00 mailing fee.

Student Conduct and Appeals

Student Conduct
When you enroll in the University, you assume an obligation to conduct yourself in a manner compatible with the University’s function as an educational institution. Rules concerning student conduct, student organizations, use of University facilities, and related matters are set forth in both University policies and campus regulations, copies of which are available upon request at the Office of Student Activities and Services, 102 Sproul Hall. You should pay particular attention to the booklet Berkeley Campus Regulations Implementing University Policies (October 1985).

Cheating or Plagiarism
Achievement and proficiency in subject matter include your realization that neither is to be achieved by cheating. An instructor has the right to give you an F on a single assignment produced by cheating without determining whether you have a passing knowledge of the relevant factual material. That is an appropriate academic evaluation for a failure to understand or abide by the basic rules of academic study and inquiry. An instructor has the right to assign a final grade of F for the course if you plagiarized a paper for a portion of the course, even if you have successfully and, presumably, honestly passed the remaining portion of the course. It must be understood that any student who knowingly aids in plagiarism or other cheating, e.g., allowing another student to copy a paper or examination question, is as guilty as the cheating student.

Sexual Harassment Procedure
The Berkeley campus Student Grievance Procedure (Appendix II to the Berkeley Campus Regulations Implementing University Policies (October 1985)) gives you an opportunity to resolve complaints alleging discrimination based on race, color, national origin, sex, handicap, age, and sexual orientation. You may also use the procedure to resolve any complaints you may have alleging that any other rules or policies of the Berkeley campus were inappropriately applied and resulted in an injury to you. The procedure is not applicable to certain kinds of complaints for which other appropriate appeals procedures exist, such as a grade appeal based on the application of nonacademic criteria. (See "Appeal of Grades in Courses and Examinations," on page 55 for a description of the grade appeal process.) The procedure contains important time limitations and provisions about the interrelationship between this procedure and other campus complaint procedures. Inquiries about this procedure or its interrelationship with other campus complaint procedures may be directed to the Assistant Chancellor, Affirmative Action and Special Projects, 642-1991. Copies of the procedure are available in 102 Sproul Hall.
School of Business Administration

Office: 350 Barrows Hall, 642-7989
Dean:
Raymond E. Miles, Ph.D.
Associate Deans:
Mark B. Garman, Ph.D. (Academic Affairs)
Robert A. Meyer, Ph.D. (Operations and Budget)
John G. Myers, Ph.D. (Curriculum)

Directors:
David H. Pyle, Ph.D. (Ph.D. Program)
David H. Downes, Ph.D. (M.B.A. Programs)
Karlene H. Roberts, Ph.D. (Undergraduate Program)

The Undergraduate School of Business Administration

The Undergraduate School of Business Administration admits students at the junior level and offers a curriculum leading to the undergraduate degree of Bachelor of Science in Business Administration. The primary function of the school is to prepare students for responsible positions in administration and management. An excellent foundation is also provided for students preparing for graduate professional degrees in business, law, and public policy.

Prior to admission to the school, you should obtain an Announcement of the Undergraduate School of Business Administration, available in 310 Barrows Hall. The announcement contains complete information concerning academic qualifications for admission with details about important prerequisites and degree requirements. Because there are many more applicants than spaces available, completion of the prerequisites does not guarantee admission to the school. We expect you to have a strong academic record in your lower division work either at Berkeley or elsewhere, particularly in the courses specified as prerequisites. Requests for advice on programs of study and general information should be addressed to the School of Business Administration, 310 Barrows Hall, University of California, Berkeley; Berkeley, CA 94720.

Lower Division. Students preparing for admission to the Undergraduate School of Business Administration may complete required lower division courses in any college or school in the University, or equivalent courses at other institutions. Counselors in the Undergraduate School of Business Administration will assist lower division students in selecting courses prerequisite to the upper division business administration curriculum. Detailed information on required preparation is available in the Announcement of the Undergraduate School of Business Administration.

Upper Division. Upper division courses which are required in Business Administration are:

110—Microeconomic Analysis for Business Decisions; 111—Macroeconomic Analysis for Business Decisions; 120—Managerial Accounting; 130—Financial Management; 150—Organizational Behavior; 160—Marketing; 170—Social and Political Environment of Business.

Beyond these requirements, additional courses within a subject matter field must be taken. Advisers will assist you in the selection of these courses. A minimum of 37 units in upper division business courses is required.

The following subject matter fields are available:

Accounting, economic analysis and policy, finance, management science, marketing, organizational behavior and industrial relations, production management, real estate, and urban and land economics.

Graduate School of Business Administration

The Graduate School of Business Administration offers curricula leading to the Master of Business Administration degree and the Ph.D. degree.

The M.B.A. degree provides advanced and specialized training in a variety of fields of management, research, and decision making. It provides opportunities for placement in executive positions in both public and private institutions. Curricula are divided into required and elective courses. The required courses typically provide exposure to the full range of issues in business and public management. The elective courses offer you the opportunity to develop a program oriented toward your special educational interests. Class time is divided approximately equally between the two types. The program requires four semesters to complete.

The business school maintains a busy placement center visited annually by some 400 companies that seek to employ students for both permanent and summer jobs. An active alumni association provides students with opportunities for maintaining contact with peers and faculty through meetings and seminars.

The Ph.D. program in business administration prepares students for scholarly careers calling for advanced skills in research. Most graduates of this full-time program take positions in major universities, in research-oriented professions in the field of business, or in government. The program is intensive, demanding (especially in mathematical skills), and may require from three to five years to complete.

Preparation for Graduate Study. Admission to the program is open to students with an accredited bachelor's degree from any field. No preference in admission is given to any previous field of study. However, applicants should possess strong skills in writing, oral communications, and mathematics. In the case of mathematics, you must have completed a course in differential calculus within the last five years. Otherwise, after admissions but before enrollment you should complete an appropriate college-level calculus course at a recognized institution. Your application will be evaluated on the basis of your scholastic achievement, intellectual skills, maturity, and demonstrated capacity for leadership.

The Graduate Program. In addition to the Ph.D. degree, the graduate school offers two separate M.B.A. programs. The San
Francisco M.B.A. evening program is designed for students who want to maintain their employment while undertaking their studies. The course of study may be completed in as few as three years by taking two or three courses per semester. However, most students will find it difficult to maintain this pace and will want to extend their work over a longer period. The Berkeley day M.B.A. program is intended for full-time students and requires two years to complete.

Both programs include a set of required core courses covering basic topics such as accounting, finance, marketing, and organization behavior. If you have achieved competence in one or more of these areas before admission, you may be able to waive one or more basic courses, either by previous course work or by passing a special examination. In either case, you must substitute an elective course for the waived core course. After completion of the core courses, you will undertake a series of elective courses in advanced topics to finish your course of study. Fields of study include accounting, finance, economic analysis, international business, marketing, management science, organizational behavior and industrial relations, public policy, real estate, and various area programs.

Where space is available, core and advanced courses of the Berkeley program are open to students from other fields of study on the campus who have satisfied prerequisite requirements. Since available classroom space is often limited, nonbusiness students may not find it possible to take any given course in a specific semester. Students should consult the graduate school office concerning space availability and faculty in their own fields for aid in planning to take business school courses.

