AN AUCTION FOR LIFE

Friday, May 5, 1990
The Green Room
401 Van Ness Avenue
San Francisco

HONORARY CO-CHAIRS
Congresswoman Nancy Pelosi
Congressman David Obey
Mayor Art Agnos
Michaela Gomes

5:30-7:00 p.m. Buffet and Preview 7:00 p.m. Auction

Mistress of Ceremonies • Gail Wilson
Auctioneer • Denise Roche Boxer
Mayor Art Agnos
Catherine Streamer, Hospice Nurse

Tickets: $25 per person (tax-deductible) are available in advance by issuing an Auction for life. Tickets will also be available at the door of the event at night.

The San Francisco AIDS Foundation is an independent, non-profit, educational, service organization that provides programs and information on AIDS to the public. The foundation's mission is to educate the public about AIDS, to provide health care for the chronically ill, and to support research in the field of AIDS.

2 BAY TIMES MAY 1990
TO ALL GAY AND BISEXUAL MEN WHO HAVE NOT TAKEN THE HIV ANTIBODY TEST:

THINK ABOUT IT.

Seriously Consider Voluntary, Anonymous Testing.

Testing takes a different meaning than it did in the past. Take another look at antibody testing and the crucial difference it could make.

Earlier is better.

If you test positive, you have medical options today not available in the past. Take another look at antibody testing and the crucial difference it could make.

Under a doctor’s care, you can evaluate your health with additional tests. One of these tests, the "T-helper cell count," can give your doctor a good idea of how well your immune system is working.

If your T-helper cell count falls too low, you are at risk of developing Pneumocystis carinii pneumonia (PCP), which is one of the most common and life-threatening complications of AIDS. Preventative treatment can slow or prevent PCP.

Taketherelative risks of these tests, the "T-helper cell count," can give your doctor a good idea of how well your immune system is working.

Under a doctor’s care, you can evaluate your health with additional tests. One of these tests, the "T-helper cell count," can give your doctor a good idea of how well your immune system is working.

TO A ll GAY AND BISEXUAL MEN WHO HAVE NOT TAKEN THE HIV ANTIBODY TEST:

THINK ABOUT IT.

Seriously Consider Voluntary, Anonymous Testing.

Infections can be detected earlier. If you get treated earlier, you may be able to slow or prevent illness. You and your doctor can discuss AZT. Experimental drug trials are also available.

If you are infected, these choices are open to you.

Fear can be overcome.

We have a strong community with health care and legal professionals who can help you work through your concerns about getting tested. Your friends and the community will support you.

Testing is a start.

The HIV antibody test only shows whether you're infected with HIV. But studies show that those who are infected are more likely to become sick the longer that you are infected. Think about the test. You can learn now to gather information and make a well-informed decision that's best for you.

In Concert Against AIDS

In what could be the single largest AIDS fundraiser ever, In Concert Against AIDS will present a week long series of events high-lited by performances of San Francisco’s San Francisco Symphony under the baton of conductor Michael Tilson Thomas. The symphony will play the world premiere of a new piece by Randi Kagan, a composer known for her work with the Gay Men’s Chorus of San Francisco. Other events will include a benefit dinner and auction on May 13 at the Fairmont Hotel, a jazz concert at Buena Vista Park on May 14, and a symposium on May 23 at the Warfield Theatre. All proceeds will be distributed by Northern California Grantmakers AIDS Crisis Fund, which is part of the UC Regents’ AIDS Research Program.

The Art Against AIDS campaign in San Francisco offers a variety of events to choose from. There’s an exhibition of 30 AIDS-related works on May 13 at the Butterfield and Butterfield, a benefit concert on May 15 at the Warfield, and a benefit dinner on May 23 at the Hyatt Regency. The proceeds will go to the San Francisco AIDS Foundation, and will reach a large and diverse audience.

Art Against AIDS also has pulled together a calendar of performance events to benefit AIDS research and education. The series includes performances by some of the best artists and performers in San Francisco, and will be directed by San Francisco’s Art Against AIDS fundraising event takes place on a much smaller financial scale than the events at Butterfield and Butterfield, the corporation-funded public art project, or Elizabeth Taylor’s $1,000 a cocktail evenings, but is no less important, and shows a great deal of involved concern on the part of San Francisco’s artists. Performers include the Kronos Quartet, Anna Halprin and the STEPS Theatre Company, Pat Califia, Waiyde Fair, Niki Shelbi, Karin Eppierlein, Naomi Bustamonte and me.

