“If I were founding a university I would find first a smoking room; then when I had a little more money in hand I would found a dormitory; then after that ... a decent reading room and a library. After that, if I still had more money that I couldn’t use, I would hire a professor and get some textbooks.”

Stephen Leacock (1869-1944)

With these words, Professor Leacock wryly outlined what he considered the most important elements of higher education. Barely finding room for his fellow teachers, he does not even mention such things as curricula, majors, prerequisites, examinations, theses, and degrees. While a complex and bustling campus of a large public university might find much wanting in his recommendations, there is still something of great value in a view of university life that places prime emphasis on human contact, academic freedom, and good books. For these, whatever else changes with time, remain the nucleus of higher education.

As you enter the Berkeley campus of the University of California—whether as a student, parent or visitor; whether through Sather Gate, Oxford Street, or this General Catalog—you may be overwhelmed by what you encounter. The modern public university has come a long way from Leacock’s “smoking room.” Instead of a handful of people gathered informally to discuss life, you will find thousands of students of all ages, from all backgrounds, pursuing all varieties of educational aims. Instead of “one decent reading room and a library,” there are, in fact, 25 libraries and seven million books. The faculty, considerably more than a daydreamer’s afterthought, is made up of some of the most distinguished teachers and scholars in the world. And, as might be expected, the Berkeley campus occupies a lively place in public life. Its research centers and institutes concern themselves with scientific, technical, and social problems that affect the daily lives of millions. The campus, situated within a large metropolitan area, maintains close communication with the social, economic, and cultural life of the surrounding community. Whatever Stephen Leacock had in mind, it was not the Berkeley campus. Or was it?

Have we, in truth, come very far from a concept of a university where human contact, academic freedom, and the availability of good books are given priority? The student who enters the Berkeley campus has an ample share of all three, and, indeed, may find that his or her entire educational experience is built on these vital elements. The abundant resources of this University make all the more attainable an ideal of academic life. Where there are more people of varied backgrounds and interests, the value of human contact increases. Where there are more books and more capable teachers and scholars to help those books come alive, the student’s freedom to learn is enhanced—for there is more from which to grow and develop, more by which to measure progress.

The man who founds a university in his daydreams might add to his prescriptions for simplicity the following: room to grow and room to experiment. The Berkeley campus has undertaken broad reforms in its classes and programs, in its administration, and in the learning experience. More seminars and small classes, more creative challenges to the student, a greater service role in the community, and expanded educational innovation—these changes are made with the hope of keeping strong and vital the ideals of a university that people have cherished for centuries. Ultimately the university that seeks to provide a significant experience for its participants is the one that makes the most of what it has. And the Berkeley campus has a great deal.
Your education should inspire questions: What are the truths by which men and women have lived in various times and places and which may bear on your life today? What ethical obligations does a good person observe in a free society?

At Berkeley all faculty members are engaged in research. The “creation of knowledge” is an important part of the life of the Berkeley community, and the knowledge created here is a part of learning everywhere. Berkeley is, moreover, committed to the notion that research and teaching are not to be separated. Research enlivens teaching, and the life of the classroom provokes and deepens research. Faculty come to Berkeley because they want to deepen their understanding of physical and human nature and convey their discoveries to others. It is not surprising, then, that students who come to Berkeley find that teaching and learning are different from what they have experienced before. Students are expected to move from being sponges of knowledge toward being scholars who can pose scientific and philosophical questions, think critically and creatively about them, and communicate their ideas to others in a literate way. Students are expected to engage in the search for understanding and to come to enjoy the pleasure of independently exploring the paths of knowledge.

Upon coming to Berkeley, students should think about their intellectual interests and let them be a guide to particular fields of study. Berkeley provides an incredible opportunity to encounter diverse subject matters, approaches to knowledge, and philosophies. There is no one right way, no single definition of a good education, no single subject matter prescribed for everyone. All you need do is read through the descriptions of the multitude of programs in this catalog and you will quickly disabuse yourself of any assumption about a simple way of truth or to becoming an educated person.

What does unite the Berkeley community of faculty and students, however, is the genuine belief that curiosity is important, that the world is far harder to understand than it first appears, and that intellectual humility is a vital grace. The questions stimulated by your arrival at Berkeley are important, and you should insist on paying attention to them. Why are you here at Berkeley? What is the purpose of an education? What are your strengths and limitations, what subjects fascinate you, and what skills ought you to have the courage to improve? What are the truths by which men and women have lived in various times and places and which may bear on your life today? How have these truths been represented in literature and art, buildings, technologies, and social systems? What ethical obligations and limits does a good person observe in a free society such as ours? These questions are worth asking, and you will be the better for the very attempt to formulate your personal answers to them.
History of the University

The roots of the University of California go back to the gold rush days of 1849, when the drafters of the State Constitution, a group of vigorous and farsighted people, required the legislature to "encourage by all suitable means the promotion of intellectual, scientific, moral and agricultural improvement" of the people of California. California had few families in 1849 and few children to educate, but these early planners dreamed of a university which eventually, "if properly organized and conducted, would contribute even more than California's gold to the glory and happiness of advancing generations."

The university that was born nearly 20 years later was the product of a merger between the College of California (a private institution) and the Agricultural, Mining, and Mechanical Arts College (a land grant institution). The College of California, founded by former Congregational minister Henry Durant from New England, was incorporated in 1855 in Oakland. Its curriculum was modeled after that of Yale and Harvard, with the addition of modern languages to the core courses in Latin, Greek, history, English, mathematics, and natural history. With an eye to future expansion, the board of trustees augmented the college's Oakland holdings with the purchase of 160 acres of land four miles north, on a site they named Berkeley in 1866. This original tract was to be considerably expanded over the years.

While the College of California was in its infancy, efforts continued in the state legislature to create a public educational institution, and in 1866 the legislature took advantage of the federal Morrill Land Grant Act of 1862 to establish the Agricultural, Mining, and Mechanical Arts College. The college was to teach agricultural, mechanical arts, and military tactics "to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life." Scientific and classical studies were not to be excluded but were of secondary importance.

The boards of trustees of the College of California and the Agricultural, Mining, and Mechanical Arts College decided to merge the two schools to their mutual advantage—one had land but insufficient funds and the other had ample public funds but no land—on the condition that the curricula of both schools be blended to form "a complete university." On March 23, 1868, the governor signed into law the Organic Act that created the University of California. The new university used the former College of California's buildings in Oakland until South Hall and North Hall were completed on the Berkeley site (South Hall is still standing), and in September 1873 the University, with an enrollment of 191 students, moved to Berkeley.

Fiscal problems plagued the new University, and it was not until the 20-year presidency of Benjamin Ide Wheeler beginning in 1899 that finances stabilized, allowing the University to grow in size and distinction. Early in this period Phoebe Apperson Hearst, one of the University's most generous benefactors, conceived of and financed an international competition for campus architectural plans that, she stipulated, "should be worthy of the great University whose material home they are to provide for."

The competition, won by Emile Bénard of Paris, brought Berkeley not only a building plan but worldwide notoriety. The London Spectator wrote, "On the face of it this is a grand scheme, reminding one of those famous competitions in Italy in which Brunelleschi and Michael Angelo took part. The conception does honor to the nascent citizenship of the Pacific states ...." At Oxford University, which at the time was strapped for funds, a Latin orator said, "There is brought a report that in California there is already established a university furnished with so great resources that even to the architects (a lavish kind of men) full permission has been given to spare no expense. Amidst the most pleasant hills on an elevated site, commanding a wide sea view, is to be placed a home of Universal Science and a seat of the muses."

John Galen Howard, the supervising architect charged with implementing the Bénard plan, took advantage of his "permission to spare no expense" and developed a style of architecture that reinterpreted the grace,
dignity, and austerity of classical lines to suit the California environment. Some of the campus's most elegant and stately structures were built during Howard's tenure, among them the Hearst Memorial Mining Building (1902-7), the Hearst Greek Theatre (1903), California Hall (1905), Doe Library (1911-17), the Campanile (1914), Wheeler Hall (1917), Gilman Hall (1917), and Hilgard Hall (1918).

President Wheeler, a classical scholar and able administrator, attracted library and scholarship funds, research grants, and a distinguished faculty to the University, and its reputation grew, particularly in the fields of agriculture, the humanities, and engineering. Many new departments were added in the early years of his presidency, and existing departments expanded. Summer sessions were begun in 1899 to train physics and chemistry teachers and before long broadened their scope.

The University grew with the rapidly expanding population of California and responded to the educational needs of the developing state. In the early 1900s the University's new College of Commerce (now the School of Business Administration) trained students for export trade with the Orient and funneled graduates into industries and businesses throughout the state. During the same period a foreign service training program was developed in response to State Department concern about the poor quality of consular personnel.

In 1930 Robert Gordon Sproul began a presidency that lasted three decades. His principal concern was academic excellence, and he was committed to attracting brilliant faculty in all fields. His success was particularly evident in the physical and biological sciences. In the 1930s research on campus burgeoned in nuclear physics, chemistry, and biology, leading to the development of the first cyclotron by Ernest O. Lawrence, the isolation of the human polio virus, and the discovery of all the artificial elements heavier than uranium. Fifteen members of the Berkeley faculty have been awarded Nobel Prizes for these and subsequent discoveries, as well as in literature and economics, for liberal arts kept pace with physical sciences. In 1966 Berkeley was recognized by the American Council on Education as "the best balanced distinguished university in the country."

The Berkeley Campus

South Hall, the oaks along Strawberry Creek, and the eucalyptus grove link Berkeley to its beginnings over a century ago. While the campus has grown considerably since then, it has retained much of the tranquil beauty of its rural past and is now a park-like oasis in an urban setting. Students study, work, and relax among Neoclassical buildings, wooded glens, and parklands spread across 1232 scenic acres overlooking the San Francisco Bay.

With 31,000 students, a distinguished faculty, nearly 300 degree programs, and alumni in positions of national and international leadership, Berkeley today is a large and complex institution, offering students a vast range of scholarly endeavor and a wide arena for personal growth.

The campus is surrounded by wooded, rolling hills and by the city of Berkeley (population 106,500), "the Athens of the 20th century." Berkeley has a long history as one of America's most lively, culturally diverse, and politically adventurous cities. The surrounding San Francisco Bay Area offers culture, entertainment, and natural beauty without rival, much of which is accessible by BART (Bay Area Rapid Transit).

All of Northern California, with its great variety of cultural and recreational opportunities, is within easy reach. San Francisco is just over the bridge; the wine country and the Point Reyes National Seashore are a short drive north; the Monterey Peninsula and Big Sur, a short drive south; and Lake Tahoe, the Sierra Nevada mountains, and Yosemite National Park are close enough for weekend skiing and backpacking trips.

Tradition of Excellence

Berkeley is internationally noted for its academic excellence. Its faculty includes 9 Nobel laureates, 94 members of the National Academy of Sciences, 58 members of the National Academy of Engineering, and more Guggenheim Fellows and Presidential Young Investigators than there are at any other university in the country. Berkeley also leads the nation in another category, with nine young faculty members named by Science Digest as among the 100 brightest American scientists under 40 years of age who are changing the course of science and technology. In a recent national survey, Berkeley was ranked the best overall graduate institution in the United States, with 30 of its 32 graduate departments ranked within the top 10.

By any standard, Berkeley ranks as one of the world's leading intellectual centers, renowned for the size and quality of its libraries and laboratories, the scope of its research and publications, and the distinction of its faculty and students. More students who earn bachelor's degrees at Berkeley complete Ph.D.'s than graduates of any other university in the country.

Superior Research

The range of research projects at Berkeley is varied, reflecting the diversity of disciplines represented. The campus provides a distinctive environment in which faculty and students seek to expand fundamental knowledge of human nature, society, and the natural world.

Research programs at Berkeley are conducted within teaching departments and organized research units (ORUs). The latter are established and administered separately from the teaching units. ORUs are interdisciplinary in nature and are organized around the work of a group of faculty and graduate
excellent teachers in all departments, in all disciplines, in Teaching Awards. Every year, good teaching is, of course, not limited to distinguished teachers. You will encounter students with a desire to learn; and as a consequence they often have a life-long impact on their the people who have received Distinguished Teaching Awards. Near ly all campuses, each with a distinctive character. The San Francisco Medical Center was added to the University in 1873, the Davis campus in 1905, Riverside in 1907, San Diego in 1912, Los Angeles in 1919, Santa Barbara in 1944, and Santa Cruz and Irvine in 1965. The campuses have five law schools, three medical schools, and schools of architecture, business administration, education, engineering, and many others. The nine campuses have a full-time faculty of about 6000 and the total enrollment is about 144,600 students, most of them California residents. Nearly one third are graduate students. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the country.

**Student Diversity**

The quality of Berkeley’s student body complements the stature of its faculty. Most students are Californians, but every state and 100 foreign countries are represented. The student body can best be characterized by its diversity; one third of the students are minorities, helping to produce the wide range of opinion and perspective essential to a great university. Many programs, such as Afro-American, Asian American, Chicano, and Native American Studies, reflect the diversity, as does the opportunity students have to design their own major if their interests do not match any of the 100 majors offered.

**Organization and Administration**

The University of California comprises nine campuses, each with a distinctive character. The San Francisco Medical Center was added to the University in 1873, the Davis campus in 1905, Riverside in 1907, San Diego in 1912, Los Angeles in 1919, Santa Barbara in 1944, and Santa Cruz and Irvine in 1965. The campuses have five law schools, three medical schools, and schools of architecture, business administration, education, engineering, and many others. The nine campuses have a full-time faculty of about 6000 and the total enrollment is about 144,600 students, most of them California residents. Nearly one third are graduate students. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the country.

**Administration**

Under the State Constitution, the government of the University is entrusted to the Board of Regents. The regents appoint the president of the University, and with the president’s advice, appoint the chancellors, directors of major laboratories, provosts, and deans who administer the affairs of the individual campuses and other divisions of the University. Authority in academic matters is delegated by the regents to the Academic Senate, which determines academic policy for the University as a whole.

The Board of Regents includes seven ex officio board members and 22 members who are appointed by the governor for 12-year terms after consultation with an advisory committee. In addition, the regents appoint a student regent for a one-year term as a voting board member with full rights of participation. The chair and vice chair of the Academic Council serve as faculty representatives to the board and participate fully in all discussions. A constitutional amendment provides that “Regents shall be able persons broadly reflective of the economic, cultural, and social diversity of the State, including ethnic minorities and women.” They shall have “full powers of organization and government, subject only to such legislative controls as may be necessary to ensure compliance with the terms of the endowments of the University and the security of its funds.”

The president is executive head of the nine-campus University system. The Office of the President, located in Berkeley, is the University’s central administrative headquarters. There are five vice presidential divisions—Academic Affairs, Administration, Agriculture and Natural Resources,
Budget and University Relations, and Health Affairs. The Office of the President performs administrative functions for the University as a whole and supports all campus operations.

Each of the campuses has a chancellor as its chief administrative officer. The chancellor is responsible for the organization and operation of the campus, including academic, student, and business affairs. For the names of University regents, officers, and chancellors, see page 384.

The Academic Senate, consisting of faculty and certain administrative officers, determines the conditions for admission and degrees, subject to the approval of the regents; authorizes and supervises courses and curricula; and advises the University administration on the important matters of faculty appointments and promotions and budgets.

Students participate in policy-making at both the campus and Universitywide levels.

Colleges and Schools

The Berkeley campus is divided into 14 colleges and schools, most of which are subdivided into departments. Colleges accept students directly from high school or as transfers from other institutions and offer undergraduate instruction, normally as a four-year program, leading to the bachelor’s degree. Schools usually begin instruction at the upper division level and provide students with preparatory training for specific professions.

Each of the colleges and schools has its own regulations for earning degrees and is headed by a dean who has final authority for all academic decision making. Students are encouraged to contact the deans for assistance with academic matters.

Interdisciplinary Education

There are several possibilities for studies of an interdisciplinary nature at Berkeley:

Undergraduate Interdisciplinary Studies (Division of Undergraduate Studies, formerly Special Programs): The mission of Undergraduate Interdisciplinary Studies is to develop and administer innovative and interdisciplinary courses and programs in the College of Letters and Science that do not belong to a single department. At present it administers the field major in Celtic studies, environmental sciences, film, mass communications, Middle Eastern studies, religious studies, and women’s studies. For complete descriptions of the Undergraduate Interdisciplinary Studies majors and major courses, please see the entries listed alphabetically by major. In addition to these majors, it offers special interdisciplinary courses such as Topics in Western Civilization. Minor programs are offered in Celtic studies, religious studies, and women’s studies.

Interdepartmental Studies Courses: Courses that are sponsored by two or more departments are considered interdepartmental studies because the content of each course transcends the boundaries of individual departments. Each class is taught by one or more instructors who represent the departments sponsoring the class. There is no central information point for these courses; for further information, please contact the departments sponsoring the class. (This information appears at the end of each course description in the Interdepartmental Studies section of this catalog.) The courses are subject to change each year.

Special Studies: There are several innovative and interdisciplinary programs of study not within the colleges and schools. Special Studies courses provide credits directly applicable to a University degree and are established through interrelationships among colleges, schools, and departments, and, in certain cases, in conjunction with community groups, other UC campuses, and other universities. The following are designated as Special Studies programs (see individual listings for details): programs in Asian American Studies, Chicano Studies, and Native American Studies in the Ethnic Studies Department; Energy and Resources Group; International Education; and the Military Officers’ Education Program (ROTC), which includes Military Affairs courses and programs in Aerospace Studies (Air Force ROTC), Military Science (Army ROTC), and Naval Science (Navy ROTC).

Academic Resources

The University Library

Berkeley’s library system contains one of the best research collections in the country. The system consists of the Main Library, the Moffitt Undergraduate Library, the Bancroft Library, 23 branch libraries, and many special libraries. The combined holdings of the libraries total more than 7,000,000 volumes, 100,000 current serial publications, 55,000,000 manuscripts, more than 4,255,000 microform items, 370,000 maps, and 60,000 sound recordings.

Most of the Berkeley humanities and social sciences materials are located in the Main Library. In addition, an open stack core collection of 170,000 volumes and 500 serial titles, designed to provide a convenient entry into the library system for Berkeley’s 21,000 undergraduate students, is available in the Moffitt Undergraduate Library. Special collections in Moffitt include reserve texts assigned in undergraduate courses and a file of past course exams. The Media Resources Center is also housed in Moffitt.

The Bancroft Library, devoted primarily to the documentation of western North America, maintains the largest collection of Mark Twain archives in the world. The Berkeley collection is also distinguished for its East Asianic Library, which contains rare editions of early manuscripts, scrolls, woodblock and engraven maps, stone rubbings, and bronze inscriptions. Special collections elsewhere in the library system include some of the rarest books and illuminated manuscripts in the world.

As a student you are entitled to use the libraries upon presentation of your registration card. Borrowing privileges and access to the collections vary from unit to unit. Orientation tours are scheduled throughout the year, and librarians are available at reference desks to help you.

A cooperative program between the university libraries of Berkeley and Stanford provides convenient interlibrary services to faculty and graduate students. Together the two libraries have more than 12,000,000 volumes, a combined research collection that is one of the richest in the world.
Affiliated Libraries
The library system also includes 15 affiliated libraries that contain specialized research collections of unique and often difficult-to-locate materials associated with organized research units, academic departments, and professional schools at Berkeley. These libraries primarily serve the teaching and research needs of faculty and staff, although many of them also serve the campus community at large and the general public.

Lawrence Hall of Science
The Lawrence Hall of Science is both a public science center and a research unit in science education. To increase public understanding of science, LHS’s programs are designed to involve participants actively in science. Visitors play logic games on computers, participate in interactive planetarium shows, conduct do-it-yourself experiments and observations in the biology and physics discovery laboratories, and explore a myriad of other exhibits on everything from dinosaurs to lasers. LHS also offers public lectures; science and general interest videos; numerous special events; workshops for school groups and after-school classes in biology, chemistry, physics, astronomy, computers, robotics, and math; and summer science camps.

Science curricula developed at LHS are used throughout the world. Teacher-training workshops actively involve participants in curriculum development. LHS is open Monday through Saturday from 10 a.m. to 4:30 p.m. and Sunday from noon to 4:30 p.m. There is an admission fee. Transportation to and from LHS is available on a shuttle bus on weekdays, excluding University holidays. For more information, call 642-5132.

Lowie Museum of Anthropology
Facilitating scholarly research and educating undergraduate and graduate students from many disciplines including anthropology are among the primary functions of the Lowie Museum. Teaching exhibits are installed to assist faculty and students with ongoing instruction and individual study. The museum also maintains a program of changing exhibits in its exhibit hall and at other points on campus to meet the varied educational and aesthetic interests of the University community and general public. There are 600,000 catalogued specimens in the museum’s holdings. The exhibit hall is open Tuesday through Friday from 10 a.m. to 4:30 p.m. and on weekends from noon to 4:30 p.m. The hall is closed Mondays and holidays. For further information, please call 642-3681 or 643-7648.

Language Laboratory
Dedicated to the support of language instruction, the Language Laboratory offers a variety of services and houses an extensive collection of audiotapes, including programs in 96 languages. Laboratory services include listening and viewing facilities for class and individual use, an audiotape lending library, a recording studio, and a tape duplication service. In addition to language instruction programs, tape library holdings include archival collections of linguistic field work and noteworthy University speeches and events. For further information, call 642-0767.

Summer Session
An extensive offering of regular academic courses and special programs is available through University Summer Session. Students in good standing at any campus of the University or at another college or university are eligible for enrollment. Equally eligible are high school graduates, qualified adult applicants of sufficient maturity and aptitude for the work they plan to undertake, and, in certain cases, high school juniors and seniors.

Tuition varies with the number of units taken. Introductory and advanced courses for University credit are offered, and there are also special sessions for selected intensive language workshops. Extensive cultural and recreational activities are provided. Courses are taught by both regular and visiting faculty.

Study Abroad
Both undergraduate and graduate students may earn University credit while studying abroad at study centers in some 50 cities around the world. See the study abroad sections in the chapters on undergraduate and graduate education.

Exchange Programs
Undergraduate and graduate students may participate in exchange programs with Mills College, Oakland; California State University, Sonoma; or California State University, Hayward. Graduate students may participate in exchange programs with other University of California campuses, Stanford University, the Graduate Theological Union, and a number of colleges and universities that participate in the Exchange Scholar Program. See the exchange program sections in the chapters on undergraduate and graduate education.

University Extension
University Extension is the continuing education branch of the University, linking the campus and the community. It ranks among the top half-dozen university-level programs in the nation in size, scope, and the quality of instruction. Its courses—about 1900 are offered each year—provide the adult population of the Bay Area with opportunities to pursue intellectual and cultural interests, keep abreast of current research, prepare for career advancement, and examine critical issues in society.

Most of the University’s fields of study are represented in courses ranging from evening classes to one-day seminars and weekend conferences. Instructors are drawn from the campus, the business world, the arts and sciences, and the professions. Most extension students have bachelor’s degrees and many have advanced degrees.

Extension offers 22 multi-course certificate programs in such fields as accounting, interior design, marketing, computers and information systems, telecommunications engineering, and landscape architecture. The programs are designed for persons who want to acquire a thorough background in a given field but do not want to undertake a degree program.

English-language programs, designed for non-native speakers who want to improve their command of English, offer full-time or part-time study.

Extension courses are held throughout the Bay Area, with concentrations in Berkeley, San Francisco, Menlo Park, Fremont, Walnut Creek, and San Ramon. Farther afield, course locations include environmentally
and spices, palms, rhododendrons, Mesoe-
American plants, gymnosperms, ferns, cacti,
carnivorous plants, orchids, a garden of Chi-
nese traditional medicinal plants, and eco-
nomically important species.

The Botanical Garden offers free tours to the
public every Saturday and Sunday at 1:30
p.m. Special group tours may be arranged
for a nominal charge by phoning 642-3343.
The garden is open to the public daily except
Christmas, from 9 a.m. to 4:45 p.m. A Visi-
tor Center/Gift Shop is also open daily.
There is no admission charge. A shuttle bus
provides transportation to and from the gar-
den on weekdays, and parking is available at
the garden.

The California Alumni
Association

Nearly 100,000 former students are mem-
ers of the California Alumni Association to
keep in contact with Berkeley and work for
the continued welfare of the University and its
student body.

The association administers the Alumni
Scholarship Program, which annually
awards more than $300,000 to some 600
undergraduates. It co-sponsors career pro-
grams with various campus units and main-
tains the Alumni Career Resources file, a
compilation of Cal graduates whom students
may contact to learn more about career
fields. In addition to offering free income
tax counseling for students each spring, the
association co-sponsors internship programs
for students interested in summer work in
Sacramento and Washington, D.C. It also
sponsors the Senior Class Council, which
provides activities for students in their last
year on campus; Mortar Board, the student
honorary society; and the Alumni Scholars
Club, a social and service organization.

Alumni are actively involved in helping the
University recruit the finest high school
students to Berkeley, and every year they
host receptions honoring newly admitted
students. Outstanding students from under-
represented minorities in particular are
attracted to Berkeley through the associa-
tion’s Student Recruitment and Outreach
Program. The association augments the
campus’s minority student retention pro-
grams with its own mentorship program for
minority students.

Among the many benefits association mem-
bers enjoy are the award-winning publica-
tion, California Monthly; free UC library
privileges on most UC campuses; access to
the Lair of the Golden Bear vacation center;
year-round alumni travel programs; major
medical and life insurance plans; and dis-
counts on use of campus sports facilities.

The association recognizes distinguished
alumni achievement and outstanding service
to the University, its alumni, and the com-

munity, and co-sponsors the Distinguished
Teaching Awards for faculty. It presents
a variety of events each year, such as the
Charter Banquet, the Commencement
Luncheon, and Cal Alumni Day. Alumni
clubs help members stay in close touch with
the University and with one another. Infor-
mation about all association activities, in-
cluding young alumni and club programs
and alumni events, is available at the
association’s campus headquarters, Alumni
House, where students and alumni are al-
ways welcome.

The Visitor Center

The staff of the Visitor Center, located in the
lobby of the Martin Luther King, Jr., Student
Union, answers questions about the campus
and conducts free 90-minute tours daily,
Monday through Friday, at 1 p.m. and MWF
at 10 a.m. During the semester, tours of a
residence facility are also available. Special
group tours may be arranged by calling 642-
5215. A brochure describing a self-guided
walking tour is also available for visitors
who wish to explore the campus at their lei-
sure. For information and questions regard-
ing current campus activities, call Calendar
at 642-2294.

Student Life

This section offers general information
about student life on the Berkeley campus
and brief summaries of some of the services
and organizations available, arranged in al-
phabetical order. You may obtain more in-
formation from the appropriate office or
from Resource, the student handbook.

The ASUC

The Associated Students of the University of
California (ASUC) is the official organiza-
tion of Berkeley students. Membership in
the ASUC is voluntary, although all students
must pay the ASUC fees. This nonprofit
organization, through its student-elected
council, is responsible for directing a large
variety of student activities and serves as
the official student spokesperson in University
affairs. Graduate students also elect depart-
mental representatives to the Graduate As-
sembly, which meets regularly in Anthony
Hall. The ASUC also provides a wide range
of programs and activities. Each year,
roughly $600,000 is distributed to student
activity groups, including associations, eth-
nic and cultural groups, hobbies, and sports.
The ASUC, moreover, sponsors vital pro-
grams such as student advocacy (642-6912),
the Student Legal Clinic (642-9984), the
Renters’ Assistance Project (642-1755),
and the Student Union Program, Entertain-
ment, and Recreation Board (SUPERB)
(642-7477).

The basic goals of the ASUC are to enhance
the quality of life for both students and the
community, as well as to increase the ave-
uines for student participation in education
and campus operations. Other important
goals of the ASUC are to protect full freed-

om of assembly and expression in the Uni-
versity community and to facilitate aca-
demic and social responsibility.

Career Planning

Career Planning and Placement
Center

The Career Planning and Placement Center
(642-1716; deaf and hearing impaired
(TDD), 642-0592) provides students and
alumni with assistance in defining their ca-

reer objectives based on information about
the world of work and an understanding of interests and skills acquired through education and life experience; teaches job search skills that assist in finding employment consistent with career objectives; provides on-campus interviewing opportunities for students seeking summer and career employment; and lists opportunities for internships and full-time, part-time, summer, and casual employment.

Advisers are available to assist students, their spouses, and alumni with any aspect of the career planning and placement process. An adviser at 2200 Bancroft Way can provide specialized assistance to disabled students and alumni.

Workshops and programs are conducted throughout the year on a variety of career development topics. Examples include career/life planning, resume writing, interviewing, summer jobs, and internships.

A career library (Building T-6, upper level) provides many valuable reference materials including occupational information, directories of employers, and past job listings.

Child Care

The Child Care Program is available to registered students and provides care for children between the ages of three months and eight years. Priority is given to children currently enrolled and then to families with low incomes. Two hours per week of parent participation are required. The fall semester application deadline is June 2. Late applicants are placed on an eligibility list. Applications and information are available from Child Care Services, 2537 Haste Street, Berkeley, CA 94720, 642-1827.

Special Interest Clubs

Besides regular ASUC-sponsored activities, there are more than 350 registered student organizations on campus serving special interests and activities. At the beginning of fall semester, an activities fair is held in Sproul Plaza to acquaint you with many of the organizations and to give you an opportunity to join. A list of registered student groups is available in Student Activities and Services, 102 Sproul Hall (642-6778).

Academic and professional societies, including clubs organized by many of the schools and departments, as well as national professional fraternities, provide you with an opportunity for seminars, discussions, lectures, tutoring services (both giving and receiving), and communication with members of academic or professional fields. Honorary academic societies are open to students of outstanding ability. These groups include Honor Students' Society, Phi Beta Kappa and Golden Key (national honor societies open by invitation to the top juniors and seniors in nonprofessional fields), Tau Beta Pi (a national society of upper division students in the College of Engineering and in chemical engineering), and various other groups within the several disciplines. Most of these groups offer tutoring services.

Student Publications

Student publications provide opportunities for involvement in all phases of publishing, writing, editing, reporting, art and design, advertising, sales, and general management. If interested, you should inquire at the Eshleman Library on the seventh floor, Eshleman Hall (642-2892). Grants are available through the Committee on Student Publications in 102 Sproul Hall (642-5376).

Office of Student Affairs

The Office of Student Affairs within the ASUC offers fiscal advice and program assistance to over 150 ASUC-funded student groups. For information call 642-4536.

Community Service Programs

As part of its overall mission to prepare students for good citizenship, Berkeley is committed to promoting the ethic of public service and encouraging students to participate in community service activities. These activities benefit the disadvantaged and address needs such as educating the illiterate, consoling the lonely and sick, serving the elderly, and preserving the environment.