Students in the Ph.D. program should have a strong background in one or more fields of business as well as the intensive study of quantitative techniques, decision making, and social science theory. Students in the program frequently take courses from a number of other Berkeley departments, e.g., engineering, computer science, statistics and economics, in order to develop unique research expertise. Many applicants have advanced degrees, but this is not a requirement for entry.

Applications may be obtained by writing to the Graduate School of Business, 350 Barrows Hall, University of California, Berkeley, Berkeley, CA 94720.

College of Chemistry
Office: 420 Latimer Hall, 642-0473

Dean:
C. Judson King, Sc.D.

Associate Dean (Undergraduate Affairs):
Scott Lynn, Ph.D.

Assistant Deans:
Dennis W. Hess, Ph.D.
Rollie J. Myers, Ph.D.

The College of Chemistry comprises two departments, the Department of Chemistry and the Department of Chemical Engineering. Both disciplines provide the opportunity for tackling a number of major world problems. Overcoming the energy shortage, recovering and utilizing dwindling mineral resources, developing new drugs and food supplies, and synthesizing new products biochemically all depend centrally upon chemistry and chemical engineering. Students entering these fields will spend their careers in the middle of the action on these and other highly important areas of research.

Both departments in the College of Chemistry rank among the most prominent in their fields and both are renowned for their breadth of activity in a diverse range of disciplines and applications. At the same time, with only two departments the college is a relatively small and comfortable place in which to work. Faculty members have many demands on their time, but students are able to develop close and satisfying contacts with them while in the college.

The college offers programs leading to the B.S., M.S., and Ph.D. degrees in both chemistry and chemical engineering. The B.S. degree in chemistry is intended for students who are primarily interested in careers as professional chemists. The B.S. degree in chemical engineering is intended as preparation for a career in chemical engineering and related disciplines and permits a broad range of interdisciplinary options in such areas as energy, applied biology, and materials processing. The College of Letters and Science offers a chemistry major leading to an A.B. degree through a curriculum with a greater proportion of courses in the humanities and social sciences than is included in the B.S. chemistry program. It is intended for students interested in careers in teaching, medicine, or other sciences in which a basic understanding of chemical processes is necessary.

Advanced undergraduate and graduate students have opportunities to conduct research in synthetic and structural chemistry of organic and inorganic compounds, chemistry of natural products, theoretical chemistry, nuclear chemistry, physical chemistry, biophysical chemistry, solid-state and surface chemistry, catalysis, process design and control, polymers, food processing, and biochemical engineering.

Recommended high school preparation for chemistry or chemical engineering should include chemistry (1 year); physics (1 year); mathematics (4 years) including trigonometry, intermediate algebra, and analytic geometry. If you have a choice, the preferred foreign language is German.

For a more specific description of the programs for the various degrees, as well as options of specialization, see the Announcement of the College of Chemistry.

Organizational Units

Chemical Engineering
Department Office, 201 Gilman Hall, 642-2291

Chemistry
Department Office, 419 Latimer Hall, 642-5882
Graduate School of Education

Office: 1501 Tolman Hall, 642-3726

Dean: Bernard R. Gifford, Ph.D.
Associate Dean: Charles B. Benson, Ph.D.
Assistant Dean: Ronald K. H. Choy, Ph.D.

The Graduate School of Education is committed to programs of instruction, research, and service that will enhance the profession of education. The school prepares professionals who will apply their understanding of discipline-based theory and research to the complex and challenging responsibility of educating students. It also trains researchers and scholars who will direct their academic study to the improvement of educational practices and institutions.

The school offers four kinds of graduate programs: (1) credential programs for prospective elementary and secondary school teachers who are interested in acquiring a strong grounding in developmental psychology, writing, science, or mathematics and in applying this knowledge to problems of teaching and learning; (2) advanced credential programs for experienced school practitioners who are intent on developing specialized leadership capacity in administration, reading, or mathematics; (3) advanced professional degree programs leading to the M.A., M.A.T., or Ed.D.; and (4) advanced academic degree programs leading to the M.A. or Ph.D. degree. In addition, the school provides undergraduate students with courses that contribute to their liberal arts education and preparation for citizen involvement with the public schools and universities.

The school’s programs are organized into five principal areas of study: Education in Mathematics, Science and Technology; Education in Language and Literacy; Educational Administration; Educational Psychology; and Foundations of Curriculum and Teaching.

• Education in Language and Literacy emphasizes reading, writing, and first and second language acquisition in educational settings. The approach is interdisciplinary and includes the study of linguistics, psycholinguistics, sociolinguistics, and cognitive psychology.

• Educational Administration focuses on the development of a broad understanding of the structure of educational systems; the quality, effectiveness, and equity of educational programs; and the nature of the changing social, political, fiscal, and legal contexts of education. School leadership and management, higher education leadership and management, political and policy analysis, financing and organizational design, and educational planning and evaluation are the major areas of study.

• Educational Psychology focuses on two areas: development phenomena, including cognitive development, social development, and individual differences; and quantitative methods, including measurement, psychometrics, research methods, and data analysis. Students must have one of these areas of focus as well as one selected area of application in education.

• Foundations of Curriculum and Teaching focuses on the social and cultural contexts within which schools operate. The relationship of social, cultural, philosophical, and political events to curriculum and pedagogy in the public school are examined.

For details about the school’s programs and information concerning admissions requirements and procedures, consult the Announcement of the Graduate School of Education as well as the pamphlets that are available for credential programs and each of the five principal areas of study. These materials may be obtained by writing or visiting the Graduate School of Education, Education Admissions Office, 1607 Tolman Hall, University of California, Berkeley, CA 94720, or by calling (415) 642-0841.

College of Engineering

Office of the Dean: 320 McLaughlin Hall; graduate information, call individual departments; undergraduate information, call 642-7594.

Deans:
Karl S. Pister, Ph.D.
Morrough P. O’Brien, D.Eng. (hon.), LL.D. (hon.) (Emeritus)
George J. Maslach, B.S. (Emeritus)

Associate Deans:
Michael M. Carroll, Ph.D., D.Sc.
George Leitmann, Ph.D.
Robert M. Oliver, Sc.D.
Alan M. Portis, Ph.D.

Assistant Dean:
Arthur Gill, Ph.D.

The College of Engineering offers programs in a wide variety of engineering fields. These programs are based on the concept that the engineer must be well-grounded in the sciences, humanities, and social studies, with a full command of the principles and practices of the profession.

Four-year undergraduate curricula are offered in the following professional fields: civil engineering, electrical engineering, computer science, industrial engineering, mechanical engineering, mineral engineering, naval architecture, nuclear engineering (all accredited by the Accreditation Board for Engineering and Technology, Inc.). Programs are also offered in manufacturing engineering, materials science, operations research, and petroleum engineering. Each of the curricula is administered by a department within the college and each emphasizes a core program of science and engineering subjects related to the particular field. In addition, there is a curriculum in engineering science with programs in bioengineering, engineering geoscience, engineering mathematics and statistics, and engineering physics. Five double major programs leading to a B.S. degree in two fields are offered. These are materials science and engineering or nuclear engineering with electrical engineering and computer science or mechanical engineering and materials science and engineering with nuclear engineering. Double major programs in materials science and engineering/chemical engineering and nuclear engineering/chemical engineering are offered jointly by the College of Chemistry and the College of Engineering. The unit requirement for the bachelor’s degree is normally 120 semester units, within which
the student is expected to satisfy graduation requirements. For valid reasons, this minimum may be exceeded by 10 units. For unit extension beyond 130 units, prior approval of the dean is required for registration.