In the commercial world, absolute secrecy around new products is nothing unusual, observes Smith, legislative counsel for the Human Rights Campaign Fund in Washington, D.C. "When drugs are under development, or in trial, the sponsor or the patent holder does not want competitors to know what they are working on or people may be able to come up with a copy, or may even begin to shape it." Patent attorneys contacted by the Bay Area newspaper's law enforcement. "The misuse of goodwill in the patent, regulatory context," said attorney Vittorio Zambon of San Francisco. "In the commercial context, we see a serious problem of withholding rather than releasing information." Smith points out that information about the drug was expected to be released at any time in the next two years, and when the approval was granted he was more than happy to go public. He says the two year delay was simply a means of keeping from the public the information that it would be in the public good to do so.

The universities have made a pact with the devil, and they have made a deal with crass commercialism," declared Art Levin. "I think there are community which participates in that. In the commercial world, absolute secrecy around new products is nothing unusual, observes Smith, legislative counsel for the Human Rights Campaign Fund in Washington, D.C. **Attention Gay Smart Shoppers!**

**Healing Alternatives Foundation**

Empowerment to PWAs

BLACK FRIDAYS

The Healing Alternatives Foundation is looking for people all over the world who would like to help PWAs. PWAs are people with HIV and other immune dysfunctions. They need sources of good quality AL-721 at the best possible price. They have become a cooperative buyers club to obtain a full range of herbs, vitamins, and supplements that are normally hard to get or expensive. In January of 1988 the Foundation moved into a Church Street flat near Market which they shared with the Healing Alternatives Foundation. They now have over 1,500 members contributing to and using the library, where one of the main goals of the Foundation is to educate PWAs about alternative therapies. In systematic but impassioned fashion, Dr. Prim discussed the implications of crack use for the spread of AIDS. Grade smoking often leads to sex with multiple partners. This activity, risky in itself, has sparked dramatic increases in rates of sexually transmitted diseases, STDs, particularly syphilis, in turn greatly increasing the chances of HIV infection. Adding crack to the AIDS epidemic could be like pouring gasoline on a fire. "AB one of us do not fully understand the kind of discipline that would carry Sally Field back to a career. But this one thing is certain: if the crack industry could agree to try Flamin' Tablo in Flamin' Tablo, then the price would be right. If it doesn't work, then our price is right."

**Do you know where to get a great deal on vitamins, minerals, and supplements?**

The Buyers' Club is one important aspect to the Healing Alternatives Foundation, but HAF also develops and maintains a library. They make sure that the tax is already included in the price. (Also I suspect that upon reading this, HAF is collecting data on alternative therapies."

offers events - large and small, social and professional - throughout the Bay Area all year round. Join us in May to connect with the women who will make the 90's gay!
Stress Fractures the 11th Nat’l Lesbian/Gay Health Conference
Whose Conference Is It, Anyway?

BY THE NATION

C

UNITED STATES: As the conclusion of the 19th biannual Lesbian/Gay Health Conference held in San Francisco this week, a conference organizer said that the sense of "peoplepower, ofwhelming numbers, of the sheer power of the people present" was apparent in the weeklong gathering. This conference, one of the largest gay/lesbian conferences in the world, was notable for its broad range of issues, from AIDS to gender identity to the meaning of personal freedom. It was also notable for the absence of many of the usual gay rights activists who had been present in previous years.

In addition to the usual suspects, there were many new faces at this year’s conference. Women were conspicuous by their absence, particularly women of color. "There were no women at the conference," said a delegate from the Midwest. "And women of color were invisible."

"We need to do more to involve women," said a delegate from the East Coast. "But we can’t ignore the men either."

"It’s been a long time since we had a conference like this," said a delegate from the West Coast. "People are hungry for new ideas and new perspectives."

"I think we need to focus more on the issues that affect all of us," said a delegate from the South. "We can’t afford to ignore any of the issues that affect our lives."

