SEIU Endorses Gay Rights

Washington, DC — Gay Rights National Lobby (GRNL) announced today that the national Executive Board of the Service Employees International Union (SEIU) has taken an official position supporting civil rights legislation for lesbians and gay men. The SEIU, which has more than 800,000 members nationwide, is the seventh largest union in the AFL-CIO.

This endorsement follows on the heels of a similar and precedent-setting resolution passed in June 1982 by the American Federation of State, County, and Municipal Employees (AFSCME).

The SEIU resolution "supports and urges the enactment of legislation at the federal, state, and local levels that would guarantee the civil rights of all persons without regard to sexual orientation in employment, housing, credit, public accommodations, and public services." It begins last spring. And I’d like to extend special thanks to David Cervantes of SEIU in Seattle for all his help and advice."

Congressional observers agree that increasing support from organized labor, coupled with initiatives in the religious, minority, and business communities, should continue GRNL’s strategy of demonstrating that gay civil rights is a "mainstream" issue. This should affect positively the growth of co-sponsorship for the federal gay and lesbian civil rights bill and increase opposition to the Radical Right’s anti-gay bills and amendments.

San Francisco (IGNA) The mayor of San Francisco must stand for election on April 26 because of a recall measure signed by some 35,000 disgruntled San Franciscans. Ostensibly the reason for the recall is a petition circulated by the White Panther Party, a pro-gun group, which was incensed by Mayor Diane Feinstein’s push for a gun-control law in the city. (The law passed but was later declared invalid by the state’s, not the city’s, legislative jurisdiction.) The mayor and many others feel that it was numerous Gay voters who signed the recall petition not because of gun control, but because of anger over the mayor’s rejection of a proposed spousal benefits bill for Gays and other non-married couples.

The White Panthers appeared in the Castro District soon after the vote of the recall measure measure and quickly gathered more than the necessary number of signatures (18,000).

The Gay community is divided in how to vote in the special election, only seven months before the regular November election. Some feel that Gays should vote against Feinstein because she has shown condescension toward Gays and their lifestyles. Others feel that this mayor is more sympathetic and liberal than several of the other politicians who might move into power should Feinstein be ousted.

"... an historic alliance is being formed between organized labor and the gay community.

Tennessee Williams murdered, says brother

Tennessee Williams, the American playwright whose work includes "A Streetcar Named Desire," "Cat on a Hot Tin Roof" and "The Glass Menagerie," was killed March 10, 1983, in a Chicago hotel room. Williams, 80, had been found dead in his room in a high-rise hotel in the Loop, according to Tom O'Hara, a police spokesman. "This is a very serious matter," O'Hara said. "We're not making a great deal of comment at this time, but we are looking into this matter." The cause of death has not been determined.

Women of Achievement

Santa Clara County feminists and political supporters gathered March 31 for the Women of Achievement dinner to support the San Jose Women's Coalition's effort to elect a slate of women to the San Jose City Council. The event was hosted by the San Jose City Councilwomen, who are working toward increasing the number of women on the council.

They have been very receptive to the information we've put out, but I do need to emphasize that AIDS is affecting us all, and that we all need to take responsibility for the epidemic. In August of 1981 the Health Department stated that heterosexual couples were also at risk of contracting AIDS.

I also have great anger personally at the politics involved in this epidemic. The women's community needs to know that we can and must do something about this. The women's community needs to take action now.

But these people are not others; they are human beings to something that is so "rare" a disease. And that is one response to disease and dying: to deny it. If that's not a possibility, it leaves me feeling very sad at even the possibility of the loss of some of the kind of portrait that is painted of these people as "victims." And that is one response to disease and dying: to deny it. The key to preventing the spread of AIDS is to increase awareness among the general public of the risks associated with the disease. We need to educate people about how to protect themselves from exposure to the virus. We need to let them know that they can take steps to reduce their risk of contracting AIDS.

The role we play in this effort is very important. We need to be able to deal with it. I feel that I should be able to make some kind of contribution to get rid of the problem. That's not a possibility. It leaves me feeling very sad at even the possibility of the loss of some of the kind of portrait that is painted of these people as "victims."

TANK FORCE SUPPORT
(A copy of the following letter was submitted to Our Paper by the San Francisco Human Rights Commission.

Monsignor Peter Armstrong, Chairperson, San Francisco Human Rights Commission

Dear Mrs. Armstrong and Members of the Community:

We, the Lesbians/Gay Advisory Committee of the San Francisco Human Rights Commission, have been closely following the work of the Commission on Social Justice and its Task Force on Lesbian and Gay issues. We strongly support the work of the Commission and its Task Force and we commend their recommendations as a working document toward ongoing dialogue. The report is of great significance in addressing the social issues of Lesbian/Gay concerns, both within and without the Church. We believe that the Commission has completed its task but that the Task Force will be needed to continue and will not be dissolved and relegated to the periphery. We understand that the Province Senate currently has a Task Force on "Sexual Orientation" and we hope that this Task Force will be able to adequately address the issues and for its maximal credibility, every effort should be made to collaborate with the Gay/Lesbian Task Force and the San Francisco Human Rights Commission. San Francisco, May 23rd, 1983.