Entering freshmen should have completed the following subjects:

High School Subjects and Units:

United States history—1 (1 year of United States history or ½ year of United States history and ½ year of civics or American government.)

English—4

Mathematics—1

Physics—1

Chemistry—1

Foreign language—2

Other college preparatory subjects—2

Total units—15

Graduate programs are offered leading to the Master of Science and Doctor of Philosophy degrees for study emphasizing engineering and applied sciences, and Master of Engineering and Doctor of Engineering degrees for advanced professional studies of design development. Fields of study include civil engineering, electrical engineering and computer sciences, industrial engineering and operations research, mechanical engineering, nuclear engineering, ceramic engineering and metallurgy, materials science and mineral engineering, engineering geoscience, fluid mechanics, applied mechanics, and naval architecture and offshore engineering. Interdisciplinary graduate programs are also available in the fields of bioengineering, ocean engineering, plasmas, hazardous waste management, integrated sensors, robotics and manufacturing, and rock mechanics. More information will be found throughout the engineering sections of this catalog and in the Announcement of the College of Engineering. The announcement is available from the department of interest or the College of Engineering, 308 McLaughlin Hall, University of California, Berkeley; Berkeley, CA 94720.

Organizational Units

Civil Engineering
Department Office, 760 Davis Hall, 642-3261
Chair: Robert L. Taylor, Ph.D.

Electrical Engineering and Computer Sciences
Department Office, 231 Cory Hall, 642-3214
Chair: Eugene Wong, Ph.D.

Computer Science Division
Division Office, 571 Evans Hall, 642-1024
Associate Chair: Domenico Ferrari, Dr.ing.

Industrial Engineering and Operations Research
Department Office, 4135 Etcheverry Hall, 642-5484
Chair: Shmuel S. Oren, Ph.D.

Materials Science and Mineral Engineering
Department Office, 210 Hearst Mining Building, 642-3801
Chair: James W. Evans, Ph.D.

Mechanical Engineering
Department Office, 6189 Etcheverry Hall, 642-1338
Chair: Clayton D. Mote, Jr., Ph.D.

Naval Architecture and Offshore Engineering
Department Office, 202 Naval Architecture Building, 642-5464
Chair: Alaa E. Mansour, Ph.D.

Nuclear Engineering
Department Office, 4153 Etcheverry Hall, 642-5010
Chair: Thomas H. Pigford, Sc.D.

College of Environmental Design

Office of the Dean: 230 Wurster Hall, 642-0830
Dean: Richard Bender, M.Arch.
Associate Deans: Thomas G. Dickert, M.L.A., M.C.P. Raymond Lifchez, M.S.

The College of Environmental Design brings together departments that deal with the functional and aesthetic quality of the physical environment.

Designing the environment is an exceedingly complex responsibility. It requires a knowledge of the social, economic, technical, and institutional forces that produce the built environment, a knowledge of the natural environment in which people live, and aesthetic sensitivity. The professional designer and the responsible citizen must be familiar with the complex values that motivate different groups in society, values that often compete and sometimes conflict with environmental conditions.

The college’s program aims to provide tools for the mastery of technical skills and the ethical underpinnings of the professions. The tools are skills, methods, and habits that help to create sound solutions and sensitive design.

The college seeks to prepare people for informed participation in environmental debate and for important roles in research and academic life as well as for the design professions. Its success can be measured by the quality of its students and faculty, their accomplishments, and the college’s continuing ranking among the great schools in the field.

The college is composed of the departments of Architecture, City and Regional Planning, Landscape Architecture, and Environmental Design. Courses whose content,
philosophy, and method provide a common base of knowledge for the several disciplines within the College of Environmental Design are taught at the undergraduate level as Environmental Design (ED) courses and are listed first in the course listings section of the catalog.

Undergraduate students entering the college enroll in a four-year curriculum leading to the academic degree of Bachelor of Arts (A.B.) with a major in either architecture or landscape architecture. Individual majors are available with special approval for continuing students. On the graduate level the college offers curricula leading to the Master of Architecture, Master of Landscape Architecture, Master of City Planning, and Master of Arts in Design; and the Doctor of Philosophy in Architecture, Environmental Planning, and in City and Regional Planning. The Master of Architecture degree fulfills the first professional degree applicable to requirements for state licensing in architecture. The Master of Landscape Architecture degree is similarly applicable to the certification of landscape architects.

Undergraduate Admission
High school preparation for the college should include four years of mathematics, one year of physics, and one year of biology or other natural science. Additional preparation could include freehand drawing or introductory drafting. Transfer students who have completed 60 semester units should have completed the prerequisite course work given in the Announcement of the College of Environmental Design. Procedures for undergraduate admission, registration, and enrollment are identical to those of the University in general. Enrollment in the college beyond 130 semester units is subject to approval of the dean. Consequently, a transfer student who has credit for more than 70 semester units is not normally admitted to the undergraduate program. An undergraduate major in architecture or landscape architecture is not prerequisite for admission to graduate study in these fields. Students who are interested in graduate study should obtain from the Dean of the Graduate Division the circular Admission to Graduate Study, which outlines general University requirements for admission. Application is made directly to the Graduate Division of the University.

Degree Requirements
The A.B. degree programs in the college require the completion of 120 units distributed according to regulations which appear in the Announcement of the College of Environmental Design. These requirements include completion of (1) a major requirement, (2) an ED core requirement, (3) a breadth requirement, (4) a senior residence requirement, (5) a scholarship requirement, as well as the general University requirements of Subject A, American history, and American institutions.

Major Requirements. Requirements for the major are specified by individual departments or programs and may not be fewer than 27 units.

ED Core Requirement. A minimum six courses (21 units) as specified in the Announcement of the College of Environmental Design.

Breadth Requirement. A minimum of 12 courses (40 units) taken outside the College of Environmental Design from a list of acceptable courses published by the college, including study in the following areas: (1) reading and composition, (2) natural science, physical science, and math, (3) social science, (4) humanities and arts. A more detailed distribution of these subject requirements may be found in the Announcement of the College of Environmental Design.

Minor Programs
The College of Environmental Design offers several minors. Minors consist of at least five upper division courses and are offered as an optional program to encourage coherence in course work taken outside the major and to give recognition to the work when it is completed. The following minors are currently being offered: social and cultural factors in environmental design, open to students not in the College of Environmental Design; history of the built environment; landscape architecture, open to students not in the College of Environmental Design; and landscape design, open to architecture majors only. For further information, contact the Department of Instruction in Environmental Design, 234 Wurster Hall.

Information on the courses and degree programs in Architecture, City and Regional Planning, Environmental Design, and Landscape Architecture can be found in those sections of this catalog, as well as in the Announcement of the College of Environmental Design.

Department Office: 232 Wurster Hall, 642-4942
Chair: Howard Friedman, A.B., F.A.I.A.

City and Regional Planning
Department Office: 228 Wurster Hall, 642-3256
Chair: Edward Blakely, Ed.D.

