PREFACE

We provide here a brief index to Reports No. 32-74 (1955-1968) of the University of California Archaeological Survey, Berkeley (UCAS). This is intended as a continuation of the index of Reports No. 1-30 which was published in UCAS Report No. 31, 1955.

To this index is added a check list of Reports No. 1-75 of the UCAS and a check list of Contributions, No. 1-30 of the Archaeological Research Facility of the Department of Anthropology, University of California, Berkeley (ARF).

Further, a brief history of the University of California Archaeological Survey and its successor, The Archaeological Research Facility, is provided, together with a listing of the manuscripts and maps filed with the Archaeological Research Facility, and a list showing numbers of archaeological sites in the permanent California site file maintained by the ARF.

VI. CATALOGUE OF MANUSCRIPTS IN THE ARCHAEOLOGICAL RESEARCH FACILITY,
DEPARTMENT OF ANTHROPOLOGY, UNIVERSITY OF CALIFORNIA (BERKELEY).

[In July 1972 a check was made of the manuscript file. Items formerly listed under Nos. 14, 32, 50, 54, 59, 78, 79, 88, 91, 92, 105, 114, 159, 174, 200, 228, 229, 276, 295, 346 are not in the filing drawers and are classed as "missing". They probably exist somewhere, but we have no record of who has them in his possession. The following numbers in the catalogue have no manuscripts assigned for the reason that they have either been withdrawn by their author or have been removed from the file as worthless: Nos. 9, 62, 76, 91, 134, 139, 181, 192, 195, 196, 214, 218, 219, 246, 249, 298, 313, 328, 331, 339, 395, 396.]

IX. A BRIEF HISTORY OF THE UCAS AND ARF, 1948-1972.

There was established on July 1, 1948 in the Department of Anthropology at Berkeley through the combined efforts of the State Legislature, the Board of Regents and the President of the University, Robert G. Sproul, an organization named The California Archaeological Survey. An Advisory Board of nine members was formed "for the purpose of strengthening and broadening existing collaboration with other institutions in the state whose interests are related to those of The California Archaeological Survey."* The Advisory Board may have been good theory, but it proved to be unproductive, and it was allowed to lapse in the second year of the Survey's existence. The official title of the Survey was changed to University of California Archaeological Survey (UCAS) on July 1, 1949, and this title was maintained until the UCAS was abolished on July 1, 1961.

On July 1 of each of the 12 years of the operation of the UCAS a report on activities was prepared and submitted to the President of the University or the Chancellor of the Berkeley campus and these reports contain details of the annual operation of the Survey.

The purposes of the UCAS were varied. It was essentially a Departmental operation, and the salaried Archaeologist and Assistant Archaeologist were graduate or undergraduate students in the Department of Anthropology at Berkeley. The following list indicates persons who held these positions:

1948-49	Franklin Fenenga, Archaeologist Francis Riddell, Assistant Archaeologist
1949-50	Franklin Fenenga, Archaeologist Arnold Pilling, Assistant Archaeologist
1950-51	William J. Wallace, Archaeologist (July 1, 1950-Jan. 31, 1951) Clement Meighan, Archaeologist (Feb. 1, 1951-July 31) Donald Lathrap, Assistant Archaeologist
1951-52	Clement Meighan, Archaeologist Martin Baumhoff, Assistant Archaeologist
1952-53	James A. Bennyhoff, Archaeologist Albert B. Elsasser, Assistant Archaeologist
1953-54	James A. Bennyhoff, Archaeologist Albert B. Elsasser, Assistant Archaeologist
1954-55	James A. Bennyhoff, Archaeologist Albert B. Elsasser, Assistant Archaeologist
1955-56	Albert B. Elsasser, Archaeologist Francis A. Riddell, Assistant Archaeologist

* Heizer, R. F. 1949. Report to President Robert Gordon Sproul For the Year Ending June 30, 1949 of the California Archaeological Survey (6 pp., mimeographed).

- 1956-57 Albert B. Elsasser, Archaeologist
 Eduardo Contreras, Assistant Archaeologist
- 1957-58 Albert B. Elsasser, Archaeologist
 Jack E. Smith, Assistant Archaeologist
- 1958-59 Albert B. Elsasser, Archaeologist
 James T. Davis, Assistant Archaeologist
- 1959-60 Albert B. Elsasser, Archaeologist
 James T. Davis, Assistant Archaeologist
- 1960-61 Albert B. Elsasser, Archaeologist.

Research Associates who served without pay were also part of the staff of the UCAS. Dr. Adan E. Treganza served as Research Associate from July 1, 1953 to June 30, 1959. Dr. Sherburne F. Cook was Research Associate from July 1, 1955 to June 30, 1961. Dr. Alex D. Krieger held appointment as Research Associate from July 1, 1957 to June 30, 1959. Dr. Jay vonWerlhof was Research Associate from July 1, 1958 to June 30, 1959.

The UCAS was directed by Robert F. Heizer from July 1, 1948 to June 30, 1961. Paid half-or full-time secretarial assistance was provided by Mrs. Adra Long (1949-50), Mrs. Doreen Scott (1950-Feb. 21, 1955), Miss C. N. Gregoire and Mrs. A. Davis (Feb. 21, 1955-June 30, 1955) and Mrs. Edna Flood (July 1, 1955-June 30, 1961).