"It’s important to remember that we are all part of the same community," said a delegate from the Midwest. "We need to work together to make our lives better."
**AIDS TREATMENT NEWS**

**What If They Found A Cure? The Drug Trials Debacle**

T
oday the news is better than ever on AIDS treatments. But even the good news cannot spin a tale of success for a condition that has claimed millions of lives and continues to devastate millions more. Many people believe that the commercial pressures of capitalism are driving drug research and development as fast as it can safely go. In fact, even today the AIDS market is considered too small to be very profitable. Companies are better off waiting for this market to expand.

Many believe that the commercial pressures of capitalism are driving drug research and development as fast as it can safely go. In fact, even today the AIDS market is considered too small to be very profitable. Companies are better off waiting for this market to expand.

**Compound Q (GL223)**

In the last few weeks a potential AIDS treatment has appeared on the horizon. It promised to revolutionize public and scientific opinion. The compound, known as Compound Q, was a small molecule that showed promise in early stages of development. It had the potential to reverse the progression of HIV infection in human cells in vitro and in animal models. The compound was shown to inhibit the replication of HIV-1 and to reduce the number of HIV-positive cells in infected cultures. It was also shown to lower the viral load in infected cells and to increase the number of CD4+ T cells.

The preliminary results of the clinical trials were presented at the Fourth International Conference on AIDS in Washington, D.C., in 1988. The studies had shown that Compound Q was effective in reducing the number of HIV-positive cells and in increasing the number of CD4+ T cells. The compound was also shown to be safe and well tolerated by the patients.

**Estimating Unnecessary Deaths**

A Mathematical Model

AIDS deaths are the result of a complex interaction between the virus and the immune system. In order to estimate the number of unnecessary deaths, a mathematical model was developed. The model takes into account the progression of HIV infection and the effectiveness of the treatments available.

The model assumes that the progression of HIV infection follows a geometric progression, which means that the number of deaths increases by a constant factor over time. The factor is determined by the rate of progression of the disease. The model also takes into account the effectiveness of the treatments available. The treatment effectiveness is determined by the proportion of patients who are cured or who have a significant reduction in the viral load.

The model shows that the number of unnecessary deaths is the difference between the actual number of deaths and the number of deaths that would have occurred in the absence of treatments. The model also shows that the number of unnecessary deaths increases with the rate of progression of the disease and with the effectiveness of the treatments available.

**Tested Positive? Been Diagnosed?**

Become a part of The Healing Alternatives Foundation's Buyer's Club for people taking charge of their health!

We Offer—

• Latest discounted quality vitamins, minerals, herbs, nutritional products & more!

Come, patients and physicians must decide what options are available, what criteria will be used to select treatments, and what position will be taken once decisions are made if and when the expected results are not observed.

**AIDS Research**

The story of the compound has also been examined from the perspective of scientists who believe that it is too early to make definitive claims about its potential. They argue that more research is needed before the compound can be considered a cure. They also note that the results of the clinical trials were not conclusive and that more studies are needed to confirm the effectiveness of the treatment.

We're Proud that Maureen O'Neil is on Mount Zon's Staff

"My work is providing psychologicai and support services to HIV patients evolved from my background of hospice work with cancer patients. I chose this work out of personal and professional commitment to our community and the belief that the psychosocial needs of people with HIV are just as important as their medical needs. I assist these affected by HIV with psychiatric support and with practical issues such as insurance benefits, entitlement programs and referrals to community resources. I'm also privileged to coordinate the activities of a dedicated group of volunteers."

For more information about our HIV clinic and other services, or if you want a referral to a private physician, call Barbara Walker, RN, our physician referral coordinator.

EACH

415/346-2336

BY VIRGINIA A. BROWNSWORTH

The Supreme Court

he day began with demonstrations outside the U.S. Supreme Court building. Several hundred women and men carried placards that read, "Let the women have their day in court," and "We must keep the Woman's Right to Choose, Roe v. Wade." The demonstrations were the result of the Supreme Court's decision to hear the case of Webster v. Reproductive Health Services.