Landscape Architecture
Department Office: 202 Wurster Hall, 642-4022
Chair: Randolph T. Hester, Jr., M.L.A.
Graduate School of Journalism
Office: 121 North Gate Hall, 642-3383
Dean:
Ben H. Bagdikian, A.B.
Acting Associate Dean:
Thomas C. Leonard, Ph.D.

The Graduate School of Journalism offers a program leading to the degree of Master of Journalism (M.J.). The program provides training in the skills of journalism and a knowledge of the traditions and principles of the profession, combined with the study of other disciplines that constitute the subject matter of journalism. The program is based upon the idea that the best possible preparation for a career in journalism is a sound liberal arts education, with specialized training in journalism at the graduate level.

Just as important as perfecting skills or acquiring knowledge is developing the journalist’s attitude: detached, curious, and skeptical, but still critical because of a concern for basic moral values and the conviction that the citizen’s access to information is a fundamental need of a free people.

Though the school places strongest emphasis on the development of writing and reporting skills, the curriculum also includes courses intended to increase understanding of the role of journalism in society. Students are expected to become thoroughly acquainted with recent history and to seek to understand the political, social, and cultural problems of the day.

The curriculum is intended to prepare students for careers in any of the communications media, but basic skills in writing and reporting are fundamental to all. Courses designed to develop these skills include those in news writing, political reporting, science writing, and coverage of cultural, business, and legal affairs. A few courses offer training in special techniques, such as those used in copy editing, writing for magazines, and reporting for television or radio.

Courses that provide background information about the profession include those in the mass media and society; the history, traditions, and ethics of journalism; legal aspects of the media; public opinion and propaganda; and the literature of journalism.

Candidates for the M.J. degree are expected to complete their work for the degree in four semesters. They must complete 36 units in approved upper division and graduate courses, of which at least 24 must be in graduate courses in journalism, and must present an acceptable thesis or reporting project. Students generally take about one-third of their courses in disciplines other than journalism.

Applicants for graduate study should hold a bachelor's degree comparable to that given by the University of California. Requirements and procedures are outlined in the brochure Graduate Application, Fellowship, and Financial Aid, available at the Office of the Dean of the Graduate Division, and in the Announcement of the Graduate School of Journalism.

The Graduate School of Journalism offers a variety of courses for undergraduates, ranging from small writing and reporting seminars to large lecture courses. Undergraduates with a special interest in journalism may also attend graduate seminars when there is room, but only with the consent of the instructor.

Further information, application requirements, and copies of the Announcement of the Graduate School of Journalism are available from the Journalism Office, North Gate Hall.

School of Law
Office: 225 Boalt Hall, 642-1741
Administrative Officers:
Dean: Jesse H. Choper, LL.B.
Associate Dean: Jan Vetter, LL.B.
Assistant Dean: W. James Hill, LL.B.
Vice Chair, Jurisprudence and Social Policy: Charles J. McClain, Jr., Ph.D., J.D.

The School of Law (Boalt Hall) has a three-year curriculum leading to the Juris Doctor (J.D.) degree. In addition to preparing its students to practice law, the school attempts to develop the study of law and legal institutions and to foster legal research. The school is a member of the Association of American Law Schools and is approved by the American Bar Association. Its graduates are qualified to become applicants for admission to practice in any state of the United States.

No single “pre-law” major is required or even recommended. However, these suggestions are made: students should learn to write by taking courses in which their work is vigorously edited; enroll in courses demanding analytical skills; obtain some breadth in humanities and social sciences that will help in understanding the social context within which legal problems arise; and acquire a general understanding of economic principles and the business world. However, prospective students should not be deterred from pursuing the study of law merely because their undergraduate education has not emphasized all these areas. Diversity of background enhances and enriches the legal experiences of all students.
Graduate Program in Jurisprudence and Social Policy. The School of Law offers a graduate program in Jurisprudence and Social Policy, leading to M.A. and Ph.D. degrees, that is unique in legal education. The program is founded on two related convictions: (1) legal scholarship should have intimate connections with the social sciences; and (2) education in a law school should not be confined to the professional training of future lawyers.

The program is multidisciplinary, involving faculty from Law and a variety of humanities and social science disciplines, including economics, criminology, history, philosophy, political science, and sociology.

It is designed for students who are interested in careers in teaching, research, policy analysis, or public administration. Doctoral dissertations are currently being undertaken on such subjects as law and educational administration, the history and jurisprudence of natural resources, and modern European jurisprudence.

Study for a degree in Jurisprudence and Social Policy may be combined with study for a J.D. degree. Further information on admissions procedures and program requirements may be obtained from the Graduate Secretary, JSP Program.

The school also offers programs leading to the degree of Master of Laws (LL.M.) or the degree of Doctor of the Science of Law (Juris Scientiae Doctor, J.S.D.).

The school does not offer a part-time or evening program. Most work in the first year is prescribed; the second and third years' courses are elective.

College of Letters and Science (L&S)

Student Services: 113 Campbell Hall, 642-1483

Dean: Leonard V. Kuhi, Ph.D.

Associate Dean: William Nestrick, Ph.D.

Assistant Deans: (To be announced)

Divisional Deans:

Beth Burnside, Ph.D., Biological Sciences
Geoffrey F. Chew, Ph.D., Physical Sciences
Donald M. Friedman, Ph.D., Humanities
Gerald A. Mendelssohn, Ph.D., Social Sciences
Nancy Scheper-Hughes, Ph.D., Freshman and Sophomore Studies

The College of Letters and Science offers undergraduate students a variety of programs leading to the Bachelor of Arts degree in four academic years of full-time study.

For the student, the first two years are a time of exploration, experimentation, and decision. In the last two years the student confirms the decision and acquires and refines special knowledge, usually in the major department. The college's departments are devoted to instruction and research in a variety of academic subjects. Each department represents a style of study and communication and refined development of a set of structured ideas. The subjects of the departments overlap and complement one another.

Requirements for Admission in Advanced Standing

Students applying for admission will not be considered if they have completed more than 80 semester (120 quarter) units. The dean of the college makes exceptions to this policy only in unusual circumstances. Applicants with advanced placement credit may, however, exceed the 80-semester-unit limitation by the amount of their advanced placement credit and be admissible if they meet all other admission criteria. Students who enter the college with advanced placement credit may exceed by the amount of this credit the maximum unit limitation requiring the selection of a major and the maximum unit limitation requiring graduation.

In computing the number of units which they have completed, students should be aware that the College of Letters and Science does not grant unit credit for courses completed in a two-year college after a total of 70 semester units has been completed in all institutions attended. Subject credit toward completion of college requirements is, however, granted for appropriate courses.

Transfer students with 56 or more semester units are required to have satisfied, prior to admission to the college, the reading and composition breadth requirement, the foreign language breadth requirement, and the quantitative reasoning breadth requirement of the college. Any student planning to declare a major in a biological science must in addition have completed the minimum subject preparation in the major with a grade-point average of 2.00 (C average) or higher. The subject preparation listed below is minimal; transfer students who wish to declare a major in a biological science are urged to consult directly with the department or program in which they are interested to learn of additional requirements or of any restriction placed on entry to the major. With the exception of majors in biochemistry (see departmental listing), physical education (see departmental listing), and paleontology, the subject preparation for majors in the biological sciences is as follows:

Students who have completed 56 to 70 semester units:

1. General chemistry with laboratory (5 semester or 8 quarter units).
2. General biology with laboratory or a course in botany plus a course in zoology (8 semester or 12 quarter units).

