Things have been happening so fast at Metropolitan Community Church of San Francisco, you might think they would be spinning out of control. Instead they seem to be spinning into control.

When three uniformed policemen came to the door of 890 Folsom at about 10:30 on the night of Friday, July 14, the doorman thought they were gay men wearing uniforms for their fetish value. "My first impulse," David says, "was to think they were here to play." The impulse was short-lived, but entirely reasonable since some fliers for events at 890 Folsom encourage guests to wear uniforms.

890, as the warehouse-like space is known to regulars, is rented out on a day-to-day basis to all kinds of groups, many of them organizers of sex parties. When the uniformed policemen came in, they were not the first SFPD officers present. Two plainclothes officers were already inside. "The first one," David recalls, "said he didn't bring his bilfold in." When the man, not yet identified as a policeman, returned from his car with his wallet, he also brought a second man with him. Then one of the men went inside where he took off his shoes, while the other stationed himself near the entrance.

Soon the uniformed men were at the door and allowed in. "Then," David says, "I picked up on the fact that the other two were policemen. I felt very intimidated. I didn't know what was going to happen, and I didn't want to have any violence."

Neither the doorman nor Kubian gave the police any trouble. In fact, Kubian was following 890's crib sheet for "Dealing with Harassment" which was developed during a series of appearances by SFPD and SFFD officials in October of last year. The how-to sheet mostly lists statements that it is appropriate for party organizers to make to their official, but uninvited guests:

- This is a private meeting.
- We are not selling or providing alcohol, there are no underage people, and no live entertainment or dancing.
- We of course want to cooperate with the police. What is the nature of the complaint? What exactly does the complaint allege?
- We are aware of the complainant. We believe that we are being harassed, that the allegations have no grounds. Our attorney advises us not to shut down this event.
- Restate: We want to cooperate with the police. If you insist on investigating these allegations, we request that you send plainclothes officers, so as not to disrupt the meeting.

About 35 people were present for MAK's party when the officers — two of whom were later identified by 890 manager Buzz Bense as David Gin (badge 432) and Lt. Dennis Schardt — arrived and inspected the space and event. According to Kubian, Gin told him he needed a cabaret license because food was being served and music was playing. The food was a bowl of corn chips. The music was being played on a stereo.

Next, the officers collected club property including fliers, membership cards, lists of names, and the posted copy of the sheet telling party organizers how to deal with police. They also confiscated a member's bottle of BYOB wine. A total of eight officers were involved in the procedure, which included taking the names and addresses of all the guests at the party and checking their IDs before making them leave.

"Some guests," David says, "were challenging the police about not having a search warrant and asking what charges would be.

Agnos and the Homeless

A few early troubles, Mayor Agnos deserve some credit for helping to solve a major crisis in local housing. He has acted promptly to keep things from getting worse.

The burning of the American flag by what appeared to be a group of gay Americans last week resulted in a few days of as much turbulence in San Francisco as there has been in recent years. The events did not come as a surprise, but the amount of violence that erupted was surprising.

The American flag is the symbol of the United States of America. It is a powerful and symbolic representation of the values and ideals that the country was founded upon. The flag is a symbol of freedom, democracy, and equality.

The burning of the American flag by gay Americans is a direct challenge to the values that the flag represents. It is an act of disrespect and violation of the law.

The American flag should never be burned or taken down as a sign of protest. It is a sacred symbol that should be treated with respect.

The United States of America has a history of violence and injustice towards the LGBTQ+ community. The burning of the American flag by gay Americans is a reminder of the need for continued advocacy and action to ensure the equality and rights of all people.

The events of last week should serve as a reminder that the American flag is a symbol of the values we hold dear and should be treated with respect.

The American flag should be protected and respected, and any acts of violence or disrespect towards it should be condemned.

The American flag is a powerful symbol, and any act of burning it is a violation of the law and a challenge to the values it represents.

**AIDS BLINDNESS, ANEMIA, AND MAGIC BULLETS**

By Stephen Farber, R.S., R.T.T.

Although not a topic, it may damage the形象 when the subject of the patient's white blood cell (WBC) count drops so low that the WBCs are seen through the skin, exposing the body to risk of infection.

Yet, it does occur. And it is the subject of a new book, *The Magic Bullet: How Science Is Changing the Face of Medicine* by Michael Cunningham. Cunningham, a former New York Times science reporter, explores the history of medicines that have been used to treat various diseases, from the first antibiotics to the newer genotypes of cancer treatments.

Once thought of as powerful and saving, the magic bullets have been shown to be less effective than once thought. In fact, some are now known to be harmful, leading to new diseases and side effects.

The book covers a wide range of topics, from the history of the first antibiotics to the newer genotypes of cancer treatments. Cunningham explores the challenges that scientists face in developing new medicines, and the potential benefits and drawbacks of different approaches.

However, despite the challenges, Cunningham remains optimistic about the future of medicine. He believes that continued research and development will lead to more effective and safer treatments.

BAY DINING

BASQUE DELIGHTS IN S.F. HOTEL

by Mike Sher

There's always a sight a restaurant will make you feel that you've spent a little while in the country whose food it serves. I definitely get that feeling at San Francisco's Basque Hotel, even though the Basque nation, wedged in the Pyrenees between France and Spain, has never been independent. You're impressed by the incredible amount of food you can get for just $9.50 — a four course meal with beverage. This has to be one of San Francisco's best buys, and the setting is great — a colorful old hotel dripping with atmosphere.

First, a word about the Basque. They're a fiercely independent people whose mountain nation historically has been split between France and Spain. Their language is related to no other, nor, even though a Roman alphabet has been given. Some of their sons and daughters emigrated to Northern California and, in areas around multi-Central California known as Los Barrios, piled the shade of shep herd-yielding for which they're famous as well known. A handful of families came to the Bay Area, and named the hotel that later Basques are prospering.

The Basque Hotel, located at Roma

plane Co, a step little alley just off Broadway near Kearny, has been around for decades. It was built just two years after the earthquake, and some of its early days as a speakeasy. The exterior was used by Clint Eastwood in one or two Dirty Harry movies, and has a true style dining. A potent Picon Punch, made with Amerpicon liquer, grenadine and soda, got my evening off to a high tone. There were hosted by a cannibal tribe. I didn't ask her if they stayed for lunch!)

The hotel dining room is charming, and could have come right out of Basque country. There's lots of wood trim, daughters emigrated to Northern Calif.

And the winners are! Actually in the mind and heart of all of us the sport of baseball has a different meaning than the usual one. However, is the sentiment of the worlds of the Gay World Series the following morning when the first games at the San Francisco fields 1 & 2 the Open Division's sure to produce some fireworks. I heart the championship games to be played at the last few weeks. We will be glad to publish any comments, pre and post, concerned to us.

The annual meeting was brought up on a motion by Tim McGowan, a long-time, late, and hopeful, public meeting. As for gay San Francisco basketball—no pushovers...