CAL CORPS

The CAL CORPS' Service Projects, located in 303 Eshleman Hall, 642-3916, is the fiscal and administrative office for approximately 20 community service projects that are initiated and coordinated by students. The agency funds long-term projects such as tutorial and educational programs, nutrition projects, senior citizen projects, refugee and immigrant projects, dance and music programs, and other social service projects. If you are interested in starting a new project or doing volunteer work of any kind, the CAL CORPS' Service Projects offer orientation programs and information on its various services. Applications and proposals are welcomed during spring semester for the following academic year. Grants range from a few hundred dollars to $1500.

CAL CORPS Clearinghouse is a computerized database listing volunteer positions at more than 200 community agencies on campus and in the Bay Area, among them positions with museums, public schools, senior centers, and legal aid collectives. Students interested in volunteering must complete an
information form and are then counseled. Their information is entered into the computer, a "match" is made, and a list of agencies is printed.

Short-term or one-time volunteer opportunities are also available. Commitment may vary from a few hours to a weekend. CAL CORPS Clearinghouse is located in 103 Eshleman Hall. If you are interested, drop by the office or call 643-9131.

Stiles Hall
At Stiles Hall, a century-old institution dedicated to serving the broader community, students participate in several outstanding community service projects. In exchange for commitment, enthusiasm, and hard work, students can learn and grow personally and professionally while making a significant impact on the community. Students receive regular training and supervision from staff and community agencies and get to know and work with a diverse group of fellow students. Stiles Hall is located at 2400 Bancroft Way, 841-6010.

University YWCA
The University YWCA Volunteer Placement Program is coordinated with 40 community agencies representing health care, human services, and education. Placements are selected based on their strong appeal to students, often related to future career choices, and also because of the agencies' need for student services. In each placement students are trained and supervised by experienced professionals interested in working with student volunteers. The YWCA is located at 2600 Bancroft Way, 848-6370.

CalPIRG
The California Public Interest Research Group (CalPIRG) is an independent, nonprofit corporation established by Berkeley students for research and advocacy of contemporary public issues. Students propose and conduct CalPIRG projects with the aid of professional staff, and policy is set by a nonpartisan student board of directors. The CalPIRG office is at 407 Eshleman Hall, 642-9429.

Other Organizations
A large number of other campus organizations such as student religious groups, fraternities, sororities, student government, student service units, and academic departments also provide community service opportunities. For further information, consult the Internship Directory available at the CAL CORPS Volunteer Clearinghouse.

Counseling and Psychological Services
Counseling and Psychological Services include the Counseling Center, Psychiatry, and Student Advising—Pre-professional/Pre-graduate. The Counseling Center and psychiatric services are discussed below. The other programs are listed alphabetically elsewhere in this section.

Counseling Center
If you are a regularly enrolled student, you may talk in confidence with professional staff about your scholastic performance, choice of a major, personal concerns, assessing your interests and aptitudes, or exploring long-range career opportunities. Psychological and aptitude testing is provided as part of the counseling process. An extensive group counseling program is available on a variety of topics such as procrastination, coping with stress, and improving relationships.

The Counseling Center maintains a library of reference materials on occupations, professions, and career opportunities; a comprehensive collection of college catalogs; and directories of colleges, professional schools, and training programs which you may use, even if you are not seeking counseling services. Special testing for admission to graduate or undergraduate programs (except ETS and Psych Corp.) is administered at no charge. The Counseling Center is located in Building T-5, 642-2366.

Psychiatric Services
Psychiatric services are available to all Berkeley students. The highly trained professional staff includes licensed clinical social workers, clinical psychologists, and psychiatrists. The Psychiatry Clinic is open from 8 a.m. to 5 p.m., Monday through Friday. You should make your initial appointment in person. Appointments are possible before and during enrollment as well as during defined academic sessions. The service is located in 81 Cowell Hospital, 642-9494.

Disabled Students' Program
The Disabled Students' Program (DSP) is located at 2515 Channing Way, 642-0518; deaf and hearing impaired (TDD), 642-6376. If you have a permanent disability or temporary injury, you can receive help with personal and academic support services such as admissions, enrollment, readers, notetakers, sign language interpreters, attendant referral, adapted transportation, wheelchair repair, limited tutoring, and housing assistance. A residence program for severely disabled students needing attendant care is available. Many other services are available and most are free. If you have a visual, hearing, orthopedic, mobility, or learning or other nonvisible disability, you should contact DSP for complete information about ongoing services.

Educational Opportunity Program/Affirmative Action
The EOP/AA Counseling Component of the Student Learning Center provides supportive services and programs to students from economically disadvantaged backgrounds, and to students who are from ethnic minority groups that are underrepresented at the University. The Counseling Component offers assistance with personal, academic, and financial concerns. In addition, the component also administers a wide range of programs and activities designed to assist EOP/AA students in achieving their academic goals. Among these are the Reduced Study Load Program, the Emergency Loan Program, housing assistance, and the Achievement Award Program, which recognizes outstanding students.

The Counseling Component is located in the Student Learning Center, Room 220, Building T-8, 642-7224.
Graduate Assembly

The Graduate Assembly, whose offices are located in Anthony Hall (Pelican Building), 642-2175, is the graduate component of Berkeley's student government, the ASUC. The Graduate Assembly represents and serves the interests of graduate students. If you are a graduate student, you are welcome to participate in the various projects and activities of the Graduate Assembly, but formal representation is assigned through departments.

Services the Graduate Assembly offers include direct funding for graduate student groups and activities, an annual new graduate student orientation, teacher's assistant training programs, a Graduate Minority and Women's Project, and a lounge and meeting room for general use. Staff assistance is available for a variety of information and referral services including information on fellowships, affirmative action, and other campus units.

Health Services

University Health Service

The University Health Service (UHS) provides on-campus health promotion services, medical care, and dental care to Berkeley students, faculty, and staff. The staff includes more than 200 trained and licensed professionals in the general, specialty, and technical areas of health education, medicine, nursing, and dentistry. The UHS, Cowell Hospital, is an accredited treatment facility located on the eastern edge of campus. The UHS services are extensive enough to provide for most of the campus community's health care needs.

During the fall and spring semesters, the UHS is open every day. During semester breaks and summer, the UHS is open weekdays from 8 a.m. to 5 p.m. except holidays.

Health plan membership. Any registered Berkeley student who pays the registration fee is automatically a member of the UHS Health Plan. Because the UHS is supported by registration fees, you have already paid for the following services:

- Unlimited visits to an UHS physician or nurse practitioner of your choice; visits to UHS medical specialists in any of 15 different medical disciplines; walk-in urgent care for serious immediate medical problems; individual appointments with a nutritionist, chemical dependency counselor, or health educator to get help with everything from AIDS prevention to stress management; the most common laboratory tests and X-ray procedures; free workshops on a variety of health topics; and a safety net insurance plan to help defray the costs of hospitalization.

The UHS provides additional services for fees that are about 30 percent less than the community standard. These services include allergy tests and shots, dental services, minor surgery, prescription medication and over-the-counter drugs, a summer health care package, general physical exams, supplemental insurance covering students and/or their dependents, physical therapy, lab work and X-rays processed outside the UHS, and travel immunizations and information.

Most of the health care services you need are available to you at the UHS. Because the current plan is not designed to cover the rare catastrophic illness or injury, we encourage undergraduates to maintain any private health insurance currently carried. A more comprehensive insurance plan is under consideration for fall 1990. Graduate students are automatically enrolled in a major medical health insurance plan administered through the UHS.

Others who can use the UHS. The following groups may use most UHS services on a pay-as-you-go basis: Spouses of registered Berkeley students, including students at Boalt Hall; Berkeley visiting scholars and their spouses; participants in Berkeley special programs; UC faculty and staff (for work-related illness or injury, travel shots and other immunizations, and education programs); campus visitors (for illness or injury occurring on campus); and former students for one year after their last registration. Fees will be charged according to the services provided. If you have health insurance, reimbursement may be possible, and we can provide the information necessary to process a claim. Monthly payment plans are also available.

For additional information about services and how to use them, visit the University Health Service or phone 642-2000.

Optometry Clinic

The School of Optometry Clinic offers complete optometric services, including appointments for general eye and vision examinations and contact lens fitting. These services are part of the teaching program of the School of Optometry. The clinics are open to students, faculty, staff, and the general public. In addition to thorough examinations for general needs, clinical services are available in many specialties including contact lens fitting, ocular health evaluation, vision training for reading or sports, eye photography, binocular and infant vision, anisokoria exams, tests for vision functions, and special visual assessment for the handicapped. The clinic also offers job-related vision exams, services to video display terminal users, and safety glasses and has a low-vision rehabilitation center. Vision care coverage under University and other employers' benefit plans is accepted.

For appointments or information, call 642-5761, or go to the appointment desk on the ground level of Minor Hall Addition.

Housing

Admission to Berkeley does not guarantee housing reservations. You should acquaint yourself well before your enrollment with the various living arrangements possible. Undergraduates should check the appropriate box on the Application for Admission to receive descriptive material; graduate students should write directly to Housing Services, 2401 Boweditch Street, Berkeley, CA 94720, to receive descriptive material.

More than 9000 men and women live in University residence halls, fraternities, sororities, International House, cooperatives, and University Family Student Housing. Early application to living groups is recommended. The remaining students live in rooms and apartments in the community.

University Residence Halls

University-operated residence halls accommodate some 5000 students, approximately 75 percent of whom are freshmen. Each residence hall is unique, and to become acquainted with the options, new students are encouraged to read their housing information thoroughly. If possible, they should also...
take the tour offered by the campus Visitor Center. Most halls are co-ed, and all halls offer a dining facility, recreational and social programs, and study rooms. University housing includes "theme houses" which provide a living environment focused on a language or culture. Most residence halls are within a few blocks of campus.

Community Living
The Community Living Office offers rental listings and counseling for students who are looking for housing in the community. To use the services, you must visit the office at 2405 Bowditch Street and present one piece of photo identification and a current registration card or letter of acceptance to the University. There is a shortage of rental housing in and around Berkeley. Students should plan to spend at least one week and possibly up to three weeks looking for a place to live. For more information, write to the Community Living Office, 2401 Bowditch Street, Berkeley, CA 94720, or call (415) 642-3642.

Co-ops
The University Students' Cooperative Association (USCA) is a nonprofit, student-owned and operated organization that is independent of the University. The Co-op houses approximately 1400 students in 18 two- and three-story houses and apartments. Members must work five hours a week at a variety of duties. Contracts may be cancelled at the end of each semester. You may also join a program which allows you board although you do not room there. Admission priority is given to EOP/AA and disabled students. For more information, contact USCA, 2424 Ridge Road, 848-1936.

Fraternities and Sororities
Membership in a fraternity or sorority is by invitation after a period of "rushing." If you are interested, apply through the Interfraternity Council for men (643-6919), the College Panhellenic Association for women (643-6916), or the predominantly black National Pan Hellenic Council (643-6917). All three groups are located in 304 Eshleman Hall. Each will supply general information regarding programs and costs. Additional information is available from the University Greek advisers in 102 Sproul Hall.

International House
International House is a coeducational residence for students from the U.S. and abroad, primarily at the graduate level. It is also an intercultural program center for the campus. An active schedule of cultural, social, and recreational events is offered, designed to promote understanding and friendship among all nationalities. For an application and further information, write or call the Residence Office, International House, University of California at Berkeley; Berkeley, CA 94720; 642-9470 or 642-9460.

Family Student Housing
The University operates 1022 apartments for married students and single-parent families. The apartments are located at the University Village in Albany, approximately four miles northwest of the campus, and at the Smyth-Fernwald complex in Berkeley. You may apply for family student housing even before you have been admitted to the University. You should apply early, as assignments are made on a first-come, first-served basis. For more information, contact the Family Housing Assignment Coordinator, 2401 Bowditch Street, Berkeley, CA 94720, 642-4109.

Information
The Student Information Center on the main floor of the Student Union provides campus, transportation, and entertainment information; counseling and advising referrals; directory assistance; campus literature; career planning and placement bulletins and supplements; help with registration procedures; a Student Union lost and found; and on-loan magazines and newspapers. Call 642-INFO.

International Student Advising
Services for International Students and Scholars offers a wide range of services to international students, international scholars, and their families. Services include an international student orientation program, guidance on visa matters, help in solving financial problems, health care counseling, advice and referrals about personal concerns, and information on almost any topic of special interest to international students and scholars. Located in International House, 2299 Piedmont Avenue, 642-2818, the office is open Monday through Friday, 9 a.m. to noon and 1 to 4 p.m.

The International House Program Office, 642-9460, organizes cultural, social, and recreational programs that enhance the appreciation of various cultures. Programs offer opportunities for personal interaction and participation in campus and community events. Trips to neighboring communities for home stays and tours of local institutions and facilities enable international visitors and U.S. citizens to learn from each other; at the same time these activities introduce people from abroad to unique aspects of U.S. society. I House cultural events, parties, and slide shows enrich the extracurricular life of the campus.

Nonresident membership in the I House (for a nominal fee) keeps newcomers informed of activities for the international community.

Office of the Ombudsperson
The ombudsperson serves all students and academic staff of the University community who feel they have been treated unfairly or need help in resolving a problem. The ombudspersons at Berkeley are professors appointed for two-year terms by the Academic Senate. Ombudspersons have no official authority or administrative power to impose solutions. They are independent "agents of justice" who, if in their opinion the situation warrants it, investigate complaints and the conditions leading up to the complaints and attempt to work with all parties to mediate a satisfactory solution. All matters referred to the ombudsperson are held in the strictest confidence.
If you are confronted with a bureaucratic impasse or feel you have been treated unfairly or need help with a procedural or academic problem, contact an ombudsperson at 328 Stephens Hall. The office is open Monday through Thursday, 9 a.m. to noon and 1 to 4 p.m. To make an appointment, come by or call 642-5754.

Re-entry Program

The Re-entry Program provides special services to undergraduates over the age of 25 and to graduate students who enter Berkeley at age 29 or over. Workshops and programs designed to promote collaborative learning include individual writing assistance; writing groups; academic skills workshops; student/faculty colloquia; and support systems for specific groups such as student parents. The re-entry lounge provides an opportunity for students to meet each other for coffee between classes. Volunteer and paid internships are available. The lounge is in the Sproul Plaza Student Services Building (Dining Commons), 643-8070.

Religious Activities

Since the University is a state-supported institution, it does not offer chapel services or religious activity on campus. However, there are more than 35 churches and student religious clubs within a few blocks of the campus. For additional information, contact the Office of Student Activities and Services, 102 Sproul Hall, 642-5171.

Safety

The University maintains a campus police department of approximately 70 officers who are fully trained for your protection. Police services are located in Room 1 in the basement of Sproul Hall. You can make emergency calls on a 24-hour basis by telephoning 9-911 from nonrestricted office phones, 642-3333 from restricted phones, and 911 from campus pay phones. The emergency numbers should also be used to report fires and to request ambulance service. For general business, call 642-6760; for personal safety counseling and crime prevention information and training, call 642-3186; for lost and found, call 642-4936.

Escort Service

Night escort service is available to your car, nearby home, or public transportation from 6:30 p.m. to 12:30 a.m., Sunday through Thursday. Limited service is available Friday and Saturday. Call 642-WALK.

Rape Prevention Education Program

The University Health Service administers the Rape Prevention Education Program, which offers crisis counseling and assistance for victims and their friends and families, prevention workshops, self-defense training, and referrals. Call 642-7310.

Student Activities and Services

Student Activities and Services (SAS) staff work closely with students, campus units, and the ASUC on activities such as the Activities Fair; Leadership 98/197 courses; UC student regent recruitment; Immigrant Students Project; and the Residential Life Program. Registered students may use the free services of an attorney (see Student Legal Services, below) and the notary public (University documents only).

SAS assists in registering student groups, reserving facilities, disseminating information regarding campus rules and regulations, and administering funding for student activities and programs such as Community Projects Office, Forensics, Spirit Groups, Model United Nations, Cal in the Capital/Sacramento, and Committee on Student Publications. Sponsored groups include fraternities and sororities, service organizations, and honor societies.

SAS offers Cal Student Orientation (CalSO), an orientation program for new students and their parents, during the summer and at the start of each semester. Information, advice, and the student handbook Resource are provided to help new students ease into life at Berkeley. CalSO also organizes fall’s Welcome Week and runs the CalSO Resource Center in the Martin Luther King, Jr., Student Union, which helps students with class enrollment during the early weeks of each semester. SAS is located in 102 Sproul Hall (642-5171).

Student Learning Center

The Student Learning Center is an academic support service that offers tutoring and learning skills assistance to University students. The Counseling Component of the center provides assistance with personal, academic, and financial aid concerns to Educational Opportunity and Affirmative Action students.

Learning skills assistants provide individual and group tutorial services in writing, study skills, and reading improvement, and in introductory courses in the humanities, social sciences, mathematics, and sciences. Other services include preparation for graduate and professional school exams. The Student Learning Center is located in Building T-8, 642-7332, and in 111 Wheeler, 642-7022.

Student Legal Services

If you are concerned about a legal problem or want information about your legal rights and obligations, you are encouraged to make an appointment with the Student Legal Services’ attorney by calling 642-4980. Offices are located in 102 Sproul Hall and are open Monday through Wednesday.

Women’s Resource Center

The Women’s Resource Center is a student service unit that promotes and supports the academic achievement and personal development of women students at Berkeley. The center serves as a clearinghouse for information by providing a drop-in resource and referral area, a women’s library collection, a campus newsletter, and a central calendar of campus and community events of special interest to women. The center also sponsors workshops, events, and support groups and acts as an advocacy resource concerning the needs of women. Hours are from 8:30 a.m. to 5 p.m. Monday through Friday, in the Sproul Plaza Student Services Building (Dining Commons), 642-4786. The library is open from 10 a.m. to 4 p.m.
The 1500 men and women of the Berkeley faculty constitute one of the most outstanding faculties of any university in the world. In both research and teaching, the quality of their efforts has been recognized by their students and national and international organizations. In addition to the 9 Nobel laureates on the faculty, there are four Pulitzer Prize winners and more than 150 members of the national academies of sciences and engineering. Over the last 20 years, more Berkeley faculty have won Guggenheim fellowships than faculty at any other university.

In the six-year history of the program, more young faculty in the sciences and engineering at Berkeley were named Presidential Young Investigators by the National Science Foundation than from any other university.

Berkeley has 60 “organized research units” administered separately from the teaching departments. These interdisciplinary units support the research of faculty and assist in graduate student training. Among them are Lawrence Berkeley Laboratory, Earthquake Engineering Research Center, Institute of International Studies, Earl Warren Legal Institute, and the Cancer Research Laboratory.

As a prospective Berkeley undergraduate, you should give careful thought to preparing yourself adequately in reading, writing, mathematics, and other areas related to your intended major. The more comprehensive and challenging your high school or college program is, the better prepared you will be for work at Berkeley.

High school honors-level and advanced placement courses are good preparation for Berkeley, regardless of the major you choose. The nature of instruction and the subject matter you cover in advanced courses will give you a definite advantage in your studies. These challenging courses will help you develop the good study habits and skills you will need at Berkeley.

Applying for Admission

How to Apply

If you are interested in applying to Berkeley, you can obtain an undergraduate application packet from your high school or community college counselor’s office or any of the University of California campuses’ admissions offices. The packet contains an application form and explains the application process, fees, and all the items you must submit with your application. You may apply to as many UC campuses as you wish, using one application form. (The San Francisco campus, which is devoted to the health sciences, has its own application and filing procedures.)

You should be aware of the importance of the priority filing periods. Berkeley has received an increasing number of applications in the last few years, so generally we are not able to accept applications after a filing period ends.

Certain schools and colleges do not accept applications for admission to the spring term. Check with the campus Office of Admissions and Records at 642-3175 to find out if the college you want to apply to has any filing period restrictions.

Priority Filing Periods

Fall semester 1991: File November 1-30, 1990

Note: For information about application fees and fee waivers, see Fees and Financial Aid beginning on page 55.

Application Fees and Fee Waivers

The basic application fee of $40 entitles you to apply to one University campus. If you apply to more than one campus, you must pay an additional $40 for each campus you select. These fees are not refundable. You must include your fees with the application or it will not be processed.

The University will waive application fees for up to three campuses in order to assist students for whom payment is a barrier to application to the University. Students who qualify for fee waivers and who select more than three campuses must pay $40 for each additional choice. To be accepted for the fee waiver program, your family income and the number of dependents must be within specific guidelines.

There are four ways to obtain a fee waiver:

1. If you are in high school, you may use the College Board fee waiver. You may obtain an application for this waiver from your high school counselor.

2. If you are enrolled in the EOPS program in a California community college, you may obtain a fee waiver from your EOPS office.

3. You may obtain a fee waiver application from Berkeley’s Office of Admissions and Records, Office of Relations with Schools, or the EOP Office.

4. If you are unable to obtain a fee waiver from any of the sources mentioned above, you may attach a letter to your admission application requesting consideration for a fee waiver. In the letter, describe your family’s income, the number of dependents, and the hardship that makes payment of the application fee difficult. Berkeley will review the letter and may grant you a fee waiver if appropriate.
Competitive Admission at Berkeley

Berkeley makes an effort to provide a place for applicants who meet the minimum admissions requirements and who file an application during the appropriate filing period. When the number of applicants exceeds the spaces available for a particular college or major, the campus uses additional criteria to select students. Meeting the minimum requirements, therefore, is not enough to gain admission to Berkeley. See the Appendix for more information on selection criteria.

Admission as a Freshman

Berkeley considers you a freshman applicant if you have graduated from high school and have not enrolled in a regular session at any college or university. If you attend a summer session immediately after graduating from high school, you are still a freshman applicant.

Minimum Eligibility Requirements

California Residents*

To be eligible for admission to Berkeley, you must meet the subject, scholarship, and examination requirements described below.

Subject Requirement

To satisfy this requirement, you must complete the high school courses listed below with a grade-point average defined by the scholarship requirement. This sequence of courses is also known as the "a-f" requirements. You must take 15 units of high school courses to fulfill the subject requirement, and at least 7 of the 15 units must be taken in your last two years of high school. (A unit is equal to an academic year, or two semesters, of study.)

Applicants from California high schools: To be acceptable to Berkeley, the courses must appear on a list certified by your high school principal as meeting Berkeley's admissions requirements. Your counselor or principal will have a copy of this list.

</table>

*ACT is scored in intervals of 1 point, from a minimum of 1 to a maximum of 35 or 36. Use the first score listed if you take the test before October 1989. Use the second score if you take the test October 1989 or later.

**SAT is scored in intervals of 10 points, from a minimum of 400 to a maximum of 1600.

Scholarship Requirement

The scholarship requirement defines the grade-point average (GPA) you must attain in the "a-f" subjects to be eligible for admission to Berkeley. If your "a-f" GPA is below 3.3 but above 2.77, you have met the minimum requirement if you achieve the necessary college entrance test score indicated in the eligibility index on this page.

Berkeley calculates your GPA in the "a-f" subjects by assigning point values to the grades you earn, totaling the points, and dividing the total by the number of "a-f" course units. Points are assigned as follows: A=4 points, B=3 points, C=2 points, D=1 point, F=0 points.

The grades you earn in "a-f" subjects in the 10th, 11th, and 12th grades are used to calculate your GPA. Courses taken in 9th grade can be used to meet the subject requirement if you earn a grade of C or better, but they will not be used to calculate your GPA.

Honors courses: Berkeley assigns extra points for up to 4 units of certified honors-level and advanced placement courses taken in the last two years of high school: A=5 points, B=4 points, C=3 points. A grade of D in an honors or advanced placement course does not earn extra points.
The courses must be in the following "a-f" subjects: history, English, advanced mathematics, laboratory science, or foreign language, and they must be certified at your high school as offered at the honors level. In these fields, as well as in the fields of computer science, social science, and the visual and performing arts, courses that are designed to prepare students for an advanced placement examination of the College Board and college courses that are transferable to Berkeley are acceptable honors-level courses.

D and F grades: D and F grades in the "a-f" courses must be repeated or validated. Consult with your counselor to determine how these grades can be improved and how Berkeley will use them in evaluating your scholarship record. Grades will not be used for repeated courses in which you initially earned a grade of C or better.

Examination Requirement
You must submit the following test scores:
One aptitude test, either the Scholastic Aptitude Test (SAT) or the American College Test (ACT). The verbal and mathematics scores on the SAT must be from the same sitting. The ACT composite score must be submitted.

Three College Board Achievement Tests (ACH), including English Composition, Mathematics Level 1 or 2, and one test in one of the following areas: English literature, foreign language, science, or social studies.

For information about the tests you must take to fulfill the examination requirement, talk to your school counselor or write to the appropriate address below. Berkeley strongly advises you to take these tests by December of your senior year.

For the SAT and ACH: College Board ATP, P.O. Box 6200, Princeton, NJ 08541-6200.
For the ACT: American College Testing Program, Registration Unit, P.O. Box 168, Iowa City, IA 52240.

Admission by Examination Alone
If you do not meet the subject and scholarship requirements, you may be able to qualify for admission to Berkeley by examination. To satisfy the minimum requirements for qualifying by examination alone, you must achieve a total score of 1100 or higher on the SAT or a composite score of 26 (or 27 if taken October 1989 or later) or higher on the ACT. In addition, you must earn a total score of 1650 or higher on the three College Board Achievement Tests, with a minimum score of 500 on each test. You cannot qualify for admission by examination alone if you have completed 12 or more units of transferable course work at another college or university following high school graduation, or if you have taken transferable college courses in any subject covered by the College Board Achievement Tests.

High School Proficiency Examination
Berkeley accepts the Certificate of Proficiency awarded by the State Board of Education for completion of the California High School Proficiency Examination in lieu of a regular high school diploma. Berkeley also accepts the General Education Development (GED) certificate and certificates of proficiency awarded by other states. You must satisfy all other admission requirements if you apply with a certificate of proficiency.

Admission of Nonresident Applicants
The minimum freshman admission requirements for nonresidents of California are the same as those for residents except for the following:

Scholarship requirement: Your grade-point average in the "a-f" subjects must be 3.4 or higher, regardless of your college entrance examination score. The eligibility index is used only for California residents.

Admission by examination alone: You must score at least 1100 on the SAT or 26 (or 27 if taken October 1989 or later) on the ACT. Your total score on the three College Board achievement tests must be at least 1730, with a minimum score of 500 on any single test.

Admission as a Transfer Student
Berkeley considers you a transfer applicant if you graduated from high school and enrolled in a regular session at another college or university. You cannot disregard your college record and apply as a freshman.

If you plan to attend a California community college before applying to Berkeley, you should take courses that are transferable, that satisfy University and college requirements, and that fulfill prerequisites in your intended major. Advisers in the Office of Admissions and Records and community college counselors can help you with your planning.

The University publishes a booklet especially for transfer applicants called Answers for Transfers. It is available from your community college counselor or the Office of Relations with Schools; call 642-5135.

California Residents*
There are three ways in which you can meet the University's minimum admission requirements for transfer students. These requirements are described below. In all cases, you must have at least a C (2.0) average in all transferable course work.

Requirements for Nonresidents
The minimum admission requirements for nonresident transfer applicants are the same as those for residents except that nonresidents must have a grade-point average of 2.8 or higher in all transferable college course work.

Minimum Eligibility Requirements

Requirements for Residents
1. If you were eligible for admission to Berkeley when you graduated from high school—meaning you satisfied the subject, scholarship, and examination requirements—you are eligible to transfer if you have a C (2.0) average in your transferable college course work.

*Residency status: The requirements for California residents also apply to dependents of University of California graduates and employers. The manner in which legal residence is defined for tuition purposes is different. If you have questions about your residency status, see the Appendix or contact the Office of Admissions and Records at 642-1614.
2. If you met the scholarship requirement but did not satisfy the subject requirement, you must take college courses in the subjects you are missing to be eligible to transfer. You will need to earn a grade of C or better in each of these required courses and an overall C (2.0) average in all transferable college course work. If you completed less than 12 quarter or semester units of transferable college course work, you must also satisfy the examination requirement.

3. If you were not eligible for admission to Berkeley when you graduated from high school because you did not meet the scholarship requirement, or you did not meet the scholarship requirement and did not complete all the required "a-f" subjects, you must (a) complete 84 quarter units or 56 semester units of transferable college credit with a grade-point average of at least 2.4 and satisfy either (b) or (c) as follows: (b) take college courses in the subjects you are lacking and earn a grade of C or better in each one (Berkeley will waive up to 2 units of the required high school course work except in mathematics and English); (c) complete one college course in mathematics, one in English, and one selected from either U.S. history, laboratory science, or foreign language. You must earn a grade of C or better in each course. All courses, with the exception of the required mathematics course, must be transferable. The course in mathematics must assume a proficiency level equivalent to three years of high school mathematics (i.e., elementary algebra, advanced algebra, and geometry). The course may be trigonometry or a more advanced course in mathematics or statistics for which advanced algebra is a prerequisite.

When the number of applicants exceeds the spaces available for a particular college, school, or major, the campus uses criteria that exceed the minimum requirements to select students. (See the discussion of selection criteria in the Appendix for more information.) Meeting the minimum requirements, therefore, is not enough to gain admission to many programs at Berkeley.

For additional requirements for admission in advanced standing, see the announcement of the individual college or school to which you seek admission.

Intercampus Transfers
If you are registered on any campus of the University or were previously registered in a regular session of the University, you may apply for transfer to another campus of the University by filing the undergraduate application. Filing dates and application fees are the same as those listed for new applicants.

Admission of International Applicants
International students are those holding or intending to apply for nonimmigrant visas. Whenever possible, the admission of international applicants is incorporated into the regular admission process for U.S. citizens or permanent resident applicants as defined above. However, many applicants have foreign educational credentials which make this impossible. These applicants are individually reviewed and assessed by international admission specialists. Using their knowledge of educational systems throughout the world, the international admission specialists determine which applicants have qualifications deemed equivalent to the Berkeley admission requirement previously described.

If you are applying from another country, you should request further information about admission to Berkeley, visas, special examinations, fees and expenses, housing, and travel. Direct your inquiries to the Office of Admissions and Records, 120 Sproul Hall, 642-3246. If you need to improve your English language skills, you should contact the English Language Program, University of California Extension, 2223 Fulton Street, Berkeley, CA 94720, USA. All nonimmigrant international students must check in with Services for International Students and Scholars, International House, 2299 Piedmont Avenue, Berkeley, as soon as possible.

Readmission
If you formally withdraw from Berkeley, were absent for one or more semesters, or are returning to Berkeley in the Limited Status or Second Bachelor's programs, you must file an Undergraduate Application for Readmission. Application deadlines are April 15 for fall admission and August 15 for spring admission. Applications must be accompanied by a $40 readmission fee. If you attended other colleges or universities while you were away from Berkeley, you must send an official transcript to Berkeley immediately. Address correspondence to Admissions, Office of Admissions and Records, 120 Sproul Hall, or call 642-0734.

