Map Showing Approximate Location of Sites Referred to in This Report.....Following title page

---

\*These 5 papers were presented at the Second Annual Meeting of the Western States Branch of the American Anthropological Association held in Berkeley, February 3-4, 1950. Site designations in the form of a number prefixed by an abbreviation of a county name are those based upon the system employed by the UCAS as described in its Report No. 5, 1949. The state map accompanying the present report shows the location of the various archaeological sites mentioned in the papers which appear below.