From 1948 to 1961 considerable amount of excavation and site reconnaissance was carried out by UCAS personnel or individuals working in active cooperation with the UCAS. This resulted in collections of artifacts and skeletal material catalogued and stored in the Lowie Museum of Anthropology; in the accumulation of a statewide file of archaeological sites; and in publication of results of research. Between 1948 and 1961 the UCAS deposited 71,247 archaeological specimens and 1,529 individual human skeletal remains in the Lowie Museum. A site file of about 10,000 sites in California and a file of ca.2,000 archaeological sites in Nevada was established. Between 1948 and 1961 the UCAS published 55 Reports (see list elsewhere in this publication) which aggregated 2,688 pages of text, 80 maps, 218 figures, 90 plates, 2 charts, 90 tables and 3 diagrams. The Reports are primarily papers detailing results of UCAS research. A file of about 10,000 black-and-white photographic negatives and about 3,000 kodachrome slides had been collected and catalogued, these dealing almost wholly with archaeology of Nevada and California. Between 1948 and 1961 an "archive" of 315 manuscripts was collected and catalogued. This archive is varied in its coverage and quality and consists of original field notes, maps, old manuscripts which have been published and which are mainly of historical interest. A catalogue of the manuscript collection (now numbering 442 items) is appended.

By 1960 the need for a Departmental archaeological program whose interests were purely local were much less than they had been in 1948. In part this was due to the considerable post-war development of archaeology and establishment of programs of local archaeology on a number of other University and State College campuses; in part the UCAS was not serving the academic interests of the Department of Anthropology which, by 1960, had six full time archaeologists on its staff, and none of these had an exclusive, or even main, interest in local prehistory. The request to reorganize the UCAS to become The Archaeological Research Facility (ARF) of the Department of Anthropology was approved and took effect on July 1, 1961.

Local archaeology on a reduced scale has continued after 1961, as has the maintenance of and addition to the California and Nevada archaeological site files. The salaried positions of Archaeologist and Assistant Archaeologist were abolished and paid personnel was limited to a full-time secretary. The Reports publications were maintained, and Nos. 56 to 74 were published between 1961 and 1968 when the series was discontinued. In 1965 a new publication series, Contributions of the Archaeological Research Facility, was instituted, and as of July 1, 1972, 14 issues have appeared. These comprise 1809 pages of text, 150 plates and 232 figures.

Beginning in 1969 another publication series was instituted by the ARF. No series name is assigned to these publications which are issued in a limited number, usually 200 copies. Titles issued to date listed in VIII above.

From July 1, 1961 to July 1, 1971 archaeological specimens numbering 32,707 have been catalogued and deposited in the Lowie Museum of Anthropology.

Printer's copy of all UCAS Reports and ARF Contributions have been saved and are stored in the ARF space in Hearst Gymnasium basement.

The California archaeological site file in the ARF contained on June 10, 1972, a total of 14,395 siterecords, and there remain on file but not yet incorporated into this file about 2,000 additional site record sheets. Each site is located on a USGS quadrangle sheet. Maps are bound separately by county and the Santa Barbara Channel Island maps are also bound in a separate volume. A duplicate of this map file, complete up to 1961, was deposited in the Anthropology Department at University of California, Davis.

The Archaeological Research Facility also supervises the C. Hart Merriam Collection of ethnographic data referring primarily to Indians of California. A catalogue of this collection has been published.* The Merriam Collection is stored in Hearst Gymnasium basement in 8 steel five-drawer filing cases.

* Catalogue of the C. Hart Merriam Collection of Data Concerning California Tribes and Other American Indians. Prepared by Robert F. Heizer with the assistance of Dennis Bailey, Marke Estis and Karen Nissen. 1969.

Anyone who wishes to learn the details of the year-by-year history of activities of the UCAS (1948-1961) and/or the ARF (1961-date) may do so by consulting the annual reports which are filed in the office of the Archaeological Research Facility and ARF manuscript No. 310. Also relevant in this regard is a brief article in American Antiquity (Vol. 14, No. 3, pp. 222-223, 1949) and Report No. 1 of the UCAS (1948). In addition there is a document of 1971 entitled "The Archaeological Research Facility of the Department of Anthropology: A Review of Its History, Present Operation and Future Plans" which was submitted to the Office of the Chancellor as background information for the Faculty Review Committee which in 1971-1972 evaluated the ARF for the Chancellor of the Berkeley campus.

The state of California as of 1972 still lacks the required single organization which maintains a statewide site record center and site master file. No real effort at establishing such a record center has been attempted, and the result of this failure to coordinate the efforts of local societies, museums and academic departments has been a wasteful duplication of work. Only when some central agency is established will we be able to determine how much we know and the extent to which we really understand the prehistory of California. No single greater need exists in California archaeology than the establishment of an adequately financed, staffed and housed agency whose purpose is to coordinate the work of all individuals and organizations interested in California's prehistoric past. Some suggestions as to how this might be accomplished are contained in a communication printed in the UCLA Archaeological Survey Newsletter No. 9, December, 1965. That discussion, now seven years old, is somewhat outdated, but we are no further along with the solution than we were seven years ago. But there are some hopeful signs. The Society for California Archaeology is a young and growing organization but it does not seem to have yet developed into an organization which attracts the active participation of professional archaeologists. It could, perhaps, become more effective if it could secure an institutional sponsor and publish a journal. The UCLA Archaeological Survey has done, and continues to do, an excellent job, and it is possible that this organization might be designated as the center for archaeological records for the southern part of the state if sufficient Legislature funds were provided. The northern part of the state could be handled by the State Resources Agency in Sacramento. Whatever the solution is, it seems that it had better be found soon. California's present population is now in excess of twenty million, and the destruction of the archaeological evidence continues at an every accelerating pace. We can never hope to recover the full story of man's history in California because so much of the evidence has been covered by modern settlement or destroyed in earth-moving operations. The real danger now is that for major portions of the state we may never learn more than we know at present.