Special Admission
Because all students have not had the same opportunities to prepare for higher education, Berkeley gives special consideration to a limited number of both freshman and transfer applicants who show potential to succeed at Berkeley although they do not meet the minimum admission requirements. If you think you qualify for special admission, contact the Office of Admissions and Records at 642-3175.

Student Affirmative Action (SAA) and Educational Opportunity Programs (EOP)
Berkeley recognizes and values the intellectual and cultural contributions of a student population that reflects the rich diversity of the people of California. To promote this diversity, Berkeley has a Student Affirmative Action (SAA) program for students from historically underrepresented ethnic groups, and an Educational Opportunity Program (EOP) for students from educationally disadvantaged and low-income backgrounds. These programs help students who are interested in attending college and who are already enrolled at Berkeley.
Through SAA, you may take advantage of a variety of special educational programs and support services. For example, you may participate in Early Academic Outreach developmental programs before you enroll at Berkeley. These programs will help you select the proper courses in high school and strengthen your academic skills. Through Immediate Outreach, counselors will advise you about your prospects for admission and help you with the admissions process. If you qualify for financial assistance, SAA provides application fee waivers, information about financial aid, and financial advising.

Once you enroll, SAA offers special services to help you make the transition to life at Berkeley. These include Summer Bridge programs, orientations, personal counseling, academic advising, and academic skills development. All students from underrepresented ethnic groups are eligible for SAA services.

The support services provided to educationally disadvantaged and low-income students by EOP complement the services offered by SAA. EOP is open to students who meet the regular admission requirements. In addition, EOP provides special assistance to applicants who do not meet the regular admission requirements but who can demonstrate the ability and potential to succeed at Berkeley. (See above for information about special admission.) You may apply to EOP on Berkeley’s undergraduate admission application.

If you are considering Berkeley and you qualify for these programs or want more information, contact the Office of Admissions and Records at 642-3175.

Limited Status
Limited-status students either hold a bachelor’s degree but are ineligible for admission to graduate standing, or, without a bachelor’s degree, have completed a substantial amount of college work. In practice, Berkeley generally admits only students who hold a bachelor’s degree. These students are in a special category of undergraduates who have earned an undergraduate degree with a record of superior scholarship (an overall grade-point average of at least 3.3), but need additional undergraduate course work for a specific and clearly defined purpose.

Limited status is granted only in special circumstances; students’ needs, abilities, and programs should have enough urgency to justify admitting them in place of students in regular status, and there should be no reasonable alternative available. Use of limited status to enable students to raise their scholarship average is not permitted.

**Work Toward a Second Bachelor’s Degree**

If you are a candidate for a second bachelor’s degree, you will be considered for admission only if you need an entirely new major program for a valid educational purpose. To apply for this program, you must have earned an undergraduate degree with a record of superior scholarship (an overall grade-point average of at least 3.3) and must have completed all lower division requirements for your proposed major with excellent grades. Your proposed program must represent a definite change in field from your first undergraduate degree, and you must prove that you require the second degree for the stated purpose. If you need course work but not a degree in a new field, you should apply for limited status (see above) instead.

In practice, Berkeley admits very few students to the limited status or second bachelor’s programs each year. Detailed information about these programs is available in the Office of Admissions and Records, 123 Sproul Hall.

If you are not eligible for the second bachelor’s or the limited status programs, you may consider concurrent enrollment through UC Berkeley Extension as an alternative.

---

**Registration and Enrollment in Classes**

**The Advance Class Enrollment System**

Berkeley’s computerized Advance Class Enrollment (ACE) system enables you to request classes and receive a class schedule well before each semester begins. The system is designed to increase the probability that spaces will be available for all students wishing to take a particular course. For courses that are limited in enrollment, ACE will ensure that students who meet the courses’ specific priority requirements are scheduled first.

To register and enroll, follow these steps:

**Obtain Your Registration Packet**

*New students (including transfer students):* You will be mailed your registration packet after you return your Statement of Intention to Register, Statement of Legal Residence, and the $100 deposit.

*Readmitted students:* You will be mailed your registration packet after receiving approval of your readmission.

**Continuing students:** You must obtain your registration packet in person at locations indicated on campus bulletin board placards during the Advance Enrollment period (see the Academic Calendar at the front of this catalog).

Your registration packet will contain a Schedule Request Form for requesting classes and a billing statement for paying your registration fees. If you will be a new or readmitted student, you will also receive a Schedule of Classes which lists the meeting times and locations of all courses to be given at Berkeley for the term. Continuing students must purchase one from the ASUC Bookstore or from other local bookstores.

**Select Classes and Submit Your Schedule Request Form**

With the Schedule of Classes and the General Catalog, you can determine a class schedule. You are encouraged to contact a college, school, or major adviser to help you choose classes and formulate a schedule tailored to your particular academic interests. Once you have selected your classes, you must complete and submit your Schedule Request Form by the appropriate ACE deadline.
Pay Registration Fees
You must pay the fees indicated on your billing statement by the ACE fee payment deadline in order to be scheduled into classes. You may pay your fees in full or in three installments on the Deferred Payment Plan (see below). If your fees are not paid in full by the designated due dates, you may be dropped from the rolls for the current term and blocked from future registration in accordance with University policy.

The Deferred Payment Plan: You may pay your registration fees in three installments if you wish. A $10 nonrefundable processing fee will be charged to your first installment. Your billing statement will indicate the amount due for the first payment; subsequent statements for the remaining payments will be mailed to your local address on file with the Office of Admissions and Records. For full information about the Deferred Payment Plan, read the billing statement or call the Loans and Receivables Office at 643-6373.

Receive Your Confirmed Class Schedule
If you submitted your Schedule Request Form and paid your registration fees by the ACE deadline, a Confirmed Class Schedule will be produced for you shortly before the beginning of the semester. You may have your schedule mailed to your local or permanent address or have it held for pickup at the Office of Admissions and Records.

You are responsible for all classes into which you have been scheduled. To make any changes, you must file a Petition to Add/Drop Courses and/or a Petition to Change Grading Option on or after the first day of instruction.

In-Person Registration
If you fail to submit your Schedule Request Form and/or pay your registration fees by the ACE deadlines, you will have another opportunity to do so at In-Person Registration at the beginning of the semester. However, you will be limited to requesting classes that are still open after the scheduling of students who enrolled through ACE. Continuing students will be liable for a $50 late registration fee and/or a $50 late enrollment fee. Confirmed Class Schedules will be available on the first day of instruction.

Myths and Facts About Majors and Careers
Myths about the relationship between your major and career goals abound. When you choose a major, you should have no misconceptions about the undergraduate preparation you will need to pursue your goals. Several popular myths about majors and careers are debunked below.

Myth: When you choose a college major you are choosing a career.
Fact: A study conducted by the College Placement Council found that the majority of college graduates are successfully employed in fields not directly related to their academic majors. A few majors such as engineering, computer science, and accounting prepare students for fairly specific career fields, but most majors, especially in the liberal arts, give graduates a wide range of career options.

Myth: You should choose a career that is in high demand.
Fact: The job market moves in cycles. The career that is in high demand now may be glutted by the time you finish college—either because so many people have already entered that field or because economic patterns have changed. New fields are also constantly opening up. So it is better to choose a major and career that genuinely interest you.

Myth: Liberal arts majors are not employable.
Fact: Liberal arts majors develop skills that are highly valued by employers and that are applicable to a wide variety of professional jobs. If these graduates sometimes take longer to find a niche in the working world, it is because they have not defined their goals or are unaware of their options.

Undergraduate Majors and Degrees
Planning for a Major
The decision on the choice of a major is a very important one and should be made on the basis of your interests and abilities as well as your career goals. You should look carefully into the programs available by using this catalog and by visiting departments in which you are interested. Your adviser can help you explore the possibilities of interdisciplinary majors, which you take by declaring a group major or field major. If the major you are interested in is offered in more than one college or division, your adviser can help you choose the one that best suits your academic goals.

You are strongly urged to declare your major as soon as possible and should begin thinking about possible majors in your first year at Berkeley. Some majors require a full four years to complete; most majors require that some or all of the lower division major...
requirements be completed before you may be accepted into the major. Since you are expected to be accepted into a major by the time you have completed 60 units, these lower division major requirements should be planned into your program for the first two years. It is possible for you to plan a program that would include preparation for any time up to the last semester of residence.

There are some majors which are very crowded and cannot accommodate all applicants. You should consult closely with the departments in which you have an interest to learn of any restrictions that have been placed on entry to the major.

**Declaration and Change of Major**

Regulations and procedures for declaring the major vary for each college. You may, at any time up to the last semester of residence, file a petition for a change of major. You must secure approval for this action from the dean or other authorized person in the college or department to which you are transferring.

**Preparation for Graduate Study**

If you are preparing for study toward a higher degree, you should learn, as early as possible, the entrance and degree requirements of your graduate field, in order to include all prerequisite steps in your undergraduate program.

Minors
Minors are offered at Berkeley in many departments and groups in the College of Letters and Science (Afro-American Studies, Art, Asian Studies, Celtic Studies, Classics, Demography, English, Ethnic Studies, Geography, Music, Near Eastern Studies, Philosophy, Physics, Religious Studies, Rhetoric, Slavic Languages and Literatures, South and Southeast Asian Studies, Women's Studies, and many foreign language departments), in the College of Environmental Design, and in the College of Natural Resources. For more detailed information and lists of the minors available, see the section "Colleges and Schools," beginning on page 71.

1Applicants interested in prevetinary medicine should apply for the major in bioresource sciences in the College of Natural Resources and contact the prevetinary ad­ viser after admission.
2College of Natural Resources students who are already pursuing the B.S. in genetics or molecular plant biology may continue in the programs but are encouraged to consider changing to a major in plant biology or biore­ source sciences.
3The School of Business Administration requires completion of 60 semester units for admission into its program.
4A chemistry major may be taken either in the College of Chemistry (B.S.) or in the College of Letters and Science (A.B.).
5Computer science may be studied either in the College of Engineering (B.S. in electrical engineering and computer sciences) or in the College of Letters and Science (A.B.).
6See Announcement of the College of Engineering for details.
7Nutrition and clinical dietetics requires completion of 56 acceptable semester units for admission into its program.
8Optometry requires completion of 90 acceptable semester units for admission into its program.
9Applicants interested in peace and conflict studies should apply for an alternate major and contact the peace and conflict studies adviser after admission.
10Applicants interested in physiological optics should apply for optometry and contact an adviser after admission.
11These degrees were closed to new students in the College of Letters and Science beginning fall semester 1989.
Letters and Science students already pursuing these degrees may continue in the program provided they complete all degree requirements and graduate before fall semester 1993.
12Students will no longer be able to declare majors in pest management and plant pathology as of fall 1990.

Undergraduate Degree Requirements
As soon as you have been accepted for admission to Berkeley, you should learn the requirements you will have to fulfill to earn your bachelor's degree. These requirements are prescribed by three sources: the University, your college or school, and your department. All are summarized below. For more information, please visit the Office of Admissions and Records, Student Service Area, 128 Sproul Hall.

University Requirements
The University sets two general requirements for the baccalaureate degree: Subject A and American History and Institutions.

Subject A Requirement
The University assumes that you are proficient in English and in writing about academic topics. Fulfillment of the Subject A requirement is a prerequisite to enrollment in all freshman Reading and Composition sequences. If you have not passed the Subject A examination or otherwise fulfilled the requirement on entrance to the University, you must complete Subject A1 or the equivalent course Asian American Studies 1.

If your native language is not English, you may have to complete one or more preliminary courses before completing a Subject A1-level course. Beginning with your first semester at Berkeley, you must enroll each semester in a course leading to fulfillment of the Subject A requirement until you have fulfilled the requirement. If you enter at the Subject A1 level and have not fulfilled the requirement after two semesters, you may not be eligible to enroll at Berkeley for a third semester.

In addition to a passing score on the Subject A examination, the Office of Admissions and Records accepts the following means of fulfilling the Subject A requirement before you enter the University:

• A score of 600 or above on the English Composition Test of the College Entrance Examination Board (CEEB).
• A score of 3, 4, or 5 on the CEEB Advanced Placement Test in English Composition and Literature or in English Language and Composition.
• A score of "Pass for Credit" on the California State University and Colleges English Equivalency Examination.
• A score of 600 or above on the Test of English as a Foreign Language (TOEFL). (Restricted to non-native speakers of English who have had no previous academic work in English-speaking countries and who have taken the test before their arrival in the United States.)
• A grade of C or higher in an approved transfer-level English composition course taken at another institution.

American History and Institutions Requirements
The American History and Institutions requirements are based on the principle that a U.S. resident enrolled at an American university should have an understanding of the history and governmental institutions of the United States. These requirements may be met as follows:

1. Options for Students Entering Berkeley for the First Time Fall Semester 1983 or Later:
Both the American History and the American Institutions requirements may be satisfied in the following ways:
• By fulfilling the "a" subject requirement for admission (one year of U.S. history or one-half year of U.S. history and one-half year of U.S. government in high school with a grade of C or better).
• By taking one quarter or semester of a transferable course in basic U.S. history or U.S. government at a college or university before entering Berkeley. Inquiries about specific courses should be directed to the Office of Admissions and Records, 120 Sproul Hall.
• By passing the high school Advanced Placement American History exam with a score of 3 or better.
• By passing the College Board Achievement Test in U.S. history with a score of 500 or better.
Planning Your Program/College of Letters and Science

You will note in the selection of sample programs below that there are several ways to fulfill College requirements such as the reading and composition requirement. If you plan to take a mathematics course, please read with great care Choosing Your First Math Course at UCB, available in the Office of Undergraduate Advising. As you look through the courses in this catalog, you will learn that some courses must be taken in a specific sequence while many others may be taken in random order. The courses taken in your first year should be selected for a variety of reasons, including the following:

1. General interest
2. Fulfillment of degree requirements listed in the Announcement of the College of Letters and Science
3. Prerequisite (or lower division) requirements for the major or majors you wish to consider. Most major departments will not accept you into the major until the lower division requirements for that major are completed. These prerequisites are listed in the “Courses and Curricula” section of this catalog for all majors in the College of Letters and Science.

=[workload credit]
• For students transferring from another UC campus: by taking any course or courses that satisfy the AH&I requirements of that campus.

Students who have not satisfied the AH&I requirements before entering Berkeley may satisfy them in the following ways:

• By taking the American History and/or American Institutions exams (see Section II, 4 below).

• By taking at Berkeley, History 7A or 7B for the History requirement, and Political Science 1 or 100 for the Institutions requirement. (Students who took other courses before fall semester 1988 may check with the AH&I Office, 29 Dwinelle, 642-5006, for possible AH&I credit.)

• By taking a course or courses, approved by the AH&I Office, at another collegiate institution.

• By mixing these three alternatives (for example, an exam for one requirement and a course for the other).

Freshmen: Your first opportunity to see the status of your AH&I requirements will be on your first Berkeley transcript.

II. Options for Students Who Entered Berkeley Between Fall 1981 and Spring 1983:

• History Requirement: By completing two semesters of U.S. history in high school with an average grade of B or better.

• Institutions Requirement: By completing one semester of U.S. government in high school with a grade of B or better.

• By taking, at Berkeley, History 7A or 7B for the History requirement, and Political Science 1 or 100 for the Institutions requirement. (Students who took other courses before fall semester 1988 may check with the AH&I Office for possible AH&I credit.)

• By petitioning for the acceptance of courses taken at an accredited college or university and equivalent in scope and content to those on the approved Berkeley course list. When making such a petition, you should present a course syllabus, reading list, and copy of your transcript or report card to the AH&I Office.

• By passing two essay examinations, one for each requirement. The exams are based on three topics and their associated readings, are graded passed/not passed, and are offered on campus throughout the year. If you want to take either or both of the exams, you may obtain the reading lists, sample answers, and test dates at the AH&I Office.

• The American History requirement can be fulfilled by passing the Advanced Placement Test in American History with a score of 3, 4, or 5 by passing the College Board Achievement Test in American History with a score of 500 or better.

• By mixing these five alternatives (for example, an exam for one requirement and a course for the other).

III. Students Who Entered Berkeley Before Fall 1981 may use any of the options listed under Section II above, with the following exceptions:

High school courses will not satisfy either the History or the Institutions requirement.

The College Board Achievement Test will not satisfy the American History requirement.

IV. International Students: The AH&I requirements will be waived if you have at least 90/2 semester units (senior status), hold a current, nonimmigrant visa (F is the most common), and an I-94 departure record. You should present your visa and I-94 record to the Office of Records, 128 Sproul Hall, before the semester in which you will graduate. International students intending to remain in the U.S. must fulfill the AH&I requirements.

College and School Requirements

Every college and school has established a program of requirements for the degree, which may be in addition to those of a field of concentration. These requirements may include (1) preparatory subject requirements for admission; (2) preparatory college-level courses for your particular field of study—to be completed, if possible, during your early period of residency in the college or school, or in some cases before entrance; (3) breadth requirements, courses outside the field of study, considered essential to a well-rounded curriculum; (4) the credit requirement, which is the total number of units to be completed, with specifications of how these credits are to be distributed; and (5) a minimum scholarship requirement. For detailed information you should obtain a copy of the announcement of your college or school.

Reading and Composition Requirement

The Berkeley campus is strongly committed to developing high levels of ability in critical thinking and communication among its undergraduates. Hundreds of courses require long papers and a number of courses provide training in writing or speaking. In addition to the Universitywide Subject A requirement, the College of Letters and Science and most other colleges and schools require two semesters of lower division work in composition. The following departments and programs regularly offer courses that satisfy the reading and composition requirement: Afro-American Studies, Asian American Studies, Chicano Studies, Comparative Literature, Undergraduate Interdisciplinary Studies (formerly Special Programs), Dramatic Art, English, Native American Studies, Rhetoric, South and Southeast Asian Studies, and Women’s Studies. Since each course has a slightly different focus, you should contact the individual departments for details and consult your college or school for the particular courses that satisfy its requirements.

Minimum Scholarship Requirement

If you fail to maintain the minimum grade-point average prescribed by your college or school, you will normally be dismissed or put on probation. Since scholarship rules are applied only at the close of regular sessions, grade points that you earn in a University of California summer session or by removing an Incomplete grade are not taken into consideration until the close of your next semester of attendance.

Residence Requirement

After you have completed 90 units toward the bachelor’s degree, you must complete at least 24 of the remaining units in residence in no fewer than two semesters in the college or school of the University in which you will take your degree. You must begin these final 24 units in the semester in which you exceed 90 units. You should consult the announcement of your college or school for details concerning the senior residence requirement as it pertains to the summer session.
Departmental Requirements
Every student must select a field of concentration and pursue a major or curriculum, normally by taking a minimum number of units in one department or school. Occasionally—as with business administration, optometry, and others—the school and the department are synonymous. In some cases a major may embrace more than one department, as with the social science field major in the College of Letters and Science.

Major Requirements
Major requirements that must be fulfilled before you may receive a baccalaureate degree are outlined in each department in the “Courses and Curricula” section of this catalog. See also your department adviser.

Declaration of Candidacy
If you know at the beginning of a semester that you will have fulfilled graduation requirements by the end of the semester, you must fill in the appropriate bubble on the back of your Schedule Request Form just before the beginning of the semester in which you will complete your degree requirements. You may also declare your candidacy in person in the Office of Admissions and Records, 128 Sproul Hall. The period for declaring candidacy is the first five weeks of the semester. Up to the end of the third week you may declare with no fee, and from the third to the end of the fifth week there is a $5 fee. If for any reason you do not meet the requirements for graduation after declaring your candidacy, you must file a new declaration in the filing period for the subsequent semester in which the degree will be awarded. If you are a nonregistered student at the time you are ready to declare your candidacy, you must go in person to 128 Sproul Hall to fill out the form “Candidate for Bachelor’s Degree for a Nonregistered Student.” The filing deadline is the same as that stated above.

Note: The Office of Admissions and Records does not backdate degrees. The semester in which all your requirements are completed is the semester in which your degree will be posted to your academic record.

General Rules and Academic Policies
See also the section “Academic Policies,” beginning on page 61.

Academic Probation
Regulations and procedures governing academic probation vary with each college and school. For specific details, consult your college or school announcement. Students on probation are not entitled to take courses with a passed/not passed option.

Academic Dismissal
Regulations and procedures governing academic dismissal vary with each college and school. For specific details, consult your college or school announcement. If you are dismissed, you may appeal for a hearing by formal petition to the dean of your college or school, but the action of dismissal is normally considered final. If you are dismissed and want to transfer to another college or school at Berkeley, you may petition the dean of that college or school.

Minimum Progress
For undergraduates, normal progress toward a degree requires 30 units of successfully completed course work each year. If you fail to achieve minimum academic progress, you may continue to be enrolled only with the approval of the dean of your college or school. To achieve minimum academic progress, you must have successfully completed a number of units no fewer than 15 times the number of semesters, less one, in which you have been enrolled on the Berkeley campus. Summer Session is not counted as a semester. A 15-unit study list is considered a normal course load; a study list of fewer than 13 units must be authorized by the dean of your college or school.

Progress Toward a Degree
At the close of each semester, the courses, units, grades, and grade points earned are added onto your cumulative University record. From this record, you may determine your progress toward a degree.

In working for a degree, you should keep in mind the various levels on which you must satisfy requirements—University, college, school, and department—as well as the kinds of requirements you must fulfill: course, unit, grade point, and amount of upper division work. You may receive additional counsel in these matters from your adviser.

Academic Opportunities
Exchange Program with Hayward, Mills, and Sonoma
Berkeley has an exchange program with California State University, Hayward; Mills College, Oakland; and California State University, Sonoma. With the approval of your adviser and the dean of your school or college, you may register and pay applicable fees at Berkeley and be exempt from tuition and fees at the host campus. You may enroll for only one course per semester at the host campus.

Studying Abroad
Education Abroad Programs
While progressing toward your bachelor’s degree, you have a number of opportunities to earn University of California credit while studying abroad. The Universitywide Education Abroad Program has study centers at the following universities:

Africa
University of Ghana, near Accra
University College, Nairobi, Kenya
University of Benin, Lome, Togo (summer program)

Asia
Beijing University, People’s Republic of China
Chiang Mai University, Chiang Mai, Thailand
Chinese University of Hong Kong
Chulalongkorn University, Bangkok, Thailand
Gadjian Mada University, Yogyakarta, Indonesia
Indonesia Dance Institutes in Bali and Bandung, Indonesia
Indonesia Institute of the Arts, Yogyakarta, Indonesia
International Christian University and Sophia University, Tokyo, Japan
Meiji Gakuin University, Yokohama, Japan
Nanjing University, People’s Republic of China
Nankai University, Tianjin, People’s Republic of China
National Chengchi University, Taipei, Taiwan
Padjadjaran University, Bandung, Indonesia
University of Delhi, India
Yonsei University, Seoul, Korea

Australia and New Zealand
Australian National University, Canberra
Flinders University, Bedford Park
La Trobe University, Melbourne
Lincoln College, Christchurch, New Zealand
Massey University, Palmerston North, New Zealand
Monash University, Melbourne
University of Adelaide
University of Auckland, New Zealand
University of Melbourne
University of New South Wales, Kensington
University of Otago, Dunedin, New Zealand
University of Sydney
Victoria University, Wellington, New Zealand

Central America
National Autonomous University of Mexico, Mexico City
Summer Intensive Language, Morelia, Mexico
Tropical Biology Program, Monte Verde, Costa Rica (spring semester)
University of Costa Rica, San Jose

Europe
University of Vienna, Austria
University of Copenhagen, Denmark
Universities in France: Bordeaux, Grenoble, Lyon, Paris (Film, Literature), Pau, Pau-Paris (one semester in each city), Poitiers
Georg-August University, Goettingen, Germany
Karl Marx University, Budapest, Hungary
Universities in Ireland: University College, Cork; University College, Galway; University of Dublin, Trinity College (a part of the United Kingdom and Ireland program)

Universities in Italy: Padua; Academy of Fine Arts, Venice; G.B. Martini Music Conservatory, Bologna; University of Bologna; II Bonsone International School of Graphic Arts, Florence
University of Bergen, Norway
University of Lisbon, Portugal
Universities in Spain: Barcelona, Madrid
University of Lund, Sweden
State University of Leningrad, USSR

Middle East
Universities in Israel: Haifa, Jerusalem (Hebrew University)
American University of Cairo, Egypt

North America
University of British Columbia, Vancouver, Canada

South America
University of Sao Paulo, Brazil
Pontifical Catholic University of Peru, Lima, Peru

Requirements for participation are a grade-point average of 3.0, upper division standing, and sufficient language preparation. University scholarships, loans, and grants may be used to finance the year abroad.

Berkeley also participates in several inter-collegiate consortia for advanced language studies: Rome Classics Program (requiring Latin fluency), Japanese language study in Tokyo, Mandarin Chinese study in Taipei, and Arabic study in Cairo.

If you are interested, consult your academic advisers and the Education Abroad Adviser in the Berkeley Programs for Study Abroad office, 2538 Channing Way, 104 Building D, 642-1356.

Programs Not Sponsored by the University of California

Many Berkeley undergraduates choose to attend overseas study programs sponsored by institutions and organizations other than the University of California. To obtain information about these programs, you should contact the programs directly. Directories of study abroad programs are available at the office of Berkeley Programs for Study Abroad, 2538 Channing Way, 104 Building D, 642-1356, and the Occupational Career Library, Counseling Center, Building T-5.

Credit for course work completed may or may not be granted, depending on a review of your final transcript by the Office of Admissions and Records. Before enrolling in

Teaching, Research, and Internships

Berkeley offers many opportunities for you to gain practical teaching experience, conduct research projects, and engage in internships either as volunteers or paid employees.

Teaching

Over 2000 students participate every year in more than 100 programs that provide you with the opportunity to develop and refine teaching or tutoring skills. You may work with local schools, help other undergraduates through various departmental tutoring programs, or guide visitors around the campus, and may receive academic credit or financial compensation for your work. A listing entitled “Opportunities for Undergraduates to Teach,” available at Moffitt Undergraduate Library, describes these programs and how you might participate.

Research

In classes in a wide range of disciplines, students work independently or as part of a team on projects ranging from writing preliminary research designs to carrying out sophisticated research projects. Past projects have included working on archaeological digs, collecting and recording family folklore, cataloguing museum collections, determining the mechanism for habitat selection of garden snails, assessing the effect of media coverage of the Vietnam war on public sentiment, and collecting information from scholars, managers, and workers in Yugoslav on management in Yugoslavian firms. For more information consult your adviser.

Internships

A wide variety of internships—loosely defined as structured field experience—is available to you on and off campus. The positions may be paid or unpaid, may or may not carry academic credit, and may
have either educational or career value. Courses with field components occur primarily in the 98, 99, 197, 198, and 199 series. Check the course listings in the catalog for specific information. The following offices have listings of numerous internships, both on and off campus: SCOPE (Survey of Career Options through Professional Experience) Cooperative Education Internship Program, Career Planning and Placement Center, Building T-6, upper level; College of Engineering Cooperative Education Program, 209 McLaughlin Hall; Career Planning and Placement Center, 2200 Bancroft Way; Work-Study Program, 207 Sproul Hall; and CAL CORPS Clearinghouse, 103 Eshleman Hall. Many individual internship programs in education, counseling, government, news media, museums, and other private and public organizations are available through campus-based offices. For detailed information about these programs, consult The Internship Directory at the Career Planning and Placement Center, Building T-6 and 2200 Bancroft Way.

Cooperative Education Program

The Cooperative Education Program is an opportunity for undergraduate and graduate students to integrate classroom study with supervised practical and professional experience in the field. You may work with government, industry, business, or nonprofit organizations in positions related to your academic and/or career objectives before graduation. These positions are paid and may be full- or part-time. They may last for one semester or as long as two years, depending upon the type of experience you want.

Two offices constitute the campus-wide cooperative education program: SCOPE (Survey of Career Options through Professional Experience) and the Engineering Cooperative Education Program. Each program office has separate application procedures and requirements. If interested, you should contact the appropriate program for specific information.

SCOPE Cooperative Education Program

Liberal arts, sciences, natural resources, environmental design, and business administration majors may apply through this office. Positions are paid, full- or part-time, and last for one semester or as long as two years. For general requirements, contact the SCOPE Office, Career Planning and Placement Center, Building T-6, upper level, 642-1532.

Engineering Cooperative Education Program

All engineering, computer science, and chemical engineering majors may apply through this office. Positions offered are full-time, paid, for a minimum of one semester. For general requirements, contact the Engineering Co-op Office, 209 McLaughlin Hall, 642-6385.

Honors Courses

Berkeley offers some honors courses for highly qualified students, usually in their senior year. A very small number of these courses is available to lower division students. See your major adviser for information.

Individual Majors

If you have interests that fall outside traditional disciplines, you may design your own major to satisfy your individual academic goals. See an adviser for assistance and more information.

Advising and Academic Assistance

College and Department Advisers

The College of Letters and Science has a staff of professional advisers who will help you plan your course of study, fulfill requirements, and eventually choose a major. After you have chosen a major, you will be assigned to an adviser who is a faculty member in your major department. Outside the College of Letters and Science, your adviser will most likely be a faculty member.

Student Learning Center

The Student Learning Center, located in Building T-8, 642-7332, offers assistance and noncredit courses in reading, writing, and study skills and preparation for examinations. Priority is given to Affirmative Action and Educational Opportunity Program students, but everyone is welcome.

Academic Excellence

Semester Honors

To be eligible for semester honors, you must have completed a minimum of 12 units undertaken for letter grades at Berkeley and must have achieved the minimum grade-point average required by your school or college. Schools and colleges may establish additional criteria that you must also meet.

Honors at Graduation

To be eligible for honors in general scholarship at graduation, you must have completed a minimum of 50 semester units at the University of California, of which a minimum of 43 units must be undertaken for a letter grade; completed a minimum of 30 units at Berkeley; and achieved a grade-point average that ranks you in your school or college in the top 3 percent for highest honors, the next 7 percent for high honors, and the next 10 percent for honors. These criteria are minimal; consult your college or school office.

Honor Societies

Berkeley has a number of honors societies that elect students in recognition of academic excellence. Among these are Phi Beta Kappa, a national honor society; the Prytanean Society, founded in 1900 to honor upper division and graduate women for academic accomplishment and service to the University; the Honors Students Society; Tau Beta Pi, the national honor society for all engineering disciplines and various other engineering honors societies (see the Student Guide to Engineering Societies, available at the Engineers Joint Council office); Alpha Mu Gamma, a national society for students with demonstrated excellence in languages; and individual societies in most language departments. See your adviser for more information.

Prizes

Awards for outstanding ability in some area of creative, scholarly, or athletic achievement are available at Berkeley in two general categories: competitive prizes for creative effort or departmental awards for outstanding scholastic achievement. Consult the Committee on Prizes, 642-3498, for more information.
The rich cultural life of the Berkeley campus rivals that of San Francisco in diversity and scope.