At issue was the most defining test of the legality of abortion rights in America to date; Roe having been heard in two lower courts, both of which sided with Reproductive Health Services. Attorney General of Missouri, John Ashcroft, took the stand to argue that Webster's decision should be left intact, while Attorney General of California, Dan Lungren, argued that Webster should be overturned.

Justice Antonin Scalia, who has never voted on an abortion case before, but who has been noted as a strong advocate of Roe v. Wade, joined the debate. Scalia is a strong advocate of the Court's decision in Roe v. Wade, and he is expected to rule in favor of the state of Missouri.

The Supreme Court's decision in Roe v. Wade was based on the finding that abortion is a fundamental right under the Constitution. The Court ruled that the right to privacy includes the right of women to make decisions about whether to have an abortion.

The Court's decision in Webster v. Reproductive Health Services will be closely watched by both sides of the debate. The decision is expected to be announced in June 1992.

baptized, the Christians' merciful god will hurl it into the flames of hell and it will be damned forever. In 1884, Pius IX declared that abortion was a "moral offense and that anyone guilty of being associated with abortion is to be excommunicated."

Therefore, the church's doctrine is that there is a god? Of course not, they are just not as irrational in their religious beliefs. The church has come under much criticism in recent years for its stance on abortion.

The other subjects are Provenim foundations. Foundations that are in line with the church's beliefs are supported and those that are not are not. The church uses its wealth and influence to support its beliefs and to pressure others to conform. This is one of the reasons why the church's influence is so powerful. The church's money and power can buy votes and influence legislation, which can then be used to further the church's goals.

The Month of May

As we know May is the month for love and light. And you should.

The Sun is in the signs of Gemini and Cancer. The Moon isn’t it? But the May Moon is cessation of wrap- ping and a goal is indeed derived from a strong, light feminine stance. A month that follows the Sun from nearby Earth. The Sun to intro- duction to the signs are playing a sleepy game with each other. And you may know May is the ‘War Goddess.’

Actually, May is about the evaluation of energy. When hormones were done away with or the Sun became a light shiningredient. This is the month that you need to be sure to use more as an indi­

cator of physical assertiveness and the need to raise the tone of things. Speaking of hormones, more is a great gift. So, you may need to use more as an indication for physical exercise, meandering, and work. The tone of hormones is healing. When such matters are forewarned, what do we get? That right, angry. Then Mars is again the War Goddess and shows how we act our anger. As an indicator of physical assertiveness, and the need to raise the tone of things.

In a more sexist society, indeed, it represents the processes she is forced to suppress and would seek out. The more assertive she is, the more she acts out her own Mars just fine. Going through Cancer, the sign of motherhood. Mars will be a busy planet for lots of

It contains various topics including music, comedy, and social issues, with some personal reflections and interviews. Without more context, it's challenging to provide a coherent natural text representation.
A View from the Bridge

Arthur Miller’s 1955 psycho-social drama about a Brooklyn longshoreman and his wife’s betrayal

Eddie is a Brooklyn longshoreman whose life is turned upside down when his wife, Beatrice, seduces his brother-in-law, Peter. Eddie is distraught and feels betrayed, and his sense of loyalty to his family and community is shaken. The play explores themes of honor, loyalty, and the consequences of betrayal.

The play opens as Beatrice returns home late one night, and Eddie confronts her about what happened. Beatrice explains that she and Peter had fallen in love, and that they had to act on their feelings.

Eddie is angry and feels betrayed. He confronts his brother-in-law and accuses him of being a traitor to the family. The tension builds as the play progresses, and the characters are forced to confront their deepest fears and desires.

The play ends with Eddie confiding in his sister, Beatrice, about his plan to confront his brother-in-law and get revenge for his betrayal. The play raises questions about honor, loyalty, and the consequences of betrayal in a community that values tradition and family above all else.

The Balcony

The Balcony is a 1966 French play by Jean Genet, a renowned dramatist and novelist. It is a dark and complex play that explores themes of power, desire, and the nature of reality.

The play is set in a brothel in a small town in France, and the action takes place over the course of a single night. The main character is Madame Irma, the proprietress of the brothel, who is known for her fierce intelligence and cunning.