Students who have completed 71 to 80 semester units must complete in addition to points 1 and 2 above:

3. Introductory organic chemistry with laboratory (6 semester or 9 quarter units).
Certain majors in the social sciences and natural sciences are overcrowded. Transfer students planning to declare a major classified under social science or natural science should consult directly with the department or program to learn of any restriction placed on entry to the major.

Requirements for the Bachelor of Arts Degree

Students must complete a minimum of 120 semester units, distributed according to regulations which appear in the Announcement of the College of Letters and Science. A 15-unit class schedule per semester is considered to be a normal course load; a class list of fewer than 13 units requires the special permission of the dean. There are also scholarship, minimum-progress, residence, breadth, and major requirements; these are described in the announcement as well. Brief descriptions of the breadth, major, and minor requirements appear below. Major and minor programs are outlined under the department, field, or group headings in this publication. In addition, students must satisfy the University requirements in Subject A, American History, and American Institutions.

**Breadth Requirements.** There are four breadth requirements:

1. **Reading and Composition.** This requirement is to be completed in the freshman or sophomore year in order that students may develop skill in the communication of ideas and a sensibility for language which will facilitate and enrich further studies. Regulations regarding the completion of the reading and composition requirement through course work will be implemented according to the following guidelines: *Academic year 1987-88: Students who have never been registered in the College of Letters and Science may count, upon admission to the college, course work that they successfully completed at another institution prior to their date of registration in the college if that course work was accepted by the college in satisfaction of the reading and composition requirement under the former quarter system or the current semester system. Once admitted, students who have satisfied only half the requirement must complete course work that satisfies the second half of the reading and composition requirement according to the requirements of the semester system, whether the course work is undertaken at Berkeley or elsewhere. Students who completed none of the requirement prior to admission must complete the entire requirement through course work according to the requirements of the semester system, whether the course work is undertaken at Berkeley or elsewhere.**

2. **Quantitative Reasoning.** This requirement may be fulfilled by satisfactory performance in an examination or by successful completion of an acceptable college course. Information about acceptable examinations and acceptable courses is included in the announcement. This requirement, if satisfied by course work, must be completed without delay.

3. **Foreign Language.** This requirement assures that students who graduate from the college will have some knowledge of the language of a culture other than their own. Students who have not satisfied the language requirement at the time of admission must complete it without delay. The requirement may be satisfied by (A) completion of the third year of one foreign language in high school with a minimum grade of C-, (B) by completion of the second semester of a Berkeley course, or its equivalent elsewhere, in one foreign language with a minimum grade of C-, or (C) by demonstration of equivalent knowledge through examination, including the College Entrance Examination Board Achievement Test, the CEEB Advanced Placement Examination (if taken before admission to the college), or an acceptable foreign language placement examination offered by a foreign language department at Berkeley or on another campus of the University of California. The college will accept in completion of the requirement appropriate work in two foreign languages (with C-grades) only if that course work was completed prior to fall semester 1983 and if the course work was accepted by the college in satisfaction of the foreign language breadth requirement under the quarter system.

4. **Six Courses (minimum total of 16 semester units)** outside the Field of Students' Major. Students must follow specific college guidelines in the satisfaction of the requirement, and its completion may be spread over the four years of college attendance. The fields of knowledge are defined as the humanities, the natural sciences, and the social sciences. See the Announcement of the College of Letters and Science for details.

**Major Programs.** All students must pursue and complete a major program, the object of which is to provide them with a limited experience in specialization. There are over 60 departmental major programs ranging from art to zoology. In addition, there are group majors in Asian studies, development studies, Dutch studies, environmental sciences, ethnic studies, film, genetics, Latin American studies, legal studies, mass communications, Middle Eastern studies, neurobiology, political economy of industrial societies, religious studies, social welfare, and women's studies. There are also field majors in the humanities, biological sciences, physical sciences, and social sciences. Moreover, students who have completed at least 60 semester units and at least one semester of enrollment at Berkeley, and who have attained a minimum 3.0 Berkeley and overall grade-point average may, with the permission of the dean and support and supervision of a college faculty member and a second faculty member who acts as second reader of the individual major thesis, pursue an individual major designed to satisfy special academic goals. Students currently enrolled in individual majors have developed major programs ranging from urban planning policy to the history of physics. Thus the options available to students outside traditional disciplines are many and varied.

**Minor Programs.** Minor programs are intended as optional programs that will encourage coherence in the work that students undertake outside their major field(s) of study. The college has set the following minimum requirements for completion of a minor program: 1) Course requirements: a minimum of five upper-division courses,
completed on a letter-graded basis, are
required for the minor. At least three of the
five upper-division courses must be com-
pleted at Berkeley.

2) Grade-point average requirements: Stu-
dents must maintain a minimum overall
grade-point average of 2.0 in upper-division
courses required for the minor program.

At present the college offers minor programs
in the following departments and groups:

Department of Afro-American Studies
Afro-American Studies Humanities
Minor
Afro-American Studies Social Science
Minor

Department of Art, History of
Minor in the History of Art

Group in Asian Studies
Option I: Minor in Chinese Studies
Option II: Minor in Japanese Studies
Option III: Minor in Southeast Asian
Studies

Department of Classics
Minor in Greek
Minor in Latin
Minor in Classical Civilization

Group in Dutch Studies
Minor in Dutch Studies

Department of English
Minor in English: Creative Writing
Minor in English: American Literature
Minor in English: Literature in English

Department of Ethnic Studies
Minor in Asian-American Studies
Minor in Chicano Studies
Minor in Ethnic Studies
Minor in Native American Studies

Department of French
Minor in French

Department of Geography
Minor in Geography

Department of German
Minor in German

Department of Italian
Minor in Italian

Department of Music
Minor in Music

Department of Near Eastern Studies
Minor in Arabic, Option A
Minor in Arabic, Option B
Minor in Hebrew, Option A
Minor in Hebrew, Option B
Minor in Persian, Option A
Minor in Persian, Option B
Minor in Turkish, Option A
Minor in Turkish, Option B

Department of Scandinavian
Minor in Scandinavian

Department of Slavic Languages and
Literatures
Minor in Russian Language
Minor in Russian Literature
Minor in Czech/Polish/Serbo-Croatian
Language and Literature

Department of South and Southeast Asian
Studies
Minor in South Asian Civilization
Minor in South Asian Archaeology

Department of Spanish and Portuguese
Minor in Spanish Language and
Literatures
Minor in Luso-Brazilian Language and
Literatures

Group in Women's Studies
Minor in Women's Studies, Social
Science Emphasis
Minor in Women's Studies, Humanities
Emphasis

Students should consult the department or
group in charge of the minor for additional
requirements and specific information
regarding the minor program in which they
are interested. Admission to the minor and
certification of completion of the minor are
determined by the department or group in
charge of the program. When a student
completes a minor program, the department
or group in charge of the minor program
will notify the Office of Admissions and
Records, so that the completion may be
noted on the student's transcript.