Cal Performances sponsors a dazzling array of music, dance, and theatrical performances by major dance and theater companies, orchestras, chamber ensembles, and solo performers. Many of these are held at Zellerbach Hall, a 2100-seat auditorium that has an orchestra pit capable of accommodating the world’s largest symphony orchestras and a stage wide enough for major operas and ballets. The more intimate Hertz Hall and the Zellerbach Playhouse are used for smaller-scale professional and student productions.

Berkeley’s museums—including the University Art Museum and Lowie Museum of Anthropology and the Museum of Paleontology—offer world-class exhibits from other museums and rotate exhibits from their permanent collections as well. The Pacific Film Archive in the University Art Museum has received international recognition as a resource for film scholarship and exhibition.

The Botanical Garden, a 30-acre facility, has more than 12,000 plant species from around the world.

The main purpose of graduate study is to inspire independence and originality of thought in the pursuit of knowledge. As a graduate student you are expected to achieve mastery of your chosen field through advanced course work, independent study, and research.

Graduate education embraces study for all degrees and certificates beyond the bachelor’s degree—principally the master’s and doctor’s degrees. Graduate degrees fall into two broad categories: (1) Professional—degrees awarded by each professional college and school in recognition of a student’s command of a comprehensive body of professional knowledge and the ability to organize and carry out investigation of significant problems in the field. (2) Academic—degrees awarded by the academic departments and some professional schools in recognition of a student’s command of a wide range of related subjects within an academic field, preparation in one or more foreign languages, and ability to pursue original research leading to a significant contribution to a field of study.

These graduate degree programs have been approved by the Graduate Council and the Coordinating Committee on Graduate Affairs, which must approve any new programs. A list of graduate degrees appears later in this section. For complete information on regulations and procedures for graduate students, see the section “Academic Policies,” beginning on page 61.

The Nature of Graduate Education

Graduate study is the pursuit of knowledge through advanced course work and research. Graduate courses demand a capacity for critical analysis and a specialization of research interests not normally appropriate for an undergraduate major. These courses may be conducted in a number of ways: (1) as advanced lecture courses; (2) as seminars in which faculty and students present critical studies of selected problems within the subject field; (3) as independent study or reading courses; or (4) as research projects conducted under faculty supervision.

You are accorded considerable liberty in your choice of courses, at the discretion of your graduate adviser, as long as you meet the minimum requirements for academic residence. Possession of a bachelor’s degree does not in itself entitle you to enroll in a graduate course. These courses assume adequate preparation at the upper division level in the subject field (a minimum of 12 units of upper division work basic to the subject matter of the graduate course; this basic work may be pursued in more than one department). You are therefore encouraged to take upper division courses that will give you the background you need for advanced work; you are not confined to graduate courses.

Graduate courses completed before you attain your bachelor’s degree are not acceptable for unit credit toward an advanced degree. Courses in the 300 and 400 series, which are professional in nature, are not acceptable for unit credit as part of the program for an academic degree. These courses may, however, satisfy certain requirements, such as teaching, research, or technical work, in particular academic programs.

Graduate Advisers

Graduate advisers are appointed by the dean of the Graduate Division for each department, school, or group and are announced before the beginning of the fall semester. Graduate advisers (1) assist students in selecting programs of study; (2) endorse study lists; (3) act on petitions for study list changes only; (4) maintain records of all students enrolled under their jurisdiction; and (5) supply information requested by the dean of the Graduate Division about a student’s progress. In addition, the chair of the graduate advisers (1) endorses applications for candidacy for higher degrees and for qualifying examinations; (2) acts on petitions by graduate students; and (3) assists the dean in the enforcement of regulations, particularly those relating to registration, admission to graduate courses, and maintenance of acceptable scholastic performance.

You will also have an individual or major adviser, usually assigned after you are advanced to candidacy for the doctorate, but frequently appointed in the earlier stages of your training. The individual or major advisers may or may not be the same as the official graduate advisers. You should keep in close touch with your individual adviser and should confer with your official graduate adviser at the beginning of each semester to obtain approval of your program of study (by signature on the Schedule Request Form).
Graduate Admissions

Applying for Admission

You must file a completed application for admission, as well as all additional documents specified in the application booklet (including official transcripts from each college-level institution you previously attended) and a nonrefundable application fee of $40, with the Graduate Admissions/Fellowship Office or the department to which you are applying by the established deadlines. Follow the instructions in the application packet, which you should request from the department of your choice.

Many departments have earlier final application dates than the Graduate Division, both for admission and financial assistance, and many departments also admit students only for the fall semester. Information on special departmental deadlines and requirements is contained in the application packet.

You must meet departmental deadlines. The final dates of the Graduate Division for acceptance of applications for admission for the 1990-91 academic year are: fall semester, February 10; and spring semester, September 1. The School of Law admits only for the fall semester; the deadline is February 1.

Limited Enrollment

Each graduate program at Berkeley has a maximum enrollment, which limits the number of applicants who may be accepted. Almost invariably, this maximum is smaller than the number of applicants who meet the minimum qualifications for admission. Selection procedures are designed to admit applicants in accordance with their relative merit and promise among those at least minimally qualified. It is to your advantage to inquire early about the possibility of study at Berkeley.

Admissions Requirements

The University requires the following academic qualifications: (1) a degree from an accredited institution, comparable to the bachelor’s degree offered at Berkeley; (2) sufficient undergraduate training to undertake graduate study in the chosen field; and (3) a satisfactory scholastic average. In addition to the general University requirements, certain schools or departments may require additional records, such as separate applications, reading lists, examples of original work, or the results of qualifying examinations. Information on undergraduate requirements for a major field and on graduate programs and requirements is available in the school or departmental announcements and bulletins and in the “Courses and Curricula” section of this catalog.

Graduate Record Examination

Applicants for graduate admission (with certain exceptions listed below) are required to take the general test of the Graduate Record Examination and to have their scores on this examination reported by the Educational Testing Service. Although current test scores are preferred, reports up to five years old—but not older—will be accepted.

If you are applying to the UCB-UCSF Joint Medical Program, you are not required to take the GRE but must take the MCAT (Medical College Admission Test).

If you are applying to the School of Business Administration/M.B.A. Program, you must take the Graduate Management Admission Test (GMAT) in place of the Graduate Record Examination.

If you are applying to the School of Law for the J.D. degree, you must take the Law School Admission Test (LSAT) rather than the GRE.

Teaching Credential applicants (Multiple and Single Subject only) are not required to take the GRE. However, applicants for the M.A.T. degree must fulfill the GRE requirement.

You should make arrangements directly with Educational Testing Service to take the GRE at least three weeks before the desired test date (six weeks, if registering to take the examination outside the United States). You may obtain applications for the GRE examination and GMAT examination from the Educational Testing Service, Box 955, Princeton, NJ 08540, or from its western office at P.O. Box 23470, Oakland, CA 94623-0470.

If you are a domestic candidate from a family with an extremely low income, you may qualify for a waiver of GRE test fees. Consult your undergraduate financial aid office to determine whether your institution participates in the GRE Fee Waiver Program and whether you qualify. Fee waivers are not available directly from the Educational Testing Service.

International Applicants

Applicants who come from a country in which the official language is English or who have studied for one year or more in schools or universities in which English is the language of instruction must take the general test of the Graduate Record Examination. In general, others applying from countries outside the United States need not submit GRE scores unless their major departments so require. A list of departments or groups that require the GRE of all their applicants is included in the application packet.

International applicants must fulfill all previously stated admissions requirements and have an excellent command of English before beginning graduate study at Berkeley; students cannot be admitted to graduate standing to learn English. If you are applying from a country in which English is not the official language, you must take the Test of English as a Foreign Language (TOEFL) and have the results sent directly to the Graduate Admissions/Fellowship Office. The test is administered six times a year, and you should register as soon as possible by writing either the TOEFL agent in your home country or TOEFL, P.O. Box 6155, Princeton, NJ 08541-6155.

Applicants who register to take the TOEFL in May or later cannot be considered for admission to the fall semester. The results of institutional administrations of the TOEFL are not acceptable in lieu of the international or special center administrations. If you took the test more than two years ago, you must take it again.

If you are from a country in which English is not the official language and you expect to be a graduate student instructor, you should take the Test of Spoken English (TSE) in your country. For information on registering to take the TSE, contact the TOEFL agent in your country or at the address given above. The TSE is not a requirement for admission.
Special Circumstances

Readmission
If you have previously registered and withdrawn and want to re-enroll, you must file an Application for Readmission, obtainable from the Petitions Desk, Graduate Division, 1 California Hall, and pay a nonrefundable, nontransferable readmission fee of $40. This fee must accompany the Application for Readmission when first submitted or the application will not be reviewed. Approval of readmission is not automatic. The Graduate Division and your school, group, or department will review your petition and notify you of their decision.

Duplication of Higher Degrees
Normally, duplication of degrees is not permitted. You may petition the dean of the Graduate Division for an exception to this policy if the degree you want is in a field of study distinctly different from the field in which you attained your original degree. A professional degree is not regarded as duplication of an academic degree.

On the recommendation of the graduate advisor and with the approval of the dean of the Graduate Division, you may, however, be permitted to earn a second master’s degree in the same subject as that of the first master’s (or in a closely allied subject), if you are enrolled in a doctoral program at Berkeley in that subject (or allied subject), and if that particular doctoral program requires a master’s degree from Berkeley.

Reactivation of Application
The Graduate Division keeps application materials on file for two years. If you filed an application within the past two years but did not complete the application process, were denied admission, or were admitted but did not register, you may reactivate your previous file by submitting a new application form by the established deadline for the semester in question.

The first reactivation is free. Thereafter, the current application fee is required. A request for reconsideration in another major field for the same semester does not constitute a reactivation of application.

Notification of Action on Admission
A written notice from the dean of the Graduate Division is the only valid proof of admission. Admission to graduate study is limited by the number of places available in the various colleges, schools, and departments of Berkeley. If you have applied for admission and fellowship consideration, you should be notified on or about March 15 of the action on your applications. If you have applied for admission only, you will be advised as soon as possible after a decision has been reached. Normally, however, acceptance letters for admission only will not be issued until after March for the fall semester.

Registration and Enrollment in Classes

Advance Class Enrollment
Berkeley’s computerized Advance Class Enrollment (ACE) system enables you to request classes and receive a class schedule well before each semester begins. The system is designed to increase the probability that spaces will be available for all students wishing to take a particular course. For courses with limited enrollment, ACE will ensure that students who meet the courses’ specific priorities are scheduled first.

To register and enroll, follow these steps:

Obtain Your Registration Packet

New students: See “Special Information for New Graduate Students” below.

Readmitted students: You will be mailed your registration packet after receiving approval of your readmission.

Continuing students: You must obtain your registration packet in person at locations indicated on campus bulletin board placards during the Advance Enrollment period (see the Academic Calendar at the front of this catalog).

Your registration packet will contain a Schedule Request Form for requesting classes and a billing statement for paying your registration fees. If you will be a readmitted student, you will also receive a Schedule of Classes that lists the meeting times and locations of all courses to be given at Berkeley for the term. New and continuing students must purchase one from the ASUC Bookstore or from other local bookstores.

Select Classes and Submit Your Schedule Request Form
With the Schedule of Classes and the General Catalog, you can determine a class schedule. Once you have selected your classes, you must complete and submit your Schedule Request Form, with the approval of your major adviser, by the appropriate ACE deadline.

Pay Registration Fees
You must pay the fees indicated on your billing statement by the ACE fee payment deadline in order to be scheduled into classes. You must pay your fees in full or in three installments on the Deferred Payment Plan (see below). If your fees are not paid in full by the designated due dates, you may be dropped from the rolls for the current term and blocked from future registration in accordance with University policy.

The Deferred Payment Plan: You may pay your registration fees in three installments if you wish. A $10 nonrefundable processing fee will be charged to your first installment. Your billing statement will indicate the amount due for the first payment; subsequent statements for the remaining payments will be mailed to your local address on file with the Office of Admissions and Records. For full information on the Deferred Payment Plan, read the billing statement or call the Loans and Receivables Office at 643-6373.

Obtain Your Confirmed Class Schedule
If you submitted your Schedule Request Form and paid your registration fees by the ACE deadlines, a Confirmed Class Schedule will be produced for you shortly before the beginning of the semester. You must obtain your schedule in person from your major department office.

You are responsible for all classes into which you have been scheduled. To make any changes, you must file a Petition to Add/Drop Courses and/or a Petition to Change Grading Option on or after the first day of instruction.
In-Person Registration

If you fail to submit your Schedule Request Form and/or pay your registration fees by the ACE deadlines, you will have another opportunity to do so at In-Person Registration at the beginning of the semester. However, you will be limited to requesting classes that are still open after the scheduling of students who enrolled through ACE. Continuing students will be liable for a $50 late registration fee and/or a $50 late enrollment fee. Your Confirmed Class Schedule will be available at your major department office on the first day of instruction.

Statement of Intent to Register

The admission notice to new (including reactivating) graduate students contains a Statement of Intent to Register that must be filled out and returned to the Graduate Admissions Office by the date indicated in the notice. Only the return of the form to the Graduate Admissions Office indicating an intent to register will reserve the registration slot allocated to you. If you want to retain a record of the return of your Statement of Intent to Register, you should send it by certified or registered mail. If you do not want to accept the offer of admission, you should return the Declination of Admission form so that your place can be allocated to another applicant.

Failure to Register

If you do not return the Statement of Intent to Register or return it but do not register for the semester in which you were admitted, you must request reactivation of your application if you want to attend any subsequent semester. You have no priority over other applicants for any subsequent semester by virtue of your previous admission.

Registration

To maintain good standing as a graduate student, you must register with the Office of Admissions and Records each semester until you complete all requirements for the degree, unless you have permission from the dean of the Graduate Division to withdraw. Failure to register or to obtain formal permission to leave the University will constitute withdrawal from the Graduate Division, and you will be denied readmission. You can satisfy the requirement for full-time continuous registration by attending both semesters of an academic year. You must be registered or pay the filing fee, whichever is applicable, for the semester in which your degree is conferred. If you hold a nonimmigrant visa, you must be registered for both semesters of each academic year unless you have special permission from the Immigration Service to do otherwise. Consult the International Student Adviser for further information.

In summary, you must register in any semester in which you are enrolled in formal courses of instruction or are making any use of University facilities, including access to the faculty, except for uses accorded the general public.

If your studies or research requires absence from California for the semester, you must file a petition requesting absence and a reduction of the University registration fee with the Graduate Division, 1 California Hall.

Special Information for New Graduate Students

If you will be a new graduate student, you must enroll and register during the In-Person Registration period at the beginning of the semester. However, if you have submitted your Statement of Intent to Register in time, you will be mailed a billing statement shortly before the ACE fee payment deadline. The statement will indicate the registration fees due and the amount of financial aid, if any, applied against your fees. You may make a payment at that time or by the In-Person Registration deadline. You must obtain your registration packet, which will include your Schedule Request Form, in person from your major department office (available approximately two weeks before the beginning of instruction). After meeting with your major adviser, you must submit your Schedule Request Form and pay your registration fees (if you did not do so previously) by the In-Person Registration deadline. Your Confirmed Class Schedule will be available in your major department office on the first day of instruction.

Cancellation of Registration

Students who have registered and decide before classes begin not to attend Berkeley may cancel by filing the appropriate form. For further information see the section "Academic Policies," beginning on page 61.

Class Schedule and Unit Load

Under Advance Class Enrollment, all students fill out a Schedule Request Form, entering on it all course requests, including thesis and/or research approved by the graduate adviser. Courses are classified as lower division (numbered 1 through 99); upper division (100-199); graduate (200-299); professional, for teachers or prospective teachers (300-399); special study for preparation for the master's exam (601); and special study for preparation for the doctoral qualifying exam (602). Lower division courses are not counted as part of a full program of study leading to a higher degree. You must be enrolled in 12 units in 200 series (or above) to be considered a full-time student. (For information on courses in the 600 series, see page 62.)

Graduate student instructors and research assistants must normally carry a minimum of 6 units of upper division or graduate work (courses in the 100 or 200 series). Fellowship holders and foreign students on nonimmigrant visas must carry a full program of study; the minimum program is 12 units in upper division and/or graduate courses, although individual study in the form of language preparation, comprehensive and qualifying examination preparation, etc., for the Ph.D. degree is taken into account.

In these cases reduced unit loads are accepted as full programs with the consent of the graduate adviser and dean of the Graduate Division.

Changes in the Confirmed Schedule

Graduate students may file petitions to add or drop courses listed on their confirmed class schedules at any time through the fifth week of instruction with the signed approval of the course instructor and graduate adviser. If you discontinue a course after this time, you will normally receive a grade of F unless you submit a letter of explanation from your graduate adviser along with your petition for special approval to the dean of the Graduate Division. A $5 fee will be assessed for petitions submitted after the third week of instruction.
The following rankings of selected graduate departments at U.S. universities are drawn from the most recent assessment of the country’s top research institutions.

In the 1982 study sponsored by four national academic organizations, Berkeley emerged as the strongest graduate institution across the board on a "reputational" scale in which faculty members rated the academic quality of their peers across the country.

The study, which consisted of polling 5000 faculty members at 228 colleges and universities, was sponsored by the Conference Board of Associated Research Councils, an ad hoc group consisting of the American Council on Education, American Council of Learned Societies, National Research Council, and Social Sciences Research Council.

The study surveyed 32 fields, and the reputations of Berkeley’s departments were listed among the top 10 in 30 of them. Stanford was in the top 10 in 24 fields, and Harvard in 22. To the right are the 16 fields in which Berkeley’s departments were rated among the top three.

Withdrawal

If you want to withdraw from Berkeley at the end of a semester or while the semester is in progress, you must file a formal withdrawal. For further information, see the section "Academic Policies," beginning on page 61.

Graduate Degrees and Certificates

Academic degrees are the M.A., M.S., M.F.A., and Ph.D. All other degrees and certificates are professional. The J.D. in Law is the basic law degree. It is a graduate degree, and if interested you should apply directly to the School of Law.

Students applying for admission to the biological sciences should be aware of the current reorganization of majors in that discipline. Please contact the graduate adviser in your proposed major for up-to-date information.

*Students are not admitted to work for the M.A./M.S. degree, although it may be awarded to students pursuing work toward the Ph.D. degree after fulfillment of the appropriate M.A./M.S. requirements.

**No new students admitted to these majors after fall 1990.

♦Indicates established interdisciplinary group or field.
Certificate in Russian and East European Studies

The Certificate in Russian and East European Studies has been developed to serve graduate students in the humanities and social sciences who wish to broaden their knowledge of the Russian and East European area. To be eligible you must be in good academic standing and currently enrolled in a graduate program at Berkeley in a field related to the Russian/East European area. The program is to include at least 18 semester units in three or more disciplines, not including that in which you have received or are planning to receive your master's or doctoral degree. Advanced language courses in grammar, composition, or conversation may not be used to fulfill this requirement. Of the 18 required units, at least 6 must be at the 200 level; the remaining units may be at the 100 or 200 level. Applications and further information about the certificate program are available at the Center for Slavic and East European Studies, 361 Stephens Hall.

Certificates of Completion of Graduate Curricula in Library and Information Studies

A certificate program has been established which is designed to meet the need for advanced studies beyond the first professional degree (M.L.I.S.) and short of the doctoral degrees (Ph.D., D.L.I.S.). You should direct inquiries to the School of Library and Information Studies.

Certificate of Completion of Graduate Curriculum in Optometry

In this program you will spend 9 to 18 months in graduate professional training and must have previously earned the Doctor of Optometry degree. For information contact the Director of Clinics, School of Optometry, 250 Minor Hall, 642-0945.

Master of Arts in Teaching

The degree of Master of Arts in Teaching is offered by the School of Education jointly with the Department of English. If you are a candidate you must satisfy all requirements for certification to teach in California. In addition to completing academic training in one of the subject fields, you should direct inquiries to the appropriate academic department and to the School of Education.

Joint Doctoral Programs

There are two intercampus joint degree programs between Berkeley and the University of California, San Francisco: Bioengineering and Medical Anthropology. If interested, you should apply to the campus most appropriate to your research interests, but you will have access to facilities and faculty on both campuses through intercampus exchange registration. For information, write to the Department of Anthropology or the Group in Bioengineering.

Near Eastern Religions

A program leading to the Ph.D. degree is conducted jointly by the Berkeley campus and the Graduate Theological Union. For more information, see the discussion below under "Academic Opportunities."

Special Education

A joint doctoral program in special education leading to either the Ph.D. degree or the Ed.D. degree is offered by the Berkeley campus and San Francisco State University. The program is interdisciplinary, including clinical experience as well as in-depth preparation in the behavioral sciences and in statistics and research methods. For application material and additional information, write to: Special Education Group, c/o School of Education, University of California at Berkeley, or Department of Education, San Francisco State University, 1600 Holloway Avenue, San Francisco, CA 94132.

Concurrent Degree Programs

Concurrent degree programs provide a broad integrated curriculum between two disciplines. You should direct inquiries to the departments or schools involved.

Teaching Credentials

Courses leading to the multiple subject or single subject teaching credentials are offered on the Berkeley campus. For details, please consult the Announcement of the School of Education.

Requirements for Graduate Degrees

The Master's Degree

Berkeley offers instruction leading to both academic and professional degrees. For specific regulations governing the professional master's degrees, see the individual announcements of the colleges and schools. This section will deal primarily with the academic master's degree.
Residence Requirement
A minimum of two semesters of academic residence is required for the master's degree. Academic residence is defined as enrollment in at least 4 units in 100-200 series courses. Specific subject requirements and performance levels are set by the schools, departments, and groups.

Transfer of Credit from Other Institutions
You should first request a transfer of units at the end of your first semester of attendance. Your graduate adviser should make a formal request to the dean of the Graduate Division specifying the units and courses involved. Your credits may be transferable if (1) the units involved are equivalent to work normally offered within your current program of study, (2) the grade recorded was at least a B, and (3) you have a superior scholastic record (at least a 3.3) at both your original institution and at Berkeley. Final action will be taken when you have completed half the program and are applying for advancement to candidacy. No more than 4 semester or 6 quarter units are transferable, and the work must have been completed previously in graduate status at an institution of high standing. The units transferred cannot be used to reduce the minimum required in the 200 series courses or the minimum residence requirement.

Work that formed part of the program for a master's degree previously conferred (either at the University of California or elsewhere) may not be applied toward a current degree program.

Credit for graduate work that you completed on other campuses of the University of California may be granted in excess of 6 quarter units or 4 semester units. Requests are handled on an individual basis.

Concurrent Enrollment—University Extension
Courses taken concurrently through University Extension but held on the Berkeley campus under the instruction of a regular member of the Berkeley faculty are generally not applicable toward a Berkeley master's degree. These courses are intended to provide Extension students with an opportunity to take courses that would not ordinarily be available to them. Concurrent enrollment cannot replace normal registration by Berkeley graduate students, nor may it be used to accumulate credit toward a Berkeley degree by an individual not formally admitted to graduate standing at Berkeley. An exception may be made for you only if there is clear evidence that you were concurrently enrolled through Extension while in graduate standing at another institution and with the intent of applying the units earned toward a graduate degree at that institution. Exceptions must be fully justified by the graduate adviser and will require special approval by the dean of the Graduate Division.

Amount and Distribution of Work
If you work toward an academic master's degree on the Berkeley campus, you will pursue one of two plans, as determined by your school, department, or group. (Units may adopt either or both plans and will, in the latter case, designate which plan you are to follow.)

Plan I requires at least 20 semester units of upper division and graduate courses and a thesis. At least 8 of these units must be in graduate courses (200 series) in your major subject. Course units are not granted for the thesis.

Plan II requires at least 24 semester units of upper division and graduate courses, followed by a comprehensive final examination administered by your school, department, or group. At least 12 of the units must be in graduate courses in your major subject.

Your graduate adviser will guide you regarding distribution of course work among departments. Please note that departments, schools, and groups may have performance standards that are higher than the minimum B average required by the Graduate Division. Further requirements are specified by the major department.

Advancement to Candidacy
When you complete the requirements for your degree, you will not automatically be admitted to candidacy for the master's degree; you must make a formal application to the dean of the Graduate Division when you have completed approximately half the master's program. The application must be approved by the chair of graduate advisers win your major school, department, or group and must include a precise statement of the studies on which the application is based. You must apply no later than the end of the third week of instruction of the semester in which the degree is to be awarded. If you are to submit a thesis, however, you should consult your adviser as early as possible about advancement to candidacy so that the appropriate committee can be formed.

The Master's Thesis
If you are following Plan I, described above, you must submit a typewritten thesis, double-spaced on medium-weight, 8 1/2 x 11-inch approved paper, with a minimum left-hand margin of 1/2 inches. Consult the Degrees staff in the Graduate Division for required brands of paper.

The thesis must be unbound and without perforations. The type must be adequate for photographic reproduction. Following approval by your thesis committee, two copies are filed with the Graduate Division. Further information regarding the organization and format of the thesis is available from the Degrees staff in the Graduate Division.

The thesis constitutes a report, in as brief a form as possible, of results obtained in an original investigation of a problem. The problem in question need only be of limited scope; however, the thesis should be comparable in style, organization, and depth of understanding to investigations of greater scope, such as the dissertations of doctoral candidates.

You must submit your thesis to a committee of three members of the faculty appointed by the dean of the Graduate Division. One member of the committee must be chosen from a department other than that of your major subject. You are required to confer with all members of your committee before beginning your thesis; since the committee is not appointed until you are advanced to candidacy, you should not begin thesis work before advancement in order to avoid extensive revisions. You are responsible for placing the completed thesis in the hands of your committee members.

Three years is the normal time period allowed for completion of the thesis. Candidacy for the master's degree will lapse automatically at the end of that time. You can be reinstated, however, upon the recommendation of the graduate adviser to the dean at the time your thesis committee members have approved a final draft of your thesis.
If all three members of your committee approve the thesis, they sign the official title page prepared by the Graduate Division. You then file two copies of the thesis with the Graduate Division for later deposit in the University library. If any member of your committee doubts the acceptability of the thesis, the committee chair convenes the committee to discuss it. If the committee reaches agreement on its acceptability, the thesis is signed and filed as described above. If the committee continues to disagree, the thesis is sent to the dean of the Graduate Division together with a brief statement of each committee member’s opinion. If all members of the committee reject the thesis, it is sent to the dean with a statement to that effect by the committee chair. In all cases of rejection or split vote, the Administrative Committee of the Graduate Council makes the final decision.

The Doctoral Degree

Berkeley offers both academic and professional degrees. Professional degree programs are outlined in the individual announcements of the colleges and schools offering them. The general procedures given in this section apply primarily to the academic doctoral degree.

The Doctor of Philosophy degree is not granted solely for fulfilling technical requirements such as residence and completion of specified courses; it is awarded in recognition of a student’s knowledge of a broad field of learning and for distinguished accomplishment in that field through an original contribution of significant knowledge and ideas. The student’s research must reveal high critical ability and powers of imagination and synthesis.

Programs of Study

Programs of study for doctoral degrees are more individualized than those for master’s degrees, permitting more specialization within a field or the establishment of connections among fields. Nevertheless, if you are seeking a doctoral degree, you must have your program of study approved by the graduate adviser of the department or group to which you are admitted or later transferred. University policy requires continuous registration from entrance until receipt of the degree, unless a formal withdrawal is granted by the dean of the Graduate Division.

Your field of study may be in a single department, except for essential related courses in other departments; in several departments; or in an interdisciplinary group. Once you have chosen a field of study, you should confer with your graduate adviser to select the sequence of courses that will best prepare you for qualifying examinations and research work.

Residence Requirement

A minimum of two years or four semesters of academic residence is required for the Ph.D. degree. Academic residence is defined as enrollment in at least 4 units in 100-200 courses. The period during which you are allowed to be in candidacy is limited; after its expiration your candidacy for the degree is likely to lapse. You should consult your department or the Graduate Division for the time permitted in candidacy.

Foreign Language Requirement

The foreign language requirement ensures that you have the ability to acquire wide knowledge in your field of study and to keep up with foreign developments in your field. You are urged to complete the foreign language requirement early in your graduate career. You must fulfill the foreign language requirement before admission to the qualifying examinations and advancement to candidacy. Each graduate program may have somewhat different foreign language requirements. If you are a prospective student, you are urged to inquire about the foreign language requirement as soon as possible and, if you can, to fulfill it while still an undergraduate. In some graduate programs, applicants for admission must have satisfied the foreign language requirement before applying.

Qualifying Examinations

Before you are admitted to candidacy, you must pass a qualifying examination administered by a four- or five-member committee approved by the Graduate Council. An oral component is required. You must be registered in the semester in which you take the examinations, and you must have removed any previous deficiencies in training, including incomplete grades in courses that your graduate adviser required for your program. You must have maintained at least a B average in all course work that you undertook in graduate status, and you must have fulfilled the language requirement(s).

Please note: Departments, schools, and groups may have performance standards that are higher than the minimum B average required by the Graduate Division.

Advancement to Candidacy

You must apply for advancement to candidacy, on a form furnished by the Graduate division, no later than the semester following the one in which you passed your qualifying examinations. The completed form, bearing the endorsement of your graduate adviser chair and dissertation chair, is filed with the Graduate Division. You must pay a fee of $25 when you file the application, and you must have completed all requirements for the doctoral degree except the dissertation before you may be advanced to candidacy.

The Candidate’s Degree

The degree “Candidate in Philosophy,” which gives formal recognition to a definite state of progress toward the doctorate, may be awarded to you when you are advanced to candidacy for the Ph.D. degree. The following departments and groups currently offer this degree:

- Agricultural and Resource Economics
- Ancient History and Archaeology
- Anthropology
- Applied Mathematics
- Architecture
- Astronomy
- Biochemistry
- Biostatistics
- Botany
- City and Regional Planning
- Classics
- Comparative Literature
- Computer Science
- Demography
- Dramatic Art
- Economics
- Education
- Endocrinology
- Engineering
- English
The Doctoral Dissertation
The format of the doctoral dissertation is similar to that outlined in the section on the master's thesis. Further information is available from the Graduate Division.

The dissertation, the product of independent investigation under faculty supervision, must be submitted to the committee in charge (see below) and must receive both its approval and the approval of the Graduate Council. The dissertation is the most important requirement for the doctoral program; the degree is never granted for completion of course work only, no matter how extensive.

You are to work under one of two plans, as adopted by the department, school, or group:

Plan A: The Administrative Committee of the Graduate Council appoints a five-member committee which determines whether you have met the requirements for the degree. Three members of the committee, one of whom must be from a department other than that of your major subject, guide you in research and judge the merits of your dissertation. The entire committee conducts a final oral examination dealing with the relationship between your dissertation and the general field of study in which the subject of the dissertation lies. Admission to the final examination may be restricted to the members of the committee, members of the Academic Senate, and guests of equivalent rank from other institutions.