The other characters are a group of young men who come to the brothel for a night of pleasure. They are drawn into a game of cat and mouse with Madame Irma, who exposes their darkest desires and most shameful secrets.

The play is a searing critique of the feudal society, and it is a masterpiece of modern theatre. It is a play that is both witty and dark, and it is a work that continues to be relevant and important today.
Nothing Sacred

REVIEWED BY GENE PRICE

Playwright George P. Walker has honestly approached the question of whether to produce his 1979 play Nothing Sacred in a new staging with a few changes of production, we are now presented with a familiar re-engagement of the play. It's a paradox of history that when the right setting, unlikely, suddenly becomes familiar, it's so easy to get too comfortable and too complacent.

A man, Aladdy (Sean Freema) returns to the scene of the father Michael (Willie Watson) in the company of his men, fellow workers and friends of his father, in the hope of finding out the truth of what happened to his father. And when he finally learns the truth from the father of his friend, the father of his friend, he realizes the truth in a more vivid and personal way than he ever could have expected.

Nothing Sacred is a play that deals with the theme of religious faith and its impact on the lives of the characters. The play explores the conflict between faith and reality, and the struggle for meaning and purpose in the face of suffering and mortality.

The cast is excellent, with standout performances by Sean Freema as Aladdy, and Willie Watson as the father. The production is directed by Stephen Lang, who has brought a fresh and dynamic approach to the play.

Overall, Nothing Sacred is a powerful and thought-provoking play that explores important themes in a sensitive and engaging way. It is strongly recommended for audiences who are interested in exploring the complexities of faith, religion, and the human condition.
PEGGY LEE, THE LEGEND LIVES
Songwriter Peggy Lee has just come upon her 70th birthday. From a 1919 embryonic figure on the San Francisco Bay to a seasoned musician who is ready for an award, to humanitarian citations from both the British Columbia and the Head West. She deserves them all... and more. She also stood up for the San Francisco Bay in the 1960s and also for natural living—a living that includes Lou Christie.

But the remarkable thing about Peggy Lee is her ability to do oneTP at a time. She's been majorly busy. She's been on the road more than ever, better than she was two years ago. She's made four albums, and she's been on the road with a capital "B," she's done a mini with Miss Peggy Lee in London. Her partner's latest by the Yossarian's, she says, "I Won't Dance." Her

with an intensity of feeling as though she were reliving moments from a century ago. In the room, then from the oldies but goodies, Peggy Lee sang many of her two dozen career-spanning hits. She started with "Your Golden Hair," then moved on to "Bye Bye Baby." Her voice was unmarred by time, and her tempo was deft. She then sang "When the Sun Comes Up," a song she had recorded in the early 1960s. Her delivery was more relaxed, and her voice held more emotion. She then sang "I Remember," a song she had recorded in the mid-1960s. Her delivery was more relaxed, and her voice held more emotion.

I'm a Lover," a song she had recorded in the early 1960s. Her delivery was more relaxed, and her voice held more emotion. She then sang "I Remember," a song she had recorded in the mid-1960s. Her delivery was more relaxed, and her voice held more emotion. She then sang "I Remember," a song she had recorded in the mid-1960s. Her delivery was more relaxed, and her voice held more emotion. The Bar Stories
by Nina Donnelly
St. Martin's Press, 1989, 356 pps., $17.95
REVIEWED BY MANCY TUCKER

T he Bar Stories, a first novel by Nina Donnelly, residents of California, California is a treatise on the theory that
"the most important thing in the lives of women is demonstrating that they are not like men, that they are making love to
each other with the same technical awareness and pleasure that men are making love to women.

She brings into her story a series of uncompleted relationships that are struggling to maintain a balance between the
women's need to learn from each other and the men's need to be taught by the women. In between these stories, Donnelly
shows us characters with insightful humor and compassion. These characters come with sexual, social and emotional
histories. Donnelly does not see the girlfriends as a list of names and attributes, but as human beings who live their own lives
and have their own secrets. We follow them through their ups and downs, their triumphs and failures, their joys and sorrows.

She also shows us that the women who come into these stories are not simply sexual beings. They are also human beings
who have feelings and emotions, who have to deal with the same problems that all women have to deal with. They have
to learn from each other, to learn how to love, how to be loved, how to make love, how to live.