Special Programs

The Division of Special Programs develops
and administers innovative and interdisci-
plinary courses and programs in the College
of Letters and Science that do not belong
to a single department. Currently, it admin-
isters the field majors in the humanities and
the social sciences and the group majors in
environmental sciences, film, genetics,
mass communications, Middle Eastern
studies, neurobiology, religious studies, and
women's studies. In addition to these ma-
jors, it offers a special interdisciplinary
course in western civilization. For complete
descriptions of the Special Programs majors
and major courses, please see the entries
listed alphabetically by major.

The Division of Freshman and
Sophomore Studies

The office of the divisional dean of Freshman
and Sophomore Studies is located in 237
Campbell Hall (642-8363).

Freshmen may wish to contact this office
for information about special seminars for
lower division students. These seminars,
designed to maximize professor-student in-
teraction in the classroom, are offered by
a variety of departments and address impor-
tant intellectual questions and contemporary
issues.

The division also administers tutorial pro-
grams at the Clark Kerr campus and the
Stern and Bowles residence halls. In addition,
it works with several departments to en-
courage the formation of faculty-student
"clusters" for the purpose of general advising
during the early undergraduate years.

The Rhodes and Marshall Scholarship
application process is administered through
this division. Information about scholar-
ships available to sophomores and juniors
may also be obtained through this office.

Law and Economics
There is an increasing realization that economic and political well-being depends on the kind of educational and informational support that public libraries and other related agencies can provide. The School of Library and Information Studies trains people to keep track of information, to diagnose people's needs, to organize information to meet those needs, and to deploy available resources to bring people and information together. Libraries, the traditional repository of the human record, are the loci of these activities.

The school has two goals: (1) to improve the level of access by various sectors of society to the contents of the world's total supply of records, and (2) to increase knowledge and understanding of the character of the first goal and the conditions for its success. The first goal is practical and aims at improving the way things work. The second goal is theoretical and aims at understanding the way things do and might work. The theoretical goal is pursued both for its own sake and in support of the practical goal.

The school has four principal objectives in the pursuit of its goals: (1) to prepare individuals to design, organize, administer, and evaluate information services; (2) to improve the quality of professional performance by librarians and others engaged in information service; (3) to encourage and contribute to research in bibliography, librarianship, and information studies; and (4) to increase the ability of undergraduate students to understand the bibliographical access system and to inform them of the substantive concerns of librarianship and information studies.

The School of Library and Information Studies offers a basic curriculum at the graduate level, lasting one calendar year, leading to the Master of Library and Information Studies degree, which qualifies the holder for professional service in libraries and other information activities. It offers a post-master's program leading to the Certificate in Library and Information Studies. The school also offers a program leading to the Ph.D. degree for students interested in advanced research and teaching in librarianship and the information sciences, and a program leading to the professional doctorate, the D.L.I.S., for students interested in a design-oriented preparation for administrative positions in libraries or other information services. Admission to the degree programs is contingent upon admission to graduate standing. The school also offers undergraduate courses for nonmajors in librarianship.

For further details about these programs, consult the Announcement of the School of Library and Information Studies.
The undergraduate majors fall in three distinct categories: programs in basic biology, programs dealing with the social science of environmental concerns among students, faculty, and society in general. Prominent among these concerns is the belief that our renewable natural resources must be used in ways that are at once productive, conservation-conscious, and protective of environmental quality, while meeting the accelerating demand for essential food, fiber, timber, wood products, and recreational use of open space.

The College of Natural Resources offers a variety of academic programs which focus on renewable natural resources. These embrace most of the physical, biological, technical, and social processes that people use to produce and utilize the food, fiber, and other materials they require.

**Undergraduate Programs**

The undergraduate programs of the college emphasize two aspects of natural resources: they seek out and develop an understanding of the complex interactions involved in resource systems that have major environmental, material, and recreational/aesthetic values; and they stress the relationship of people to their natural environment, balancing their needs and desires with those of environmental preservation.

The undergraduate majors fall in three distinct categories: programs in basic biology, professional and technical programs, and programs dealing with the social science of natural resources.

For students interested in basic biology, major programs are available in bioresource sciences, entomology, genetics, molecular plant biology, nutrition and food science, plant pathology, and plant and soil biology. These programs develop a broad foundation in the biological sciences and prepare students for graduate and professional work in biology, medicine, dentistry, and veterinary medicine.

Professional programs in forestry (with options in forest, wildlife, and range management), nutrition and clinical dietetics, pest management, soil resource management, and forest products are available to students with interests in these specific professions.

For students whose interests in natural resources run in the direction of social and political science and public issues in the fields of population, renewable natural resources, resource economics, and environment, there are major programs in the political economy of natural resources and in conservation and resource studies. Both emphasize flexible, interdisciplinary approaches and can be used to prepare for work or further study in various areas of social science such as law, public policy, and environmental planning.

**Major Requirements.** Detailed course requirements for each major, along with college requirements for the B.S. degree, are listed in the *Announcement of the College of Natural Resources*, available from the Dean's Office, 106 Giannini Hall, University of California, Berkeley, California, CA 94720.

**Minor Programs.** Several departments in the College of Natural Resources offer minors. Contact the Office of Student Advising, 106 Giannini Hall, for information and procedures.

**Limited Status.** Qualifications for limited status include (1) a previous bachelor's degree or substantial previous college work, and (2) a specific well-defined academic goal for which additional undergraduate work is necessary. Students must also have a GPA of 3.0 or better. For further qualifications and information, contact the Student Affairs Office at 642-0542 in Room 106 Giannini Hall.

**Undeclared Status.** A few freshman students are admitted each year to the College of Natural Resources in undeclared status. Students so admitted must declare a major in natural resources after their first year. During the period in undeclared status, students are expected to take a lower division preparatory program that will satisfy natural resources majors.

A typical course schedule for freshmen should include basic English (or Subject A) and math (calculus). Most of our majors have a biological emphasis in which chemistry is also required. Our social science majors require economics and/or political science.

During this year students are encouraged to contact advisers promptly for advice about potential majors and requirements.

**Typical first semester schedule:**

English 1A or Subject A; Math 1A-16A or math prep class; Chem 1A or Chem 2A (biological emphasis); Econ 1 or Poli Sci 1 (social science emphasis); elective; Total 14-15 units.

**Undergraduate Advisers.** The undergraduate advisers for each major serve as the principal liaison officers between students and the college. They are available for consultation throughout the year. Advisers are prepared to discuss details of the requirements and planning of a program best suited to a student's individual needs. All students are encouraged to see their advisers as early as possible for advice in the planning of their academic programs.

The adviser should also be consulted concerning any special academic problems that may arise. In addition, the Office of the Dean may be consulted on any such difficulties or on questions relating to records and regulations. It is open year-round, 8:15 a.m. to 4:45 p.m. weekdays, except during the noon hour and on administrative holidays.

**Schedule Request Form.** Students in the College of Natural Resources are required to file their schedule request forms in the Office of Student Advising, 106 Giannini Hall. An adviser's approval is required prior to filing the form. All add and drop forms must also be approved in the same manner.

For fall semester 1987 the minimum course load for students will be 13 units. Exceptions...
would require either (1) an employment verification form on file, or (2) a part-time status form on file. For further information contact the Student Affairs Office at 642-0542.