Plan B: The Administrative Committee of the Graduate Council appoints a committee of three members, one of whom must be from a department other than that of your major subject, to guide you in research and judge the merits of your dissertation. This committee may require any necessary conferences to elucidate the subject treated in the dissertation. After presentation of the dissertation but before final action is taken upon it, the committee may, if necessary, require you to defend the dissertation in a formal oral examination.

After your committee has approved your dissertation, the original must be filed with the Graduate Division by a deadline specified by that office. You must also file an abstract of the dissertation, no longer than 350 words and signed by the committee chair.

Programs using Plan A and Plan B are listed below.

Plan A
Anatomy
Buddhist Studies
Logic and the Methodology of Science
Near Eastern Religions
Romance Philology
South and Southeast Asian Studies

Plan B
Agricultural and Environmental Chemistry
Agricultural and Resource Economics
Ancient History and Archaeology
Anthropology
Applied Mathematics
Architecture
Asian Studies
Astronomy
Biochemistry
Bioengineering
Biophysics
Biostatistics
Botany
Business Administration
Chemical Engineering
Chemistry
City and Regional Planning
Classical Archaeology
Classics—Emphases: Greek, Latin
Comparative Biochemistry
Comparative Literature
Computer Science
Demography
Developmental Biology
Dramatic Art
Economics
Education
Endocrinology
Energy and Resources
Engineering
Engineering Science
English
Entomology
Environmental Health Sciences
Epidemiology
Ethnic Studies
French
Genetics
Geography
Geology
Geophysics
German
Health Services and Policy Analysis
Interdisciplinary Groups and Individual Majors
If your interests fall outside departmental boundaries, Berkeley has a number of interdisciplinary graduate programs that cut across departmental lines and are administered by faculty from a variety of departments. You may also design your own major with the consent of the Graduate Council (see page 53).

For information about these programs, see the discussions of interdisciplinary graduate groups and individual doctoral programs under “Academic Opportunities” below.

Academic Opportunities
Exchange Programs
Berkeley students participating in any of the following exchange programs, with the exception of the Intercampus Exchange Program, will not automatically receive credit for taking course work at the host campus. The courses will be posted in the memorandum column of your transcript. If you want to transfer units, see page 46, “Transfer of Credit from Other Institutions.” No more than 4 semester or 6 quarter units are transferable toward the master’s degree.

Intercampus Exchange Program
If you are a graduate student registered on any campus of the University, you may go to another campus of the University as an Intercampus Exchange Graduate Student with the approval of your graduate adviser, the chair of the department in which you want to study, the dean of the Graduate Division on the home campus, and the dean of the Graduate Division on the host campus. You may obtain an application form for the Intercampus Exchange Program for Graduate Students from the office of the dean of the Graduate Division on your home campus. You should complete and file the application form at least three weeks before the opening of the term of enrollment on the host campus. (Please note that all other UC campuses are on the quarter system.)

This privilege is available to graduate students who would like to associate with scholars or fields of study not available on the home campus, or who seek the use of special facilities and collections. Whenever possible, you should make personal arrangements with faculty members on both campuses to ensure that the courses, seminars, or facilities will be available to meet your needs. This privilege will be granted where there is evidence of serious and high-quality scholarship.

As an intercampus exchange student, you register and pay fees on your home campus but have library, infirmary, and other student privileges on your host campus. You should make arrangements with the Office of Admissions and Records to follow the enrollment procedure of the host campus so that the grades you obtain in courses taken on the host campus will be transferred to your record on the home campus. Exchange students are considered graduate students in residence on the home campus and are not formally admitted to the host graduate school and department. Unless specifically restricted, fellowship recipients may participate in the Intercampus Exchange Program.

Stanford-California Exchange Program
If you have a superior academic record, you may participate in the Stanford-California Exchange Program when it is considered desirable for you to take a limited number of courses that are offered at Stanford but not at Berkeley. Participation in the program must be approved by the Graduate Division and your department. Normally, you will not be allowed to participate in this program until you have completed a year of graduate study at Berkeley. Participants register and pay the applicable fees at Berkeley and are exempt from tuition and fees at Stanford. The same privilege is accorded to Stanford students who want to take courses at Berkeley. If you apply for this program, you must enroll in at least one course at Berkeley. You may obtain further information and an application form from the Petitions Desk in the Graduate Division, 1 California Hall.

Minimum Requirements
All the procedures and regulations described above and in the preceding section on master’s degrees constitute the minimum requirements for the higher degrees, as set by the Graduate Division. Each academic department may adopt additional requirements, as approved by the dean of the Graduate Division and the Graduate Council, according to the demands of your field of study.

Exchange Program with Hayward, Mills, San Francisco, and Sonoma
You may also participate in exchange programs with California State University, Hayward; Mills College, Oakland; California State University, San Francisco; and California State University, Sonoma. With the approval of the Graduate Division and your department, you may register and pay applicable fees at Berkeley and be exempt from tuition and fees at the host campus. You may enroll for only one course per semester at the host campus.

Graduate Theological Union
There are two kinds of programs that include the facilities of the Graduate Theological Union in Berkeley: the "casual program" and the joint Ph.D. program in Near Eastern Religions.

The casual program is open to all students in the GTU community and all graduate students at Berkeley. This program allows you to register on one campus and take courses on the other, subject to the appropriate academic approvals. You may obtain applications and deadline dates from the Petitions Desk in the Graduate Division, 1 California Hall.

The Joint Doctoral Program in Near Eastern Religions is open only to students who intend to work toward the Ph.D. degree. To apply, you must first have an M.A. (or its equivalent) in Near Eastern studies or in a related field and must have at least two ancient languages suitable to the proposed program. You must be admitted to both the Graduate Theological Union and the University, because the degree is conferred jointly by both institutions. As a student in the joint doctoral program, you will be under the administrative supervision of the graduate dean at each institution. Both deans must participate in decisions before final action may be taken on a student matter.

You may use the extensive library holdings of the Union and supplement your program with selected courses in Palestinian archaeology, Biblical studies, Semitic epigraphy, and philology. For information about the program, a catalog, and application forms, write to the Graduate Theological Union, 2465 LeConte Avenue, Berkeley, CA 94709.

The Exchange Scholar Program
The Exchange Scholar Program is an experimental program designed to enable doctoral students with superior academic records to study at one of the participating institutions to take advantage of educational opportunities that are not available at Berkeley. Normally, you are eligible to become an exchange scholar only after you have completed one year in a Berkeley graduate degree program. You may take courses and/or conduct research with particular faculty at the host institution for no more than one year while remaining registered at Berkeley.

Participating institutions are Berkeley, Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, Stanford University, and Yale University. You may obtain further information and an application from the Petitions Desk in the Graduate Division, 1 California Hall.

Please note: Guidelines for participation in the exchange program with Stanford University are outlined above under the Stanford-California Exchange Program.

Studying Abroad
Graduate students who have been admitted to study toward a higher degree may, under certain conditions, be granted permission to study abroad. To apply, you must have completed at least one year in residence before your departure for study abroad, and you must demonstrate language proficiency where required.

As a graduate student, you are eligible to apply to most of the study centers under the Universitywide Education Abroad Program. (For a list of study centers, see "Studying Abroad" on page 35.) You must obtain the approval of both your department and the chair of the Graduate Division.

M.A. and Ph.D. Research Internships in India
Berkeley conducts a program of fieldwork and research in India for graduate students in professional fields. Based on their professional and research interests, participants design projects which are conducted under the supervision of Indian faculty and professionals. For additional information, contact Berkeley Programs for Study Abroad, 2538 Channing Way, 104 Building D, University of California at Berkeley; Berkeley, CA 94720, 642-1790 or 642-1356. For course descriptions, see Berkeley Programs for Study Abroad in the courses section of this catalog.

Tropical Biogeography
If you are a registered graduate student interested in doing field research in the tropics, see Integrative Biology 289 (formerly Biology 250) for information.

Interdisciplinary Groups
Berkeley has established graduate programs in a number of fields that cut across conventional departmental lines yet comprise distinct cores of knowledge. These programs are administered by groups of faculty from several related departments and, in certain instances, from several campuses. If you are enrolled in these programs you can work with any faculty member in the group without having to pursue the particular discipline of the department with which the faculty member is associated. Moreover, this arrangement gives you access to a range of facilities not ordinarily open to students enrolled in departmental programs. In some cases (e.g., medieval studies), a faculty committee is appointed specifically to advise you and the interested departments on setting up a program that will best meet the departments' and your views of the intellectual quality of the proposed programs. Since groups have no budgets or facilities of their own, however, most applicants, to be accepted by a particular group, must first obtain the sponsorship of one of its faculty members.
Following is a current list of graduate groups on the Berkeley campus:

Group in Agricultural and Environmental Chemistry
Professor Norman Terry, Chair
c/o Department of Plant Biology
111 Genetics and Plant Biology Building

Group in Ancient History and Archaeology
Professor Ronald Stroud, Chair
c/o Department of Classics
5215 Dwinelle Hall

Group in Asian Studies
Professor Lowell Dittmer, Chair
2223 Fulton, Room 520

Group in Bioengineering
Professor Edwin R. Lewis, Chair
c/o Department of Electrical Engineering and Computer Science
230 Bechtel Engineering Center

Group in Biophysics and Medical Physics (Chair to be announced)
230 Donner Laboratory

Group in Biostatistics
Professors Lucien LeCam and Nicholas Jewell, Co-chairs
c/o School of Public Health
19 Warren Hall

Group in Buddhist Studies
Professor Padmanath S. Jaini, Chair
c/o Department of South and Southeast Asian Studies
1203 Dwinelle Hall

Group in Comparative Biochemistry
Professor Lester Packer, Chair
c/o Department of Molecular and Cell Biology
Life Sciences Annex

Group in Demography
Professor Eugene A. Hammel, Chair
c/o Graduate Group in Demography Office
2234 Piedmont Avenue

Group in Developmental Biology
Professor Fred H. Wilt, Chair
c/o Department of Molecular and Cell Biology
Life Sciences Annex

Group in Endocrinology
Professor Charles Nicoll, Acting Chair
c/o Department of Molecular and Cell Biology
Life Sciences Annex

Group in Energy and Resources
Professor Jeffrey Romm, Chair
c/o Group Office, 100 T-4

Group in Environmental Health Sciences
Professor Eddie Wei, Chair
c/o Public Health, Biomedical and Environmental Health Sciences
107 Haviland Hall

Group in Epidemiology
Professor Warren Winkelman, Chair
c/o School of Public Health
19 Warren Hall

Group in Ethnic Studies
Professor Alex Saragoza, Chair
c/o Chicano Studies
4106 Dwinelle Hall

Group in Folklore
Professor Alan Dundes, Chair
c/o Department of Anthropology
232 Kroeger Hall

Group in Genetics
Professor Jasper Rine, Chair
c/o Department of Molecular and Cell Biology
Life Sciences Annex

Group in Health and Medical Sciences
Professor Donald Heyneman, Chair
c/o Program Office
106 Building T-7

Group in Health Services and Policy Analysis
Professor Richard Scheffler, Chair
c/o Social and Administrative Health Sciences
405 Warren Hall

Group in Immunology
Professor Phyllis B. Blair, Chair
c/o Department of Molecular and Cell Biology
Life Sciences Annex

Group in Latin American Studies
Professor Francine Masiello, Chair
c/o Center for Latin American Studies
2334 Bowditch Street, Berkeley

Group in Logic and the Methodology of Science
Professor Hans Sluga, Chair
731 Evans Hall

Committee on Medieval Studies
(Chair to be announced)

Group in Microbiology
Professor James R. Hardy, Chair
c/o School of Public Health
216 Warren Hall

Group in Neurobiology
Professor Frank S. Werblin, Chair
c/o Department of Electrical Engineering and Computer Sciences
231 Cory Hall

Group in Nutrition
Professor Sharon E. Fleming, Chair
c/o Department of Nutritional Sciences
119 Morgan Hall

Group in Parasitology
Professor James L. Hardy, Chair
School of Public Health
216 Warren

Group in Physiological Optics
Dean Jay M. Enoch, Chair
School of Optometry
350 Minor Hall

Group in Range Management
Professor James Bartolome, Chair
c/o Department of Forestry and Resource Management
145 Mulford Hall

Group in Romance Languages and Literatures
(Chair to be announced)

Group in Romance Philology
Professor Jerry R. Craddock, Chair
c/o Department of Spanish and Portuguese
Dwinelle Hall

Group in Science/Mathematics Education
Professor Frederick Reif, Chair
c/o School of Education
1607 Tolman Hall

Group in Soil Science
Professor Harvey Doner, Chair
c/o Department of Plant and Soil Biology
108 Hilgard Hall

Group in Special Education
Professors Reginald Jones and Nadine Lambert, Co-chairs
c/o School of Education
4413 Tolman Hall

Group in Wood Science and Technology
Professor Arno P. Schniewind, Chair
c/o Forest Products Laboratory
478 Richmond Field Station
Advisory Groups
(not degree programs)

Committee on Psychoanalytic Studies of the Arts and Society
Professors Neil Smelser and Joseph Lipshutz, Co-chairs
C/o Department of Linguistics
2337 Dwinelle Hall

Program in Public and Nonprofit Management
Professor Nancy Van House, Coordinator
School of Library and Information Studies
South Hall

Committee for Certificate in Russian and East European Studies
Professor George W. Breslauer, Chair
Center for Slavic and East European Studies
361 Stephens Hall

Individual Doctoral Programs
To allow you to work in a field that, in its breadth, falls between that of a department and an interdisciplinary group, the Graduate Division permits the informal establishment of ad hoc programs leading to the Ph.D. degree. You will be considered for an interdisciplinary program only if you have completed at least two semesters of graduate study in a doctoral program on this campus and have shown superior academic performance in your graduate studies here. In these programs, you may prepare a proposal for a course of study under the sponsorship of five faculty members. Final approval of every individual graduate program and admission of each student into such a program must be granted by the Graduate council. You must complete degree requirements in accordance with Plan A of the Graduate Council policies, and the degree is awarded in a field approved for you by the council.

Teaching and Research Appointments
Many departments make graduate student instructorships available to qualified graduate students, and departments, centers, and institutes often seek qualified graduate stu-

dents for research appointments. For specific information see the section "Fees and Financial Aid," beginning on page 55.

Internships
A number of internships are available to graduate as well as undergraduate students. For information see "Teaching, Research, and Internships" on page 36.

General Rules and Academic Policies
A brief summary follows of some of the general rules and policies you are subject to as a graduate student. For more exhaustive coverage, see the section "Academic Policies," beginning on page 61.

Standards of Scholarship
You must receive a grade of A, B, C (including pluses and minuses), or S in your course work to satisfy degree requirements. You will not receive course credit for courses graded below C-. You must maintain a grade-point average of 3.0 in all upper division and graduate course work taken as a graduate student. Your department, school, or group may establish more stringent standards.

Probation and Dismissal
You are subject to probation and dismissal if your grade-point average falls below 3.0 or that required by your department, school, or group; if you have too many Incomplete grades; if your written work is substandard, or if you fail to make adequate progress toward the degree. You may appeal dismissal for academic reasons to the Graduate Council of the Academic Senate.

Normative Time
Normative time is defined as the elapsed calendar time in years that under normal circumstances would be needed to complete all requirements for the doctoral degree, assuming that a student is engaged in full-time, uninterrupted study and is making desirable progress toward the degree.

The primary goals of the Normative Time program are to provide incentives to both students and instructional units to reduce the average time taken to complete requirements for the doctoral degree, to facilitate a greater degree of continuity in doctoral studies, and to provide a more equitable assessment of fees for doctoral students advanced to candidacy. After advancement to candidacy, eligible students will receive a special grant to offset the cost of the educational fee.

The program is obligatory for all doctoral students (independent of original degree goal) first enrolled on the Berkeley campus in fall 1978 and thereafter. If you entered earlier you may elect to join the program. The conditions of the program are described in the section "Academic Policies," beginning on page 61.

Academic Residence
In order to meet the academic residence requirement for higher degrees—not to be confused with state residence, defined in the Appendix—every graduate student must enroll in and complete a minimum of 4 units of upper division and/or graduate courses per required semester of academic residence. Only courses in the 100 or 200 series satisfy this requirement. You should also become familiar with the regulations on academic residence for the individual graduate degree.

Postdoctoral Fellows and Visiting Scholars
Prospective fellows or scholars should communicate with the chair of the department, school, or research unit in which they are interested to determine whether the facilities they require are available and whether they meet eligibility requirements for an honorary appointment. With rare exceptions, visiting scholars must hold a doctoral degree or its equivalent. Visiting scholars may not be students enrolled in or on leave from another institution of higher education, candidates for a graduate degree, or employees of any University of California campus. Foreign fellows or scholars should communicate with Services for International Students and Scholars, International House, to determine whether they hold the proper visa to assume an appointment.
Berkeley's library system, composed of approximately seven million volumes and 100,000 periodicals, contains one of the best research collections in the country.

Most of the collection is housed in the Doe Library and Moffitt Undergraduate Library, where the core collections emphasize social sciences and the humanities.

The Bancroft Library, devoted primarily to the documentation of western North America, maintains the largest collection of Mark Twain archives in the world. The Bancroft collection is also distinguished for its East Asian Library, which contains rare editions of early manuscripts, scrolls, woodblock and engraved maps, stone rubbings, and bronze inscriptions from East Asia.

Special collections of the library system include some of the rarest books, illuminated manuscripts, and other publications in the nation.

It is very important that you carefully consider the total financing of your education, from your first term at Berkeley to completing your degree objective. If financial help will be needed beyond funds that you or your family are able to provide, you should make the necessary applications for financial assistance well in advance of enrollment. You should pay particular attention to early deadlines for application for grants, scholarships, work-study, Perkins, and Stafford Student Loans. While the needs and resources of each student differ, the University can provide a general list of fees and expenses normally encountered. You should note that fees are subject to change without notice.

Part of your fees may be refunded if you cancel your registration before the opening day of the semester or withdraw before the beginning of the sixth week of classes of any semester. (See Index, "Schedule of Refunds.") A circular on refunds, Student Fees and Deposits, is also available from the Office of Admissions and Records, 120 Sprout Hall.

**Total Expenses.** The cost of attending the University varies according to individual circumstances. The expenses listed below are approximate costs for the nine-month academic year and should be used only as a guideline.

### Required Fees

**University Registration Fee**—$321 per semester. This fee is paid by all students and covers normal expected usage of facilities such as laboratories and gymnasiums (except for instructional programs associated with these facilities) and services such as counseling, placement, and health.

**Educational Fee**—This fee is paid by all students at $451.50 per semester. It is used to support a portion of the student services costs of the educational program, such as financial aid, social and cultural activities, Admissions and Registrar operations, counseling and career guidance, student affirmative action, and academic tutoring. In exceptional circumstances the educational fee may be reduced by one-half for part-time undergraduate students. Approval of part-time undergraduate study is made only in exceptional cases and is based on considerations of occupation, family responsibility, and health. Applications must be approved by the appropriate dean before the start of each term. A fee reduction will be made only if you enroll in no more than two courses.

**Berkeley Campus Fee**—This fee is paid by all students in the amount of $47.25 per semester. It provides support for a wide range of activities sponsored by the ASUC, including work with academic and administrative units of the campus. It covers use of the Student Union, helps pay construction costs of the Union building, and assists with the provision of ethnic studies on the Berkeley campus.

**Graduate Student Health Insurance Plan (GSHIP)**—Approximately $260 per year. The health insurance fee is required of all graduate students and all undergraduates on nonimmigrant visas. Payment of the fee for both the fall and spring semesters provides coverage for the entire calendar year, including summer. If you have insurance comparable to the GSHIP, you may either use both plans or apply for an exemption from the GSHIP. For more information, call 643-7474.

**Nonresident Tuition**—$2958 per semester. At the time of registration, you are classified as a resident or nonresident for tuition purposes. Only U.S. citizens and holders of immigrant visas can become qualified for resident classification. Under California law you will be classified as a resident for tuition purposes if you have lived in California for more than one year immediately before the day instruction begins at the last of the campuses to open for a semester. Residence is the combination of physical presence within California plus intent to live in California permanently. Nonresidents must pay a nonresident tuition fee each semester. For detailed information regarding the establishment of California residence, see the Appendix or write to the Attorney in Residence Matters, 590 University Hall, University of California at Berkeley; Berkeley, CA 94720.
Additional Fees and Expenses

Late Fee Payment—$50. Continuing students who pay fees after the ACE fee payment deadline are liable for this fee.

Late Enrollment—$50. Continuing students who submit their Schedule Request Forms after the ACE deadline (see calendar for dates) are liable for this fee.

Reinstatement after having been dropped from University rolls—$10.

Athletic Privilege Cards, Men's Athletic Events—Student football season tickets and basketball/all sports cards are available for purchase at the Athletic Ticket Office. Privilege cards permit free admission or reduced rates to most University men's athletic events. For more information call 642-5150.

Athletic Privilege Cards, Women's Athletic Events—$15, Cal Gold Card. Purchase is optional. The privilege card is a season pass that permits free admission to all women's intercollegiate athletic events.

Table of Fees

At the time of registration, by mail or in person, students pay the following fees each semester:

<table>
<thead>
<tr>
<th>Student Category</th>

</tbody>
</table>

*All fees subject to change without notice.

Financial Aid

The Financial Aid Office is located on the second floor of Sproul Hall. The office is composed of four units, each serving a different part of the academic community. Please refer to the following directory for the address and telephone number of each unit. You may obtain detailed information about the various kinds of student aid available to Berkeley students by calling or writing the appropriate unit.

Directory

Financial Aid Offices:

Unit 1 and Unit 2
Undergraduate College of Letters and Science, 250 Sproul Hall 642-6442

Unit 3
Undergraduate Professional Schools and Colleges, 201 Sproul Hall 642-0623

Unit 4
Graduate/Law, 201 Sproul Hall 642-0485

Special Financial Aid Services:

Committee on Prizes, 127 Sproul Hall 642-3498

Director's Office, 224 Sproul Hall 642-0645

Emergency Loans, 205 Sproul Hall 642-0470

Undergraduate Scholarship Office, 203 Sproul Hall 642-6363

Work-Study Program, 207 Sproul Hall 642-5625

Students may apply for a variety of financial aid funds, including grants, scholarships, work-study, and loans. Financial aid applications and supporting information will be sent to entering undergraduate and graduate students who indicated their interest in financial aid on their applications for admission. New financial aid applications will not be sent to continuing students; they should stop by the Financial Aid Office in December or January to pick up their forms. The deadline for filing each year is normally March 2.

All financial aid except fellowships, honorary scholarships, teaching and research appointments, and prizes is granted on the basis of financial need. Financial need is the difference between the cost of attendance for the academic year and the amount you and your family can contribute toward those costs. Prizes are awarded on the basis of competition or outstanding ability in some area of creative or scholarly ability. Most scholarships are awarded on the basis of academic performance and financial need. Regents', Chancellor's, and Alumni scholarships, however, are awarded solely in recognition of outstanding achievement and promise. A separate booklet describing the prizes offered to Berkeley students is available from the Committee on Prizes, 127 Sproul Hall.

Much of the funding for graduate students comes from sources other than the Financial Aid Office. Fellowships are awarded through the Graduate Division. Information and applications are available at the Graduate Division, 1 California Hall. The deadline is January 5, but there are exceptions. Check with your department to confirm its filing dates.

Reserve Officer Training Corps

The University of California, as a land-grant institution established by the Morrill Act of 1862, offers courses and programs in military training. This training is voluntary and affords you the opportunity to qualify for a commission as an officer in the Army, Marine Corps, Navy, or Air Force while completing your college education. Reserve Officer Training Corps (ROTC) courses are offered by three departments: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). The scholarship programs carry a monthly stipend and pay for tuition, books, and most fees for qualified students. Individual programs are described under Military Officers' Education Program.

* Law students add $180 for additional law books and $30 for additional fees. Fees do not include undergraduate health insurance expenses.

**This figure represents average housing costs.

***Travel allowance to cover costs during vacation/semester break for dorm students.

If not a California resident, add $5916 nonresident tuition (estimated).

Graduate students and law students add $260 health insurance fee.
Veterans' Educational Benefits

The Veterans Services Unit in the Office of Admissions and Records certifies eligible veterans, dependents, surviving spouses, and reservists for educational benefits.

As the campus liaison to the Veterans Administration and the State Department of Veterans Affairs, Veterans Services can answer all questions regarding your eligibility for benefits and can assist you with counseling and referrals. A veterans' work-study program, a tutorial assistance program, and a fee waiver program are also available.

If you are a veteran newly admitted to Berkeley, please submit a certified copy of your Certification of Release or Discharge from Active Duty (form DD-214). You may also need to submit certified copies of your marriage certificate, dependent children’s birth certificates, and final divorce decree, if applicable.

If you are a veteran’s dependent, you must provide your spouse or parent’s VA claim number and social security number. The VA pamphlet, “A summary of Veterans Administration Benefits,” is available upon request.

If you have questions or need more information, you may write to the Veterans Services Unit, Office of Admissions and Records, 120 Sproul Hall, or call 642-1592.

Fellowships, Graduate Scholarships, and Academic Appointments for Graduate Students

Numerous programs—from fellowships, grants-in-aid, and loans to assistantships, subsidized housing, and child care programs—provide ways in which you can cut the cost of graduate school. Some of the programs are need-based and are administered through the Financial Aid Office. These programs are discussed in preceding paragraphs. Others are merit-based and are administered through the Graduate Division Fellowship Office and the academic departments. For detailed information about all the sources available to you, consult the Graduate Application for Admission and Fellowships, available from the department to which you wish to apply. The following paragraphs discuss merit-based fellowships, graduate scholarships, and teaching and research appointments, the primary sources of non-loan financial aid for graduate students.

Fellowships and Graduate Scholarships

Applications for fellowships and graduate scholarships are considered only once a year. Awards are made for the academic year beginning with the fall semester.

In assigning awards, the Committee on Fellowships and Graduate Scholarships will consider the extent and quality of your previous academic work, evidence of your ability in research or other creative accomplishments, your intellectual capacity, and promise of productive scholarship.

In addition to Regents’ Fellowships and fellowships funded by endowed income, the following fellowships are awarded in open competition:

The Berkeley Fellowships for Graduate Study. Fellowships are awarded to students of outstanding achievement and high promise who will begin graduate study toward the doctoral degree in any field. These are three-year awards, based on continued excellence in the fellow’s advanced degree program, with an initial annual stipend of $9000, plus tuition and fees.

University Predoctoral Humanities Fellowships. Entering humanities students who enroll in Ph.D. programs and who plan to pursue a career in teaching and research are eligible for this fellowship, which provides $10,000, plus tuition and fees, for the first year of graduate study and for the dissertation year. For at least the second and third years, departments provide support in the form of teaching or research appointments.

The Chancellor’s Minority Predoctoral Fellowships. Fellowships are awarded to minority students of outstanding achievement who are beginning study toward the doctoral degree and are planning a career in university teaching. Fellowships provide a stipend of $8500 plus tuition and fees. The fellowships are for three years and are based on continued excellence in the fellow’s advanced degree program.

Foreign Language and Area Studies Fellowships. The U.S. Department of Education allocates fellowship funds to institutions of higher education that offer advanced training in modern foreign language and area studies. Area studies is defined as a program of comprehensive study of aspects of a society or societies including geography, history, culture, economy, politics, international relations, and languages. To be eligible, you must be a citizen or permanent resident of the U.S., show potential for high academic achievement, and plan to enroll in a course in the language of award.

Graduate Opportunity Fellowships. The purpose of the Graduate Opportunity Fellowship Program is to increase the enrollment of women and ethnic minorities in departments in which they have been traditionally underrepresented. To be eligible for an award under this program, you must have demonstrated scholastic achievement and be an entering or continuing full-time registered graduate student and a citizen or permanent resident of the United States. Awards carry a maintenance stipend plus tuition and fees.

Fellowship Application Procedure. If you are applying for admission/fellowship, you must file the combined Graduate Application for Admission and Fellowships according to instructions included in the application. Important: You are strongly advised to take the October Graduate Record Examination.

If you are applying for admission for the spring semester, you must file a Continuing/Returning Graduate Student Fellowship Application (secured from the Graduate Fellowship Office) for an award to begin the following fall semester.

If you are a continuing or returning graduate student at Berkeley, you may obtain the necessary fellowship application materials from the Graduate Fellowship Office. You must file the application and supporting materials with the department or graduate group.

The fellowship application deadlines for new students range from December 15 to January 5, depending on the department; see
the Application for Admission and Fellowships for deadlines. Continuing students must submit fellowship applications to their departments by January 5.

Announcement of Awards. Awards are announced by April 1 and must be accepted or refused, in writing, by April 15. Your acceptance of a fellowship or graduate scholarship carries with it the presumption that you will devote full time to graduate study and research at Berkeley.

Fellowship Supplementation. Fellows may be employed no more than 25 percent of their time per semester as teaching or research assistants or in similar educationally relevant positions. Any exception to this policy must be approved by the dean of the Graduate Division upon recommendation of the graduate adviser.

Nonresident Tuition Scholarships
If you are a nonresident student with an outstanding academic record, you may be recommended by your department for a nonresident tuition scholarship. Awards may cover a full academic year or partial nonresident tuition only. If you receive one of these scholarships, you must enroll in a full-time program of study and/or research leading to a higher degree.

Applications are available in the Graduate Fellowship Office, 1 California Hall, and in departments. You should submit your completed application to your department by April 15.

Graduate Minority Program
The goal of the Graduate Minority Program is to increase the number of minority students entering and completing higher degrees at the University. The program assists with recruitment activities and provides financial assistance and support services for students from groups that have been traditionally underrepresented in graduate and professional programs in the United States. The University has identified black/African Americans, Native American/American Indians, Pacific Islanders, Mexican Americans (Chicanos), Filipinos, and Puerto Ricans as the most severely underrepresented, and it recognizes that Asian Americans and Latinos are underrepresented in certain fields. U.S. citizenship is required.

Graduate Minority Program awards are based on evaluation of academic promise, financial need, and available program funds. Awards provide a maximum stipend of $4500 for students in professional master’s degree programs and up to $8500 for students in the Ph.D. programs, plus payment of fees. Award amounts are subject to verification of financial need. Awards are made for one year and are renewable for an additional year if satisfactory academic progress is being made toward completion of the degree.

Applications for prospective students are included in the Graduate Application for Admission and Fellowships. Applicants are also required to complete the Financial Aid Office application for determination of financial need.

Application fee waivers are also available for disadvantaged needy students from underrepresented groups. The request forms are available at the Graduate Minority Program Office.

For further information write to the Graduate Minority Program, Graduate Division, 1 California Hall, University of California at Berkeley; Berkeley, CA 94720.

