March 31st. marks the date when ARC will sponsor a public forum titled simply, "The Homosexual". The forum will be held in the Terrace Room of the First Methodist Church at 22nd and Jay Streets, 7:45 pm.

At the moment, thousands of programs are being printed for the forum and will be mailed to civic organizations, libraries, colleges, all forms of local news media, and public opinion leaders. It is hoped a turnout of 300 will take advantage of the special free meeting, a phase of the ARC Community Education Program which began late last year.

The forum marks the first of its kind in the Sacramento area, and comes at a time when public attitude should be optimistically in favor of an open discussion on the topic. The forum is being presented in an effort to educate the public as to the nature of homosexuality and to promote mutual understanding and acceptance between the homosexual and the heterosexual communities.

An impressive list of panelists has been compiled from the Sacramento area and covers every important phase in which homosexuality is generally considered. Among those represented, and the areas covered are: 1-Reverend John Moore, D.D., United Protestant Ministry, University of California at Davis. Rev. Moore will act as moderator. 2-Dr. Harry Aron, Ph.D. Psychology, Associate Professor of Psychology, Sacramento State College. 3-Frank B. Baldwin, III, L.L.M., Acting Associate Professor of Law, University of California at Davis. 4-Gordon Halberg, M.D., Vice-President, Institute for Transactional Analysis. 5-Larry Malngren, M.A. History, Instructor of Sociology, Sacramento City College. 6-Miss Diane Fraser, Student, Daughters of Bilitis (a female homophile organization).

Currently, a fund has been established to pay for advertising in the Sacramento Bee. It is hoped you will donate to help pay for the ad.

The forum will be open to local news media for coverage on radio, TV, and the newspapers.

In a nationally televised documentary, CBS will air a special hour-long study of homosexuality on its CBS Reports program, Tuesday, March 7 at 10 pm. Viewers in Sacramento may see the telecast on KXTV - channel ten.

The broadcast, produced by Harry Morgan, will include results of a national sampling of the public's attitude toward homosexuality conducted by National Research Corp., Princeton, N.J. CBS News Correspondent Mike Wallace is the reporter for the broadcast, written by Morgan and Wallace. Peter Davis is Associate Producer.

"The Homosexuals" is a study of a condition that, according to the broadcast, affects people who may not be as far removed or different from the majority as is commonly thought. Through individual interviews, the broadcast will introduce a cross-section of male homosexuals whose words will challenge common opinions and stereotypes. Those interviewed include a married father of two children, and four single men.
Psycho Annie is Proud She Voted for Reagan

The following article was written by one of the few who wish to use the by-line of "Psycho Annie," who is in the interest of those readers who share the opinion expressed by Psycho Annie. ARC News will gladly print rebuttals as we receive them.

California may well point with pride in the future to the day one is occurring under the leadership of Governor Reagan. We must commend Governor Reagan to partisan party politics. It is inconceivable that the negative philosophy and apathy in State, County, and city government as expressed by so many public officials and professional politicians will permit this man to tower above them for long. The image a positive government will reflect the public budget. Actual revenues, sensible programs to return responsibility for government to the people, and actual facts presented to the public are all in direct conflict with the philosophy of government which rigidly defines Republican and Democratic party politics.

Governor Reagan's philosophy is to return responsibility for government to the people, and actual facts presented to the public are all in direct conflict with the philosophy of government which rigidly defines Republican and Democratic party politics.

Dear David,

Just a brief line to say "thank you" for your hospitality of the past week. You and your family have been a great help to us. We hope you enjoyed your visit with us.

It's No Simple Choice to Create Your ARC News

If all issues of the ARC News were put together, they could form a 39-page newspaper to thumb through. Our paper is no more than five pages in length, but it is an important publication. Its contents range from articles on current events to columns written by students. The paper is published weekly and is available for free to all students on campus.

The homophile movement was recently criticized in a university-based student homophile organization. Known as Student Homophile League, the new-type group is operating at the University of California at Berkeley. The meeting is at the organization's headquarters, 1500 Shattuck Ave. The meeting is open to all students and will begin at 7:30 pm. The meeting will focus on the issues of discrimination and prejudice faced by homosexuals. The meeting is sponsored by the Student Homophile League and is free to all students on campus.

Jacquette's Offers New Boy-Girl Atmosphere

One of the most congenial crowds to be found on the campus is the one that turns out most any weekend night at Jacquette's. It's a mixed situation where both boys and girls are found. The atmosphere is relaxed and friendly. The music is light and enjoyable. The food is good, and the company is great. It's a place where one can really let loose and have a good time. Jacquette's is a popular spot for students looking for a fun night out.

Next ARC Meeting

The New Guilded Cage

420 Tyler St., Walnut Creek, Calif.
From the Malebag Comes...

Dear Editor:

In a recent issue, ARC News appealed for help in carrying out a research project on homosexuality being conducted by Emory University of Georgia. Could not ARC even more profitably seek ways and means of co-operating with the University of California, University of the Pacific, and Stanford University in a Northern California research project? (All the more appropriate if the one hundred miles or so around and behind the Golden Gate does indeed constitute a kind of 'Capital Region' of gay North America -- as some have claimed). Surely, the world's largest, oldest, chartered higher education institution, and one of the Western world's most distinguished community of scholars could at least match the quality of research and inspiration emanating from any institution in thehandle Georgia.

- an ARC member

Dear Member,

Should ARC be called upon to assist in a research project by one of the universities mentioned, we would do our all to help. Meanwhile, it is enlightening to notice ANY institution of higher education ANYWHERE conducting a research on homosexuality. California is rather "axhandle" in many respects, also!

Dear Editor:

It will be a free-for-all in our condemnation and destruction if the extreme rightist radicals are able to repeal California's liberalism and change this into a John Birch Society type "Police State" with sadistic "Minutemen" in charge.

The "Gastapo" actions that the police are doing against the homosexuals in Southern California cleverly distracts the homosexual from his even worse fate of reactionary laws they are trying to get passed at the State Capitol in Sacramento of allowing each community to have the pleasure of enforcing whatever sex-crime laws that they can get over. "After all, the morality of our American youth must be safeguarded at all cost."

A few years back, such laws were declared unconstitutional by the majority of the Justices on our California State Supreme Court, so that no community could add their own narrow-minded sex regulations and penalties as they had been doing.

But now, since these Reactionaries have already won most of this last election, they are spending millions more on their propaganda to get such liberal Judges out----and "Hate" laws in.

-D.S., San Francisco

Dear D.S.,

We tried to get the message across in a pre-election issue of ARC News, but to no avail. Meanwhile, you and I better pack our bags.