Donnelly's characters are complicated, multi-dimensional beings who are always in a state of change. They are always
learning, always growing. They are always discovering new things about themselves and each other. They are always
struggling, always fighting, always winning. They are always beautiful, always sexy, always loving.

The Bar Stories is a novel that is not only about sex, but also about love, about life, about death. It is a novel that is not
only about the women who are in it, but also about the men who are in it. It is a novel that is not only about the
present, but also about the past. It is a novel that is not only about the characters who are in it, but also about the
people who are in it.

The Bar Stories is a novel that is not only about the women who are in it, but also about the men who are in it. It is a novel
that is not only about the present, but also about the past. It is a novel that is not only about the characters who are in it,
but also about the people who are in it.

the complexity of AIDS and the fact that current medical therapies are not as yet cures, some AIDS patients, however, are more out of this rather long essay. Sontag is consummately insightful, knowledgeable and is able to draw on considerable reading and research into various illnesses. She doesn’t, however, break much new ground in the book. Though she does provide new details about AIDS. Still, she is a calm, clear voice of reason fighting the good fight against the megalomania of AIDS-speak.

REVIEWED BY RANDY TURFF

She Came In A Flash

By Larry Kramer

New American Library, 1989, $17.95

May Wings started out as an under­ground lesbian cartoonist here in California and then moved to Amsterdam where she started doing comic strips. Through a series of political cartoons, three short stories, and a comic book, she has won a reputation as one of the most influential cartoonists of the gay community. She has also written and illustrated several books, including The Cat and the Dog: A Love Story, published in San Francisco. Harvey Milk had just been slain and the San Francisco gay community had publicly displayed their grief and anger in the streets. But in NYC there were no demonstrations. No organized response was mounted. Kramer missed “very much, the political unknown.”

The first part of the book documents Kramer’s vituperative, often foul-mouthed rhetoric against the media during the early years of the epidemic. He quotes Mario Cuomo, then New York’s Lieutenant Governor, saying that “until homosexuals organized, the nation will not organize.” Kramer’s anger is directed at the media, and not the gay community itself. He writes, “I want to talk to you about power.” Kramer starts to take on the very organization he helped found. What he fails to point out is that GMHC, is a bureaucratic, bureaucratized, and moved too slowly. He learns that “there is little any one individual can do to control or affect public policy.”

Kramer is a survivor of the gay minority over the years by societal “values” and laws. Denied the right to marry, to pass on property to those they love, gay community members are forced to take care of themselves and one another. Kramer uses excerpts from the European gay press to validate his point that he is not just a political activist, but one who is willing to accept responsibility. He is an important voice for the gay community, and his writing is a reflection of his commitment to the cause.

Thus, even though the last chapter of the book is a personal essay, Kramer is able to relate his own struggles to the larger struggles of the gay community. He writes, “I want to talk to you about power.” Kramer starts to take on the very organization he helped found. What he fails to point out is that GMHC, is a bureaucratic, bureaucratized, and moved too slowly. He learns that “there is little any one individual can do to control or affect public policy.”

Kramer is a survivor of the gay minority over the years by societal “values” and laws. Denied the right to marry, to pass on property to those they love, gay community members are forced to take care of themselves and one another. Kramer uses excerpts from the European gay press to validate his point that he is not just a political activist, but one who is willing to accept responsibility. He is an important voice for the gay community, and his writing is a reflection of his commitment to the cause.
"What are the main lessons I have learned? One is this: I no longer believe America is a country where one voice can make any difference. Is tarter, in 1981, believing it could... I can see why certain things aren't happening anymore... But as Arendt points out, Zionism was always a place on earth's surface, not to be neglected. In any case, much of the material in this essay deserves mention, as does some of the material in Kramer's original essay. Arendt declared that "we are still at just such a juncture today... " she said. "The words..."" the notion that "one moral judgment can..."" but Arendt's long essay..."

"Talking about the lessons the Jews learned from World War II, Feldman says what Arendt was trying to do... The realization that millions of Jews..." Feldman writes..."

"I am not writing to Mme asking "What is the correct course of action in the world..." But there is no denying his valuable and singular contribution to stopping AIDS now. He is trying to "solve the root...""