Graduate Programs
Academic and professional graduate degree programs are available in agricultural and environmental chemistry, agricultural and resource economics, comparative biochemistry, entomology, forestry, genetics, nutrition, plant pathology, molecular and physiological plant biology, plant and soil biology, range management, soil science, wildland resource science, and wood science and technology. In addition, an ad hoc interdisciplinary doctoral program is offered.

Inquiries regarding details of the various graduate programs may be directed to the appropriate graduate adviser in the chosen field. Names of advisers for the various graduate departments in the college are given in the graduate course section of this catalog.

School of Optometry
Office: 350 Minor Hall, 642-3414
Dean:
Jay M. Enoch, O.D., Ph.D.

Assistant Dean—Student Affairs:
Darrell B. Carter, O.D., Ph.D.

Assistant Dean—Academic Affairs:
Anthony J. Adams, O.D., Ph.D.

The School of Optometry provides professional training in the art and science of vision care. Drawing upon the principles of anatomy, optics, physiology, and psychology, the four-year professional program leads to the degree of Doctor of Optometry, which qualifies one to take the state board examinations.

Doctors of Optometry are health care professionals who specialize in the examination, diagnosis, and treatment of conditions or impairments of the vision system. Specifically educated, clinically trained, and state-licensed to examine the eyes and related structures to detect the presence of vision problems, eye diseases, and other anomalies, optometrists provide treatment by prescribing ophthalmic lenses, contact lenses, or other optical aids and provide therapy to preserve or restore maximum efficiency of vision. By thoroughly evaluating the internal and external structures of the eyes, Doctors of Optometry can detect eye diseases such as glaucoma or cataracts and systemic diseases such as diabetes, hypertension, and arteriosclerosis that require referral to other health care practitioners.

Doctors of Optometry are educated in the sciences of anatomy, zoology, chemistry, physics, mathematics, neurology, bacteriology, microbiology, disease processes and detection, pharmacology, behavioral science, social science, public health, and many other related fields. The school provides four years of comprehensive training in vision care. The first year is devoted to more advanced study of basic sciences which form the background of optometry, such as
ocular anatomy, ocular pathology, physiology, neuroanatomy, the psychology of vision, physiological optics, geometric optics, ophthalmic optics, pharmacology, and theoretical and practical optics. The second and third years are devoted to the science of optometry and the acquisition of skills in examination procedures. Active clinical participation begins in the third year. The fourth year is devoted to the practice of optometry and the detailed study of specialized areas, including contact lenses, binocular vision, vision functions, ocular disease, and low vision.

Optometry offers a wide variety of interesting, challenging, and rewarding careers in private practice, in hospitals and other health organizations, and in public service. The education acquired at the School of Optometry provides today's Doctors of Optometry with the knowledge and skill necessary to meet the challenges of providing vision care.

The school also offers a graduate program in physiological optics which leads to the M.S. degree and the Doctor of Philosophy degree. Offered in cooperation with other departments of the University, this program is designed to prepare students for a career in teaching and research in the science of vision. Research facilities available to graduate students in physiological optics are unexcelled anywhere in the world, and a distinguished resident and visiting faculty is available to provide guidance in the most important aspects of the field.

A one-year optometric residency program is available for graduate optometrists who want to expand their skills in one or more clinical areas and/or seek training in specialty areas. The following areas of study are offered: binocular vision and/or pediatrics, family practice optometry, contact lenses, visual functions, low vision care, and ocular disease detection. Special combined or unique programs are possible.

For optometrists interested in reading disabilities, a Master of Science degree program is offered in the School of Education in cooperation with the School of Optometry. This post-O.D. program is designed for optometrists who want to specialize in the handling of children with reading problems, particularly those problems that are visually based. Additional information may be obtained by writing to the Admissions Office, School of Education, Tolman Hall, University of California, Berkeley; Berkeley, CA 94720. For further information about any of the school's programs, please consult the Announcement of the School of Optometry, available from the Admissions Office, School of Optometry, 381 Minor Hall, University of California, Berkeley; Berkeley, CA 94720.

Physiological Optics

An undergraduate program in physiological optics leads to the B.S. degree. The primary purpose of this program is to prepare students for the graduate program in physiological optics rather than the practice of optometry.

The graduate program in physiological optics leads to the M.S. and Ph.D. degrees. The program is administered by the Group in Physiological Optics, representing faculty from the School of Optometry and other departments.

Students interested in this graduate program should become familiar with the regulations of the Graduate Division and should contact the adviser of the Group in Physiological Optics as early as possible. Admission to this program requires a bachelor's degree in a science field or a doctoral degree in medicine or optometry.

For further details about the requirements for the B.S., M.S., and Ph.D. degrees, please consult the adviser of the Group in Physiological Optics, School of Optometry.
The professional degrees Master of Public Health (M.P.H.) and Doctor of Public Health (Dr.P.H.) are offered in the area of biomedical and environmental health sciences, including epidemiology and biostatistics, and in the area of social and administrative health sciences, including health policy and administration, maternal and child health, genetic counseling, public health nutrition, applied behavioral sciences, and public health education. Particular attention also may be given to special areas of concern such as population, environmental pollution, disease control, health and medical care delivery, and forensic science.

Programs of study leading to the following academic degrees are administered by groups of faculty from the School of Public Health and other departments.

Biostatistics, M.A., Ph.D.; Environmental Health Sciences, M.S., Ph.D.; Epidemiology, M.S., Ph.D.; Immunology, M.A., Ph.D.; Microbiology, M.A., Ph.D.; Nutrition, Ph.D.; Parastology, M.S., Ph.D.

Students are encouraged, and in most programs are required, to begin studies in the fall semester because of the order in which courses are scheduled. Separate applications for admission must be submitted to the Graduate Division of the University and to the School of Public Health no later than February 10 for admission to the following fall semester. Applicants to the General Preventive Medicine Program must submit all application materials by December 15.

For further information, consult the Announcement of the School of Public Health, available from the school.

Graduate School of Public Policy
Office: 2607 Hearst Avenue, 642-4670
Acting Dean: Arnold J. Meltsner, Ph.D.
Associate Dean: Phyllis Strong Green, Ph.D.

For many decades now, the problems American society faces have steadily grown in number, variety, and complexity. Most of these problems come for resolution, sooner or later, to the doorstep of government. In response, public officials are increasingly involved with devising solutions to social problems and improving governmental services. They wrestle with such difficult questions as political conflict, policy choice, the implementation of policy, bureaucratic behavior, program effectiveness, and the equity and efficiency with which public resources are distributed. Heightened concern with this broad policy terrain is also evident within the private sector, which is developing greater capability in the analysis of public policy. As a consequence of these trends, the need for well-trained analysts and managers in the policy field remains strong.

The Graduate School of Public Policy prepares students to join the ranks of policy analysts in both the public and private sectors. The strong first-year core curriculum is enhanced by the diversity offered in the second year. The school's program provides students with the benefits of and access to the resources of the entire Berkeley campus. Second-year students can take their elective courses from the full array of campus offerings.

Undergraduate Courses

The undergraduate courses in Public Policy deal with the substance of American public policy, how it is made, how its effects can be gauged, and what the purposes of policy should be. The courses consider both the policy process and particular policy issues. By examining different policy problems in their political and social contexts, students should gain a greater sensitivity to the forces which shape and carry out public policies and to the impact of social, political, economic, and legal power.