Teaching and Research Positions
Teaching Appointments. Many departments make graduate student instructorships available to qualified graduate students, providing them with a stipend of $1146 to $1364 per month (based on a half-time appointment). Appointments are half time or less. Graduate student instructors must be registered full-time students. Chosen for scholarly achievement and promise as a teacher, appointees serve the apprenticeship under active supervision of the regular faculty. Advancement to candidacy, teaching experience, and continuous and satisfactory progress toward the degree are rewarded with appointment to the higher steps of graduate student instructor. In some departments, students working for a Ph.D. are required to complete a specified minimum period of teaching as part of their degree program. If interested, you should apply directly to the chair of the department in which you wish to teach.

New students who have graduated from institutions in non-English-speaking countries will be required to demonstrate competence in spoken English before they are appointed as graduate student instructors. Applicants are strongly encouraged to take the Test of Spoken English in their home countries. Enrolled students should contact their major departments for details.

Research Appointments. If you are a qualified registered full-time graduate student, you may seek a research appointment in the departments, centers, and institutes of the University. The stipend ranges from $988 to $1299 per month for a half-time appointment. The duration and extent of such an appointment are variable. If interested, you should apply directly to the department, center, or institute in which you wish to work.

Stipend figures for all positions mentioned above are subject to United States income tax deductions. Figures given are gross, not net, and do not reflect deductions. If you are offered an appointment, you should obtain information about payment schedules, since payment for work performed is later than the deadline for payment of registration fees.

Appointments are for one or two academic semesters and carry no guarantee of waiver of the nonresident tuition fee or any other fees. Reappointment may be recommended. Summer Session appointments may be additional and, in some cases, full time. For teaching appointments, payment is in 10 equal installments (five installments per semester). In order to ensure proper academic progress, candidates for higher degrees may not be appointed by the University in any capacity at more than half time without the express consent of the dean of the Graduate Division. Graduate students appointed half time by the University to most academic titles must be registered for at least 6 units of upper division and/or graduate work and are considered full-time students. The structure of graduate student research appointments is currently under review on the Berkeley campus.
While considered an urban university, Berkeley retains much of the beauty associated with more pastoral settings. The campus's 1200 acres are spotted with groves of oak, redwood, and eucalyptus trees. Strawberry Creek meanders through the central campus, amidst hiking and running trails, athletic fields, and spacious lawns.

Buildings on campus provide a collection of outstanding architectural designs, from neoclassical to modern. Among the more notable structures are the Hearst Greek Theatre, an outdoor amphitheater seating 10,000; Wurster Hall, home of the College of Environmental Design; the Hearst Memorial Mining Building, considered one of the most elegant and stately structures on the campus; Doe Library, with its magnificent reading rooms; and South Hall, the oldest building on campus, constructed in 1873.

The Semester System

Under the semester system on the Berkeley campus, the academic year is divided into two semesters and one summer session. Quarter units, either earned previously at Berkeley or at another institution, are converted to semester units by multiplying by two-thirds; for example, 180 quarter units equal 120 semester units.

Courses and Units

Most University courses are assigned a unit value. One unit represents three hours of work per week by the student, including both class attendance and preparation. Laboratory, discussion, quiz, or review sessions may or may not be given unit value. For graduate courses (numbered 200 and above) it is generally understood that 1 unit should require four hours per week of effort on the part of the student, including time spent in class, laboratories, and outside reading and preparation.

Grades

The work of all students on the Berkeley campus is reported in terms of the following grades: A (excellent), B (good), C (fair), D (barely passing), F (failure), P (passed at a minimum level of C-), NP (not passed), S (satisfactory), U (unsatisfactory), I (work incomplete due to circumstances beyond the student's control, but of passing quality), IP (work in progress; final grade to be assigned upon completion of entire course sequence). The grades A, B, C, and D may be modified by plus (+) or minus (-) suffixes.

A course in which the grades A, B, C, D or P (undergraduate students only) is received is counted toward degree requirements. A course receiving the grade S (graduate students only) is similarly counted unless otherwise specified in the course description. A course in which the grade F, NP, or U is received is not counted toward degree requirements. A course in which the grade of I or IP is received is not counted toward degree requirements until the I or IP is replaced by grade A, B, C, D, P, or S.

Grade Points

Grade points per unit are assigned as follows: A=4, B=3, C=2, D=1, and F=none. When attached to the grades A, B, C, or D, plus (+) grades carry three-tenths of a grade point more per unit, and minus (-) grades three-tenths of a grade point less per unit than unsuffixed grades, except for A+, which carries 4.0 grade points per unit as does the A.

Grade-Point Average

Your grade-point average is computed on courses undertaken in the University of California, with the exception of courses undertaken in University Extension. Grades A, B, C, D, and F are used in determining your grade-point average; grades IP, P, S, NP, and U carry no grade points and are excluded from all grade-point computations. Grade I, if assigned before fall 1973, is included and is computed as an F; an I grade assigned fall 1973 and later is excluded from computations. For additional information, see “Repetition of Courses” below.

Special Provisions—Graduate Students

Only courses graded A, B, C (with or without plus or minus signs), or S are accepted in satisfaction of degree requirements. Courses graded below C- do not yield unit credit toward a higher degree, regardless of your overall grade-point average. Graduate students must maintain a minimum grade-point average of 3.0 in all upper division and graduate course work undertaken in graduate standing in the University of California or its exchange programs. Please note that departments, schools, and groups may have a higher performance standard than the minimum B average required by the Graduate Division. You must also work full time at your academic or professional program unless a program with fewer units is approved by your graduate adviser. In addition, you must successfully complete all course work required by your department, school, or group program, be advanced to candidacy, pass the required examinations, and fulfill other requirements specified for the program.

For a course extending over more than one semester in which evaluation of your performance is deferred until the end of the final semester, provisional grades of in progress (IP) may be assigned in the intervening semesters. The provisional grades are replaced by the final grade if you complete the full sequence. If you do not complete the full sequence, the Berkeley Division of the Academic Senate is authorized to regulate the award of credit.

With the consent of the department involved, graduate students may enroll in courses in the 600-series. These courses are evaluated by means of the grades satisfactory and unsatisfactory (S and U). They prepare you for appropriate master’s or doctoral examinations and do not count toward academic residence or the unit requirements for a higher degree. Beginning with fall semester 1985, you may earn 1-8 units of 601 or 602 per semester or 1-4 units per summer session. You may accumulate a maximum of 16 units in 601 and 602, respectively, toward examination preparation. No credit is allowed for work graded unsatisfactory.

Passed/Not Passed and Satisfactory/Unsatisfactory Grades

If you are an undergraduate in good academic standing (2.0 grade-point average or better, or in good academic standing under the academic probation regulations of your college or school), you may elect to take letter-graded courses on a passed/not passed basis, and if you are a graduate student in good academic standing, you may elect to take letter-graded courses on a satisfactory/unsatisfactory basis with the consent of your department, school, or group. Credit for courses taken on these bases is limited to one-third of the total units that you have taken and passed on the Berkeley campus at the time your degree is awarded. Included in this one-third are any units completed in an Education Abroad program, or on another University of California campus in an intercampus visitor or exchange program, or in a joint doctoral program. For graduate degree programs, grades of Satisfactory assigned in courses numbered 299 and in courses of the 300, 400, or 600 series are excluded from this computation. If you enroll in a course offered only on a passed/not passed or satisfactory/unsatisfactory basis, you will be graded P/NP if an undergraduate and S/U if a graduate.

A course that is required in or prerequisite to your major may be taken on a P/NP or S/U basis only upon approval of the faculty of your school or college. Courses required in a graduate major are determined by your adviser.

If you are a special or limited-status student, you may take courses on a P/NP basis at the discretion of the dean of your college or school. You may not repeat on a P/NP basis a course that you have previously taken on a letter-graded basis.

The option of being graded P/NP or S/U in a course may be cancelled if you are found to be ineligible for the option. If the course is offered on a P/NP or S/U basis only, it may be deleted from your study list at the option of your dean.

If you want honors at graduation, you should consult your college, school, or division for additional restrictions.

Your level of performance must correspond to a minimum letter grade of C- if you are to receive a passed grade, and to a B- if you are to receive a satisfactory grade.

These rules may be further limited by the faculties of the various schools and colleges and by the Graduate Council.

Grade I (Incomplete)

The grade I may be assigned if your work in a course has been of passing quality but is incomplete for reasons beyond your control. Prior arrangements must be made with the instructor, because in assigning the I grade the instructor is required to specify the reasons to the department chair.

For graduate students, the I grade will remain on the record until the required work is completed. Graduate students must finish the course requirements as soon as possible. To remove an I grade from your record, you must file the appropriate petition and fees with the Office of Admissions and Records, 128 Sproul Hall.

Although I grades are not counted in computing the grade-point average, it is important to remove them quickly. If you have more than the maximum allowable number of I grades, you will be placed on probation with the possibility of dismissal. Graduate students may have no more than two I grades on their academic records. You should seek the advice of the Graduate Division if you have further questions concerning I grades.

For undergraduate students, an I grade received in the fall semester must be replaced by the first day of instruction in the following fall semester.

An I grade received in the spring semester or Summer Session must be replaced by the first day of instruction in the following spring semester.

When you complete the required work or deferred examination, grade points will be assigned if you receive a grade of A, B, C, or D. If you repeat the course, grade points will then be assigned to the earned grade if the dean has given prior written approval to
repeat it. If you repeat the course without the approval of the dean, the I grade will be converted to an F and the repeated course will be treated the same as any other course in which you receive an F. The dean of your college or school may extend the deadline for undergraduate completion of an I grade. For undergraduates, except as noted below, any I grade which has not been removed within the above deadlines will, at the end of that time, be converted to grade F (or NP if taken passed/not passed). After that time, but not retroactively, the grade is included in computing your grade-point average.

Exceptions: Within the above deadlines for completing an I grade, undergraduate students may notify the dean that they have not attempted completion and will not complete the work required for removal of the I grade, and may request that the grade not be replaced by an F (or NP). This procedure is limited to a maximum of two courses. Once the decision has been made, it is irrevocable; the course cannot afterward be completed by any means, including repetition of that course or any equivalent course.

If a degree is conferred before the end of the above deadlines following the assignment of an I grade, the grade will not be converted to an F (or NP). However, you still have the option of removing the I grade within the above deadlines.

If you are an undergraduate student with 12 or more units of I on your record, you may not register without the permission of the dean. If you have registered by mail, the registration may be cancelled.

All students who receive an I grade must file a Petition for Grade and Grade Points in an Incomplete Course, available at department offices and at the Office of Admissions and Records, 128 Sproul Hall. You should file the petition with the department in which you received the I grade as soon as you and the instructor have established the date you completed the course. The filing fee is $5, payable at the Cashier’s Office. You must make arrangements to complete the course at least 30 days before the deadline. The final grade cannot be recorded until you have filed the petition with the department and paid the fee.

Note: The I grade is not physically replaced or removed from the academic record. Completion of the work is reflected as a subsequent line entry on the record, and the units and grade points thus earned will be included in the grade-point computations at the close of the next session.

Grade IP (In Progress)
If you take a course extending over more than one term and evaluation of your performance is deferred until the end of the final term, provisional grades of IP (In Progress) are assigned in the intervening term(s). The provisional grades are replaced by one final grade if you complete the full sequence. The grade IP is not included in the grade-point average. Effective with an IP assigned fall 1973 or later, if the full sequence is not completed as scheduled, the IP will be replaced by grade I when the instructor has no basis for assigning a grade for the term(s) completed. Further changes in your record will be subject to the rules pertaining to I grades (see above).

Changes of Grade
All grades except I and IP (see above) are considered final when assigned by an instructor at the end of a term. An instructor may request a change of grade when a computational or procedural error occurred in the original assignment of a grade, but a grade may not be changed as a result of re-evaluation of your work. No final grade except I may be revised as a result of re-examination or the submission of additional work after the close of the term.

Appeal Process
If you have a grievance about grades, you may appeal. You have grounds for appeal if you feel that considerations of race, politics, religion, sex, or sexual harassment affected your grades, or that your work was evaluated by other criteria that do not directly reflect your performance of the course requirements. The following formal procedure may not be activated unless you, the instructor in charge, an ombudsperson (or any mutually accepted third party), and the department chair have failed to resolve the dispute informally. The procedure, once initiated, is to be completed at the unit level within 20 days and at the Senate level within 40 days if both parties are in residence and the University is in regular session. The formal process must be initiated within two semesters of the alleged offense.

Appeal of Grades in Courses and Examinations
Each department or other instructional unit, or group of units teaching similar disciplines, must establish a standing Grievance Committee chair. For each case this chair will appoint an ad hoc Grievance Committee composed of three faculty members, only two of whom may be from the same unit, and two students in good standing appointed by the student association(s) of the unit(s). If no student association exists, the students are to be appointed by the ASUC or the Graduate Assembly. (The student members must have passed courses or an examination in the unit(s) at least at the level of the disputed course or examination and have been in residence for at least one year.) If you are dissatisfied with the outcome of the informal discussion, you may submit the case in writing to the Grievance Committee, which will obtain a written response from the instructor and will provide all parties the opportunity to present additional information orally or in writing. The Grievance Committee’s recommendation to the Committee on Courses, including minority view, if any, must be given in writing.

If the Committee on Courses finds in your favor, it may change a failing grade to a P or S, drop a course retroactively, retain the course but eliminate the grade from the GPA, or adopt the letter grade, if any, that was recommended by four of the five members of the Grievance Committee of the unit(s).
**Repetition of Courses**

You may repeat only courses in which you received a grade of D+, D-, F, NP, or U. You may repeat an I grade subject to limitations listed below (see Grade I). Courses in which you received a grade of D+, D-, or F and courses that you undertook for a letter grade but for which you received a grade of I may not be repeated on a passed/not passed basis. Repetition of a course more than once requires approval by the dean of the college, school, or division in which you are enrolled at that time you repeat the course. Without this approval, a course repeated more than once will not be included in the grade-point average, but a passing grade in the repeated course will be accepted in satisfaction of unit requirements for the degree. Degree credit for a repeated course will be given only once, but the grade assigned at each enrollment is permanently recorded. If you repeat courses in which you received a grade of D+, D-, or F, the units are counted only once and only the most recently earned grades and grade points are used for the first 12 units repeated. In case of further repetitions, the grade-point average is based on all grades assigned and total units attempted. If, however, you receive a grade of I upon repetition of a course, the grade of D+, D-, or F will continue to be computed in the grade-point average until the I grade is replaced. If you repeat an I in a letter-grade course, the units will be computed in the average, but no grade points will be allowed without specific approval of your dean. In effect, the grade-point penalty will be the same as for a grade of F, regardless of the grade earned.

**Credit by Examination**

**Undergraduate Students**

You may earn credit by examination in two ways:

1. If you are a new or re-entering undergraduate student, on the recommendation of the Board of Admissions you may be allowed credit by examination for knowledge that you acquired since graduation from high school, either by independent study or at another institution, and for which you have not been allowed advanced standing credit. You should apply to the Office of Admissions and Records for credit.

2. If you are a student in good standing and currently registered in a regular session, you may qualify for course credit by examination. You may apply for credit to the dean of your college or school on the Petition for Credit by Examination, obtainable from the Office of Admissions and Records. You may apply for credit by examination in any course listed in the current General Catalog that pertains to the regular sessions at Berkeley. However, the subject in which you want to be examined should be one in which, in the opinion of the instructor in charge of the department, knowledge can be tested by examination. You must file a separate petition for each course for a fee of $5 per course. In certain laboratory, field, or practice courses, neither a written nor an oral examination may be a satisfactory test. You may not receive credit by examination (1) if the credit would duplicate credit that you presented for admission to the University or (2) in elementary courses in your native language if it is not English. The examination must cover the entire course and be administered at one sitting of no longer than three hours. It may be the regularly scheduled final examination for the class, provided that the examination meets the foregoing criteria. The result of the examination may be reported to the Office of Admissions and Records only as Passed or Satisfactory, according to the regulations governing the assignment of these grades. Further information concerning credit by examination may be obtained from the Office of Admissions and Records.

**Graduate Students**

If you are a graduate student in residence, you may petition to receive a limited amount of course credit toward your degree by passing examinations on material covered in certain courses in lieu of taking those courses. Laboratory courses or graduate seminar or research courses are excluded. You must be registered for at least 4 units of upper division and/or graduate course work at the time you take the examination and you must be in good academic standing (3.0 grade-point average or better). The final result of the examination will only be reported as satisfactory or unsatisfactory. You may obtain the petition from the Office of Admissions and Records. Approval to take these examinations must be given by the dean of the Graduate Division and by the course instructor, or, if no instructor is designated, by the department chair.

**Midterm and Final Examinations**

The number of midterm examinations varies at the discretion of the instructor. Notices will be sent to undergraduate students whose work at midterm is of D or F quality. Final examinations are required in all undergraduate nonlaboratory courses, with the exception of courses that the Schedule of Classes indicates do not require a final examination. This requirement allows you to demonstrate mastery of course material while providing the instructor with written evidence for evaluation. You may be re-examined only to complete an incomplete grade, not to raise any other grades. The examination may last no longer than three hours and must be administered at the time announced in the Schedule of Classes. Any deviation from this announced time, including take-home examinations, requires approval from the Committee on Courses. This requirement guarantees you ample prior notice of the examination time and eliminates conflict with other examinations. The Committee on Courses considers take-home examinations that extend into final examination week to violate both the letter and spirit of the three-hour limit.

Instructors or departments must return your final examinations or copies of them, or retain them for 13 months after the date of the examination. They must give you access to retained examinations under the supervision
of the instructor or a designee. The department is responsible for ensuring compliance with this regulation for all faculty, including visiting faculty and faculty on leave.

Other Academic Policies

Grade Reports and Transcripts

After the close of each semester, the Office of Admissions and Records will mail you an unofficial copy of your academic record, which will include courses taken and grades received for the previous semester. Official copies of the academic record transcripts are also available from the Office of Admissions and Records, 128 Sproul Hall. After the last date for final examinations, transcripts for registered students must be held for inclusion of grades for the semester and, therefore, will not be available for approximately 30 working days. Partial transcripts will not be issued. At times other than the end of the semester, the normal period required for processing and issuing transcripts for both registered and former students is seven to 10 working days after receipt of your request. The charge for each transcript of every undergraduate, graduate, or separate summer session record is $3 and $1 for each additional copy of any record requested at the same time. The total amount due must accompany the application. If you urgently need a transcript that would normally take seven days to issue, it can be made in 24 hours at a special charge of $8 and $6 for each additional copy.

Registration Cards

Your registration card is your official identification as a student at Berkeley. You should keep it with you at all times. After you have paid all applicable fees and submitted your Schedule Request Form, you will receive a Confirmed Class Schedule which will have your validated registration card attached to it. As a supplement to the registration card you are also expected to have a photo ID card, which will eventually replace the registration card. For more information, go to 120 Sproul Hall.

Change of Name and Address

If you are moving, go to 120 Sproul Hall to fill out a change of address form.

Probation and Dismissal—Graduate Students

Graduate students are subject to probation and dismissal for academic deficiencies at the discretion of the dean of the Graduate Division under the policies established by the Graduate Council of the Academic Senate. Probation may be initiated by the dean of the Graduate Division or by recommendation of the chair of graduate advisers in your major department, school, college, or graduate group. The most common reasons for probation are a low GPA, incomplete grades in 100-200 series courses, written work of substandard quality in courses central to your program of study, or failure to make adequate progress toward the degree. Dismissal for academic deficiencies is normally carried out by the dean on the recommendation of the chair of the graduate advisers in your major department, school, college or graduate group. The most common reasons for dismissal are a low GPA, incomplete grades in 100-200 series courses, written work of substandard quality in courses central to your program of study, or failure to make adequate progress toward the degree. Dismissal for academic deficiencies is normally carried out by the dean on the recommendation of the chair of the graduate advisers in your major department, school, college or graduate group. Probation may also initiate dismissal after reviewing your record. You may appeal dismissal for academic reasons to the appropriate committee of the Graduate Council of the Academic Senate.

Normative Time—Doctoral Students

This program is obligatory for all doctoral students who first enrolled on the Berkeley campus in fall 1978 and afterward, regardless of their original degree goal. Students who entered earlier may elect to join the program. The conditions of the Normative Time Program are as follows:

1. Upon entry to a Berkeley doctoral program, you proceed with course work in the normal fashion until you have completed all requirements for advancement to candidacy. During this period you are registered continuously, except for semesters on approved withdrawn status as appropriate, and are liable for payment of all fees and applicable tuition.

2. Once you have been advanced to candidacy for the doctoral degree, you become eligible in subsequent semesters for a fee offset grant equal in amount to the educational fee if you have not exceeded the normal time in candidacy for your discipline.

3. You are awarded the grant each semester until your accrued time in graduate status exceeds the normative time set for your program of study. Accrued time is the number of semesters since you first registered, less a maximum of two semesters of approved withdrawn status, and any other adjustments that may be approved by the dean of the Graduate Division.

4. During the entire period of study, you must be registered continuously, except when you are on approved withdrawn status, or during the semester when the filing fee is used in lieu of registration. You will be informed of your eligibility and the number of semesters of fee-offset grant support available to you when you are advanced to candidacy. You must attain formal candidacy for the doctoral degree before the first day of instruction in the semester for which the first grant is awarded. In addition, you are required to apply annually by May 1 for renewal of the grant.

The following normative times in semesters have been established:

- Agricultural and Environmental Chemistry (13)
- Agricultural and Resource Economics (12)
- Anatomy (10)
- Ancient History and Archaeology (14)
- Anthropology (12)
- Applied Mathematics (11)
- Architecture (12)
- Asian Studies (10)
- Astronomy (10)
- Biochemistry (11)
- Bioengineering (10)
- Biophysics (10)
- Biostatistics (10)
- Botany (10)
Oriental Languages: Chinese (12), Classical Chinese (10), Japanese (12)
Paleontology (10)
Parasitology (10)
Philosophy (10)
Physical Education (12)
Physics (12)
Physiological Optics (10)
Physiology (12)
Plant Pathology (10)
Plant Physiology (10)
Political Science (12)

Public Health (12)
Public Policy (12)
Rhetoric (12)
Romance Languages and Literatures: French (12), Italian (12), Spanish (10)
Romance Philology (10)
Scandinavian Languages and Literatures (12)
Science/Mathematics Education (8)
Slavic Languages and Literatures (12)
Social Welfare (10)
Sociology (12)
Soil Science (10)
South and Southeast Asian Studies (14)
Statistics (10)
Wildland Resource Science (10)
Wood Science and Technology (10)
Zoology (10)

Access to Records
You are entitled by law and University policy to examine and challenge most of the records that the University maintains on you. These records are confidential and in most circumstances may be released to third parties only with your prior consent. Such matters are detailed in the Berkeley Campus Policy Governing Disclosure of Information from Student Records, available in the Office of Admissions and Records, 128 Sproul Hall.

Leaving Berkeley
Cancellation of Registration
Undergraduate Students
If you paid registration fees but are unable to attend classes, you may have your enrollment and registration cancelled by notifying the Office of Admissions and Records in writing before the first day of instruction. Beginning with the first day of instruction, you must request a formal withdrawal from the University rather than a cancellation (see below). You cannot cancel your registration by nonattendance of classes alone. A refund of all but $10 of the registration fee is made on cancellations except for the $50 deposit paid by new undergraduates.

Graduate Students
If you have paid registration fees and decide before the first day of instruction not to attend (consult the Academic Calendar at the front of this catalog for the appropriate date), you must file the Cancellation of Registration form. Once the semester has begun, if you must discontinue your studies you must apply for a formal withdrawal as described below. Cancellation of Registration forms are available from the Petitions Desk, Graduate Division, 1 California Hall. Please note that students who cancel their registration must also apply for a formal withdrawal.

Readmission After Cancellation
If you have cancelled your registration and want to be readmitted later, you must reapply for admission. See "Absences and Withdrawal" below.

Absences and Withdrawal
Undergraduate Students
You are responsible for short absences during the semester. Scholarship recipients who wish to withdraw officially from the University may be required to refund the scholarship money. If you must discontinue your studies for the remainder of the semester, you should obtain a Notice of Withdrawal form from the Office of Admissions and Records and submit it, together with your registration card, for the first of several required endorsements at the earliest possible date. If the form is submitted before the first day of classes, you will be entitled to the
same refund as would be made on cancellation of registration. The refund of fees is prorated thereafter (see Schedule of Refunds). The amount of refund is determined not by the date on which you discontinue your studies, but by the date on which the Notice of Withdrawal is first presented for endorsement. If you are eligible for further registration in the University, you will be entitled to a Statement of Honorable Withdrawal. You must not discontinue the work of a semester without formal notice; doing so may result in the assignment of F grades, academic dismissal, and loss of eligibility for readmission to a future semester.

If you have been dismissed for academic or disciplinary reasons, you are generally not eligible for readmission. If you have cancelled your registration, withdrawn, or been absent for a semester, you will be required to apply for readmission in any future semester you wish to attend. The Application for Readmission available from the Office of Admissions and Records must be accompanied by a nontransferable, nonrefundable readmission fee of $35. The Application for Readmission will not be considered until the fee has been paid. The final filing dates are June 15 for fall semester and October 1 for spring semester.

Graduate Students

If you want to withdraw from the University at the end of a semester or find it necessary to discontinue studies before the end of a semester, you must apply for formal withdrawal. Failure to obtain a formal release indicates that you have voluntarily withdrawn from the graduate program and terminated your intent to proceed to the degree for which you were admitted. Withdrawal petitions are available from the Petitions Desk, Graduate Division, 1 California Hall, and are filed with the same office. During the period of absence, you are exempt from all fees and are expected, in turn, to maintain no connections with the University. You may not use University facilities (except for uses accorded the general public) or place demands on faculty time. Withdrawal requires the endorsement of your department, school, or group and the dean of the Graduate Division.

Refunds

Armed Forces. If you enter the armed forces before the end of the sixth week of the semester, you may receive a full refund of the regular session registration fee if you received no credit for the courses you were taking. No refund will be made after that deadline.

New Undergraduate Students. If you withdraw from the University before the first day of instruction, your registration fees are refunded except for the $50 Statement of Intention to Register fee. From the first day of instruction and afterward, the $50 Statement of Intention to Register fee is withheld from the registration fee, and the schedule of refunds is applied to the balance of fees assessed.

All Continuing and Readmitted Students and New Graduate Students. There is a service charge of $10 for cancellation of registration or withdrawal before the first day of instruction. After the first day of instruction the schedule of refunds is applied to the total fees assessed.

Schedule of Refunds. The schedule of refunds refers to calendar days, beginning with the first day of instruction. Percentages listed (days 1-35) should be applied respectively to each tuition, educational fee, University registration fee, and other student fees. The effective date for determining a refund of fees is the date on which the Notice of Withdrawal is first presented for endorsement. No University services will be provided to you after that date. Students receiving federal financial aid (Pell Grant, SEOG, NDSL, or GSL) should be aware that a percentage of any refund from housing or fees will be used to repay those loans.

For students on the Deferred Payment Plan, the amount of refund is based upon total fees assessed (not actually paid) at the time the withdrawal petition is filed; these students may still have a financial obligation to the University upon withdrawal. A written policy about refunds is available from the Financial Aid Office.

Graduation from Berkeley

Undergraduate Students

Declaration of Candidacy. If you expect to complete work for your degree by the end of a semester, you must declare your candidacy by filing in the appropriate bubble on the back of your Schedule Request Form. As an alternative, you may declare your candidacy at the beginning of the semester by completing the appropriate petition in the Office of Admissions and Records, 128 Sproul Hall. You have until the end of the fifth week of classes in which to declare.

Nonregistered students. If you are not registered at the time you want to declare candidacy, you must come in person to 128 Sproul Hall to fill out the form “Candidate for Bachelor’s Degree for a Nonregistered Student” by the end of the fifth week of classes.

Degree check. The Office of Admissions and Records will check your records to ensure that you have completed the University requirements (American History and Institutions and Subject A, 120 units, and you are in good academic standing) necessary for graduation and your college or school will check for the fulfillment of major, department, and college or school requirements.

Confirmation of Candidacy. Your Confirmed Class Schedule will indicate whether or not you have been advanced to candidacy. If you think there has been an error, go to 128 Sproul Hall.

Graduate Students. Before a graduate degree can be conferred, candidates must have advanced to candidacy and completed the
master's thesis or doctoral dissertation and any required comprehensive or oral examinations. For detailed procedures and requirements, see the section "Graduate Education," beginning on page 39.

Certificate of Completion
A Certificate of Completion is official proof that you have been granted the degree for which you were working. You may request a certificate from 128 Sproul Hall and it will be sent to you from four to six weeks after the end of the semester.

Commencement
Commencement exercises to honor students who have won baccalaureate and graduate degrees and to give recognition and awards to students who are graduating with distinction are held each year in May. Students who have won their degrees in the previous fall semester or in Summer Session are welcome to participate. The ceremonies are held by individual schools or colleges or, in the College of Letters and Science, by individual department. There are about 60 ceremonies each year. The ceremonies consist of speakers and the presentation of degrees and awards and are followed by a reception, sometimes a dance, and for at least one department a picnic and volleyball game.

Students may rent caps and gowns through the ASUC and may make arrangements for photographs to be taken or video tapes made. See your department office for additional information.

Diplomas
Diplomas are not given out at Commencement but are available approximately four months afterward. You may pick up your diploma at 128 Sproul Hall or request that it be mailed to you for a $5 mailing fee.

Student Conduct and Appeals

Student Conduct

When you enroll in the University, you assume an obligation to conduct yourself in a manner compatible with the University's function as an educational institution. Rules concerning student conduct, student organizations, use of University facilities, and related matters are set forth in both University policies and campus regulations, copies of which are available upon request at the Office of Student Activities and Services, 102 Sproul Hall. You should pay particular attention to the booklet Berkeley Campus Regulations Implementing University Policies (October 1985).

Cheating or Plagiarism

Achievement and proficiency in subject matter include your realization that neither is to be achieved by cheating. An instructor has the right to give you an F on a single assignment produced by cheating without determining whether you have a passing knowledge of the relevant factual material. That is an appropriate academic evaluation for a failure to understand or abide by the basic rules of academic study and inquiry. An instructor has the right to assign a final grade of F for the course if you plagiarized a paper for a portion of the course, even if you have successfully and, presumably, honestly passed the remaining portion of the course. It must be understood that any student who knowingly aids in plagiarism or other cheating, e.g., allowing another student to copy a paper or examination question, is as guilty as the cheating student.

Sexual Harassment Policy

The Berkeley campus actively supports the official policy of the University of California on sexual harassment, which states: "The University of California is committed to creating and maintaining a community in which students, faculty, and administrative and academic staff can work together in an atmosphere free of all forms of harassment, exploitation, or intimidation, including sexual. Specifically, every member of the University community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy. It is the intention of the University to take whatever action may be needed to prevent, correct, and, if necessary, discipline behavior which violates this policy."