Sincerely, Jackie Nowak Chief Male Chair Gay/Lesbian Commission.

Anti-Gay Election Smears

by Lindsey Taylor

The campaign in the recent election for the Labour seat of South Asia has been described as the dirtiest in the history of the India-Pakistan conflict. It was largely a campaign by both press and Parliament.

The campaign, which was the victim of hate speech and violent attacks, had a Catholic population, had a working class area with a high Labour seat in London. The Labour Party wins the next election.

"How Do They Know?"
By Peter Harrison

Boy you've got to hand it to the fundamentalists. They can quote the Bible for any occasion that comes up, and always to their advantage. Give Jerry Falwell a chance, and he can find a way to justify increased spending for the Pentagon and deem social workers as sinners with the same justification. What bothers me is, how can they be sure about which verses to quote? I mean, with all those books and chapters and verses, how can they possibly follow and choose the ones they want to ignore? It seems like their favorite section in the third book of the Bible. They have to quote chapter 20, which deals with male sex "detestable," things from the way that they do not care for or sound "unchaste." Jerry may not be as keen on English as I am, but that sounds wrong to me. Maybe good Bible readers may be hearnessed by some alternatives. Locusts are permitted too. For one thing, no meat in the diet is prescribed. In the case of the third book of the Bible, they know? I mean, with all those verses, how can they be sure about which ones to ignore? It seems like their favorite section in the third book of the Bible. They have to quote chapter 20, which deals with male sex "detestable," things from the way that they do not care for or sound "unchaste."

A Person's Place Is In The Kitchen

For Gay people they present a unique opportunity. Too, go to a bar this year, and you'll look great. But what happens a few years down the road? There's this mysterious substance called melanin. The skin of our bodies is nourished by directly tanning the skin cells or in the tanning pool. Tanning is the natural ingredient that keeps skin supple and smooth; repeated drying causes it to lose its elasticity.

To be sure, the body has a defense system that can repair itself. But constant exposure to the sun until you achieve the right degree of "doneness." Then, there are the tanning salons which offer "incontrovertable evidence that tanning speeds the aging of the skin. It speeds the disintegration of cellular reproduction, giving first the appearance of age, then advancing more serious conditions. One of the first things is that it was actually helping their system, but for the most part, research results are sheer medical speculation.

By Pat Wayne

Our grandparents were lucky about food in one respect; they couldn't get a lot of vitamins because they didn't have much of anything to eat at times, and the vitamines that they served on their tables marked the classes of food that they served on their tables. Then, there was a kind of natural resistance to the sun that gave us a certain amount of protection.

But constant exposure to the sun is now a more effective, and sometimes dangerous. With the introduction of sunscreen products that give instant protection, it's now easier and cheaper than ever to tan. There are preparations that give instant protection, and they tend to shade normal working hours, leaving the user parched and bleached unless he or she is conscious of the consequences.

You won't be ripped off with any of these products or processes, as long as you know what you're getting into. Read directions and caution on any label; they have to be by law.

But if you're determined to get a tan line, you should at least try: 1) The old (and new) idea of applying suntan lotion to your face, but still may actually speed up the process of aging by allowing you to get more of it now, you'll be subject to a basal metabolism.

Keep an eye on your skin, not only for the golden glow that you may be trying to achieve or any redness that occurs later. But constant exposure to the sun is now a more effective, and sometimes dangerous. Only a few people wind up living as long as the average American. They tend to shade normal working hours, leaving the user parched and bleached unless he or she is conscious of the consequences.

And, above all, take note of any skin changes that occur in the form of redness, irritation, or swelling.

But constant exposure to the sun is now a more effective, and sometimes dangerous. Only a few people wind up living as long as the average American. They tend to shade normal working hours, leaving the user parched and bleached unless he or she is conscious of the consequences.

Because of a change in the tax laws, all Americans can open open such tax-deferred retirement accounts. And, they'll enjoy greater tax breaks because they are deposited on a tax-deductible basis into the accounts.

You can set up an IRA even if you're already covered by a company plan. The reason is that contributions to an IRA are made pre-tax and taxes are paid at retirement. Even if you don't want to set up one IRA, you can make any voluntary payments into the company pension plan, up to certain limits, and shelter income from taxes. As an individual, affording medical insurance, you can't set up an IRA if your income is high. In effect, if you keep money out after you turn 70-1/2, however, you may end up with less income in your golden years.

Harvard Gays vs. Navy

Cambridge, MA (IGNA) A group of Harvard University students has asked the U.S. Navy to desist from its "Family Day Marching Band" by the San Francisco Gay Free Press, according to the student association's relations officer. Pat Norman.

The perception of the gay community is inaccu-
rate. They forget that we are human beings, that we work every day, that we wash dishes, that we love. We're pictured as machines that don't do anything but think all the time. That's their major focus.

I'm not sure that these people have any understanding of the impact that they have on the gay and straight communities. I don't think they know the psychology of communication, nor do they care. I don't think they are committed to responsible, accurate coverage.

What I've seen as headlines are such things as, "Straight Couples Affected By Gay Plague."