Courses are designed for students in diverse disciplines and professional schools. There are no prerequisites for enrollment in the courses unless specifically noted otherwise in the course descriptions below. The training provided by the courses is useful to those interested in combining the substantive perspectives of the social sciences with the immediacy of contemporary problems; to those considering professional study; and to the informed and politically aware citizen.

Graduate Courses

Through an examination of a wide variety of contemporary American domestic policy areas, graduate courses enable students to conduct systematic work in the design and assessment of public policies. Among the skills emphasized are those facilitating the application of political, organizational, economic, quantitative, and legal analysis to the full range of the policy process—from policy initiation through policy adoption, implementation, and evaluation. By developing these skills, students from the professional schools and academic disciplines should find their strengthened analytical capabilities of direct use when applied to their own field of concentration.

In addition to the management courses available from the school, a number of public and nonprofit management courses have been developed on the campus; see the listings under Public and Nonprofit Management in the "Courses and Curricula" section of this catalog.

Master's Degree in Public Policy

The professional degree, the Master of Public Policy, is designed to provide students with the knowledge, analytical skills, and sensitivities needed to conduct public policy
School of Social Welfare

Office: 120 Haviland Hall, 642-4341
Dean: Harry Specht, Ph.D.

Graduate Program

The School of Social Welfare is a graduate professional school emphasizing preparation for leadership and practice roles at all levels of policy and practice in the field of social welfare and the institutional systems which comprise it, particularly the social services. The school seeks to develop professionals who will work with individuals, groups, organizations, or communities; it does not attempt to produce generic social workers or private practitioners. Because of the growing importance of minority population groups in California, the school gives special attention to preparing students who can contribute to the improvement of policies and practices affecting the provision of social services to disadvantaged groups.

The school offers the following programs:

1. A program of studies leading to the degree of Doctor of Social Welfare which prepares students for careers in teaching, research, policy development and analysis, and administration in the field of social welfare and in the profession of social work. It is open to applicants who hold a master's degree in social work or social welfare or comparable preparation in a closely related field and who show evidence of intellectual and other qualifications essential to successful doctoral study.

   Also offered is a combined program of master's-doctoral studies which begins in the first graduate year, leads to both Master of Social Welfare and Doctor of Social Welfare degrees, and prepares for the same careers. Applicants must show evidence of ability to complete doctoral study successfully and must have undergraduate preparation as outlined below.

2. A two-year program of studies for the Master of Social Welfare degree in preparation for the professional practice of social work. Classroom and field courses are designed to teach professionals to use tested knowledge and skill and research methods and techniques in their practice. Applicants must have completed the group major in social welfare in the College of Letters and Science, or an equivalent major, or under-
Key to Symbols

“Above the Line” and “Below the Line”
The faculty roster of many departments is divided by a short line that separates full members of a department from members affiliated with the department by a “courtesy appointment.” Faculty members whose names appear above the line are full members of the department. Faculty members whose names appear below the line are affiliated with the department but are not members of it.

Organization of “Courses and Curricula” Section
In the following section of the catalog, departments are listed alphabetically regardless of the college or school to which they belong. Interdepartmental groups, special studies, special projects, and other nondepartmental units are also listed alphabetically wherever possible. Interdepartmental Studies courses are reproduced together under that heading as well as in each sponsoring department. If you are unable to locate the department or program in which you are interested, consult the Index.

The colleges and schools are introduced in the “Colleges and Schools” section, beginning on page 60. The introductions discuss the scope and educational goals of each college and school and list the departments and organizational units within each.

Course Listings
You should carefully note prerequisites for courses, although they are sometimes waived at the discretion of the instructor.

Courses with double numbers (for example, English 1A-1B) are two-semester sequences that usually begin in the fall semester. Except as noted, each course in a sequence is normally prerequisite to the one following, and you may normally receive credit for completing the first half of a sequence. Course numbers preceded by the letter H are special honors courses that may be subject to restrictions imposed by the department.

The number in parentheses following the course title indicates the credit value; the abbreviation in parentheses indicates the semester in which the course is offered: (F) fall, (SP) spring. Summer Session courses are listed separately in the Summer Session Catalog except for a few courses that are part of a department’s degree requirements.

Course numbers are assigned as follows:

1-99
Lower division courses, including courses designated by a letter. Open to freshmen and sophomores; not acceptable for upper division credit.

100-196
Upper division courses. You must ordinarily have completed at least one lower division course in the given subject or two years of college work.

99, 197, 198, 199
Special Studies courses. (See limitations listed below.) Effective fall 1983, you may use no more than 16 semester units of courses numbered 99, 197, 198, and 199 to meet requirements for the A.B. degree. Exceptions to this rule may be granted by the Committee on Courses of Instruction.

197
Field study (upper division). 197 courses are restricted to passed/not passed grading. To enroll you must have completed 60 units of undergraduate study and be in good academic standing (2.00 grade-point average or better). Exceptions to these rules may be granted by the Committee on Courses of Instruction.

99, 198, 199
These courses allow you to pursue study of special topics, in groups or individually, under the direction of a faculty member. You may aggregate no more than 4 units of credit for independent studies or group studies in a single term.

99
Supervised independent study by superior, lower division students. You must have a 3.3 GPA and prior consent of the instructor who is to supervise the study, and you must submit a written proposal to the chair of the department for approval. Only a grade of passed/not passed is to be assigned. The dean of your college or school, on the advice of the instructor, may authorize exceptions to the grading limitation.

198
Supervised group study (upper division). Each section of a 198 course must receive approval by the chair of the department, based upon a written proposal by the instructor who is to supervise the course. A copy of the approved proposal must be submitted to the Committee on Courses of Instruction. To enroll in 198 courses, you must have completed at least 60 units of undergraduate study and be in good academic standing (2.00 grade-point average or better). Only a grade of passed/not passed will be assigned. The Committee on Courses of Instruction may, on the advice of the instructor and department concerned, authorize exceptions to the above limitations.

199
Supervised independent study (upper division). You must have prior approval of your major adviser, the instructor who is to supervise the study, and the chair of the department. Approval must be based on a written proposal that you submit to the chair. The instructor must indicate consent in writing. To enroll in 199 courses, you must have completed at least 60 units of undergraduate study and must be in good academic standing (2.00 grade-point
average or better). Only a grade of passed/not passed will be assigned. The dean of your college or school, on the advice of the instructor, may authorize exceptions to the above limitations.

**200-299**
Graduate courses. Adequate preparation, subject to the instructor’s approval, is normally 12 upper division units of work basic to the subject matter of the course.

**300-399**
Professional courses for teachers or prospective teachers.

**400-499**
Professional courses which, like teaching courses, are acceptable toward academic degrees only within the limitations prescribed by the various colleges or schools or the Graduate Division.

**601**
Special study for graduate students in preparation for the master’s examination.

**602**
Special study for graduate students in preparation for the doctoral qualifying examination.

**Note:**
The University offers a number of experimental courses. Information about these courses is contained under (1) the Personalized System of Instruction, discussed in the Appendix; (2) some of the Interdepartmental Studies courses, listed in the Interdepartmental Studies section of this catalog as well as in each sponsoring department; and (3) all courses numbered 91, 191, and 291 in departmental course listings throughout this catalog.