The campus has a special complaint procedure designed to facilitate prompt and confidential resolution of sexual harassment complaints. If you believe that you have been a victim of sexual harassment, have questions about the definition of sexual harassment or about the special complaint procedure, or have questions about the interrelationship between the special complaint procedure and other campus procedures, you may address your inquiries to the Faculty Assistant for the Status of Women, 642-7609. Copies of the procedure are available in 200 California Hall.

Student Grievance Procedure

The Berkeley campus Student Grievance Procedure (Appendix II to the Berkeley Campus Regulations Implementing University Policies (October 1985)) gives you an opportunity to resolve complaints alleging discrimination based on race, color, national origin, sex, handicap, age, and sexual orientation. You may also use the procedure to resolve any complaints you may have alleging that any other rules or policies of the Berkeley campus were inappropriately applied and resulted in an injury to you. The procedure is not applicable to certain kinds of complaints for which other appropriate appeals procedures exist, such as a grade appeal based on the application of nonacademic criteria. (See "Appeal of Grades in Courses and Examinations" on page 63 for a description of the grade appeal process.) The procedure contains important time limitations and provisions about the interrelationship between this procedure and other campus complaint procedures. Inquiries about this procedure or its interrelationship with other campus complaint procedures may be directed to the Assistant Chancellor, Affirmative Action and Special Projects, 642-1991. Copies of the procedure are available in 102 Sproul Hall.
Fifteen members of the Berkeley faculty have won Nobel Prizes over the years, a testament to the campus tradition of scholarly and creative excellence. The tradition is not only of historical significance: 9 of the laureates serve on the faculty now.

Left to right, from top left: Gerard Debreu (Economics 1983), University professor, Economics and Mathematics, developed a mathematical foundation for the supply-and-demand equilibrium theory; Czeslaw Milosz (Literature 1980), professor emeritus, Slavic Languages and Literature, has written some of the finest poetry of the 20th century; Charles Townes (Physics 1964), University professor, Physics, conceived the idea of the maser and laser; Melvin Calvin (Chemistry 1961), University professor, Chemistry, first used the carbon-14 isotope as a tracer in biological studies and exposed the mechanism by which photosynthesis operates; Donald Glaser (Physics, 1960), professor, Molecular and Cell Biology, developed a "bubble chamber" to track atomic particles; Owen Chamberlain (Physics 1959) (with Emilio Segre), professor, Physics, discovered anti-protons; Edwin McMillan (Chemistry 1951) and Glenn Seaborg (Chemistry 1951), professor emeritus, Physics, and University professor, Chemistry, respectively, co-discovered plutonium and nine transuranium elements; Yuan T. Lee (Chemistry 1986), professor, developed the field of reaction dynamics using cross-molecular beam techniques.

Deceased Berkeley Nobel laureates are: Luis Alvarez (Physics 1968), who developed a hydrogen "bubble chamber" for detecting nuclear particles; William Giauque (Chemistry 1949), who came closer to reaching absolute zero temperature (−459.688 degrees Fahrenheit) than anyone previously, by means of a magnetic refrigeration system; Ernest Orlando Lawrence (Physics 1939), who invented the cyclotron; John Northrop (Chemistry 1946), who isolated the enzymes that catalyze chemical reactions in the body; Emilio Segrè (Physics 1959), who discovered anti-protons with Owen Chamberlain; and Wendell Stanley (Chemistry 1946), who pioneered the isolation and crystallization of viruses.

Walter A. Haas School of Business
Office: 350 Barrows Hall, 642-7989
Dean: 
To be announced
Associate Deans:
John G. Myers, Ph.D. (Academic Affairs)
Robert A. Meyer, Ph.D. (Budget and Operations)

Directors:
Glenn R. Carroll, Ph.D. (Ph.D. Program)
David H. Downes, Ph.D. (M.B.A. Programs)
Cristina G. Banks, Ph.D. (Undergraduate Program)

Undergraduate Program
The bachelor of science degree in business administration constitutes an important service to the public and the business and government communities and serves as a respected model for other schools in the West. The school's program is less focused than graduate instruction. Its true distinctiveness resides in the integration of a well-rounded liberal arts education with a professional concentration in business administration. An excellent foundation is also provided for students preparing for graduate professional degrees in business, law, and public policy. Students are admitted only at junior level in both fall and spring semesters. Before admission to the school, you should obtain an Announcement of the Undergraduate Program of the Haas School of Business, available in 310 Barrows Hall. The announcement contains complete information concerning academic qualifications for admission, with details about prerequisites and degree requirements. Because there are many more applicants than spaces available, completion of the prerequisites does not guarantee admission. Requests for advice on programs of study and general information should be addressed to the Walter A. Haas School of Business, 310 Barrows Hall, University of California at Berkeley; Berkeley, CA 94720.

Lower Division. Students preparing for admission to the Undergraduate Business Program may complete required lower division courses in any college in the University, or equivalent courses at other institutions. Counselors in the undergraduate school will assist lower division students in selecting courses prerequisite to the upper division business administration curriculum. Detailed information on required preparation is available in the Announcement of the Undergraduate Program of the Haas Business School.

Upper Division. Upper division courses to be taken at Berkeley are: 110—Microeconomic Analysis for Business Decisions; 111—Macroeconomic Analysis for Business Decisions; 120—Managerial Accounting; 130—Financial Management; 150—Organizational Behavior; 160—Marketing; 170—Social and Political Environment of Business.

Beyond these requirements, additional courses within a subject matter field must be taken. Advisers will assist you in the selection of these courses. A minimum of 37 units in upper division business courses is required.

The following subject matter fields are available:
Accounting, economic analysis and policy, finance, management science, marketing, organizational behavior and industrial relations, production management, real estate, and urban and land economics.
Graduate Programs

The Walter A. Haas School of Business offers curricula leading to the Master of Business Administration degree and the Ph.D. degree.

The M.B.A. Programs. The Haas School offers two separate M.B.A. programs. The San Francisco M.B.A. evening program is designed for students who want to maintain their employment while undertaking graduate business study. This part-time M.B.A. program may be completed in as few as three years by taking two or three courses per semester. The Berkeley campus M.B.A. program is intended for full-time students and requires two years to complete.

The objective of the M.B.A. programs at Berkeley is to prepare men and women for management and leadership. The programs' flexibility allows students to pursue a general course of study or to specialize in a particular field.

The diverse student body comes from 89 colleges and universities and 24 countries. Current enrollment is approximately 500 students in the two-year full-time program on campus and 250 students in the evening program in San Francisco.

The Haas School cosponsors three concurrent-degree programs:

- J.D./M.B.A. in conjunction with Boalt Hall or Hastings College of the Law;
- M.B.A./M.P.H. in health services management in conjunction with the School of Public Health;
- M.B.A./M.A. in Asian studies in conjunction with the Group in Asian Studies.

In addition, two joint curriculum programs are offered:

- The Joint Program in Management of Technology in conjunction with the College of Engineering;
- The Real Estate Development Program in conjunction with the Department of City and Regional Planning and the Center for Real Estate and Urban Economics.

Curriculum. The information that follows concerns the full-time M.B.A. program on campus. Applicants interested in the San Francisco M.B.A. evening program for the fully employed should contact the SF/M.B.A. office at the address below.

To graduate, students must complete 54 semester units of course work comprised of 30 units of core (required) courses and 24 units of electives. A minimum residency of two academic years is required of all who enroll.

Credit may not be transferred from other graduate or undergraduate programs. However, students demonstrating proficiency in a core subject may waive the requirement and replace it with an elective course.

Because the core curriculum can be quite quantitative in nature, admitted applicants must demonstrate proficiency in mathematics through the fundamentals of calculus.

Where space is available, core and advance courses of the Berkeley program are open to students from other fields of study on campus who have satisfied prerequisite requirements. Since available classroom space is often limited, nonbusiness students may not be able to take a given course in a specific semester. Students should consult the graduate school office concerning space availability and faculty in their own fields for aid in planning to take business school courses.

Exchange Programs. The Haas School offers exchange programs with some of the finest business schools in Europe. Schools involved in the European exchange include the London Business School, L'Ecole des Hautes Etudes Commerciales (HEC) in Paris, the Rotterdam School of Management in the Netherlands, and IESE in Barcelona. In addition, programs such as the Washington Campus Program, conducted in the nation's capital, provide students with the opportunity to pursue a diverse education.

Admission. Applications for the Berkeley M.B.A. program are accepted for fall entry only. Each year, the school receives more than 2500 applications for about 250 positions in the entering class. The median GPA in the current class is 3.5 and the median GMAT score is 660. More than 98 percent of the students have significant full-time experience before entering the program.

Because admission to the program is extremely competitive, the Admissions Committee uses the following criteria for admission: a superior scholastic performance; a substantial employment history that demonstrates potential for a career in management; and personal attributes that suggest leadership, maturity, interpersonal skills, social and civic responsibility, and goal orientation.

Applications are reviewed beginning in November and are evaluated on a continuous basis, generally in the order of their receipt. Applicants are strongly urged to submit completed applications as early as possible. International applicants especially are urged to do so, since their academic records take longer to evaluate.

Career Planning and Placement. Representatives from more than 400 firms recruit at Berkeley each year. In addition to assisting with full-time job placement, the Career Planning and Placement Center sponsors a Summer Job Development Program for first-year students.

The Career Planning and Placement Center also assists students in choosing and attaining career objectives and in preparing for the job search. This preparation includes workshops on interviewing and writing cover letters and resumes.
Campus Visits. The Haas School encourages prospective students to attend information sessions at Berkeley. Organized by first- and second-year students, these presentations cover life in the program from the student perspective. Information sessions are held on Fridays at 2 p.m. in 129 Barrows Hall throughout the academic year (September through mid-May, with the exception of school holidays). The sessions last approximately one hour. During a visit, prospective students may arrange to visit classes as well. For further information or to arrange for a classroom escort, call 642-5610.

Applications. Applications become available around the first of August each year. Requests for application materials to the campus M.B.A. programs should be addressed to:

Admissions Office, M.B.A. Programs, Walter A. Haas School of Business, 350 Barrows Hall, University of California at Berkeley; Berkeley, CA 94720.

Requests for application materials to be mailed to destinations outside the U.S. and Canada must be accompanied by a certified check or international money order in the amount of $6.00.

The SF/M.B.A. program accepts applications for fall and spring entry throughout the year. Requests for information and application materials should be addressed to:

Admissions Office, San Francisco M.B.A. Program, University of California at Berkeley, 333 Golden Gate Avenue, San Francisco, CA 94102.

The Ph.D. program of the Walter A. Haas School of Business is an advanced and scholarly course of study in the functioning of business and its interaction with the environment. It combines an in-depth examination of one or more of the traditional fields of study in business administration with a broader, integrative investigation of basic and applied theory in the social sciences and in quantitative methods. Fields of specialization include accounting, business and public policy, finance, management science, marketing, and organizational behavior and industrial relations. Within management science it is possible to concentrate in operations management or in management information systems. The Ph.D. program offers two additional areas of concentration, both of which require a co-major: economic analysis and policy and international business. Economic analysis and policy students must co-major in either accounting or finance; students of international business may co-major in any of the six traditional fields offered.

The Ph.D. program includes periods of intensive work in formal courses as well as individually developed and executed reviews of special topics and programs of research. It provides the opportunity to work closely with an internationally known faculty both in the classroom and in individual scholarly investigation.

The purpose of the program is to train men and women for careers in the research, study, and teaching of business administration. It is designed to enable students not only to become critically familiar with the sophisticated technical and theoretical disciplines underlying the practice of business administration, but to develop the capacity to contribute to their extension. A distinguishing feature of Berkeley's program is an emphasis on research. Since the end of World War II, the application to business of theory and methodology from the social sciences and quantitative methods from the applied sciences has resulted in an accelerated rate of knowledge acquisition. This change has significantly deepened the sophistication of research work and broadened the range of analytical concepts with which the student in business must be familiar.

The intention of the Berkeley faculty is to train students who will take leadership roles in the future expansion and communication of this knowledge.

The teaching and research skills provided by the Ph.D. program have become virtually mandatory for positions in colleges and universities. These skills are also of increasing importance for a small but expanding number of jobs in business and government.

These opportunities are likely to be found in consulting, research, and technical advisory firms, with some Ph.D.'s in business administration starting their own companies. While a few may take positions as administrators in large companies, the Ph.D. program is not the best way to prepare for such posts. Those who want a professional degree to prepare them for responsible administrative positions will find the M.B.A. degree the appropriate course of study.

Compared to the Ph.D. programs at most other universities, the Berkeley plan is strongly discipline and research oriented. Emphasis is placed on preparing students to evaluate existing knowledge and to advance the work in their fields through the application of theory from the social sciences, mathematics, or statistics. The importance of quantitative skills in this mix varies by field of study within business administration, but all students must attain sufficient proficiencies to read and keep pace with an increasingly mathematical literature.

Instruction in the program may be separated into three general periods. The first encompasses formal course work in basic and advanced subjects. The time devoted to these studies, typically two years, depends largely upon a student's prior preparation. In general, students with previous graduate degrees such as an M.B.A. or M.A. complete this phase more rapidly than those with a bachelor's degree. Two years is a typical time period for this phase.
In the second period, directed study, students work closely with faculty members to prepare for research in their selected fields.

In the last period, individual research, students work on their dissertations. Together, periods two and three usually require two to three years to complete.

**Preparation for the Ph.D. Program.** Admission to the Ph.D. program is open to students with an accredited bachelor's degree, or higher, from any field. No preference in admission is given to any previous field of study or to applicants who have had some graduate training. Applicants should possess strong skills in writing and oral communications and have a basic understanding of differential calculus.

Ph.D. applications will be evaluated on the basis of evidence of a high level of scholarly ability in both quantitative and qualitative skills, the motivation to complete a strenuous academic program, and a clear statement of career objectives that are consistent with the Ph.D. degree.

Applications for the Ph.D. program may be obtained by writing to the Ph.D. Program Office, 371 Barrows Hall, University of California at Berkeley; Berkeley CA 94720.

---

**College of Chemistry**

**Office:** 420 Latimer Hall, 642-0473

**Dean:**
C. Bradley Moore, Ph.D.

**Associate Dean (Undergraduate Affairs):**
Scott Lynn, Ph.D.

**Assistant Deans:**
Robert G. Bergman, Ph.D.
Herbert L. Strauss, Ph.D.

The College of Chemistry comprises two departments, the Department of Chemistry and the Department of Chemical Engineering. Both disciplines provide the opportunity for tackling a number of major world problems. Overcoming the energy shortage, recovering and utilizing dwindling mineral resources, developing new drugs and food supplies, and synthesizing new products biochemically all depend centrally upon chemistry and chemical engineering. Students entering these fields will spend their careers in the middle of the action on these and other highly important areas of research.

Both departments in the College of Chemistry rank among the most prominent in their fields and both are renowned for their breadth of activity in a diverse range of sub-disciplines and applications. At the same time, with only two departments the college is a relatively small and comfortable place in which to work. Faculty members have many demands on their time, but students are able to develop close and satisfying contacts with them while in the college.

The college offers programs leading to the B.S., M.S., and Ph.D. degrees in both chemistry and chemical engineering. The B.S. degree in chemistry is intended for students who are primarily interested in careers as professional chemists. The B.S. degree in chemical engineering is intended as preparation for a career in chemical engineering and related disciplines. Students specialize in one of five interdisciplinary options: applied chemistry, applied physics, biotechnology, chemical processing, or materials science. The College of Letters and Science offers a chemistry major leading to an A.B. degree through a curriculum with a greater proportion of courses in the humanities and social sciences than is included in the B.S. chemistry program. It is intended for students interested in careers in teaching, medicine, or other sciences in which a basic understanding of chemical processes is necessary.

Advanced undergraduate and graduate students have opportunities to conduct research in synthetic and structural chemistry of organic and inorganic compounds, chemistry of natural products, theoretical chemistry, nuclear chemistry, physical chemistry, biochemical engineering, solid-state and surface chemistry, catalysis, process design and control, polymers, food processing, and biochemical engineering.

Recommended high school preparation for chemistry or chemical engineering should include chemistry (1 year); physics (1 year); mathematics (4 years) including trigonometry, intermediate algebra, and analytic geometry. If you have a choice, the preferred foreign language is German.

For a more specific description of the programs for the various degrees, as well as options of specialization, see the Announcement of the College of Chemistry.

**Organizational Units**

**Chemical Engineering**
Department Office, 201 Gilman Hall, 642-2291

**Chemistry**
Department Office, 419 Latimer Hall, 642-5882
Graduate School of Education

Office: 1501 Tolman Hall, 642-3726
Acting Dean:
William D. Rohwer, Jr., Ph.D.

Associate Deans:
Andrea A. diSessa, Ph.D.
Nadine M. Lambert, Ph.D.

The Graduate School of Education is committed to programs of instruction, research, and service that will enhance the profession of education. The school prepares professionals who will apply their understanding of discipline-based theory and research to the complex and challenging responsibility of educating students. It also trains researchers and scholars who will direct their academic study to the improvement of educational practices and institutions.

The school offers four kinds of graduate programs: (1) credential programs for prospective elementary and secondary school teachers who are interested in acquiring a strong grounding in educational research on developmental psychology, writing, science, or mathematics and in applying this knowledge to problems of teaching and learning; (2) advanced credential programs for experienced school practitioners who are intent on developing specialized leadership capacity in areas such as administration; (3) advanced professional degree programs leading to the M.A., M.A.T., or Ed.D. degree; and (4) advanced academic degree programs leading to the M.A. or Ph.D. degree. In addition, the school provides undergraduate students with courses that contribute to their liberal arts education and preparation for citizen involvement with the public schools and universities.

The school's programs are organized into five principal areas of study: Education in Mathematics, Science and Technology; Education in Language and Literacy; Educational Administration; Educational Psychology; and Social and Cultural Studies in Education.

- In Education in Mathematics, Science, and Technology, there are two areas of concern: research that will advance both fundamental and applied understanding of cognition and instruction, and the development of advanced computational systems for learning and teaching. Students must have a strong background in mathematics, physical or life science, computer science, or engineering.

- Education in Language and Literacy emphasizes reading, writing, and first and second language acquisition in educational settings. The approach is interdisciplinary and includes the study of linguistics, psycholinguistics, sociolinguistics, and cognitive psychology. A central concern is the influence of social and cultural experiences on language and literacy development.

- Educational Administration focuses on the development of a broad understanding of the structure of educational systems; the quality, effectiveness, and equity of educational programs; and the nature of the changing social, political, fiscal, and legal contexts of education. School leadership and management, higher education leadership and management, political and policy analysis, financing and organizational design, and educational planning and evaluation are the major areas of study.

- Educational Psychology focuses on two areas: developmental phenomena, including cognitive development, social development, and individual differences; and quantitative methods, including measurement, psychometrics, research methods, and data analysis. Students must have one of these areas of focus as well as one selected area of application in education, such as school psychology.

- Social and Cultural Studies in Education focuses on the social and cultural contexts within which schools operate. The relationship of social, cultural, philosophical, and political events to curriculum and pedagogy in the public school are examined.

For details about the school's programs and information concerning admissions requirements and procedures, consult the Announcement of the Graduate School of Education, available by writing or visiting the Graduate School of Education, Education Admissions Office, 1607 Tolman Hall, University of California at Berkeley; Berkeley, CA 94720, or by calling (415) 642-5345.

College of Engineering

Office of the Dean: 320 McLaughlin Hall; graduate information, call individual departments; undergraduate information, call 642-7594.

Deans:
Karl S. Pister, Ph.D. (until July 1990)
George J. Maslach, B.S. (Emeritus)

Associate Deans:
George Leitmann, Ph.D., Dr. Ing. (hon.)
Edwin R. Lewis, Ph.D.
H. Frank Morrison, Ph.D.

Assistant Dean:
Arthur Gill, Ph.D.

The College of Engineering offers programs in a wide variety of engineering fields. These programs are based on the concept that the engineer must be well-grounded in the sciences, humanities, and social studies, with a full command of the principles and practices of the profession.

Four-year undergraduate curricula are offered in the following professional fields: civil engineering, electrical engineering, computer science, industrial engineering, mechanical engineering, mineral engineering, naval architecture, nuclear engineering (all accredited by the Accreditation Board for Engineering and Technology, Inc.). Programs are also offered in manufacturing engineering, materials science, operations research, and petroleum engineering. Each of the curricula is administered by a department within the college and each emphasizes a core program of science and
engineering subjects related to the particular field. In addition, there is a curriculum in engineering science with programs in bioengineering, engineering geoscience, engineering mathematics and statistics, and engineering physics. Five double major programs within engineering are offered. These are in nuclear engineering or materials science and engineering with mechanical engineering or electrical engineering and computer science, and in materials science and engineering with nuclear engineering. In addition to these five programs, two double major programs in materials science and engineering/chemical engineering and nuclear engineering/chemical engineering are offered jointly by the College of Chemistry and the College of Engineering.

The unit requirement for the bachelor's degree is normally 120 semester units, within which the student is expected to satisfy graduation requirements. For valid reasons, this minimum may be exceeded. For unit extension beyond 125 units, prior approval of the dean is required for registration.

Entering freshmen should have completed the following subjects:

High School Subjects and Units:

United States history—1 (one year of United States history or one-half year of United States history and one-half year of civics or American government.)

English—4
Mathematics—4
Physics—1
Chemistry—1
Foreign language—2
Other college preparatory subjects—2
Total units—15

Graduate programs are offered leading to the Master of Science and Doctor of Philosophy degrees for study emphasizing engineering and applied sciences, and Master of Engineering and Doctor of Engineering degrees for advanced professional studies of design development. Fields of study include bioengineering, civil engineering, electrical engineering and computer sciences, industrial engineering and operations research, mechanical engineering, nuclear engineering, ceramic engineering and metallurgy, materials science and mineral engineering, engineering geoscience, fluid mechanics, applied mechanics, and naval architecture and offshore engineering. Interdisciplinary graduate programs are also available in the fields of bioengineering, ocean engineering, plasmas, hazardous waste management, applied science and technology, engineering and business administration, robotics and manufacturing, fire safety, engineering science, integrated sensors, nonlinear systems and dynamics, surface and subsurface hydrology, and rock mechanics.

Concurrent degree programs that provide a broad, integrated curriculum between two disciplines are Architecture, M.Arch—Civil Engineering (Structural), M.S.; City and Regional Planning, M.C.P.—Civil Engineering (Transportation), M.S.; Public Policy, M.P.P.—various engineering departments, M.S.

More information will be found throughout the engineering sections of this catalog and in the Announcement of the College of Engineering. The announcement is available from the department of interest or the College of Engineering, 308 McLaughlin Hall, University of California at Berkeley; Berkeley, CA 94720.

Chair:
T. Kenneth Fowler, Ph.D.

Interdisciplinary Studies
Program Office, 230 Bechtel Engineering Center, 642-8790
Associate Dean:
E. R. Lewis, Ph.D.
College of Environmental Design

Office of the Dean: 230 Wurster Hall, 642-0830

Dean: Roger Montgomery, M.Arch.

The College of Environmental Design combines in a single academic unit professional instruction in architecture, city and regional planning, and landscape architecture, along with related undergraduate and advanced graduate instructional programs. In addition to preparing students in these three professions, the college is committed to improving practice, contributing to basic knowledge, and addressing ethical issues in areas related to the built environment and its natural setting. To this end, instruction, service, and research programs in this college aim at educating people to build better, more efficiently, more beautifully, and in ways better fitted to the multiplicity of human, social, and ecological needs in the modern world.

The college consists of three departments: Architecture, City and Regional Planning, and Landscape Architecture. Undergraduate degree programs in architecture and landscape architecture offer unusual learning opportunities that combine general education, basic skills, and knowledge in the professional fields, with a broad introduction to the built and natural environments. All three departments offer undergraduate minor programs that are open to students majoring in other fields. At the graduate level, each department offers advanced graduate work leading to the Ph.D.

Undergraduate Programs

Undergraduates enroll in a four-year curriculum leading to the Bachelor of Arts (A.B.) degree with a major in architecture, landscape architecture, or an individual major. These curricula provide a broad educational base and preprofessional competency sufficient for entry-level employment in architecture, landscape architecture, and other environmental design fields. In addition, they serve as undergraduate preparation for graduate education both in the design fields and, with properly selected elective courses, in other fields such as business, law, and engineering. Graduates also work in related fields such as urban development, real estate, construction, etc.

Admission. High school preparation for the college should include four years of mathematics, one year of physics, and one year of biology or other natural science. Additional preparation could include freehand drawing or introductory drafting. Transfer students who have completed 36 semester units should have completed the prerequisite course work described in the Announcement of the College of Environmental Design. Enrollment in the college beyond 130 semester units is not usually permitted; consequently, transfer students who have credit for more than 86 semester units are not normally admitted to the undergraduate program. An undergraduate major in architecture or landscape architecture is not prerequisite for admission to graduate study in these fields.

Degree Requirements. The A.B. degree programs in the college require the completion of 120 units distributed according to regulations which appear in the Announcement of the College of Environmental Design, available from the Undergraduate Dean’s Office, 234 Wurster Hall, University of California at Berkeley; Berkeley, CA 94720.

Minor Programs. The College of Environmental Design offers several minors. Minors consist of at least five upper division courses and are offered as an optional program to encourage coherence in course work taken outside the major and to give recognition to the work when it is completed. The following minors are currently being offered: social and cultural factors in environmental design, open to students not in the College of Environmental Design; history of the built environment; landscape architecture, open to students not in the College of Environmental Design; city and regional planning; community development; ecological design; architecture, open to landscape architecture majors only; architecture for engineers, open to civil engineering majors only; and landscape design, open to architecture majors only. For further information, contact the Undergraduate Dean’s Office, 234 Wurster Hall.

Information on the courses and degree programs in Architecture, City and Regional Planning, Environmental Design, and Landscape Architecture can be found in those sections of this catalog, as well as in the Announcement of the College of Environmental Design.

Graduate Programs

Architecture, City and Regional Planning, and Landscape Architecture each offer accredited professional master’s degree programs that serve as the basic credential for professional practice in the respective fields. The departments also have concurrent degree programs that combine professional degrees in two fields either within the college or with other professional schools. In addition, an M.A. degree in design is offered for a very few students.

The three departments have advanced graduate programs leading to the Ph.D. degree for students who have the capacity to engage in research and teaching. These programs have limited enrollments and are not regarded as advanced degrees for professional practice.
Graduate School of Journalism

Office: 121 North Gate Hall, 642-3383

Dean:
Tom Goldstein, J.D.

Associate Dean:
William Drummond, M.S.

The goal of the Graduate School of Journalism is to produce professional journalists who move on to positions of leadership and influence in American journalism. The Master of Journalism (M.J.) program provides intensive training in journalism skills and a grounding in the traditions and principles of the field. A professional project or thesis is required to complete the two-year program. The program is rooted in the idea that the best possible preparation for careers in journalism is a sound liberal arts education followed by training in journalism at the graduate level.

The school offers specialities in print and in broadcast. Everyone must take a focused and demanding core course which stresses reporting and writing skills. This is because members of the faculty believe that the best way to train students for careers in journalism is to place them under the supervision and guidance of seasoned journalists in small classes, give them instruction in the skills and attitudes of the craft, and intensive practice in reporting, writing, and editing. Professors give exhaustive critiques of students’ work.

Beyond the core course, there are courses in specific areas, such as political, business, science, and cultural reporting. There are also courses stressing different techniques, such as investigative reporting and magazine reporting. The curriculum also includes courses in copy editing and photography and a sequence of courses in television and radio reporting.

Another group of courses is intended to increase understanding of the role of journalism in society. There are courses in the history of journalism, legal aspects of the media, journalistic ethics, and the literature of journalism.

Candidates for the M.J. degree are expected to complete their work for the degree in four semesters. They must complete 36 units in approved upper division and graduate courses, of which at least 24 must be in graduate courses in journalism, and must present an acceptable thesis. Students are encouraged to take about one-third of their courses in disciplines other than journalism.

Applicants for graduate study should hold a bachelor’s degree comparable to that given by the University of California. Requirements and procedures are outlined in the brochure Graduate Application, Fellowship, and Financial Aid, available at the Office of the Dean of the Graduate Division, and in the Announcement of the Graduate School of Journalism.

The Graduate School of Journalism offers several courses for undergraduates, ranging from small writing and reporting seminars to large lecture courses.

Further information, application requirements, and copies of the Announcement of the Graduate School of Journalism are available from the Journalism Office, 121 North Gate Hall.
School of Law
Office: 225 Boalt Hall, 642-2278
Administrative Officers:
Dean: Jesse H. Choper, LL.B.
Associate Dean: Edward L. Rubin, J.D.
Assistant Deans: Leslie Oster, J.D.
Sue Ann L. Schiff, J.D.
Vice Chair, Jurisprudence and Social Policy:
Charles J. McClain, Jr., Ph.D., J.D.

The School of Law (Boalt Hall) has a three-year curriculum leading to the Juris Doctor (J.D.) degree. In addition to preparing its students to practice law, the school attempts to develop the study of law and legal institutions and to foster legal research. The school is a member of the Association of American Law Schools and is approved by the American Bar Association. Its graduates are recommended to become applicants for admission to the Bar Association. Its graduates are qualified to become applicants for admission to practice in any state of the United States.

No single “pre-law” major is required or even recommended. However, these suggestions are made: students should learn to write by taking courses in which their work is vigorously edited; enroll in courses demanding analytical skills; obtain some breadth in humanities and social sciences that will help in understanding the social context within which legal problems arise; and acquire a general understanding of economic principles and the business world.

However, prospective students should not be deterred from pursuing the study of law merely because their undergraduate education has not emphasized all these areas. Diversity of background enhances and enriches the legal experiences of all students.

Graduate Program in Jurisprudence and Social Policy. The School of Law offers a graduate program in Jurisprudence and Social Policy, leading to M.A. and Ph.D. degrees, that is unique in legal education.

The program is founded on two related convictions: (1) legal scholarship should have intimate connections with the social sciences; and (2) education in a law school should not be confined to the professional training of future lawyers.

The program is multidisciplinary, involving faculty from Law and a variety of humanities and social science disciplines, including economics, criminology, history, philosophy, political science, and sociology.

It is designed for students who are interested in careers in teaching, research, policy analysis, or public administration. Doctoral dissertations are currently being undertaken on such subjects as law and educational administration, the history and jurisprudence of natural resources, and modern European jurisprudence.

Study for a degree in Jurisprudence and Social Policy may be combined with study for a J.D. degree. Further information on admissions procedures and program requirements may be obtained from the graduate assistant, JSP Program.

The school also offers programs leading to the degree of Master of Laws (LL.M.) or the degree of Doctor of the Science of Law (Juris Scientiae Doctor, J.S.D.).

The school does not offer a part-time or evening program. Most work in the first year is prescribed; the second and third years' courses are elective.