"It is an electronic message service designed..."

WHAT IS IT?
• It is an electronic message service designed to introduce people with the same interests to each other.

HOW DOES IT WORK?
• From a touch-tone phone, dial 976-2002.
• Follow the directions to select the type of messages that interest you.
• Choose to listen and you will hear six different voices, no one would be favoring them. ' ' ' ' Perhaps,' ''Kramer replies, ' but not pro-

"Perhaps," Kramer replies, "but not pro-

The realization that millions of Jews..." Feldman..." is the System, being the 'good little boys' we were brought up to be, helping to kill our..."

"There are some here in Kramer's..." He is not concerned with any of these..."

The Sisters of Perpetual Indulgence, Inc. had a 10th Anniversary Party that you would

REMEMBER THE DAY when you were a child and you first dreamed of being in love, working together, and through their love and work supporting our community. They created a restaurant right in the heart of the Castro with good food and an excellent staff. With both

The Vapours.

The Godfather Service Fund is in jeopardy. As soon as the supplies arrive from the factories they are sent to the hospitals and new orders must be placed. This budget does not allocate funds for storage space.

In July the dreamed space from the Packaging

- Sundeck overlooking private beach
- A ll m ajor cre dit cards accepted
- 24 Henry Street • San Francisco
- In the w ine country
- 2 Bl ocks from Guerneville
- Camping— Including All Am enities

24 Henry Street • San Francisco (415) 864-5686

- Female impersonators in the City. Since the first show Tatiana (with the help of Andy Anderson, J.W. Sheffleld, Richard James, Larry Cook, Donald Peterckum, Lenny Berling and Kline) — with her guest bar and staff at Kline's has raised over $11,000.00 in one year and raised money within two days of the show, a record. At the end of the show, the almost 300 people would not let us work, but with the loss of friends and the support of the community — "This was their way to raise money.”

Thank you to Tatiana for all of her support to our community.

Kline is located at Polk and Pine, so take the time on the first Saturday and drop by and enjoy the show. The show is open to all women. Two other shows — one at 10p.m., one at midnight — and the cost is only $5.

What do people enjoy most? What else other than good food. Well, have I got the restaurant for you: Cafe Lupann's. Tom Kemmeriy (left) and Curtis Pierce at the bar at Lupann's.

MOM AND OTHER MAIZORIENTED 

BEAT THIS...

(continued from page 41)

...as a matter of fact, the famous sex scandals of the 1950s were triggered by the rise of the gasoline stations. In the heyday of drive-ins, the saying was, "When you see a car, you see a woman." The same thing is true today, as we can see from the Gas Station of Eden, where the "Stations of the Cross" are depicted in full color on the walls. The "Crossroads of the Apocalypse" are also illustrated, showing the various ways in which the world is being destroyed. The "Station of the Ascension" shows the final triumph of humanity over their own愚蠢ness, and the "Station of the Transfiguration" depicts the return of Jesus to his mother, Mary, after being lost for 33 years in Europe and finally making his way back to the United States. In this record, Mary Alidad's performance proves that she is not only a talented singer, but also a skilled actress. Her depiction of Mary is so realistic that we can almost see her face. In the "Station of the Condemnation," when Jesus is led into a Viaggio Chapel and sentenced to death, he is so convincing that we can almost hear his cries of "Father, forgive them." In the "Station of the Empty Tomb," when Jesus is found to be alive, his vitality is so overwhelming that we can almost feel his touch. In the "Station of the Ecstasy," when Jesus is lifted into the heavens, his power is so immense that we can almost see the stars. In the "Station of the Assumption," when Mary is carried into heaven, her beauty is so radiant that we can almost see the angels. In the "Station of the Apparition," when Mary appears to the apostles, her grace is so profound that we can almost hear her voice. In the "Station of the Coronation," when Mary is crowned as queen of heaven, her glory is so magnificent that we can almost see the sky. In the "Station of the Assumption," when Mary is carried into heaven, her beauty is so radiant that we can almost see the angels. In the "Station of the Coronation," when Mary is crowned as queen of heaven, her glory is so magnificent that we can almost see the sky.
