
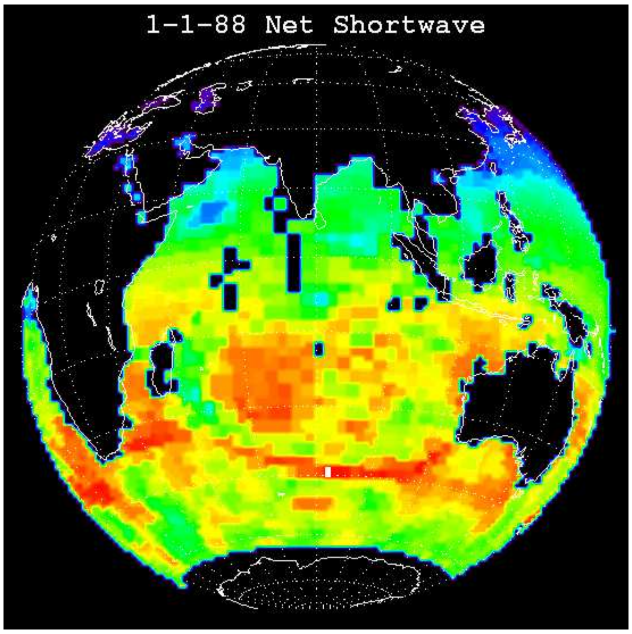

Figure 1: One of the 550×550 8-bit color images in the animation sequence. This sequence was produced from satellite data by members of Catherine Gautier's lab at UCSB (available through anonymous ftp from `heel.s2k.berkeley.edu` in the `/data/10/showcase` directory).

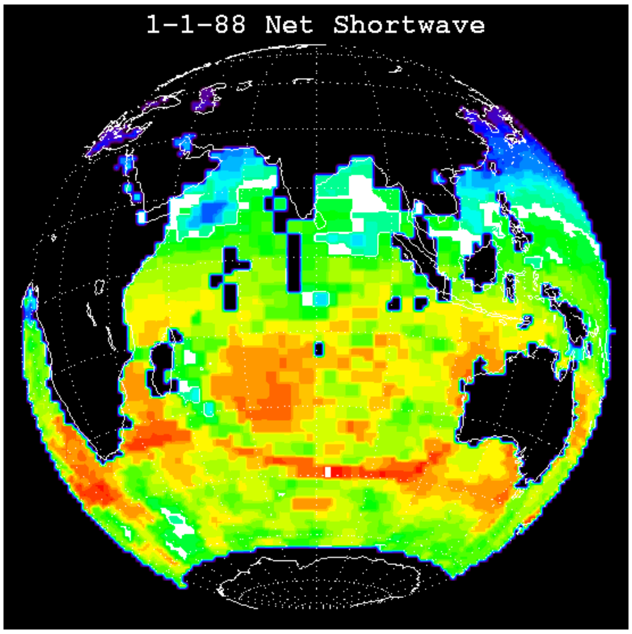

Figure 2: The same image using only the 5 most significant bit-planes.

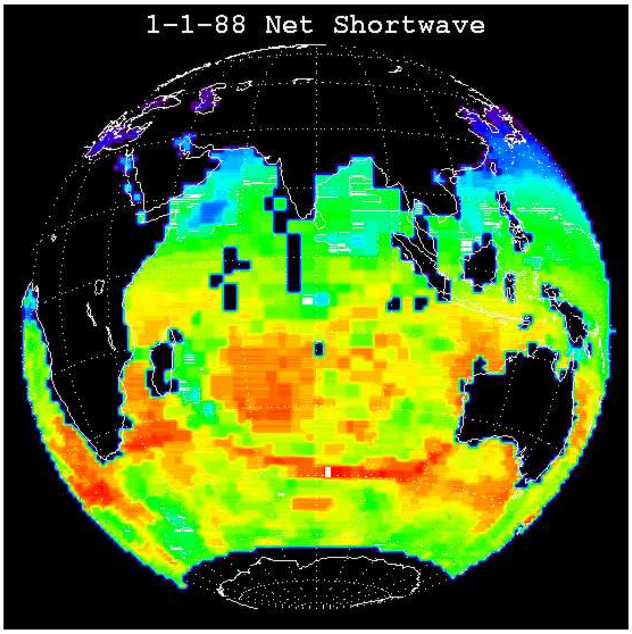

Figure 3: The same image with 50% random loss in the 3 least significant bit-planes.
