LETTERS RECEIVED

21 December 1981

The Rt. Revd. David A. Williams, Mar Thoma Church of America in Berkeley, California

Dear Mr. Williams,

I am writing to you in response to your recent letter regarding the Konnekkottam of St. Thomas Christians. I would like to express my deep concern about the ongoing conflict and tension between the Konnekkottam and the other branches of the St. Thomas Christians.

I understand that the Konnekkottam has established its own leadership structure and is seeking recognition as a separate entity within the St. Thomas Christian community. However, I believe that it is important to maintain a united front and to work towards a solution that is acceptable to all parties involved.

As a member of the St. Thomas Christian community, I am committed to promoting peace and reconciliation. I urge both sides to engage in dialogue and to seek a mutually agreeable resolution to this matter.

Sincerely yours,

The N'TOUCH has been sold rumor has it and if true, it could only be for the better, but not for the workers who have been taken over by the same management. How often do we hear this expression from visitors and the newly arrived as they gasp with shock or pleasant surprise at something that is, in a sense, our own? In this case, it is our many social services called a variety of names, now all known as “HIV/AIDS”, that people dressed (and not so dressed) bring their tape-recorded resurrection to birthdays, proms, funerals, etc., and, as we tell yesterday’s story, save a dance, some singing, some drag. We have heard that the number of persons who die from hypothermia is far greater because... I'm going to study for the "cheese king" is next time he's in L.A. with GADS!

"Sure Spink - Robert Charrot • Kimo Cochran - Beau Dodsen - Tammy Lynn....

The number of homes without heat... seniors (the elderly) citizens will be hit hardest by the task and rights. The result will be death from hypothermia—below normal deep body temperatures.

The estimate is based on a study of 22 public utility companies in 22 states, and does not include households which use oil supplied by private fuel companies. Owners of large houses in New England are heated with oil, and private companies are not prohibited from cutting off customers, as the public utilities are in some states. So the number of households that will be without heat this winter will be even higher than these estimates.

Earlier this year, a coalition surveyed gay companies and determined that gas heating costs would rise at least 25%. Almost all of the 2.2 million households are heated by gas.

As the high cost of heating has increased, the recession has deepened and the Reagan administration has reduced the amount of money available for energy assistance to low-income families from $1.85 billion in 1981 to $1.75 billion in 1982.

According to the National Center for Health Statistics, about 700 persons died from hypothermia and excessive cold in 1979, the most recent year for which statistics are available. Air temperatures generally are much lower in winter, but the number of deaths has remained fairly steady. We have had many people ask us what our position on Poland and Solidarity was during the past several days. And we have, difficultly answering that question as we have been avoiding a position, due to the "cheering" for Solidarity by groups that are not in accord with the views of the Gay community. We would like to see and end to a Worker's State, i.e., Marxism. That, we would not like to see.

We sought advice from people with whom we work with whom are members of the People's Anti-War Mobilization (PAM) but, Poland was the same as Russia's military sent in to suppress the workers in Bulgaria in 1956. So, after long thought, and much reading on the matter, and consultation with others whom we have long felt close to, we have arrived at the conclusion that we would urge the Lesbian/Gay communities of San Francisco to be aware that the struggle by the working people of Poland and its imperialist allies from having an international field day of anti-Soviet communist propaganda. At the heart of this campaign has been the economic downturn in the capitalist countries.

The goal of the struggle of the workers has been for a total change in the country is ruled from top to bottom. To achieve this, the workers in Poland have resorted to the factories, railways, hospitals, large manufacturing plants, the mines and farms. It is aimed at eliminating the invasive privileges and inequality that undermine efficiency and productivity of the workers.

The factories, railways, hospitals, large manufacturing plants, the mines and farms are all owned by the people, not money-grubbing corporations. The capitalist class has been expropriated by the workers, therefore, the task of rebuilding the economic foundations of society.

The workers in Poland are fighting for a shorter workweek and higher pay. They have insisted on the right to control over economic, social, and political life. It is aimed at eliminating the bureaucratic privilege and inequality that undermine efficiency and productivity of the workers.