College of Letters and Science
Office of Undergraduate Advising: 113
Campbell Hall, 642-1483
Acting Dean: Carol T. Christ, Ph.D.
Divisional Deans:
(Geoffrey F. Chew, Ph.D., Physical Sciences
Donald McQuade, Ph.D., Undergraduate Studies
Robert C. Knapp, Ph.D., Undergraduate Services
Gerald A. Mendelsohn, Ph.D., Social Sciences
Associate Dean: Mitchell R. Breitwieser, Ph.D.
Assistant Deans: Brenda Bredemeier, Ph.D.
Lorne M. Buchman, Ph.D.
Anthony W. Bulloch, Ph.D.
Elaine H. Kim, Ph.D.
Harry Morrison, Ph.D.
Gavriel Moses, Ph.D.

The College of Letters and Science offers undergraduate students a variety of programs leading to the Bachelor of Arts degree in four academic years of full-time study. The first two years are a time of exploration, experimentation, and decision. In the last two years students confirm the decision and acquire and refine special knowledge, usually in their major departments. The college's departments are devoted to instruction and research in a variety of academic subjects. Each department represents a style of study and communication and refined development of a set of structured ideas. The subjects of the departments overlap and complement one another.
Requirements for Admission in Advanced Standing

Students applying for admission will not be considered if they have completed more than 80 semester (120 quarter) units. The dean of the college makes exceptions to this policy only in unusual circumstances. Applicants with advanced-placement credit may, however, exceed the 80-semester-unit limitation by the amount of their advanced-placement credit and be admissible if they meet all other admission criteria. Students who enter the college with advanced-placement credit may exceed by the amount of this credit the maximum unit limitation requiring the selection of a major and the maximum unit limitation requiring graduation.

In computing the number of units which they have completed, students should be aware that the College of Letters and Science does not grant unit credit for courses completed in a two-year college after a total of 70 semester units has been completed in all institutions attended. Subject credit toward completion of college requirements is, however, granted for appropriate courses.

Transfer students with 56 or more semester units are required to have satisfied, before admission to the college, the reading and composition breadth requirement, the foreign language breadth requirement, and the quantitative reasoning breadth requirement of the college. Students who apply as intercampus transfers and who have completed all the Letters and Science breadth requirements, or the general education requirements, or the equivalent of either, at the University of California campus from which they transfer may, upon petition, be credited with having completed the breadth requirements of the college. Transfer students who apply from community colleges in California have the option of fulfilling lower division breadth requirements by completing the transfer core curriculum. This core curriculum specifies a series of subject areas and types of courses which, if completed before transfer, will satisfy the lower division breadth and general education requirements at any general campus of the University of California.

Biological Sciences Majors. Students planning to declare majors in a biological science must in addition have completed the minimum subject preparation in the major with a grade-point average of 2.00 (C average) or higher. The subject preparation listed below is minimal; transfer students who wish to declare a major in a biological science are urged to consult directly with the department or program in which they are interested to learn of additional requirements or any restriction placed on entry to the major. With the exception of Plan III of the major in molecular and cell biology (see departmental listing) and the major in physical education (see departmental listing), the subject preparation for majors in the biological sciences is as follows:

Students who have completed 56 to 70 semester units:
1. General chemistry with laboratory (equivalent to one year of Berkeley's inorganic chemistry with laboratory).
2. General biology with laboratory or a course in botany plus a course in zoology (equivalent to Berkeley's Biology 1A-1B or botany/zooology).

Students who have completed 71 to 80 semester units must complete in addition to points 1 and 2 above:
3. Introductory organic chemistry with laboratory (equivalent to Berkeley's organic chemistry with laboratory).

Social Sciences and Natural Sciences Majors. Certain majors in the social sciences and natural sciences are overcrowded. Transfer students planning to declare a major classified under social science or natural science should consult directly with the department or program to learn of any restrictions placed on entry to the major.

Requirements for the Bachelor of Arts Degree

Students must complete a minimum of 120 semester units, distributed according to regulations which appear in the Announcement of the College of Letters and Science. A 15-unit class schedule per semester is considered to be a normal course load; a class list of fewer than 13 units requires the special permission of the dean. There are also scholarship, minimum-progress, residence, breadth, and major requirements; these are described in the announcement as well. Brief descriptions of the breadth, major, and minor requirements appear below. Major and minor programs are outlined under the department, field, or group headings in this publication. In addition, students must satisfy the University requirements in Subject A, American History, and American Institutions.

Breadth Requirements. There are four breadth requirements:

1. Reading and Composition. This requirement is to be completed in the freshman or sophomore year in order that students may develop skill in the communication of ideas and a sensibility for language which will facilitate and enrich further studies. Students must complete the requirement through course work according to the requirements of the semester system, whether the course work is undertaken at Berkeley or elsewhere.

2. Quantitative Reasoning. This requirement may be fulfilled by satisfactory performance in an examination or by successful completion of an acceptable college course. Information about acceptable examinations and acceptable courses is included in the announcement. This requirement, if satisfied by course work, must be completed without delay.
3. Foreign Language. This requirement assures that students who graduate from the college will have some knowledge of the language of a culture other than their own. Students who have not satisfied the language requirement at the time of admission must complete it without delay. The requirement may be satisfied by (A) completion of the third year of one foreign language in high school with a minimum grade of C-, (B) by completion of the second semester of a Berkeley course, or its equivalent elsewhere, in one foreign language with a minimum grade of C-, or (C) by demonstration of equivalent knowledge through examination, including the College Entrance Examination Board Achievement Test, the CEEB Advanced Placement Examination (if taken before admission to the college), or an acceptable foreign language placement examination offered by a foreign language department at Berkeley or on another campus of the University of California. The college will accept in completion of the requirement appropriate work in two foreign languages (with minimum grades of C-) only if that course work was completed before fall semester 1983 and if the course work was accepted by the college in satisfaction of the foreign language breadth requirement under the quarter system.

4. Six Courses (minimum total of 16 semester units) outside the Field of Students’ Major. Students must follow specific college guidelines in the satisfaction of the requirement, and its completion may be spread over the four years of college attendance. The fields of knowledge are defined as the humanities, the natural sciences, and the social sciences. See the Announcement of the College of Letters and Science for details.

Major Programs. All students must pursue and complete a major program, the object of which is to provide them with a limited experience in specialization. There are more than 60 departmental major programs ranging from the humanities (e.g., art, comparative literature, English, foreign languages, etc.) and the social sciences (e.g., anthropology, economics, geography, psychology, etc.), to the biological sciences (e.g., integrative biology, molecular and cell biology, physical education) and the physical sciences (e.g., geology, mathematics, statistics, etc.). In addition, there are group majors in Asian studies, Celtic studies, development studies, Dutch studies, environmental sciences, ethnic studies, film, Latin American studies, legal studies, mass communications, Middle Eastern studies, political economy of industrial societies, religious studies, social welfare, and women’s studies. There are also field majors in the physical sciences and social sciences. Moreover, students who have completed at least 60 semester units and at least one semester of enrollment at Berkeley, and who have attained a minimum 3.0 Berkeley and overall grade-point average may, with the permission of the dean and support and supervision of a college faculty member and a faculty member who acts as second reader of the individual major thesis, pursue an individual major designed to satisfy special academic goals. Students currently enrolled in individual majors have developed major programs ranging from urban planning policy to the history of physics. Thus the options available to students outside traditional disciplines are many and varied.

Minor Programs. Minor programs are intended as optional programs that will encourage coherence in the work that students undertake outside their major field(s) of study. The college has set the following minimum requirements for completion of a minor program:

1) Course requirements: a minimum of five upper division courses, completed on a letter-graded basis, are required for the minor. At least three of the five upper division courses must be completed at Berkeley.

2) Grade-point average requirements: Students must maintain a minimum overall grade-point average of 2.0 in upper division courses required for the minor program. At present the college offers minor programs in the following departments and groups:

Department of Afro-American Studies
Afro-American Studies Humanities Minor
Afro-American Studies Social Science Minor

Department of Art, History of
Minor in the History of Art

Group in Asian Studies
Option I: Minor in Chinese Studies
Option II: Minor in Japanese Studies
Option III: Minor in Southeast Asian Studies

Group in Celtic Studies
Minor in Celtic Studies

Department of Classics
Minor in Greek
Minor in Latin
Minor in Classical Civilization

Group in Demography
Minor in Demography

Group in Dutch Studies
Minor in Dutch Studies

Department of English
Minor in English: Creative Writing
Minor in English: American Literature
Minor in English: Literature in English

Department of Ethnic Studies
Minor in Asian-American Studies
Minor in Chicano Studies
Minor in Ethnic Studies
Minor in Native American Studies

Department of French
Minor in French

Department of Geography
Minor in Geography

Department of German
Minor in German

Department of Italian
Minor in Italian

Department of Music
Minor in Music
Students should consult the department or group in charge of the minor for additional requirements and specific information regarding the minor program in which they are interested. Admission to the minor and certification of completion of the minor are determined by the department or group in charge of the program. When a student completes a minor program, the department or group in charge will notify the Office of Admissions and Records, so that the completion may be noted on the student's transcript.

Division of Undergraduate Studies

The Division of Undergraduate Studies encompasses Freshman and Sophomore Studies and Undergraduate Interdisciplinary Studies (formerly Division of Special Programs).

Freshman and Sophomore Studies. The offices of the associate dean of Freshman and Sophomore Studies are located in 325 and 327 Campbell Hall (642-8363). Freshmen can contact these offices for information about special lower division seminars designed to maximize professor-student interaction in the classroom. These courses are offered by a variety of departments to address important intellectual questions and contemporary issues.

The Emeritus Seminar Program is administered by these offices. Courses in this program are entitled Freshman and Sophomore Studies 22 (formerly Letters and Science 22) and are taught by emeritus professors. Many of the courses are interdisciplinary in nature and cover subjects from anthropology to integrative biology, architecture to engineering. These 2-unit courses are offered on a passed/not passed basis only and are limited to 15-20 students per section. Students should consult the office in 325 Campbell Hall for current information on these courses.

Freshman and Sophomore Studies also administers the special interdisciplinary courses in Western Civilization (Freshman and Sophomore Studies 44A, 44B, 44C, and 44D—formerly Undergraduate Interdisciplinary Studies 44A, 44B, 44C, and 44D), an introductory lecture series (Freshman and Sophomore Studies 79—formerly Undergraduate Interdisciplinary Studies 79), the tutorial programs at the Clark Kerr campus and the Stern and Bowles residence halls, the Medical Cluster program, and the Truman Scholarship application process.

Undergraduate Interdisciplinary Studies (formerly Special Programs). Located in 301 Campbell Hall, Undergraduate Interdisciplinary Studies develops and administers innovative and interdisciplinary courses and programs in the College of Letters and Science that do not belong to a single department. Currently, it administers the field major in social sciences and the group majors in Celtic studies, environmental sciences, film, mass communications, Middle Eastern studies, religious studies, and women's studies. For complete descriptions of the majors and major courses, please see the entries listed alphabetically by major. Minors are currently offered in Celtic studies, religious studies, and women's studies. The Rhodes and Marshall Scholarship application process is administered through this office.

School of Library and Information Studies
Office: 102 South Hall, 642-1464
Acting Dean:
Patrick Wilson, Ph.D.
Associate Dean:
Charlotte Nolan, M.L.S.

There is an increasing realization that economic and political well-being depends on the kind of educational and informational support that public libraries and other related agencies can provide. The School of Library and Information Studies trains people to keep track of information, to diagnose people's needs, to organize information to meet those needs, and to deploy available resources to bring people and information together. Libraries, the traditional repository of the human record, are the loci of these activities.

The school has two goals: (1) to improve the level of access by various sectors of society to the contents of the world's total supply of records, and (2) to increase knowledge and understanding of the character of the first goal and the conditions for its success. The first goal is practical and aims at improving the way things work. The second goal is theoretical and aims at understanding the way things do and might work. The theoretical goal is pursued both for its own sake and in support of the practical goal.

The school has four principal objectives in the pursuit of its goals: (1) to prepare individuals to design, organize, administer, and evaluate information services; (2) to improve the quality of professional performance by librarians and others engaged in
information service; (3) to encourage and contribute to research in bibliography, librarianship, and information studies; and (4) to increase the ability of undergraduate students to understand the bibliographical access system and to inform them of the substantive concerns of librarianship and information studies.

The School of Library and Information Studies offers a basic curriculum at the graduate level of 28 units, leading to the Master of Library and Information Studies degree, which qualifies the holder for professional service in libraries and other information activities. It offers a post-master’s program leading to the Certificate in Library and Information Studies. The school also offers a program leading to the Ph.D. degree for students interested in advanced research and teaching in librarianship and the information sciences, and a program leading to the professional doctorate, the D.L.I.S., for students interested in a design-oriented preparation for administrative positions in libraries or other information services. Admission to the degree programs is contingent upon admission to graduate standing. The school also offers undergraduate courses for nonmajors in librarianship.

For further details about these programs, consult the Announcement of the School of Library and Information Studies.

College of Natural Resources

Office of the Dean: 101 Giannini Hall, 642-7171

Dean:
Wilford R. Gardner, Ph.D.

Associate Dean—Academic Affairs:
Dennis E. Teegarden, Ph.D.

Associate Dean—Cooperative Extension
Susan Laughlin, D.S.W.

Associate Dean—Research:
William A. Allen, Ph.D.

Associate Dean—Student Affairs:
Philip T. Spieth, Ph.D.

Assistant Dean—Planning
Margaret Race, Ph.D.

Modern human society, with all its complexity and multitudinous population, is inexorably linked to the natural resources that sustain its existence. In the College of Natural Resources, teaching and research in basic and applied biological sciences, social sciences, and physical sciences are directed toward the essential tasks of achieving increased knowledge, enhanced use, wise management, and responsible stewardship of the vast renewable natural resources found in agricultural fields, range lands, wildlands, forests, and watersheds.

Formed in 1974 by a merger of the former College of Agricultural Sciences and the School of Forestry and Conservation, the College of Natural Resources has roots as old as the University of California and a longstanding tradition of basic research on practical problems in agriculture and forestry. Today, the college’s educational and research programs in the study of renewable natural resources, which are characterized by a mixture of natural sciences and social sciences, can be grouped into five overlapping areas:

- Agricultural sciences are represented by the Departments of Entomology, Plant Pathology, and Soil Science, which emphasize graduate education and basic science (including molecular biology, applied ecology, and biological control) in direct support of applied problems in agriculture. These departments provide the core for the undergraduate major in bioresource science.
- The Department of Plant Biology, formed with the reorganization of the biological sciences at Berkeley, has a strong focus on basic plant biology from the molecular to the organismal levels, with a direct connection to plant biotechnology.
- The Department of Nutritional Science provides basic study of nutrition and food science and also provides a professionally accredited undergraduate program in clinical dietetics.
- The Department of Forestry and Resource Management, in addition to its traditional, accredited professional forestry programs, has programs in resource management,
wildland resource science, and range management. The affiliated Forest Products Laboratory sponsors programs in forest products and in wood science and technology.

- The Department of Agricultural and Resource Economics and the Department of Conservation and Resource Studies emphasize the social science of natural resources, especially aspects of economic and political institutions and cultural values that affect the development, management, and conservation of natural resources.

Undergraduate Programs

The undergraduate programs of the college fall into three categories. Some are basic science programs that provide a foundation in the biological sciences and prepare students for graduate and professional programs in biology and the health sciences. Some are prescribed professional programs designed for students with interests in specific professions. Some are social science programs that emphasize flexible, interdisciplinary approaches and prepare students for areas such as law, public policy, and environmental planning.

Major Requirements. Detailed course requirements for each major, along with college requirements for the B.S. degree, are listed in the Announcement of the College of Natural Resources, available from the Dean’s Office, Student Affairs, 106 Giannini Hall, University of California at Berkeley; Berkeley, CA 94720.

Minor Programs. Conservation and Resource Studies: Contact the office in 112 Giannini Hall or call 642-6730.

Entomology: Contact the office in 218 Wellman Hall or call 642-6660.

Forestry: Contact the office in 133 Mulford Hall or call 642-6410.

Forest Products: Contact the office in 478 Richmond Field Station or call 231-9575.

Political Economy of Natural Resources: Contact the office in 203 Giannini Hall or call 642-3347.

Soil Science: Contact the office in 108 Hilgard Hall or call 642-0341.

You may also contact the Office of Student Affairs in 106 Giannini Hall, 642-0542, for information.

Limited Status. Qualifications for limited status include (1) a previous bachelor’s degree or substantial previous college work, and (2) a specific well-defined academic goal for which additional undergraduate work is necessary. Students must also have a GPA of 3.0 or better. For further qualifications and information, contact the Student Affairs Office at 642-0542 in 106 Giannini Hall.

Undeclared Status. Freshmen may be admitted each year to the College of Natural Resources in undeclared status. Students so admitted must declare a major in natural resources after their first year. During the period in undeclared status, students are required to take a lower division preparatory program that will satisfy natural resources majors.

A typical course schedule for freshmen should include basic English (or Subject A) and math (calculus). Most of our majors have a biological emphasis in which chemistry is also required. Our social science majors require economics and/or political science.

During this year students are encouraged to contact advisers promptly for advice about potential majors and requirements.

First semester schedule:

- English 1A or Subject A; Math 1A-16A or math prep class; Chem 1A (biological emphasis); PENR 1 or Poli Sci 1 (social science emphasis); elective; Total, 14-15 units.

Undergraduate Advisers. The undergraduate advisers for each major serve as the principal liaison officers between students and the college. They are available for consultation throughout the year. Advisers are prepared to discuss details of the requirements and planning of a program best suited to a student’s individual needs. All students are encouraged to see their advisers as early as possible for advice in the planning of their academic programs.

The adviser should also be consulted concerning any special academic problems that may arise. In addition, the Office of Student Affairs may be consulted about any such difficulties or about questions relating to records and regulations. Call 642-0542 for office hours.

Advance Class Enrollment (ACE). Students in the College of Natural Resources are required to file their advance class enrollment (ACE) forms in the Office of Student Affairs, 106 Giannini Hall. An adviser’s approval is required before filing the form. All add and drop forms must also be approved in the same manner.

The minimum course load for students is 13 units. Exceptions require either (1) an employment verification form on file, or (2) a part-time status form on file. For further information, contact the Office of Student Affairs at 642-0542.
Graduate Programs

Academic and professional graduate degree programs are available in agricultural and environmental chemistry, agricultural and resource economics, comparative biochemistry, entomology, forestry, genetics, nutrition, plant pathology, molecular and physiological plant biology, range management, soil science, wildland resource science, and wood science and technology. In addition, an ad hoc interdisciplinary doctoral program is offered.

Inquiries regarding details of the various graduate programs may be directed to the appropriate graduate adviser in the chosen field.

Office of the Dean (642-3414) and Admissions (642-9537): 350 Minor Hall

Dean: Jay M. Enoch, O.D., Ph.D.

Assistant Dean—Academic Affairs: Anthony J. Adams, O.D., Ph.D.

Assistant Dean—Student Affairs: Darrell B. Carter, O.D., Ph.D.

Assistant Dean—Patient Affairs: Weylin G. Eng, O.D.

The School of Optometry provides professional training in the art and science of vision care. Drawing upon the principles of anatomy, optics, physiology, and psychology, the four-year professional program leads to the degree of Doctor of Optometry, which qualifies one to take the state board examinations.

Doctors of Optometry are health care professionals who specialize in the examination, diagnosis, and treatment of conditions or impairments of the vision system. Specifically educated, clinically trained, and state-licensed to examine the eyes and related structures to detect the presence of vision problems, eye diseases, and other anomalies, optometrists provide treatment by prescribing ophthalmic lenses, contact lenses, or other optical aids and provide therapy to preserve or restore maximum efficiency of vision. By thoroughly evaluating the internal and external structures of the eyes, Doctors of Optometry detect and diagnose eye diseases such as glaucoma or cataracts. They are also trained to recognize systemic diseases such as diabetes, hypertension, and arteriosclerosis.
Doctors of Optometry are educated in the sciences of anatomy, zoology, chemistry, physics, mathematics, neurology, bacteriology, microbiology, disease processes and detection, pharmacology, behavioral science, social science, public health, and many other related fields. The school provides four years of comprehensive training in vision care. The first year is devoted to more advanced study of sciences which form the background of optometry, such as ocular anatomy, ocular pathology, physiology, neuranatomy, the psychology of vision, physiological optics, geometric optics, ophthalmic optics, pharmacology, and theoretical and practical optics. The second and third years are devoted to the science of optometry and the acquisition of skills in examination procedures. Active clinical participation begins in the third year. The fourth year is devoted to the practice of optometry and the detailed study of specialized areas, including contact lenses, binocular and infant vision, vision functions, ocular health, aniseikonia, vision of the elderly, and low vision.

Optometry offers a wide variety of interesting, challenging, and rewarding careers in private practice, in hospitals and other health organizations, and in public service. The education acquired at the School of Optometry provides today’s Doctors of Optometry with the knowledge and skill necessary to meet the challenges of providing vision care.

The school also offers a graduate program in physiological optics which leads to the M.S. degree and the Doctor of Philosophy degree. Offered in cooperation with other departments of the University, this program is designed to prepare students for a career in teaching and research in the science of vision. Research facilities available to graduate students in physiological optics are unexcelled anywhere in the world, and a distinguished resident and visiting faculty is available to provide guidance in the most important aspects of the field.

A one-year optometric residency program is available for graduate optometrists who want to expand their skills in one or more clinical areas and/or seek training in specialty areas. The following areas of study are offered: binocular vision and/or pediatrics, family practice optometry, contact lenses, visual functions, low vision care, and ocular disease detection. Special combined or unique programs are possible.

For optometrists interested in reading disabilities, a Master of Science degree program is offered in the School of Education in cooperation with the School of Optometry. This post-O.D. program is designed for optometrists who want to specialize in the handling of children with reading problems, particularly those problems that are visually based. Additional information for this program may be obtained by writing to the Admissions Office, School of Education, Tolman Hall, University of California at Berkeley; Berkeley, CA 94720.

For further information about any of the school’s programs, please consult the Announcement of the School of Optometry, available from the Admissions Office, School of Optometry, 381 Minor Hall, University of California at Berkeley; Berkeley, CA 94720.

Physiological Optics

An undergraduate program in physiological optics leads to the B.S. degree. The primary purpose of this program is to prepare students for the graduate program in physiological optics rather than the practice of optometry.

The graduate program in physiological optics leads to the M.S. and Ph.D. degrees. The program is administered by the Group in Physiological Optics, representing faculty from the School of Optometry and other departments.

Students interested in this graduate program should become familiar with the regulations of the Graduate Division and should contact the adviser of the Group in Physiological Optics as early as possible. Admission to this program requires a bachelor’s degree in a science field or a doctoral degree in medicine or optometry.

For further details about the requirements for the B.S., M.S., and Ph.D. degrees, please consult the adviser of the Group in Physiological Optics, School of Optometry.

School of Public Health

Office of the Dean (642-2523) and Admissions (642-6531): 19 Earl Warren Hall

Dean:
Joyce C. Lashof, M.D.

Associate Deans:
C. Jean Morton, M.S.W., M.P.H.
(second associate dean to be announced)

The basic mission of the School of Public Health is to provide leadership in the fields of education, research, and service in all aspects of public health. Public health as a field is devoted to the promotion of health and the prevention of disease through identification of the factors affecting the health of population groups and the determination of how best to bring about change necessary to assure the maximum well-being of all people. Accomplishing this mission requires the joint efforts of professionals from many disciplines directing their attention toward understanding the biological, environmental, and social factors involved in the causation of diseases and the maintenance of health.

Health policy analysis and study of health care systems are also essential to accomplishing our mission. Identification of populations with special health needs and methods for addressing those needs are of concern. Health promotion, health protection, and disease prevention are the unifying themes for the curriculum, research, and service activities of the school.
Graduate curricula in the School of Public Health provide preparation for positions of leadership in health agencies and for research and teaching in the health sciences.

The professional degrees Master of Public Health (M.P.H.) and Doctor of Public Health (Dr.P.H.) are offered in the area of biomedical and environmental health sciences, including epidemiology, biostatistics, environmental health sciences, biomedical sciences, and forensic science, and in the area of social and administrative health sciences, including health policy and administration, maternal and child health, public health nutrition, applied behavioral sciences, and public health education. Particular attention also may be given to special areas of concern such as population, environmental pollution, disease control, genetic counseling, and health and medical care delivery.

Programs of study leading to the following academic degrees are administered by groups of faculty from the School of Public Health and other departments: Biostatistics, M.A., Ph.D.; Environmental Health Sciences, M.S., Ph.D.; Epidemiology, M.S., Ph.D.; Health Services and Policy Analysis, Ph.D.; Immunology, M.A., Ph.D.; Microbiology, M.A., Ph.D.; Nutrition, Ph.D.; Parasitology, M.S., Ph.D.; Health Services and Policy Analysis, Ph.D.

Students are encouraged, and in most programs required, to begin studies in the fall semester because of the sequence in which courses are scheduled. Separate applications for admission must be submitted to the Graduate Division of the University and to the School of Public Health no later than February 12 for admission to the following fall semester. Applicants to the General Preventive Medicine Program must submit all application materials by December 15.

For further information, consult the Announcement of the School of Public Health, available from the school.

Organizational Units

Biomedical and Environmental Health Sciences
Department Office, 113 Haviland Hall, 642-4416
Chair: George F. Sensabaugh, D.Crim.

Social and Administrative Health Sciences
Department Office, 513 Earl Warren Hall, 642-9441
Chair: Thomas G. Ruhdall, Ph.D.

Graduate School of Public Policy

Office: 2607 Hearst Avenue, 642-4670
Dean: Eugene Smolensky, Ph.D.
Associate Dean: Phyllis Strong Green, Ph.D.

For many decades now, the problems American society faces have steadily grown in number, variety, and complexity. Most of these problems come for resolution, sooner or later, to the doorstep of government. In response, public officials are increasingly involved with devising solutions to social problems and improving governmental services. They wrestle with such difficult questions as political conflict, policy choice, the implementation of policy, bureaucratic behavior, program effectiveness, and the equity and efficiency with which public resources are distributed. Heightened concern with this broad policy terrain is also evident within the private sector, which is developing greater capability in the analysis of public policy. As a consequence of these trends, the need for well-trained analysts and managers in the policy field remains strong.

The Graduate School of Public Policy prepares students to join the ranks of policy analysts in both the public and private sectors. The strong first-year core curriculum is enhanced by the diversity offered in the second year. The school’s program provides students with the benefits of and access to the resources of the entire Berkeley campus. Second-year students can take their elective courses from the full array of campus offerings.

Undergraduate Courses

The undergraduate courses in Public Policy deal with the substance of American public policy, how it is made, how its effects can be gauged, and what the purposes of policy should be. The courses consider both the policy process and particular policy issues. By examining different policy problems in their political and social contexts, students should gain a greater sensitivity to the forces which shape and carry out public policies and to the impact of social, political, economic, and legal power.

Courses are designed for students in diverse disciplines and professional schools. There are no prerequisites for enrollment in the courses unless specifically noted otherwise in the course descriptions. The training provided by the courses is useful to those interested in combining the substantive perspectives of the social sciences with the immediacy of contemporary problems; to those considering professional study; and to the informed and politically aware citizen.

Graduate Courses

Through an examination of a wide variety of contemporary American domestic policy areas, graduate courses enable students to conduct systematic work in the design and assessment of public policies. Among the skills emphasized are those facilitating the application of political, organizational, economic, quantitative, and legal analysis to the full range of the policy process—from policy initiation through policy adoption, implementation, and evaluation. By developing these skills, students from the professional schools and academic disciplines should find their strengthened analytical capabilities of direct use when applied to their own field of concentration.

In addition to the management courses available from the school, a number of public and nonprofit management courses have been developed on the campus; see the listings under Public and Nonprofit Management in the “Courses and Curricula” section of this catalog.
The Master’s Degree in Public Policy

The professional degree, the Master of Public Policy, is designed to provide students with the knowledge, analytical skills, and sensitivities needed to conduct public policy studies. The primary focus is on American domestic policy. Students from diverse disciplinary backgrounds are accepted into this program. Those completing the master’s program are qualified to take responsible positions with government and policy research organizations and to work in the private sector on matters related to public policy. Some graduates work primarily as policy analysts while others pursue administrative and political careers which involve the initiation and utilization of policy studies. The two-year master’s degree program consists of a required first-year core curriculum, a summer internship, and a second year devoted to elective courses and a policy study of the student’s choice. The first-year core curriculum includes courses in political and organizational analysis, economic analysis, quantitative techniques, legal analysis, and a workshop where students perform policy studies on selected issues.

Ph.D. in Public Policy

The Ph.D. program prepares students for careers in advanced policy research in academic institutions, research institutes, and government agencies. The Ph.D. program is oriented toward the generation of new knowledge, theories, and methodologies in public policy analysis. The program is small and admission is highly selective.

Further Information

Brochures and information on admissions procedures and student financial assistance are available from the Graduate School of Public Policy, University of California at Berkeley, 2607 Hearst Avenue, Berkeley, CA 94720.

School of Social Welfare

Office: 120 Haviland Hall, 642-4341
Dean: Harry Specht, Ph.D.

Graduate Program

The School of Social Welfare is a graduate professional school dedicated to educating men and women for careers in service to people in need. The complexities and vicissitudes of modern society create enormous problems, such as economic dependency, physical and mental illness, child abuse and neglect, marital disruption, homelessness, and substance abuse. The field of social welfare and the profession of social work help people (many of whom are disadvantaged and from minority backgrounds) who experience these problems. Professional education focuses on the organizational structures, programs and policies, methods of practice, and institutions that attend to these social problems. In short, the School of Social Welfare is for people who care about their fellow men and women and the communities in which they live. Graduates of the school can be found in both public and private social agencies; working with individuals, families, groups, organizations, and communities; and contributing, in a variety of ways, to the formulation of new programs and policies that address emerging social problems.

The school offers the following programs:

- A two-year program of studies for the Master of Social Welfare degree in preparation for the professional practice of social work. Classroom and field courses are designed to teach professionals to use tested knowledge and skill and research methods and techniques in their practice. Applicants must have completed the group major in social welfare in the College of Letters and Science, or an equivalent major, or undergraduate study in other social and behavioral sciences judged by the faculty as adequate preparation for graduate study in the school. There are also several special programs: the Latino Intercambio project, the M.S.W./M.P.H. dual degree program, the social welfare/law concurrent degree program, the pupil personnel services credential, the M.S.W. program for American Indians, and the program in public and nonprofit management.

Applications for admission to any of these programs should be submitted as early as possible beginning in September and no later than February 10 for admission in the following academic year. Admission to the school is contingent on admission to graduate standing; for details see the booklet Admission to Graduate Study.

For further information, consult the Announcement of the School of Social Welfare, available from the School Office, 120 Haviland Hall.

Undergraduate Group Major, Letters and Science

The Department of Social Welfare administers an undergraduate major in social welfare in the College of Letters and Science leading to the degree of Bachelor of Arts. For major requirements, see the Social Welfare section of the catalog.
